ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

NEW COLLEGIATE BLDG. TO COST $50,000

May Be Erected This Summer--A By-law to This Effect Will be Submitted to the Ratepayers in April.

The City Fathers met in regular session last night, when there were present His Worship, Mayor G. M. Roger, and Aldermen Johnston, H. Rush, E. F. Mason, Scott, Frank Adams, Clinkscale, Batten, R. F. McWilliams, Henry Best, Morrison and Hicks.

The minutes of the preceding meeting were confirmed as typewritten and distributed.

THE CAVAN SWAMP.

Reeve McNeill and Councillors Geo. Shields and W. H. Staples, of Cavan, waited upon the City Fathers with a view to securing an appropriation from the town toward constructing a road through the long swamp in Cavan, to Peterborough, by which a saving of four miles each way would be effected by people coming to town. Mr. McNeil pointed out that the scheme for draining the swamp in question and constructing a road through it had been approved of some years ago, and a bylaw therefor passed. Subsequently certain land owners opposed the measure and succeeded in having it quashed at Osgoode Hall. Now, however, the measure has been approved of by the government, who have also made a substantial appropriation of $3,000 for this purpose. Peterborough will be much benefitted by the construction of this road, as the distance from Mt. Pleasant to town will be reduced from twelve to eight miles. Manvers Corners will then be as near Peterborough as Mt. Pleasant, and four miles nearer Peterborough than Lindsay; the advantage of this is obvious. Mr. McNeil then went on to say that three-quarters of the land owners have signed a petition for the road and swamp draining, some of whom, however, are for reasons hard to understand, now getting up an agitation against the scheme.

Plans, prepared by J. E. Belcher, were exhibited for inspection by the Council, and Mr. Belcher assured the City Fathers that draining said swamp into the creek running through town, would not abnormally increase the flow during spring because there would be a continual drainage; eventually, [illegible] be no flow what[illegible]

Councillor Staples said Peterborough would be benefitted by the construction of the road, as a large section of the country will be brought within easy touch with the town.

Reeve McNeil explained that there are 3,500 acres in the swamp, which could be drained at a cost of $34,000. The assessed value of the land in Cavan is between $1,000,000 and $1,500,000; so much an acre will be levied on land benefitted by draining, and the remainder of the amount required for both works, outside that contributed by the government and other bodies, will be paid by the Township of Cavan; the road will cost $3,000. He thought the land drained would increase in value about $10 an acre.

Councillor Shields said Millbrook was self-interested in opposing this scheme, as they feared a diversion of trade to Peterborough. As to the saving in distance by the proposed road, he pointed out that the cheese factory at Mt. Pleasant, which runs six months each year, and draws into Peterborough, has figured that during that period one team made 78 miles in coming into town. Each trip they drove 4 concessions each way which would be saved were this route built. The county has given $600 towards this purpose.

His Worship said the Council would give this matter their earnest consideration.

Reeve McNeil here remarked that people in Cobourg entertained the opinion that Peterborough would be the most benefitted by this proposed road being constructed. A general tax on the whole township will be levied to make up sufficient money for the scheme outside the appropriations secured from other sources and the land directly benefitted. "I expect," he said, "when this report is published in the newspapers there will be the biggest kind of a kick at Millbrook; but with reasonable support, we'll have this road finished in two years. He is asking a grant in Peterborough for the road construction only, and not for draining the swamp, although the one scheme hinges on the other. There'll be no danger from flood, and instead of stagnant water running down the creek, the flow will be fresh all the time."

The Mayor said he would have been glad to hear some definite idea as to what amount was expected from the town.

Councillor Staples here incidentally remarked that 3 miles of the drain will run alongside the road, and will thus have to be paid for by the Township.

The visiting Councillors were here assured that the question will be looked into thoroughly by the Town, after which they returned thanks and left for home.

COMMUNICATIONS

From Geo. L. Blatch and J. A. ackson, suggesting that instead of charging all printing, advertising and stationery to one general account, each amount be charged to its respective department. On motion of Ald. Adams, this recommendation will be adopted as far as possible.

From Town Solicitor, E. H. D. Hall, enclosing a letter from the Assistant Provincial Secretary, re extension of the Town's limits.—Received.

From W. H. Bradburn, suggesting that a catch basin be constructed at the south-east corner of George and Simcoe streets, to avoid the flooding of cellars under the back portion of the ina Hall block.—Referred to the Board of Works.

From the Town teamsters, asking for an increase in salary.—Received.

From Messrs. Dennistoun, Peck, ry & Stevenson, notifying the [illegible] that on Saturday night, Feb. 27th, the surface water from George and Simcoe streets once again flooded the cellar of their clients, Messrs. Ormond & Walsh, who look to the Town for damages—Referred to the Legal Committee.

From the Salvation Army, asking for a grant of $100 towards the pressing needs of their band.—Referred to the Finance Committee.

From Geo. Sloan, secretary of the Trades and Labor Council, asking that the Council have inserted in the Lock Works, or any similar agreement, a condition that the minimum scale of union wages be paid.—Received. Ald. Adams in response to this said the Lock Works pay the minimum wages.

NEW COLLEGIATE BLDG.

A deputation from the School Board at this juncture put in an appearance and submitted a resolution passed at their monthly meeting last night, asking that a by-law be submitted to the people, authorizing the Town to borrow $50,000 with which to erect an up to date Collegiate Institute. The resolution was fathered by Trustee H. P. Kennedy, and seconded by Trustee W. G. Ferguson.

Chairman J. J. Hartley here addressed the Council in support of the above request, and in the course of a lucid explanation of the urgent need for increased educational accommodation, said, "If we want a good town and a good nation we must see to it that the rising generation are educated well. We are paying out now about $1,500 a year for additional public school and collegiate accommodation, and I am convinced that for a very small margin on this amount a new institute could be built which would relieve the present pressure, and avoid additional expense for some time to come. I think you'll all agree with me that our present Institute is neither a sightly one nor a credit to the Town in any way, and we need a new building to which we can look with pride, and feel that we are interested in the education of the rising generation.

Trustee L. M. Hayes thought all would agree that a new Institute is absolutely necessary, and that it is but a business principle to acquire one when the same can be secured for three or four hundred dollars a year more than is at present paid in rent for school and Collegiate accommodation.

Trustee John Crane remarked that a suitable site will be forthcoming at the proper time.

Trustee H. P. Kennedy said he certainly felt that the Town is in absolute need at the present time of a new Collegiate Institute. Our public schools are overcrowded, and we'll either have to build a new Institute or a new public school.

Trustee W. H. Hill explained that the question is ten years old, and crops up every now and again. We have been renting the Menzies school for several years now, and I understand this lease, which expires in July, cannot be renewed, so we'll have to secure additional accommodation shortly. Peterborough is not up to date as far as school buildings are concerned, but he thought the plans already sketched for a new Institute very satisfactory.

Trustee R. Fair pointed out that this matter has been forced upon the Board. The Inspector has reported against the present Institute three or four times now, and he was afraid that should a suitable one not be secured, the government grant would be in danger of being cut off.

Trustee R. B. Rogers concurred in the remarks of his colleagues, and further pointed out that the school in Ward No. 5 is also overcrowded.

Ald. Adams and McWilliams both agreed that a new Institute is necessary, and favored submitting a bylaw to the people for this purpose.

To Ald. Best.—Trustee Hartley admitted that more ward schools will be required as the population increases. We have a site in view; we hope to secure one as central as possible.

Ald. Best thought full information should be to hand as to site, equipment, accommodation, etc., before submitting a bylaw to the people.

Ald. Johnston fell in with this scheme, and suggested that the new Institute be built on the Central Park, where the contemplated drill shed is to go up. He thought this site might reduce somewhat the amount asked for.

To His Worship, Trustee Hartley replied that they would wish the bylaw submitted in April.

Ald. Morrison was satisfied as to the School Board's judgment, and moved that their request be granted and a bylaw prepared.

Ald. Edgcumbe took great pleasure in seconding Ald. Morrison's motion.

Ald. Hicks preferred submitting the matter to the Whole Council, pending a definite report from the Board. He moved in amendment in this direction.

Trustee Hartley said the Board was prepared to furnish every data, and Ald. Hicks, not getting a seconder, he withdrew his amendment, and the original motion carried.

A bylaw to borrow $50,000 with which to erect a new Collegiate Institute will therefore be submitted at an early date.

FEWER TRUSTEES.

Trustee W. H. Hill here introduced the question of reducing the number of members on the School Board, as 17 Trustees made a somewhat cumbersome body. He suggested that the number be reduced to 11—two from each Ward, and one from the Separate Board—the Town not to appoint two members as heretofore, the Council and School Board to act jointly in the matter.

Ald. Johnston moved, seconded by Ald. Adams,— That this request be granted and application be made to the Municipal Committee at Toronto for legislation along these lines—Carried.

ACCOUNTS.

A number of accounts were referred to the Finance Committee.

On motion of Ald. Morrison, the account of Mr. Cameron of $25 for maps of the Town furnished the Manufacturers Committee be paid was carried. Ald. Morrison said he would like to see some scheme arranged by which people need not wait a couple of months for payment of their accounts as at present. Ald. Adams was authorized to consider this suggestion, and see what can be done to effect quicker payment than under the present [illegible]

NEW FIRE HOSE.

Ald. Edgcumbe submitted the following, which was adopted as read:—

Gentlemen,—Your Fire, Water and Light Committee beg leave to report as follows.

1. With reference to the letter from the Canadian Cordage and Mnfg. Co., this Committee is considering the advisability of establishing subsidiary fire stations and does not wish to make any changes until their plans are completed.

2. We recommend that the Chairman be authorized to purchase for the fire department, 500 feet of fire hose, 8 rubber coats, 2 chemical fire extinguishers, 6 smoke masks, one life saving net, and hydrant keys and also other articles required for the firemen's rooms.

All of which is respectfully submitted.

MORE PAY FOR FIREMEN

Ald. Edgcumbe submitted the following, which was adopted as read:—

Gentlemen, —Your Committee of the Whole Council begs leave to report and recommend as follows;—

1. That the request of the firemen for increase of salary be granted and that the salaries be as follows from Jan. 1st 1904;—Chief of the Brigade, $250, Assistant Chief (including salary as fireman) $200 a year; other firemen $150; and that it be a rule that in future the Brigade shall not admit a new member until approved of by the Town Council.

2. That the drivers in the Fire Hall be paid $450 a year from Jan. 1st, 1904, and that the duties of the Engineer and the drivers include keeping the sidewalks around the Town Buildings clear in the winter.

All of which is respectfully submitted.

Ald. McWilliams agreed that the firemen are not sufficiently paid, but he would rather the Council did not commit itself to this report, which would mean an annual increase in expenditure of upwards of $1,000 for one department alone, until the estimates have been definitely arrived at; he was afraid the next estimates would call for a 20 mill rate, if due caution were not exercised in increasing the expenditure in the several departments. The whole of the very rapid increase of late years has been owing to an increased expenditure in those departments over which the Council has full control. He thought this and all other proposals for substantial expenditures should be held until the Council knows what the total expenditure for the year will be.

Ald. Edgcumbe,—"That's a very low story. If we don't want our town protected, we'll not need the firemen. I would not have attended the last two fires as a fireman for $150. I think it a very small thing for any Alderman to object to an increase for our firemen, whom all admit are two poorly paid.

Ald. Adams could not see that Ald. McWilliams had found fault with the report as an individual expenditure; he perfectly agreed with Ald. McWilliams that the Town should leave the question for further consideration, until we know exactly what the total increased expenditure for the year will be. He recognized however that the firemen were not sufficiently paid.

Ald. Johnston thought this $150 for the firemen all right; if we want to draw the line let it be in some other direction. We don't object to giving away land to the value of three or four thousand dollars. There's something wrong in that policy.

Ald. Best.—"You are not going to save money by breaking up the volunteer system; and as I understand it, these men will refuse to act should they not get what they ask. The town would then have to pay four or five hundred a year each man, for a permanent brigade."

Ald. Edgcumbe,—"If you don't grant this increase, we shall have to pay more for insurance, as the Town will have no protection as far as the present firemen are concerned."

This report was adopted as read, and the firemen will henceforth receive $150 a year.

NEW WALKS.

Ald. Best moved, seconded by Ald. McWilliams,—That notice be given of the intention of the Town to construct granolithic sidewalks on certain streets.—Carried.

BYLAWS.

A bylaw to amend the bylaw licensing and regulating hawkers and pedlars as reported last meeting passed its several readings.

A bylaw to appoint auditors passed its several readings.

ARREARS OF TAXES.

Ald. Adams moved, seconded by Ald. Scott,—That the Treasurer be instructed to get from the County Treasurer a statement of the lands in Ashburnham returned to him ad in arrears for taxes.—Carried.

This Council then adjourned.

JAPANESE AGAIN AGGRESSIVE

London, Mar. 7th—Japan has struck another blow at Russian prestige and is apparently proceeding swiftly to the task of investing Vladivostok as well as Port Arthur. An official report from Alexieff to the Czar states that a Japanese squadron, consisting of seven vessels—two of them apparently armored cruisers of the first class—has approached Vladivostok and bombarded the town and defences for two hours. The official report makes no mention of losses, but unofficial statements from St. Petersburg indicate that five persons were killed during the bombardment. The action is in itself of comparatively little importance, but behind it unquestionably lies a deliberate intention on the part of Japan to destroy Vladivostok as a base for Russian naval operations. The cruiser squadron stationed there has been a menace to Japan for a month, although up to the present it has done little injury.

A report that seems to have been given considerable currency, and which is repeated in The Times' cables yesterday morning, is to the effect that the Vladivostok squadron is at sea. If this is the case it will never return to its base, because Japan will undoubtedly blockade Vladivostok as closely as Port Arthur. Alexieff's report is significantly silent upon the question of what vessels are in the harbor. If the Russian Naval Bureau is wise, the Vladivostok squadron will by this time be well on its way towards Singapore. With Port Arthur and Vladivostok bottled up, the only safety for the Vladivostok squadron is in a withdrawal to European waters until such time as it can return as a part of a great Russian armada.

The general deduction is that the Russian fleet is as effectively bottled up at Vladivostok as at Port Arthur. Though the latter place has not been attacked for some days the ships there have not shown the slightest sign of daring to go out of the harbor. This also suggests corroboration of the reports that the outlet is considerably hampered by the vessels the Japanese sank there. Admiral Togo's aim in bombarding Vladivostok is considered to have various objects in view. First, the hope of tempting the Russian squadron to emerge with the view to attack, and also to learn the general condition of the forts. Some experts suggest that the fact that the Japanese ships were covered with ice points to the likelihood that the Russian squadron is frozen in the ice-breaker not daring to work recently. The consensus of opinion is that the Russian fleet is completely useless for offensive purposes. Japanese merchantmen and transports are going to and fro unarmed and unescorted.

JAPANSSE SHIPS OPEN FIRE ON SUVAROFF.

And Port of Linevitch on The Roadstead Along the Valley of the River

Special to The Times:

St. Petersburg, March 7—Viceroy Alexieff telegraphs the Czar from Mukden under to-day's date as follows:—

Supplementary to my telegrams of March 6th I most humbly report that at 1.25 p.m. five out of seven of the enemy's ships opened fire on Port Luvaroff and Linevitch and the town on the roadstead along the valley of the river Obyasnendiye. The firing lasted until 2.15 p.m. at which hour the Japanese squadron began to steam to the southward, disappearing out of sight at 5.30 p.m.

There were no losses on the batteries on the fortifications. In the town one seaman was wounded and one woman killed.

According to information just received the enemy's squadron again appeared in sight of the fortress at 8 o'clock this morning.

A later message from the Viceroy says the commandant at Vladivostock reports that yesterday's bombardment resulted in no serious damage to the fort. The fortress did not return the enemy's fire. To-day at midday the enemy again entered Usauri Bay and approached to a point from which they bombarded the harbor on March 6. They left again, making for the open seas.

Special to The Times.

Win Kow, March 7—An official despatch received here says the Japanese are again bombarding Vladivostock. This news lacks confirmation from other sources.

A VERDICT OF SUICIDE.

REACHED BY THE JURY IN THE CASE OF EDITH GARROW

Evidence of Witnesses Proved That There Was No Indication of Violence

The adjourned meeting on the death of the late Edith Garrow, the seventeen-year-old girl who suicided near Havelock, about a week ago, was held yesterday.

The evidence of Mr. Munroe, the deceased's former employer, went to show that the girl had lived with him since last Christmas Day. On the day of her demise she was alone in the house, and the owner did not return till after dusk, and at that time no one was to be seen around the house. The witness noticed his razor case lying on the sideboard empty, and an almanac lay open upon the table. He immediately went upstairs and discovered the deceased lying on her back upon the bed. The razor lay open upon the bed beside her, and Munroe's shaving glass also was there together with a spoon covered with dye. The victim's face and mouth were covered with the dye and some blood stains were noticeable on the razor and upon the girl's face and neck. There was no indication of violence according to witness' opinion. An unopened package labeled "Strychnine Poison," also was noticed, and a trunk standing in the room had been broken open by means of hammer and case knife which also lay upon the bed.

After this discovery witness ran down stairs and informed his wife and the hired man, who were just returning. Witness swore he never heard her express any sentiments of despondency, her only remark being that, "a girl without parents would be better dead." Deceased was apparently dead when he discovered her, and he sent word to Dr. Crawford, of Havelock, to that effect. Some writing, made by the use of a cinder, appeared on the floor, and the only decipherable part were the words: — "She will kill Uncle Dan. Someone just tell Aunt Olive. Poor E[illegible]

Mrs. Monroe, testified as to the correctness of her husband's statements, and emphasized the fact that deceased was of a most cheerful disposition.

A. H. Crawford, M.D., testified as to his examination of the body and was of the opinion that death was due to poisoning. At the post mortem examination, the victim was found to be perfectly sound physically.

Mr. Munroe on being recalled swore that he noticed that a small corner had been torn off the package containing the strychnine and that the powder had been spilled over the floor and on the bed.

The verdict brought in by the jury was to the effect that the unfortunate girl had come to death by her own hand.

The following is a list of the jury: John A. Sexsmith, (foreman); H. Riley, W. Sexsmith, Geo. Riley, R. Curry, J. Gilbert, J. Smith, J. Johnston, Geo. Smith, A. Woodbeck, Jas. Rannie, Thos. Armstrong, David McQuaig and Albert Keene.

T. A. S. AGAIN CHAMPIONS

OF THE T.V.L.—DEFEATED NAPANEE IN THE FINAL GAME

Last Night by a Score of 7 to 3 — About 700 People Witnessed the Game

The sudden death game between Napanee and the T.A.S. came off last evening and proved a most exciting one. Over 700 spectators were present and the supporters of the "black and red" boys were, of course, in the majority. The game commenced at 8.25 o'clock and at first Napanee had the advantage, and after some very fast work Williams scored, inside of 8 minutes. Some fine combination work was witnessed, and both goal keepers were in the best of condition, and stopped some of the hardest shots imaginable. Inside of another 5 minutes George had placed the rubber in the net and earned a howl of applause that ought to have made him consider himself a Napoleon. But Lynch was after laurels too and by a fine run and a dandy shot, he scored the second goal for the home team. After some lively playing George again scored and the board read 3 to 1 in favor of the Abstainers.

Then 2 more goals in rapid succession by the T.A.S. boys assured everyone present that they would win the championship. Napanee scored the next, after some fast work. Then after some of the prettiest playing ever seen in Peterborough, the final score read 8 to 3 in favor of the Total Abstainers. It would be folly to attempt to describe the work of each player as all were in the best of form and played accordingly.

The following is a list of the two teams;—

Napanee		T.A.S.
	Goal	
Steacy		McCoy
	Point	
Coates		Meagher
	Cover Point	
Wagar		Crowley
	Rover	
Lake		George
	Right Wing.	
Trimble		Lynch
	Left Wing	
Williams		McGrath
	Centre	
Dafoe		Parnell
	Goal Umpire	
F. McCoy		J. Hurtubuise
	Timekeeper	
W. E. Fretz		J. McCabe.

Referee—Chaucer Elliott.

After the game the visiting team and a number of the T.A.S. members were banquetted by one of the latter's admirers, Mr. D. Conroy, Jr. About fifty present and Rev. Father Michael O'Brien acted as master of ceremonies. The usual loyal toasts were proposed, and all present thoroughly enjoyed themselves.

—The Peterborough Presbytery meets in St. Paul's church this morning at 9 o'clock.

BOARD OF EDUCATION MET

IN REGULAR MONTHLY SESSION LAST EVENING

Communications Received—Accounts Paid and General Business Transacted

The Board of Education met in regular monthly session last evening in the Secretary's office, with the following members present: J. J. Hartley, chairman, and Messrs. F. J. Jamieson, J. Stevenson, R. Fair, W. H. Hill, Dr. Burnham, H. Morgan, Peter Hamilton, L. M. Hayes, H. P. Kennedy, J. Crane, Wm. Pringle, W. G. Ferguson, R. B. Rogers and J. J. McBain.

The minutes of the previous meeting were read and confirmed.

COMMUNICATIONS.

From Miss Edna Rogers, asking to be placed as second paid assistant of Fifth Ward Kindergarten.—Carried.

From Miss Agnes Williamson, asking for an increase of salary to $400 a year.—Granted.

From F. Bartlett, tendering for the installation of heating apparatus for the Central School.—Received.

From the Provincial Association of School Trustees of Ontario, requesting that a delegation be sent to the convention to be held at the University of Toronto in April next.—Messrs. Kennedy, Rogers and the Chairman were appointed to attend this meeting.

ATTENDANCE.

The attendance at Collegiate Institute for February was 214, the average 191, and at the Public Schools 1535, average 1312.

MONIES RECEIVED.

Statement of monies received up to March 5, 1904

Town Treasurer	$4000.00
Fees Public Schools	10.50
Town Treasurer	1000.00
	$5010.50

A large number of accounts were referred to the Finance committee.

COMMITTEE ON APPOINTMENTS.

The following report was adopted as read;

Chairman and members of the Board of Education:

Gentlemen,—Your Committee on Appointments beg leave to report and recommend as follows,

1. That the application of Mr. Doupe for an increase in salary be not considered at the present time.

2. That Miss Annie Weir, of Port Hope, be appointed to fill the vacancy on the Collegiate Institute staff at a salary of $1,000 per annum, duties to commence after Easter holidays.

3. That Mr. T. J. Wallace, of Keene, be appointed to fill the vacancy on the Public School staff, at a salary of $400 per year duties to commence after Easter.

All of which is respectfully submitted.

W. H. HILL,
Chairman.

NEW INSTITUTE.

H. P. Kennedy here submitted a report, seconded by W. G. Ferguson, setting forth the urgent need of a new Collegiate Institute, which was adopted, and a resolution passed, asking the Town to borrow $50,000 for this purpose. Subsequently a deputation was appointed to wait upon the City Fathers then in session regarding this matter.

Moved by Mr. J. J. McBain, seconded by R. B. Rogers, that the payment of salary to Miss Alison Cannon for November and December at the rate of $275 per annum be confirmed.

The Board then adjourned.

SPECULATORS DISMAYED

Port Simpson Will Not be Terminus of the Grand Trunk Pacific

Montreal, March 5—There is dismay in the camp of those real estate men who had corralled all the available lots in and around Port Simpson and for cause adequate.

It appears that as soon as the Grand Trunk Pacific project was mooted, promoters, both on the Pacific coast and in Montreal, Toronto and Winnipeg, began to purchase a great portion of the holdings at Port Simpson, and secure options on the remainder.

They appear to have taken for granted that the Pacific terminal would be at Port Simpson and nowhere else. Suddenly the announcement is made in a semi-official manner that it is quite within the range of probability that the new road will not go anyway near Port Simpson. It is stated in fact that the Grand Grand Trunk Pacific managers have their eyes fixed upon a totally different port, and they they have already taken options on the greater part of the future town and wharf sites.

Hence the deep distress of the real estate dealers in question.

WILL FIGHT TO THE FINISH

A RESIDENT OF VLADIVOSTOK VISITS PETERBOROUGH AND TALKS OF THE WAR

Interesting Interview by Times Reporter—Visitor Going Home to Enlist

"Russia will fight to the last gasp and until the last man drops. We have the love of country in our veins just as strong as any Canadian." These words were uttered by a resident of Vladivostock who arrived in Peterborough the other day and registered at the Snowden House. The visitor left Vladivostock for a trip through the United States and Canada in October. He is now hurrying homeward and will enlist in the army of Russia.

"The reports of the Russian losses I am sure are exaggerated," he continued. "Our army is composed of well drilled men and our officers are trained in all the arts of modern warfare.

"The Japanese are well drilled, are they not?" was asked by a Times representative.

"I know the Japanese are well drilled; I know their officers are the equal of any in the world and I know that men and officers alike are good fighters. But even so, Russia is rich; Russia has a fighting force three times as large as the Japs, and, as I said before, they will fight to the last gasp.

"I have heard frequent reports since I have been in this country of the cruelties of the Russian soldiery practiced on the common people. You may be sure if all these things are true no word of them has ever reached the ear of the Czar. In all countries certain government officials some time or another act cruel towards the people, or at least toward some person, in their district. In Russia this has happened, and someone has written it to this country and it has crept into the papers and in time so exaggerated that persons who read it cannot help thinking it is a common practice of Russian officers to beat and kill the common people.

"The Kishineff massacre was something to be lamented and it has been explained in the press of all countries that the crimes committed at that time were not so much the fault of the officers as the fault of the misguided populace.

"All those who had any hand in it were punished, that is, all that ould be found.

"I leave here this afternoon for San Francisco. From there I return to my own country. Every loyal Russian should do the same. It is a time when we are all needed by our government and none should hesitate.

"Yes, my home is in Vladivostok. I left there in October, intending to spend a year in this country. The outbreak of the war has changed my plans.

"Yes, your climate here is very severe, if this winter is a sample, but I assure you it is not in it with Siberia yet. As you know our winters are long and severe, but I have felt the cold right in Peterborough County I think you call it, about as much as I ever did in Russia. But, of course, we dress warmer there."

MR. J. A CULVERWELL SPEAKS

Orillia Audience Listened to Interesting Address on Trent Valley Canal

The Orillia Council chambers were crowded with business men last evening, when Mr. J. A. Culverwell, of Peterborough, delivered an interesting address on the Trent Valley Canal. The meeting was under the auspices of the Orillia Board of Trade, and the chair was occupied by its President, Mr. A. B. Thompson, who, in introducing the speaker, spoke of the benefits that would accrue to Orillia from this canal as a competing agency for the transportation of heavy freight.

Mr. Culverwell illustrated his remarks with stereopticon views, showing also several maps of the grain routs from Port Arthur to the seaboard, and drew some interesting comparisons between the Erie Canal Germany's barge canal and the Trent Valley waterway. He gave details of the route with its two hundred miles of waterway, only eighteen miles of actual canal being required to connect the various lakes and rivers from Georgian Bay to Lake Ontario. He pointed out that the canal with its 8-foot draught, 33-foot width and 134-foot length of locks would accomodate barges of 25,000 bushels, while the Erie Canal barges would carry 33,000 bushels, when the enlargement was completed, and that the present Erie barge capacity was only 8,000 bushels. Only $4,000,000 has been expended on the Trent, and $5,000,000 more will complete it, while the Erie is being enlarged at a cost of $100,000,000, and will be 720 miles longer between the "Soo" and Liverpool than the Trent route. Mr. Culverwell urged that a strong delegation be sent to Peterborough to appear before the Transportation Commission shortly to meet there. At the conclusion of his address a unanimous vote of thanks was moved by Mr. J. P. Secord, Chairman of the Board of Trade's standing Committee on the Trent Valley Canal, Mayor McCosh and Mr. J. P. Secord and another were appointed to attend the Commission's sitting at Peterborough.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

PETERBOROUGH, MARCH 8, 1904

DIPLOMATIC SIDE OF THE WAR

Mr. Takahira, the Japanese minister to the United States, has given out Japan's reply to the charge Russia made against Japan that she had been guilty of "treachery" in beginning hostilities before she had made a declaration of war. It is a dignified and conclusive state paper but was wholly unnecessary in this quarter of the globe.

If Russia did not understand Japan's final note of Feb. 6, in which she announced her decision to close the negotiations, to withdraw her legation from St. Petersburg and to take "independent action" to preserve her rights to be a declaration of war everyone else in the wide world so understood it.

That note concluded as follows;

Japan announces to Russia her decision to terminate the pending negotiations and to take such independent action as she may deem best to defend her position menaced by Russia and to protect her established rights and legitimate interests. At the same time the government of Japan informs the Russian government that as its moderate and unselfish proposals in the interests of a firm and lasting peace in the far east have not received the consideration which was their due, Japan has resolved to sever her diplomatic relations with Russia, which for the reason named have ceased to possess value, and to withdraw her legation.

The world has not forgotten the incidents of the next few days, during which the Japanese minister withdrew from St. Petersburg and the Russian minister from Tokio, and the Japanese fleet took up a menacing position at Wei-hai-Wei. The world held its breath to hear the first shot, and yet Russia has the face to say that it took her unawares.

The truth is that Russia spent months in tortorous diplomacy with Japan for the single purpose of gaining time for warlike preparations, and when her tricks were all exhausted, she treated Japan with silence for weeks. The truth is that formal declarations of war, except after hostilities have begun and for the information of neutrals, have been disused for nearly a hundred years. In the case of the Spanish war Congress directed the President to invade Cuba, and the President handed a transcript of the resolutions to the Spanish minister. In other cases the finale of the negotiations has taken different forms, but Japan's note was formal as any of them, and a blind man might have seen its meaning.

The Russian fleet was torpedoed, not because the Russians did not know that there was a state of war but because they were off watch and underestimated their foe.

PRECAUTIONS AGAINST WORLD WAR

We think it probable that every diplomatic, military and naval movement in Europe which is taken to forebode a general war is really made in the interests of peace. It is the interest of every nation of Europe—unless it be desperate and bankrupt Turkey—to prevent war from breaking out anywhere and, when it does break out, to limit its extent. These nations did their best to prevent war between Japan and Russia from breaking out. Having failed in that we believe that they are now making every possible effort to prevent other nations being drawn into it. We are inclined to think that is the real explanation of all the mysterious and startling occurrences that fill the sensational press with scare heads and shrieks of universal war.

The treaty between Great Britain and Japan really operates to limit the war by keeping France out of it. Nevertheless, France cannot neglect the warning of her ally to keep her fleet ready for action. No more can England neglect the obvious duty of keeping her fleet and naval stations at all times ready for the war which Russia is eager to thrust upon her. Participation in this war would be contrary to the settled policy of Germany, which is to save her strength till other nations are exhausted and then seize large share of the spoil. But Germany also must keep her naval and military forces ready to exert all the influence in making peace that belongs to a power formidable in war.

Even the mysterious activities the Northern powers, looking to the close of the Baltic as the Black Sea is closed in case of war between England and Russia, all point in the same direction of limiting as much as possible its extent and the field of its operation. It seems to us that the most rational view is that which regards all military preparations in Europe as precautions taken by police to prevent the spread of a riot they have not yet been able to put down.

AN HUNDRED YEARS

The centennial of the formation of the British and Foreign Bible Society which was observed on Sunday last the world over, and from pulpits, altars and cloisters fitting reference were made to it.

In no brief form can tribute be made to this society. Its amazing vitality is its chief characteristic. It had advanced with the years, has gained in power and usefulness, has been the pioneer in religious and moral education and in a thousand ways commanded the attention and praise of millions.

There is absolutely no limit to its accomplishments. Wherever civilized man has gone the Bible has gone also, and today it is printed in seven-tenths of the languages and dialects of the world. It is the one book of all books that grows in interest, in intensity, in popular demand, in general acceptance.

The centennial is designed to bring to notice the work of the society, its worth, its needs, and to inspire its friends with new zeal and activity. Accompanying the anniversary is the call for an offering expressive of the public's appreciation and gratitude.

EDITORIAL COMMENT

Trains are now crossing Lake Baikal on the ice. Probably Russia isn't so dead anxious as some other people for an early spring.

In case the Japs succeed in effecting a landing at Pigeon Bay it will have to be admitted that they are birds.

TRENT VALLEY CANAL DAMS

Application of Department of Railways and Canals for their Transfer Granted

The Ontario Government is willing to accede to the request of the Dominion Department of Railways and Canals for a transfer of the dams owned by the Province on the head waters of the Trent Valley Canal. These dams were built and are being maintained for the purpose of facilitating the floating of logs and timber and for improving local navigation. Many of them, owing to their age, require extensive repairs and partial reconstruction, involving an outlay of $20,000. The necessity of storing water for the use of the Trent Canal, making the works a permanent necessity, will justify an outlay by the Dominion sufficient to gradually rebuild them in a permanent manner, and additional facilities will thereby be afforded the community served. The transfer will provide that Provincial rights as regards water powers shall be in no way prejudiced, and the owners of existing powers are to be guaranteed by the Dominion Government a continuance of them. The Dominion will be asked to refund to the Province the cost, $31,194, of the Young's Point lock, which has been built in a substantial manner, making it a permanent part of the canal system.

REVOLUTION IN MEXICO

American Who Has Been There Says There Will be Trouble

New York, March 4— A despatch from Tacoma, Wash., to the Herald says Mexico is on the eve of a revolution, according to Col. H. H. Thompson, who just returned from that country. He bases the belief on the opinions of men who are on the inside of Mexican politics, and who stand high with the Government. Col. Thompson says the prospective revolution is dependent upon President Diaz's release of the reins of government to Limantour, his present Secretary of War, whom he proposes to make his Vice-President.

"Limantour is a sympathizer of the Church," said Col. Thompson today. "The belief prevails that Limantour will return to the Church the lands which have been confiscated, and this will be a signal for a revolution."

THINGS GENERALLY

BY SI JONES

Som farmers is spiter curious. One from the other side of Lakefield had a lode of wool at the market on Saturday. As he was drivin through Lakefield a citizen offered him six dollers fer the lode, but he was out fer bizness an' laffed in his sleeve at wot he expected when he got ter Peterburrow. He got there an' stood beside his lode of wood an' smiled as he thought of the foolish Lakefield man who thought he was easy. He stood there but the smile wore of gradooly. Finely as the day wore to a close, and he was feelin' the effects of Peterburrow weather, he axcepted the last bid, six dollers and twenty-five cents, an' hitched up his team. He had drove them ten miles fer 25 sense an' now he's got better sense.

* * *

I here er grate deal uv complaint about the way which our publick school teachers of Ontario is pade, an' seems ter me they have good reasons fer kickin'. Wun of my suns was er schoolmaster, altho i never hed mutch eddication myself, and al-i've knowed him ter teatch school, though he had a furst class certifick—public school—fer three hunderd an' fifty dollers a year. This is commun throuout ontario an' its high time somethin' was done fer ther poor school teatcher. They say thet they is gittin more scarser every year an' its no wonder, an' if salarys don't increase they'll be scarcer still. It's an important job, an' the most important in the country, i think. The teatcher has the child with him more than he is with his parents an' he prepares him for the greatcher later on. If we wants ter hev good intelligunt citizuns we wants ter hev good up ter datum teatchers an' if we want them we'll hev ter hev better salries pade. I ain't no scholar mieslf mind, but i tells yer rite here that I woudn't care if it cost me my last rale in mi front fense, i'd giv mi family all ther eddication they could hold an' never mind erbout the higher taxes. I'd be gittin' the benefit of them taxes in the better larnin' of my children.

Faded Women Need Richer Blood

It Stamps the Glow of Robust Health on Cheeks and Lips. How Blood is Made Rich and Red Enough to Beautify the Complexion.

A bright rosy complexion can easily be acquired. All that is necessary is to purify the blood and supply it with an increased number of red corpuscles. The simplest method of doing it is to introduce more iron into the system, which is always lacking where the complexion is pallid or sallow.

Iron in a concentrated form, specially adapted for internal use is contained in its most efficient state in Ferrozone, which is noted for marvellous blood building properties. No matter how weak or poor the blood may be, Ferrozone will enrich and nourish it. The immediate result is a better color, which will improve steadily under Ferrozone.

Every girl that takes pride in her complexion would find Ferrozone of greater value than causmetics or face powders. Its influence is lasting, whereas artificial beautifiers are but a temporary aid. Thousands that have used Ferrozone are glad to endorse it strongly because it certainly is the best remedy for pimples, blotches, skin eruptions and poor complexion than money can buy.

Miss Minnie E. Stirling, of Lancaster, writes, "I can recommend Ferrozone to everyone who needs something to clear up their complexion. Before using Ferrozone my skin was sallow, and had a very unhealthy color. After the first box of Ferrozone there was a great improvement and when I had used three boxes I felt much better and had a satisfactory color in my cheeks."

Mrs. C. T. Warwick, of Bradford, says: "My daughter was greatly benefitted by using Ferrozone. She used to have a sickly color and never looked as if she was strong. After using two boxes of Ferrozone she felt better and her color was wonderfully improved. This encouraged her to continue Ferrozone and in a few weeks she looked like a different person and had a clear rosy complexion. Ferrozone accomplished wonders for my daughter."

Ferrozone is just what most girls and women need. It builds up their system, improves their looks, and makes them feel what buoyant good health really means. Price 50c per box or six boxes for $2.50 at all druggists. Beware of substitutes and get Ferrozone when you ask for it. Mailed to your address by N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuoble. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

THE JAPANESE FURIOUSLY BOMBARD VLADIVOSTOCK

For Nearly an Hour, With Five Battleships and Two Cruisers.

Special to The Times.

Vladivostock, March 7—A fleet of five Japanese battleships and two cruisers appeared off this place at 1.25 o'clock this p.m. and bombarded the town and shore batteries for 55 minutes. The fleet approached from the direction of Afkold Island, at the east entrance of Ussuri Bay, and about 32 miles south-east of Vladivostock.

Entering Ussuri Bay, the enemy formed in line of battle, but did not approach within closer range than 5 1-3 miles. They directed their fire against the shore batteries. No damage result d

Most of the Japanese 200 lyddite shells failed to burst. The Russian batteries, commanded by Generals Veronetz and Artauonoff did not reply, awaiting a closer approach of the enemy. The Japanese fire ceased at 2.20 p.m., and the enemy retired in the direction of Afkold Island.

Simultaneously two torpedo boat destroyers appeared near Afkold Island, and two more near Cape Maidol. The Japanese ships were covered with ice. The attack resulted in no loss to the Russians, but cost the enemy 20, ruples—$100,000—in ammunition. Most of their projectiles were 6 and 12 inch shells.

The population of Vladivostock was warned this morning of the presence on her horizon of a hostile fleet and the prospect of an attack during the day, but it remained tranquil.

THE TURKISH AND BULGARIAN WAR CLOUD THICKENS

Bulgarians are Called To Arms and A Big War is Likely to Take Place in the Near Future

Sofia, March 6.—The Bulgarian Government has issued a call to arms that only means one thing—a war to the end with Turkey. It is also known here that Turkey is massing troops along the Bulgarian frontier.

London, March 6, 2 a.m.—The Post's special says; The crisis which has suddenly confronted the world in the Asiatic Orient will almost be certain to precipitate the long-expected climax of maladies on the eastern shores of the Mediterranean. The powder magazine in the Balkans is no less dangerous than was that of Manchuria and Japan.

ALBANIANS AGAIN IN REVOLT.

Already the sparks are among the gunpowder barrels. The Albanians are again in revolt against the Turkish regular military forces, though they contribute to the Sultan some of his best and most loyal regiments. Their rising against government taxation and the introduction of reforms is, however, a movement entirely independent of the Bulgarian agitation which once more has broken out. The Macedonian Revolutionary committee has proclaimed through its agents a fresh revolt for March 28. On the Bulgarian frontier Bulgarian bands have already made raids into Macedonia and fought skirmishes with the Turkish patrols.

Recriminations between the Bulgarian government and the suzerain Porte have scarcely ceased since last September, when the two were on the very verge of actual hostilities. At Constantinople, at Sofia and at Vienna hardly any hope finds expression, except among the most optimistic diplomats, that a collision can be averted. With the melting of the snows in the Balkans, allowing the crossing of the passes, the peace of Europe is once more seriously menaced.

Such is the condition of things at this moment, when Turkey has taken a step indicating her intention to take advantage of the favorable opportunity offered by Russia's absorption in the struggle with Japan and to use her undoubted military strength to re-establish her rule in Macedonia and strike a blow at Bulgaria.

CHARGES MADE BY TURKEY.

In her note addressed to each of the powers signatory to the treaty of Berlin, Turkey charges Bulgaria with not changing its attitude of active though concealed hostility, in spite of the efforts of the Porte in carrying through the stipulated reforms. She specifies as evidence in support the transportation of guns and ammunition to eight Bulgarian frontier places, the provisioning of three frontier division depots as for imminent war, the improvement of all the military roads leading into Turkey, especially for the passage of artillery, the preparation of a vast commissariat and the fortification of strategic points, especially on the Maritza River.

Apart from these legitimate war preparations Turkey believes Bulgaria guilty of furnishing the Macedonian insurgents with dynamite and conniving at the machinations of the revolutionary committees which are allowed to plot in all the important Bulgarian cities, while active officers of the army are permitted to join the rebels.

In the caldron of Macedonia, with its heterogeneous population, its various races bitterly antagonistic to one another, with individual ambitions apart from the general religious distinction of Musselman and Christian, all the elements are brewing of an overwhelming explosion.

The Province of Macedonia stretches from the Bosporus on the east and the Adriatic on the west. It is composed of a number of vilayets, and the races which inhabit it are of such various stocks that it is hard to give it any geographical entity. In the vilayets of Sartari and Yanina, on the west, the Albanians are in an immense majority. In the east, in the vilayets of Constantinople and Adrinnople, the Mussulmans and the Greeks form the bulk of the population, and between these two groups, in the three vilayets of Salonica, Monastir, and Kossoro, the inhabitants belong to the Slav race.

As to the relative proportion of these nationalities estimates vary considerably. According to one authority there are in Macedonia 500,000 Mussulmans and 650,000 Christians, of whom 424,000 are Greeks, 176,000 Bulgarians and 50,000 Graeco-Bulgarians who have adopted the Bulgarian language. Neither the Servians nor the Greeks would regard with equanimity any political rearrangement which should enable Bulgaria to extend her territory into Macedonia.

From time immemorial Macedonia has been the prey of a cessive masters. From the days of Philip, the father of Alexander the Great, it has been Greek, Roman, Greek again, Bulgarian and Turkish. It was definitely united to the Ottoman Empire at the end of the fourteenth century.

RUSSIANS WILL DEFEND PT. ARTHUR, 325,000 IN THE FIELD

Japs to Attack in New Quarter, Expected to Attempt Landing at New-Chang Shortly

London, Saturday, March 5—The censorship continues to prevent the transmission of news regarding the military and naval movements in the Far East, and all the available news is of minor consequence.

A Tokio correspondent says that small bodies of Russian troops are constantly crossing and recrossing the Corean frontier, but it is not believed that there is any intention of seriously opposing the Japanese before the latter are much nearer the Yalu River than they are now supposed to be.

The movement on both sides, however, are purely conjectural. Even the statements given out with an appearance of authenticity suggest an intention to mystify.

The silence regarding Port Arthur continues to be complete, while the Japanese fleet might be non-existent so far as any information concerning it is concerned.

Admiral Wirenius had been ordered to keep his squadron in the Red Sea, it is now stated from Port Said that he will sail to-day, and that his vessels will remain in the Mediterranean until June to await the Russian Baltic squadron. The latter, however, is declared by the Viedomosti not to be destined for the Far East. Neither the vessels of this squadron nor any others are likely to be sent to reinforce the Asiatic squadron, chiefly owing to the difficulty of obtaining coal enough.

A Port Said despatch states that one of the Russian torpedo boats there is in very bad condition, and will be allowed to remain and repair. The whole squadron shows a lack of efficiency.

CORPS TO BE ENLARGED

Will Not Establish New Ones But Improve the Old

Ottawa, March 6—The proposed increase of the Canadian militia to a peace establishment of 46,043 officers and men is not to be brought about by the organization of new regiments but by strengthening those already in existence. As the country grows, there will, of course, be new corps raised both east and west. The increase in immediate contemplation and which will be under way before many months are over, according to General Lord Dundonald's scheme, is to bring all infantry regiments up to eight companies, which would mean a peace establishment of about 344 men, and a war establishment of 1,040. This increase may not be carried out in a day, but it is what the general has in mind.

NEED NOT DRILL.

Cavalry corps are to be brought up to a uniform establishment of five squadrons, and field batteries, whose establishment is now 103, will be increased to a peace strength of 118, with a war establishment of 203, about two-thirds of the privates in each regiment hereafter to be recruited for war service only. These will be furnished with free ammunition. They will not be called on for any drill in peace times, but must familiarize themselves with the use of the rifle by practive at the ranges each year.

IS THE CHAMPION EATER

A MAN WHO ATE A QUARTER OF BEEF IN A DAY

Twenty Pounds of Mince Pie But Delicate Meal—A Noted Glutton

Dubuque, Iowa, March 5.—Iowa has furnished to the nation men who have won distinction in politics, literature, art and athletics, but it remains for Dubuque to offer a real, live gourmand in the person of Phil Melloy, the "Glutton of Sylvia Switch," who has issued a challenge to compete with any man in the United States in an eating contest, not even barring sword-swallowers or any other museum freaks, and will wager $500 that he can put away more food in one hour than even the epicures of old whose feats are lauded in fable and song.

To eat a quarter of beef in twenty hours Mr. Melloy considers a very easy task, but when a man undertakes to get away with twenty pounds of mince meat pie in one hour the dyspeptic would feel like turning over on his couch to breathe his last, and the man with the ordinary appetite would call him a monster. Nevertheless, Phil. Melloy has accomplished these feats and pocketed the money of skeptics who ridiculed him when he boasted of his achievements at the table and supported their skepticism with big rolls of the green that looked too tempting to Mr. Melloy to pass up. He has been an odd character about Dubuque for many years and has brought grief to many restaurateurs who agreed to fill to satiety the "Glutton of Sylvia Switch" for the paltry sum of $1. He has emerged from one restaurant after devouring enough food to keep a family of ten three days only to accept another wager that he could not duplicate his feat at the nearest restaurant. Strange as it may seem, Melloy never "falls down" unless he is tricked and on numerous occasions he has won as much as $100 on small wagers in a single night.

OFFICERS BELOW WHEN SHIPS MET

Investigation Into Collision which Cost 100 Lives

ASTOUNDING REVELATIONS

Boatswain in Command and Gave No Alarm to Officers

Paris, March 5—At Marseilles the court-room of the Maritime Tribunal was crowded on the occasion of the trial of the captains of the Liban and the Insulaire, the two steamers which collided outside Marseilles on June 7 last, with the result that over one hundred persons lost their lives.

The report of the Shipwreck Commission, which was read at the commencement of the proceedings, created a profound sensation. It showed that neither the captain nor any competent officer was on the bridge of the Liban at that moment, the boatswain, Santandrea, being in charge.

Before the crash took place, the Liban twice signalled to the Insulaire that she meant to pass in the starboard, but as a matter of fact she bore down on the port side. Enquiries have shown that the two vessels frequently met in the vicinity of Maire Island, and that on such occasions the Liban's captain seldom observed the rules of the road at sea.

It was also stated that Santandrea, when he saw that a collision was inevitable, did not warn his superior officers, and both the captain and the boatswain were, in the opinion of the commission, guilty of offences against the laws of navigation

The gravest statement made by Capt. Arnand, of the Insulaire, was that if Capt. Lacotte, of the Liban, had whistled to avoid a collision he could have done so.

Capt. Lacotte, in examination, said he was at lunch when he heard a whistle blow, but, thinking it was only meant to warn off some fishing smacks, he did not leave the table.

Must Go

Six handsleighs at 25 cents will be sold for 18 cents; four 40 cent sleighs for 27 cents; two 75 cent sleighs for 45 cents, and two, high beam, steel runners and beams, regular $2.50 sleigh, for $1.50. Times Bookstore, Market Block.

—Messrs. R. R. Hall and R. B. Rogers of Peterborough visited Ottawa on Friday last, in order to wait upon the Department of Railways and Canals, in regard to the terms upon which the dams of the Trent River could be transferred to the Dominion Government.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $82.68 and $79.80 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. H. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 625 feet of tunnels, and at least 600 feet of cross-cuts, upraises, etc.

All told, there is 4,250 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 26th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air p into the 365-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

Coupling the Flock.

J. A. McDonald, Hermonville, P. E. I., writes:—The season is near when the ewes must be coupled if full profit is to be made from the flock. The early lamb is worth twice as much as the late one, and is more safely reared. Thus the choice of the ram and its introduction to the flock is a timely matter for consideration at the present moment. As to breed, it does not matter very much, unless this is a main point in keeping the sheep. If the flock is pure bred, of course, the breed is to be kept up, but even then it is good policy always to get a ram from another flock than from your own. This is an axiom which pertains to all classes of live stock—that is, get a pure bred male from some other flock or herd once every two years, and, if circumstances permit, get an imported male rather than a home-bred one. The ordinary farmer breeder will not, however, probably need to get an imported animal. He can get something good enough from those who make a business of supplying first-class males for breeding purposes. Close breeding is more disastrous to sheep than to cattle or hogs.

The best results are obtained by choosing a sound, well-formed, vigorous animal, rather than a bigger one without these qualities. This is an axiom which also works with other classes of live stock besides sheep.

The fleece is to be studied, for the lambs will take after the ram in respect to wool mostly, if the animal is from a good flock. Choose a well-formed, solid-bodied ram, with short legs and small, well-shaped head. The age of the ram is of great importance, for upon this to a very great extent will depend the sex of the forthcoming lambs.

There are many supposed laws of breeding. One of them is a wise provision of nature for the preservation of the species. When any race is in danger of extermination for any cause this law will operate to secure the extension of its existence in some way. When food is abundant and the race is vigorous we expect it to increase most rapidly. Then the younger males, active and full of energy, monopolize the females and drive off the old males. The result is a much greater proportion of female births than of male, even to the extent of three to one. On the other hand, ewes served by an old ram produce an equal proportion of male births. The breeder, then, who wants his flock to increase will choose young, vigorous rams, and will feed the flock liberally, so as to preserve the conditions suitable for rapid increase of the stock. The breeder, on the other hand, who makes his profit from young rams which he sells, will follow the opposite course, and so increase his income from a surplus of those to be disposed of.

Probably the months of March and April will be the periods when most people want the lambs to come, while there are not a few in the north and east who consider May early enough. This is a matter, of course, for individual consideration. The period of gestation in the ewe is five months. November coupling, therefore, means April lambs; December, May lambs, etc.

Good feeding of both ewes and ram from this time on is a desideratum, and the presence in the flock of a sturdy young ram, under two years of age. It is essential that he be well grown and matured. A ram eight months old may be used, if it be growthy and vigorous; but one twice as old is greatly to be preferred.

Feed oats and wheat bran in preference to corn, for nitrogenous food will be the best stimulant for the ewes, and there is no grain that so stimulates the sexual system as oats. Fat is not desirable at the breeding season. The aim should be in both ram and ewes to get flesh and a strong nervous condition. The ewes should receive a half pint of oats and the same of bran every day from now on, while a pint of whole oats and as much bran a day will not be too much for a vigorous young ram. If the ewes are not in breeding condition on account of neglect or poor pasture, or undue exposure, one or two grains of cantharides given to the ewes will usually bring them into condition for prompt breeding, provided it is observed they are lax in this respect. With intelligent feeding, largely of oats, it will seldom be necessary to resort to drugs. But the breeder of pure bred sheep who may want his lambs to come promptly on time, to sell for early breeders next fall, or for show purposes, or those in the winter lamb business, occasionally find it necessary to resort to drugs. Plenty of good, sound oats, however, are the best thing I know of to stimulate tardy breeding, of not only sheep, but all other of the domestic animals on the farm.—New York Tribune Farmer.

Manager—I want you to appear in just one piece holding a stick of dynamite.

"Yes, and how many pieces will I appear in if the dynamite should explode?"—Life.

An Engagement Extraordinary.

According to the Paris correspondent of the London "Telegraph," a determined suitor recently found a new way of using the motor-car for matrimonial purposes. The object of his affection was willing to wed him, but her parents were obdurate. He pretended to give up hope, and to be reconciled to the idea of being merely a friend of the family, and he took out the girl and her father for an automobile drive to Havre. At a dangerous part of the road he suddenly put on full speed, and the car sprang away at a terrific rate. The girl sat still and showed no fear, but her terrified father shouted to the man who wanted to be his son-in-law to stop. "Consent to my marriage with your daughter" was all the motorist replied. Still the car tore along, and if any obstacle had appeared in the road at least three fatalities would have occurred. "Stop! We shall all be killed!" the girl's father continued to cry. "Most certainly we shall," said the determined young man grimly; if you don't consent at once I am going to send the machine into the ditch, and at this rate that means quick death." As he spoke he imparted violent lurches from side to side to the car. "I consent!" gasped the now vanquished parent. Immediately the car slowed down, and the rest of the journey was done at a steady touring pace. But during the motor's previous mad career a policeman had jotted down its number. When the girl's father, to whom the machine belongs, appeared in court to answer to the summons, his future son-in-law accompanied him, and looked exceedingly pleased with himself. When a fine of sixteen francs was imposed the younger man said he would pay it himself with pleasure. He confided to the magistrate that the day has been named.

NEW AMBASSADOR TO CZAR'S COURT

King Approves Appointment of Hon. C. Hardinge

SIR CHAS. SCOTT RETIRES

Will Leave Russia Next Month—New Envoy was Assistant Under-Secretary

London, March 5—The King has approved the appointment of the Hon. Charles Hardinge, Assistant Under-Secretary of State for Foreign Affairs, to succeed Sir Charles Scott as British Ambassador to Russia. Sir Charles will return in April. His term in the Diplomatic Service automatically expires in that month.

It is understood that he is persona grata in St. Petersburg, where, it is also believed, Mr. Hardinge will be welcome. He was popular there when he was secretary of the Embassy. He is a comparatively young man, having been born in 1858 and his promotion, like that of Sir Michael Herbert to be Ambassador at Washington, is favorably commented upon as another break in the tradition of promotion by seniority. It is also remarked that he also has special fitness for the post owing to his knowledge of Persia, which touches Anglo-Russian relations closely.

The appointment is also favorably commented upon in Paris, where Mr. Hardinge was popular while he was secretary of the Embassy there. It is believed that his appointment will tend to the preservation of friendly relations between Great Britain and Russia. Mr. Eldon Gorse, jr., will succeed Mr. Hardinge in the Foreign Office.

TRIED TO KILL COREAN MINISTER

Opposed His Signing Protocol With Japan

THREW BOMB IN HIS HOUSE

Affair Supposed to be the Work of the Peddlers' Guide

Seoul, Corea, March 5—The house of the Secretary of the Foreign Office was blown up last night. A similar attempt was made upon the residence of the Acting Minister of Foreign Affairs. Five men have been arrested in connection with the crime, which is supposed to have been incited by the party opposed to the Japanese-Corean protocol. The general situation is satisfactory, owing to the prompt action of M. Hayashi, the Japanese Minister at Seoul.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema.

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peakes' Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or [illegible] boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr [illegible] $100 will be paid for any case that it w not permanently cure.

How's This

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheny for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

WEST & TRUAX, Wholesale Druggists, Toledo, O.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75c. per bottle. Sold by all Druggists.

Hall's Family Pills are the best.

A Snap

Very best ping pong sets will be sold while they last for 45c. a set. The size and quality of this set has positively never been sold before for less than 85 cents. Parties ordering by mail may have set reserved, or we will send by express prepaid for 10 cents extra. Times Bookstore, Market Block.

A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to the new patent machine upon all the land it may own, acquir lease, or operate, in Arizona. W invite special attention to great commercial value and profit of this machine, and what be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine been invented which will handle the dry placer gold gravel wit water, and in large quantities. This machine will save 98 per of all the gold in the gravel, and will do it at a lower working than by any existing process. It is operated by a small, com engine, using crude oil as fuel. A complete plant, capable of h ing 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be wo which could command large supplies of water, hence the im bodies of dry placer lands remote from water have never worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions gold, of which fifteen hundred millions—or more than 75 per c were the product of its placers.

Ninety per cent. of the world's total gold supply has bee en from placers by processes which have admittedly lost the be the values.

Simplicity of Machine — Its Method of Operatio

The machine is so extremely simple in construction and tion that any intending investor can operate it instantly. I take a peck or more of sand, either ordinary house or sea sand such as is found in the placer lands of Arizona and Californ into this sand ten or a hundred pieces of gold as small as the of a toothpick, and from that to the head of an ordinary pin, m sand and the gold thoroughly, turn them into the hopper or f the machine, and in a few seconds the machine will separate t from the gravel and recover from 95 to 100 per cent of the is an absolute, infallible, ocular demonstration of the merits machine. It has solved the problem of handling sand or grav taining gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and c easily moved by a few laborers.

The two greatest authorities in the world on the moving terial are "Haswell" and "Trautwine." They say in their m publications that a laborer can shovel horizontally, 12 feet, ve 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Governm Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at of 10 cents per cubic yard, paying laborers $1.75 per d

The dry placer gold-bearing sands of California, Arizo New Mexico are handled quite as easily as those of Hook.

Ten laborers can easily supply one machine with 204 cubi of gravel in 12 hours, working at the same speed as shown by Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. p yard.

Do You Want Monthly Dividend

We make a special offer of a limited number of shares at this time, because the company requires immediately suffic build several machines to operate in the field.

Every machine at work will increase the intrinsic value stock.

Twenty machines in the field will increase the price and the stock more than double the present offering, and every a machine means a further increase in price and value.

The Company intends to divide its net earnings every m that the stockholders may count absolutely on receiving dividends in proportion to monthly earnings.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B. WILCOX, RICHARD F. DOBBIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $93.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.
or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zaluaipa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacuaipa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacuaipa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacuaipa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacuaipa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacuaipa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacuaipa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacuaipa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price ha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

Peterborough.

A VALUABLE PAPER.

Legislative Proceedings of the First Session of Upper Canada.

In a recent report to the Legislature, Mr. Pardee, the Legislative Librarian, stated that he believed copies of parts at least of the missing journals of the early years of the Upper Canada Assembly and Council might be found among the papers of some of the older families. The suggestion has produced excellent fruit. The other day Mr. Christopher Robinson, K.C., delivered to the Librarian a manuscript of the first session of the first Parliament in Upper Canada in 1792, in the handwriting of *Angus McDonell*, Clerk of the House. The manuscript was accompanied by a letter from Hon. Alex. McDonell, ex-Speaker of the Legislature, to Chief Justice Powell, dated in 1821, committing the document to the care of the Chief Justice and showing by its terms that even at the early date the absence of printed records was already beginning to be felt. Hon. A. McDonell was Speaker from 1805 to 1812, and C. J. Powell held his office from 1816 to 1825. This manuscript seems to have passed with his papers to his successor, Mr. Campbell, and from the latter to the next incumbent of this office, Hon. John Beverley Robinson, afterwards Sir J. B. Robinson, Bart., father of Christopher Robinson, K.C., the donor.

The document is a most interesting and valuable one. Mr. Pardee says that from a rapid inspection he is convinced that the M.S.S. is fully entitled to be called the original journal, so far as there was (or is) anything that can be called the original journal. Except this MSS. there is no other record of the proceedings of the House save the copy which had to be sent to the Colonial Office in London, and has heretofore been supposed to be the only record extant. A hasty comparison of the two gives reasonable grounds for believing that the Colonial Office copy was copied from Mr. McDonell's MSS., as the former is somewhat condensed here and there.

It is known from some entries in the accounts that a short time after 1792 the House began printing its journals from day to day, much in the same way as is done at present and a few of the daily numbers have come down, but previous to 1825-26 there was no yearly volume, and even the Colonial Office copy of the MSS. for some years has disappeared. It is supposed that the vessels carrying them were captured by French or American cruisers.

Mr. Christopher Robinson also presented to the library the following interesting papers:

A table of precedence in Upper Canada, taken from a rough copy, corrected by Hon. John Elmsley, Chief Justice, in 1797.

A statement showing expense of administration of justice for 1820; the original document as laid before the House.

A British-Canadian Extra of 7th August, 1845, being a map of Canada West, showing the route of the proposed railway from Toronto to Sarnia.

Following is the letter from Alex. McDonell referred to above.

"York, March 21, 1821.

"My dear sir: You will probably smile at my transmitting to you the accompanying document. The only importance, if any, that can attach to it is that it is the first journal of the first Parliament of Upper Canada, of which neither the original nor any other copy is now in existence. The whole is in the handwriting of my deceased brother, Angus. Some years hence the perusal of it cannot fail of being interesting, and to your charge I feel a gratification in committing it—mum, as to the clerk and chaplain. Believe me, my dear sir, ever yours, with great respect and affection.

"Alex. McDonell,

"The Hon. the Chief Justice.

Late for the Party.

Mr. Harry Gummer, well known among the newspaper fraternity of Canada as proprietor of The Guelph Herald and all-round good fellow, held a card party the other evening at his residence, Waterloo avenue, Guelph. Among the guests was a well known Brantford physician—Dr. Blank, for convenience.

The evening was a merry one, and the hours slipped by quickly, says The Toronto Star. The train that Dr. Blank was to arrive on was due in Guelph at 5.50, and when 8.30 came, and the resident from the Telephone City did not arrive, it was feared he had missed the train or been delayed by the storm.

Two-thirty found Mr. Gummer turning down the gas and preparing to retire, and "When the lights had fled, the garlands dead, and all but he departed," there was a loud ringing of the door-bell.

Mr. Gummer put his head out the window above.

"Hello!"

"Hello, yourself!"

"Well."

"It's me."

"Who's me?"

"Dr. Blank."

In a moment the door was open and Dr. Blank was inside. It took him nearly 24 hours to thaw out, as he had left the train five miles out of Guelph and walked in over the snow-drifts.

Wide Range of the Moose.

The range of the moose in North America is of enormous extent, from Nova Scotia in the extreme east, throughout Canada and certain of the northern United States to the limits of tree growth in the west and north of Alaska. Throughout this vast extent of territory but two species are recognized—the common moose, Alces americanus, and the Alaskan moose, Alces gigas, of the Kenai peninsula—but it is probable that further exploration will bring to light another species near the head waters of the Laird River and the Sassiar Mountains of British Columbia and still another farther north in the neighborhood of the Colville river.—Field and Stream.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,300,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

You Take It Mixed With Air

A Powerful Destroyer of Disease Germs Which Cures Every Type of Catarrh Bronchitis and Throat Trouble.

Ever since Adam the air of the Pine woods has been known to possess marvellous healing properties. In fact doctors claim that people living in the balsamic atmosphere of the woods never contract consumption or catarrh.

A new remedy that embraces all the healing curative powers of the pine woods has at last been realized. It contains the balsams, the ozone and many other antiseptics that make it an absolute cure for all catarrhal diseases.

For years doctors have been looking for just such a remedy and claim the newly discovered Catarrhozone is the most effectual, the most scientific cure for catarrh, bronchitis and winter ills, they have ever met.

So powerfully healing is Catarrhozone that simple colds in the head and coughs can be cured in less than an hour. Chronic catarrh is erradicated from the system in the most thorough manner. It doesn't matter whether the catarrh affects the nose, throat or stomach, it cab be completely driven from the system by using fragrant healing Catarrhozone.

The remotest parts of the lungs and air passages often contain germs of catarrh and consumption which cannot be reached by ordinary treatments. But the searching vapor of Catarrhozone carries its antiseptic healing power direct to those isolated spots. So thoroughly does Catarrhozone reach all diseased surfaces that it cures for all time, and no relapse need ever be feared.

"My nose was so stuffed up from catarrh that I could not breathe except through my mouth," writes John D. Perkins, a well known merchant in Hamburg. "My breath was horribly offensive and my digestion was completely knocked out. I used Catarrhozone and was cured in two weeks. I wouldn't take five thousand dollars for the benefit and good health I received from Catarrhozone which I can recommend as a certain, absolute cure for catarrh."

Two months treatment costs $1.00; sample size, 25c. At druggists or by mail from N. C. Polson & Co., Hartford Conn., U.S.A. and Kingston, Ont. Catarrhozone always cures—refuse a substitute, and insist on getting Catarrhozone when you ask for it.

A ladies' hunting case gold watch with initials, "I. M." Lost at the carnival or between the rink and the Munroe House. Finder will be rewarded by leaving the same at the Munroe House. 553t

Y.W.C.A.

A reception for the young women of the town will be held at the residence of Mrs. A. L. Davis, Belmont avenue, this evening. Mr. Glidden's orchestra will, it is expected, be in attendance and several prominent local singers will take part.

Miss McDonald will also be there contrary to expectation and will deliver an address. Mr. O'Leary will run busses from the Y.W.C.A. rooms at 8 o'clock to Mrs. Davis' residence for the small fee of 5 cents each.

The Academy of Music

A meeting of the Provisional Directors of the Peterborough Academy of Music was held a few days ago, when it was stated that Mr. A. J. Small, the well-known theatrical manager, of Toronto, was willing to take a large amount of stock in the company. Ten thousand dollars has already been subscribed.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE

A SPLENDID INVESTMENT

The Badger Mexican Plantation Company

We call the attention of investors to the announcement published elsewhere of the Badger Plantation Company. It affords a safe investment, at same time a very profitable one.

Fuller reports of the proposition will appear in these columns in a few days.

DEATH OF MR. JAS. MOHER

Former Peterborough Man Dies in Grand Rapids—Has Relatives Here

Sad we are to have to chronicle the death of Mr. James Moher, at his home in Grand Rapids, Mich., which occurred on Sunday morning. Deceased was the son of Mr. and Mrs. Morris Moher, of South Douro, and was 41 years of age. The late Mr. Moher was a married man and a bereaved wife and family are left to mourn his loss.

The funeral will take place in Grand Rapids today.

WEDDING BELLS.

Mr. George Deyell and Miss Hanna Franks United in Marriage

The marriage took place on Feb. 24th of Miss Hannah Franks, third daughter of the late Mr. Thomas Franks, to Mr. George Deyell, of Smith, at the residence of the bride's brother, James Franks, Frank Hill, the ceremony being performed in the presence of only the immediate friends of the bride and groom. The bride was given away by her brother and unattended, and looked charming in a gown of brown costume cloth. After the ceremony, which was performed by Rev. Mr. Teeney, of Omemee, a dainty wedding dejeuner was served and a pleasant time spent. Mr. and Mrs. Deyell left for their home in Smith.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—There was no police court again yesterday morning.

—Mr. J. J. Jeffries will address the meeting of the George street Young Men's Guild, this evening.

—It is high time for the Russian general at Port Arthur to issue another no surrendervitch proclamation.

—The Times is the place to get printing done in the best styles of the "Art Preservative of all Arts," and at the lowest prices.

—Over 1200 strangers have been welcomed at the Y.M.C.A. since the Fellowship Club began its work in February, 1900.

—The ladies of the Mark st. Methodist church intend holding an "At Home" this evening, at the residence of Mr. J. Smith, Stewart street.

—The annual meeting of the Midland Football League will be held in the Y.M.C.A. Hall on Saturday, March 19th, at 1.30 p.m.

—Owing to the sudden thaw and the excessive downpour of rain yesterday, much damage was done through leaky roofs.

—Rev. William Major, who preached in All Saints church on Sunday last, has accepted a call from that church, and Sunday's were his initial sermons as rector here.

—The Midland Division of the G.T.R., after having been blocked for almost a week, has been opened for traffic, and yesterday, for the first time since last Tuesday, the passenger train from Toronto to Port Hope, made its trip.

—Brutal in the extreme has been the behavior of our Lady of the Snows this winter, and a Toronto paper pledges its solemn word that her ladyship is now so unpopular in social circles that she couldn't get an invitation to a snow ball.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. W. Henders, of this city, spent Sunday with Toronto friends.

—Mr. H. A. Littledale, of Stewart street, spent Sunday last with Toronto friends.

—Mrs. E. E. Best and children, who have been visiting friends in this city for the past few weeks, left for their home in Winnipeg on Saturday last.

—Miss McDonald, National City Secretary of the Y.W.C.A. has arrived in the city, and will address those present at the reception this evening.

—Miss Reid, of Richard Hall and Sons dressmaking department, has returned from a visit to Toronto.

—Mr. Chris. Graham, of the Oriental, left the city for Toronto yesterday.

—Miss Ethel Chambers, 463 Stewart street, pleasantly entertained a number of young people last evening in honor of her guest, Miss Lulu Chambers, of Pontypool.

DIED AT NICHOLLS HOSPITAL

Mrs. Anna Henderson Passed Away Through Heart Failure on Sunday

A sudden death occurred Sunday evening at Nicholls Hospital, when Anna E. Helson, relict of the late Robert Henderson, passed away. The deceased lady had been in ill health for about two weeks, but her condition on Saturday appeared to be improved and hopes were entertained for a speedy recovery, but she suffered a relapse on Sunday morning and passed away that evening. The late Mrs. Henderson was born a few miles from Keene, where she spent most of her life, moving to Peterborough about five years ago, and has lived at the residence of her mother, Mrs. Ellen Helison, 97 Dickson st. Her husband predeceased her by about nine years. One daughter, Alberta Moss, is left to mourn the loss of a kind and loving mother. The mother, five sisters and two brothers of the deceased are also living.

The funeral will take place to-morrow afternoon at 3 o'clock from 97 Dickson st., and proceed to Little Lake cemetery.

Must Go

Six handsleighs at 25 cents will be sold for 18 cents; four 40 cent sleighs for 27 cents; two 75 cent sleighs for 45 cents, and two, high beam, steel runners and beams, regular $2.50 sleigh, for $1.50. Times Bookstore, Market Block.

DIED IN DAKOTA

Former Victoria County Man—Well Known in This City

The following from the Grand Forks, N.D. Herald, will be on interest to many of our readers;—

An old Pembina county pioneer has gone to his final rest. The many friends of Mr. William H. Best, of Bay Centre, will be greived to learn that on Thursday evening, February 16th, at 5.45 p.m., he breathed his last after a short and painful illness. The deceased had passed his 78th year, having been born on the 7th day of November, 1825, and was hale and hearty up to a few days previous to his demise. Thus passed away one of the sturdy pioneers of Pembina county, full of honor and full of years, surrounded by his loving family of four sons and two daughters, all of whom were present when the end came.

Mr. Best was an Irish-Canadian having been born in Victoria County, Ontario. He was of original Holland Dutch stock, his forefathers having cast in their lot with William Prince of Orange, and for conscience sake left home and country and sought a refuge on the foreign soil of Great Britain, finally selecting the north of Ireland for a final resting place, and from the country of Armagh his grandparents emigrated to Canada, where the deceased was born and grew up to manhood.

In 1880 Mr. Best with his whole family, removed to what was then the wilds of Dakota, and settled on the fertile prairies of Pembina county, his sons all finding homes near by, so that in their western life the family were together and were not separated. The sons are Wm. D. George A., John E., and Howard R., all living on well-tilled farms in sight of the old homestead. The daughters are Mrs. Maggie Patterson and Mrs. Handley, also well and comfortably settled in life and both reside near by the rest of the family. The funeral was conducted on Thursday by Rev. Mr. Matheson, leaving the house at Bay Centre at 12 o'clock noon, and proceeding to the Walhalla cemetery where the remains were deposited beside those of his wife who had preceded him only fifteen months before.

EXAMINATIONS AT THE Y.M.C.A.

Results of Examination in Boys Department—LeRoy Thornton Wins Silver Medal

The examination of the members of the leader corp of the Boys' Department of the Y.M.C.A. has taken place and reflects much credit on the members of the corp. The interest in the work and classes has been exceedingly good and has proved of great assistance to the physical director in carrying on the physical work in a systematic way.

The work taken up this winter has been all elementary and next year this will be revived and more advanced work taken up. The number in the corp was twenty-two; seventeen took their examination and passed with good standing, and four were unable to attend and were given passing marks.

A silver medal, presented by the Director, to the member taking the highest percentage, was won by LeRoy Thornton, a silver Association button for second place was won by Douglas Loomis, and a bronze button for third was won by Hugh Maguire.

Following is the standing;—

Name	Per Cent
LeRoy Thornton	87
Douglas Loomis	85
Hugh Maguire	84
Stanley Fife	80
Maxwell Fife	79
Gordon Thornton	77
Wesley Elliott	77
Edward Mann	76
Maxwell Dobbin	74
Melville Robinson	73
Murray Nicol	73
Ernest Wilson	72
Charlie Barrie	70
Chester Froude	66
LeRoy Turner	65
Gordon Stark	65
Gordon Hewson	60

Norman Darling, George Henderson, Norman Barrie, and Elgie Currie were given pass marks, 50 per cent., without taking the examination.

Leaders' classes have been held for the past four months and the examination consisted of a test of knowledge of gymnastic nomenclature, form in gymnastic exercises on apparatus and manner, and ability to lead a squad in the gymnasium.

Ministerial Association

The regular monthly meeting of the Peterborough Ministerial Association was held yesterday morning in the Y.M.C.A. Parlors. The hospital visitation for March was arranged as follows;—

March 7—Rev. J. L. Holah
March 17—Rev. Dr. Torrance.
March 21—Rev. W. J. Jolliffe
March 28—Rev. J. G. Potter.

Bible Society Meeting

A very successful meeting of the local branch of the Bible Society to celebrate the Centenary of the British and Foreign Bible Societies was held in Murray street Baptist church last evening. Sheriff Hall, President of the Peterborough Branch, presided. The meeting opened with devotional exercises led by Rev. J. Hastow and Rev. Dr. Torrance. The speakers of the evening were Revds. W. J. Jolliffe, A. H. Brace, J. L. Holah, and J. G. Potter. Different phases of the Society's work were dealt with, and the Murray street choir furnished excellent music. Mrs. Miller and Miss Hall sang solos which were much appreciated.

Local Sports

BASKETBALL.

A basketball league is being formed and a series of games will be played in the Y.M.C.A. gymnasium in a few weeks. In case enough teams enter to make it interesting, medals will be awarded to the victorious players, in addition to the trophy, which is now held by the Arrows, who made such a fine showing in the Senior League this year.

HOCKEY.

The Uptown Flyers have challenged the Y.M.C.A. senior intermediate hockey team to a game on the Brock street rink, at any date arranged for by the captains.

To-morrow night the last hockey match of the season, in which the local senior team will participate will be palyed, with the Marlboros, of Toronto. The game will no doubt be an interesting one, as it will serve to determine whether the local intermediate team is strong enough for senior company, as many of our citizens at present think.

Miles on Miles

Are walked by the billiard player, as he moves around the table. That is the only exercise many a city man gets. It is this lack of exercise in the shut-in-life of the city, combined with irregular eating and indigestible dishes which tend to make the city man the victim of "stomach trouble."

When there is undue fullness after eating, with belching, sour risings and other distressing symptoms, a prompt use of Dr. Pierce's Golden Medical Discovery will effect a speedy cure. In the most extreme cases of disease of the stomach and other organs of digestion and nutrition, the persistent use of the "Discovery" will result in a complete cure in ninety-eight cases out of every hundred.

"The praise I would like to give your 'Golden Medical Discovery' I cannot utter in words or describe with pen," writes James B. Ambrose, Esq., of 1205½ Mifflin Street, Huntingdon, Pa. "I was taken down with what our physicians said was indigestion. I doctored with the best around here and found no relief. I wrote to you and you sent me a question blank to fill out and I did so and you then advised me to use Dr. Pierce's Golden Medical Discovery. I took three bottles and I felt so good that I stopped—being, as I think, cured. I have no symptoms of gastric trouble or indigestion now."

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of mailing *only*. Send 31 one-cent stamps for paper covered book, or 50 stamps for cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $4 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

RUSSIANS AND COREANS HAVE A CLASH

Special to The Times.

London, Tuesday, March 8—A despatch to the Chronicle from Harbin says that Gen. Sakaroff, commanding the first corps, arrived there Sunday. Troops continue to pass through the town, going south. The railway is working with remarkable regularity and without accident. Men, animals and material are huddled together in the cars, each of which is supplied with a stove.

Special to The Times.

Seoul, March 7—The Russian soldiers operating in the vicinity of Anju are committing all manner of excesses, maltreating the native women, and perpetrating robbery upon every opportunity. Corean soldiers attacked a body of the invaders on Friday last, the 14th inst, and succeeded in killing thirty of them. It is reported that as the result of a collision between Russian and Corean soldiers at Kang Ge the Russians were driven beyond the Yalu River.

JAPAN READY TO STRIKE ON LAND

Blow will Again Surprise and Shock Russia--Know What They are About to Do

pecial to The Times.

okio, March 7—Affairs have been very quiet here after the excitement consequent on the opening victories of the war. The Japanese do not give way to emotion in the same manner as Europeans when engaged in war. People are going about their business at Tokio as if nothing in particular were afoot.

reparations are going rapidly forward for the commencement of the land operations. It is expected that important events will be heard of in the course of a few days.

he Japanese Government is not anxious to begin its land campaign prematurely, and is organizing its forces with marvelous foresight and completeness, for every possible contingence.

he opening of hostilities ashore is likely to furnish Russia with as great a surprise as did the naval actions.

is impossible for one, of course, to give the details, but events will soon show the capacity of the men who are directing Japanese affairs and the quality of the troops at their disposal.

cording to reports received here, the Russians are moving large masses of troops toward the Chinese frontier. The population is in a state of unrest and is leaving large towns.

ILL BUILD $25,000 BLDG.

.W.C.A. WILL ASK FOR SUBSCRIPTIONS NEXT WEEK

rge Amount Already Promised—Requirements of Gymnasium Have Been [illegible]—Mrs. McDonald Delivered Interesting Address at the Reception Last Night

A most interesting reception wa ld at the residence of Mrs. A. L. vis last evening, under the aus es of the local Y.W.C.A., and th ncipal topic of discussion was the oposed building of apartments, the t of which will be about $25,000. Miss McDonald was the principal aker and in an interesting man r she outlined the work of the As ciation since its inauguration.

About twelve years ago, sixteen terborough ladies met with Mr. ville, the then secretary of the M.C.A., with another young man. o had suggested the idea, to discuss e needs of an organization for ung women. Of these, Mrs. Fairrn, Mrs. Walsh and Miss Nicks are still connected with the rk. At that meeting $68 were subibed, Mrs. Fairbairn appointed sident, and the work organized. oms were taken down town and ened during certain days of the k. Amid ups and downs, the work adily advanced until seven years o ad advance step was taken in ening a boarding department. Two ars ago the work was enlarged ain through the generous offer of nator Cox of the use of a building George street, in which the genl work of the association could be ried on. Again the association is templating an important advance p that the growing needs of the ung women of Peterborough may adequately met, namely the erecn of an association building.

The fact that during the last ten ars Peterborough has grown larly as a manufacturing centre, and at young women in increasing numrs are entering industrial and comrcial life here, is making imperae a centre at which young women all departments of life may meet r mutual benefit, socially, educanally and spiritually. That the ung women themselves are more d more realizing such a necessity shown by the way in which the esent facilities are being taxed to ir utmost. During the past assotion year ninety-two young wom have been enrolled in the various ucational classes and fifty in a ecial course of cooking which has en carried on during the past onth. A gospel meeting with an erage attendance of twenty-seven ring the past year is held every nday afternoon, and two Bible asses a week have met. In all, a onthly average of 1300 young omen made use of the George street oms for various purposes. This is ne of the reportable work of the sociation in influence which has en used to transform many lives the upbuilding and steadying of aracter through the various agenes at work, such as the opening of the mind in order that young omen may have resources within emselves, the development of the dy by helpful exercise, the forming true and wholesome companionips. These cannot be estimated, but e known to have been largely acmplished. With inadequate equipent much has been done, but the cessity of enlarging to better meet e needs is vigorously felt.

There are at least one thousand lf supporting women in Peterborgh, as many more who are at me who can help and be helped to ake other lives brighter and nobler material contact. Probably no reater temptations come to young omen than through their social naures in the craving for companionship d pleasure. That a Young Women's hristian association can supply and s supplied in Peterborough a pure holesome atmosphere, and that true companionships have there been rmed, have been adequately demonrated. The great necessity now is largement.

This subscription list for a new building has already been begun with a subscription of one fourth of any sum which would be raised, given by Senator Cox. Twenty-five thousand dollars is the sum which the ladies have named as necessary for a well equipped building, which shall contain a boarding home, a gymnasium, class rooms etc., and already some other large subscriptions have been promised. Through the kindness of Mrs. Cox the furnishings of the gymnasium have been provided for. During the next two weeks the public will be given the opportunity of assisting in this important work, and the ladies of the board and the young women of the association feel confident that they will meet with a liberal response in order that the important work of a Young Women's Christian Association may be carried on with increased efficiency.

Mrs Davis, Mrs W. D. Scott and Miss McDonald received, and Misses Davies, Hall and Pedlar sang most acceptably. Dainty refreshments were served by Mr. H. Long, and all present spent a most enjoyable evening. Ten companies of ten each were formed, each having its own captain, and these companies will canvas only the young ladies of the town.

The beautiful home of Mrs. Davis was most tastefully decorated for the occasion, and nearly 300 young aldies of the city were present. At the conclusion of a most pleasant evening, a vote of thanks, moved by Mrs. Rogers and seconded by Mrs. Jas. Dennistoun, was tendered the genial hostess.

RISKED HIS LIFE TO SAVE DOG

Interesting Incident which Took Place Recently

A correspondent of the Lindsay Post relates the following interesting story;

"About 10 a.m. Sunday morning people passing over the Lindsay street bridge were attracted by the wild and pitiful cries of a dog, and looking into the channel just below the bridge, about the centre of the river, they saw a beautiful spotted dog which by some means had broken through the ice and was struggling to get out. The poor animal put up a hard fight for about twenty minutes or half an hour, and several times almost gained his footing, but the swift current proved too strong for him and each time he fell back into the water. There seemed to be no way or means of helping the poor drowning brute, who looked up at the crowd standing on the bridge as much as to say, "Can you not help me?"

Finally Mr. L. Winters and another gentleman appeared on the scene, who at once took in the situation. Running over to the locks, they managed to get hold of a couple of narrow boards. Mr. Winters placed one on the thin ice and walking out as far as possible, with the other board he tried to help the poor dog gain a footing, but failed. Then a line was thrown to him, which he quickly and cleverly threw over the body of the dog. One would think that Mr. Winters must have spent a few years as a cowboy. In a few seconds he had his dumb friend safe on land, though very much exhausted from exposure.

Mr. Winters and his friend deserve much credit for their brave act. Doubtless had it been a human being they would have cheerfully ran greater risks to save a life. The incident should be a warning for the town to provide some means to save life by storing in a handy place some life preservers, etc."

FIND THE INCAS' MILLIONS

Bolivians Discover $18,000,000 Hidden by Indians

Lima, Peru, March 9.—Advices from La Paz, Bolivia, announce that the traditional treasure of the Incas has been discovered at Challacatta. It amounts to $18,000,000.

The discoverers are of various nationalities and are now quarreling over the treasure, although a legal contract exists between them as to the division. The authorities have interfered in the matter.

ICE PREVENTS PROGRESS

London, March 9—Cabling from Pingyang, Corea, under date of March 6, a correspondent of The Daily Mail says that 2000 Russian cavalrymen, with seven guns, retreated last Wednesday through Kusong and Sonchon towards Wiju. They destroyed the telegraph lines.

It is believed at the Japanese legation that the Japanese are now between the Russian cruiser squadron and Vladivostok and there is reason to believe that the Russian squadron is in the vicinity of Possiet Bay. Russian official despatches do not mention this squadron, and this fact lends color to the belief that the Japanese warships have shut it out of Vladivostok. It is pointed out at the legation that if this be true, the Russian vessels are in a critical position.

The Japanese are aided to a great extent by the natives, and for this reason it is a very easy matter to evade the Russians. If, however, the Vladivostok squadron were discovered in Possiet Bay, it would not remain an hour there, as it would be only a short distance from the blocading Japanese fleet. The progress of both navies at sea is seriously impeded owing to the large quantity of ice, which makes operations in Corean waters most difficult. Notwithstanding the severity of the weather, and the hardships endured by the Japanese soldiers and sailors, Japan has established her supremacy of the sea. In addition to this, she has evaded the Russians by successfully landing an immense army in Corea. But the winter is fast wearing away and as soon as the ice blocade is removed, the Japanese will, it is expected, make better progress, so that a crisis must be near at hand. Japanese vessels will be sent to various points along the coast as soon as the ice disappears, and the only Russian gun boat on the Liao river will be destroyed, and the river occupied by the Yellow Men.

Large numbers of Chinese troops have been sent to Tunchow for service beyond the great wall in the north, for although she has declared her neutrality, she will be prepared for any emergency. China regards Manchuria as lost forever, but feels convinced that the victorious belligerent will seize other territory, initiating a general scramble among the powers, and the dividing up of China. For this reason the forces of China were being sent to the front until stopped by Russia's protest. This Eastern Country however regards the matter seriously, as a case of life or death. She feels certain that the hour is at hand when she must openly denounce Russia and will, in event of her doing so, expect the other powers to support her. Nearly 300 carloads of Chinese have passed through Pekin en route for the north in the past few days.

IS THE RUSSIAN FLEET CUT OFF?

From Vladivostok and May Fall Into the Hands of the Enemy---Japs Chased Russians

Special to The Times.

London, March 8—The Exchange Company's Paris correspondent wires that reports have been received there that the Japanese have made another attempt to block the entrance to Port Arthur by sinking coast ships no details.

Special to The Times.

RUSSIANS CUT OFF?

New York, March 8—The Vienna Neue Free Presse says the opinion is growing that the Vladivostock Russian fleet has been cut off from its base of supplies by the Japs and is likely to fall into the hands of the enemy.

RUSSIA CHASED.

New York, March 8—The World prints a despatch from Seoul, which says Admiral Uriu, having satisfied himself that the Russian squadron is not at Vladivostock, steamed away to the south with the object of overtaking the Russian fleet, which is believed to be covering the communications of a Russian force, marching south from Siberia into Corea along the east coast. The Japanese squadron is expected to overtake the Russian fleet this afternoon or early tomorrow.

ACCIDENT IN FIFTH WARD

Mr. R. J. Kidd Received Painful Injuries—Struck by Falling Ice

By the falling of a piece of ice, while passing the town buildings in the Fifth Ward yesterday morning, Mr. R. J. Kidd received painful injuries, which will lay him up for a few days. The ice struck Mr. Kidd on the head, and he was injured to such an extent that he had to be conveyed to his home. Mr Harry Evans, Street Commissioner, drove the injured man home, and it is not expected that his injuries will prove serious.

FOR CHAMBERLAIN

All the Self-Governing Colonies Declare for Preference

London, March 8.—This week's developments have greatly strengthened the movement for Imperial reciprocity. The debate in the House of Lords and the Ministerial speeches of Lord Lansdowne and the Duke of Marlborough served to convince most Englishmen that Canada New Zealand and South Africa are firm in their desire for a fair 'give and take' preferential arangement with the Mother Country as soon as the British electorate will authorise the British ministers to negotiate.

AUSTRALIA IS FIRM.

Australia was a doubtful factor, but Melbourne telegrams show that Australia is also now in line with the other colonies. Premier Deakin, as the Federal Premier, has formally announced that his Government is "prepared to alter the present tariff in favor of Britain, making sacrifices if necessary, to secure reciprocal preferences from the Mother Country." As is pointed out, Premier Deakin would not take this definite stand unless he was assured that Australian opinion generally was with him. This morning, it is announced, that Mr. Watson, the leader of the Labor party, declared in the Federal House of Representatives, that he objected to a preference without reciprocity, but promised hearty reciprocation to a British preference.

WHAT CANADA SHOULD DO.

Thus the whole self-governing Empire stands behind Chamberlain's policy in its preferential aspect. Among Canada's friends here the expectation is that an early occasion will be taken at the approaching session of the Canadian Parliament by formal resolution to put Canada's national position in an umistakably clear light before the British people.

EVERYBODY READS THE TIMES.

PETERBOROUGH MAN HONORED

Mr. T. F. Matthews Invited to Play with Canadian Bowling Team in the Old Country

Yesterday morning Mr. T. F. Matthews was honored by the receipt of an invitation from the Hon. Secretary of the Ontario Lawn Bowling Association. Mr. Q. D. McCullough, to play with the Canadian Bowling team, which will visit the Old Country this year. The team will leave in May and will take part in the great tournament at the Crystal Palace. It is quite likely that Mr. Matthews will accept the invitation.

PRESBYTERY MEETING

Reports Read and Adopted—Many Visiting Brethren Present

A meeting of the Peterborough Presbytery was held in St. Paul's Church yesterday and considerable important business was transacted. Reports from the different committees were read and adopted. The outside ministers present were Revs. D. A. Thompson, of Hastings; C. S. Lord of Grafton; A. E. Camp of Havelock; D. D. McDonald, of Keene; J. M. Whitelaw, of Omemee; G. Yule, of Springville; H. E. Abraham, of Port Hope; J. F. McFarlane, of Warkworth; C. A. Campbell, of Lakefield, and D P. Oswald, Pontypool.

In the absence of the moderator, Rev. W. L. Atkinson, of Warsaw, the chair was occupied by Rev. D. A. Thompson, of Hastings, at the morning sederunt, and by Rev. D P. Oswald, of Pontypool, in the afternoon.

The visiting brethren were entertained to dinner at the Munroe House by the Ladies' Aid Society of St Paul's church.

DIED IN TORONTO

Former Peterborough County Resident Passes Away

Sad we are to have to chronicle the death of another of Peterborough County's former residents in the person of the late Rev. F. Ratcliffe, who passed away at Toronto yesterday morning, at the residence of his son, Mr. F. L. Ratcliffe.

The late Mr. Ratcliffe was over 70 years of age, and his illness had been of short duration. At one time deceased was pastor of the Fifth Line Baptist church, and has since leaving the County, resided at Stouffville, York County.

Deceased leaves three sons and one daughter to mourn his loss,—F. L., of the firm of Douglas & Ratcliffe; J. W., of Stouffville; J. H., also of Stouffville, and Mrs. Geo. Matthews, of Peterborough. Mrs. Matthews left the city for Toronto some time ago, and was present at her father's bedside when he was called away.

The funeral will take place this morning, at 10 o'clock.

WEDDED IN QUEEN CITY

Nuptials of Miss Bertha Kennedy and Mr Chris. Graham

A very pretty wedding was celebrated in St. Luke's Church, Toronto, yesterday afternoon at 3 o'clock when Mr. Chris. Graham, son of Mr. Geo. Graham of the Oriental Hotel, and Miss Bertha May, daughter of Mr. W. J. Kennedy, both of Peterborough, were united in the holy bonds of matrimony. The groom was supported by his brother, Mr. Arthur Graham and Miss Eva Firth, assisted the bride.

The groom is well and favorably known in Peterborough, being most enthusiastic in athletic circles, and is also a member of the senior hockey team. The many friends of Chris wish him every success, and long years of happy married life.

The happy couple left Toronto yesterday evening for Buffalo and other western points, which they will visit previous to their their taking up their abode in Peterborough. On their return to the city they will occupy apartments in the Grand Central block.

Sugar Beet Industry.

At a mass meeting of 800 Dane County farmers at Madison, Wisconsin, the other day, a movement was launched for the establishment of a large beet sugar factory in that city, to cost from $400,000 to $1,000,000. Dean W. A. Henry, of the College of Agriculture of the State University, and R. G. Wagner, of the Wisconsin Sugar Company, of Menomonee, Wis., addressed the meeting, giving reasons why in their judgment it would be profitable for the farmers of that country to engage in the growing of sugar beets. Mr. Wagner said his company stood ready to establish the factory if it could be assured of receiving the products from 4,000 to 6,000 acres of beets each year.

In a recent interview with a prominent Peterborough County farmer, he remarked, "If the growing of sugar beets is compared with the growing of tobacco, the leading agricultural industry of many of the States of the union, it will be seen that the former is more profitable." The above gentleman lived for many years in Wisconsin, and is thoroughly conversant with the affairs of that State. He said, in conclusion, "The Wisconsin Sugar Company will send men and literature into the rural districts to arouse interest in the undertaking. The promoters feel confident that the factory will be established. I am strongly of the opinion that Wisconsin farmers will find it unusually profitable to grow sugar beets."

THE VLADIVOSTOCK FLEET DESTROYED?

Japan Believed to Have Captured or Destroyed Russian Fleet

Special to The Times.

Vladivostock, Wednesday, March 9 —The military commandant here has ordered all foreigners to have their passports vized by the local government and commercial agents of their respective countries. Most of the residents of Vladivostock are sending their familes into the interior. The girls' school and boys' gymnasium will be transferred into the interior.

The prices of foodstuffs are becoming exhorbitant.

Special to The Times.

London, Wednesday, March 9—The Daily Telegraph this morning publishes a despatch from Tokio dated March 7, and saying:—

"It is reported that the Japanese fleet engaged the Russian Vladivostock squadron at sea yesterday. The result of the engagement is not announced, but it is believed the Russian ships were destroyed or captured.

RUSSIA DISMANTLING SHIPS

They May be Moving the Guns to Port Arthur Forts

Tokio, March 9.—According to a merchant who arrived in this city today, and who was a resident in Port Arthur up to the time of the exodus of its inhabitants ordered by Admiral Alexieff, the Russians are working day and night to dismantle the injured battleships now lying in the inner harbor. The big guns are being taken from the turrets with all possible speed and being mounted on the forts. The refugee estimated that there are 40,000 Russian troops within four hours' radius of Port Arthur.

CONTRABAND SILK

A Big Seizure of Silk Made at Brockville Ont

Brockville, March 9.—Three custom officers got a "tip" last night, and in response to the information supplied visited a boat house situated on the river front and found eleven bales of upholstering silk each weighing 100 pounds, which is supposed to have been smuggled from Morristown, N.Y., just across the river from here. The whole lot was confiscated. It is valued at $12,000. The officers say they are on the right track of more goods of the same kind.

LABOR TROUBLE EXPECTED

Union Men From States Stir Up Canadian Building Trades

Hamilton, March 9.—With the coming of spring Hamilton promises to have its share of labor troubles, especially in the building lines. The large influx of American workmen, due to the building here of many big factories, is in large measure the cause of the threatened difficulty. The local unions are now practically ruled by men from across the border who came here to work on the new industries.

Local Sports

HOCKEY.

The case of McMillan v. the O.H.A. executive came up Monday morning before Judge Fralick, junior county Judge, at Belleville, and E. Gus Porter, M.P., appeared on behalf of the Belleville Club, and W. B. Northrup, M.P., for O.H.A. Mr. Porter asked for an enlargement of the case on the ground that some members of the executive had not been properly notified. Mr. Northrup opposed the motion on the ground that the hockey season was too nearly finished. The judge after stating that his duties on circuit would keep him busy for next two weeks, adjourned the case till March 28, three weeks from today, the injunction being continued in the meantime.

The game between the Peterborough Seniors and the Marlboros this evening promises to be an exciting one. The Toronto team will bring their strongest aggregation and as the local boys are in the best of form the game will no doubt be a great exhibition of hockey. The Marlboros are now the senior O.H.A. champions, but our boys have played fine hockey this season, and feel confident that they can give the Queen City men a hard fight.

It has been commonly remarked that the local seniors are fast enough for a place in the Senior League, and this game will result in a proof of the truth of the above.

The following will be the local players.—

Goal—Mercer.
Point—Howell.
Coverpoint—Cavanagh.
Forwards —R. Armstrong, Whitcroft, H. Armstrong, and Morgan.

Stratford won the intermediate championship of Ontario by defeating Midland on Stratford ice, the score being 5 to 0.

CURLING.

Owing to the curling rink being covered with water, the Sheppard-Neill contest, which was to have come off yesterday was postponed until today.

The following games must be played at the Curling rink this evening, at the latest.—

Coupal vs. Clegg.
Neill vs. Thompson.
Knapman vs. Rutherford

In Toronto on Monday night, the Marlboros won the city championship from the St. Georges by a score of 8 to 3.

IRISH CHEER FOR RUSSIA

Enmity to England Dominant at the Emmet Anniversary

Chicago, March 9.—Russia has a friend in every Irishman who attended the celebration of Robert Emmet's anniversary at the Y.M.C.A. auditorium last night and every sympathizer with Russia was just as apparently the implacable foe of England. No hostility was shown toward Japan, but there were cheers and hand-clapping and stamping of feet whenever the speakers made reference to the friendship Russia had manifested for the United States.

The celebration was under the auspices of the Irish Nationalists of Chicago.

Chairman O'Neill in his opening address won from the audience the first expression of sympathy for Russia.

"A crisis has come in the world's history," he said. "England's puppet, Japan, is at war with England's arch enemy, Russia. As American citizens, grateful for the unbroken friendship of Russia for more than 100 years, and especially during the civil war, our sympathies are with Russia, but while the contest is between Russia and Japan we must preserve strict neutrality. But let England take the field against Russia without first making peace with Ireland and where will the Irish be found? An Irishman will be found wherever an English flag is to be pulled down."

"That's the talk," cried an enthusiast in the gallery, and a storm of cheers arose from the audience.

"If England takes the part of Japan in this contest," continued Mr. O'Neill, "the war will not be confined to Corea or Manchuria. England will have to meet Russia on the frontiers of India and she will have business on this continent, too. When that crisis arises the fate of Emmet shall not be forgotten."

HE SAVED THE COW

Former Port Hope Man Relates Exciting Experience of 13 Years Ago

"It was away back about 12 or 13 years ago," began a farmer resident of Port Hope yesterday, as he suddenly became reminiscent, "that we had one of the worst floods in the history of the town. Several dams on Smith creek gave away, in the month of February, after an unusually heavy downpour of rain, and many bridges were carried away by the flood. Why, I've seen them bring the horses and cattle through the dining room and bar of the American hotel, from the stables, and swim them out to higher ground. Ye see the hotel was situated on the edge of the creek, and this was the only way they could get them out, as there was a big bluff at the other side. And myself, I had an experience too. The family had all been driven upstairs, owing to the water raising so high, and I was worrying about my cow in the stable nearby. Finally I sent out the boy to try and release her. He floated out on a plank till he got to the stable door and on opening it the cow swam out. By means of a long ladder I climbed out of the window on to a board fence and, when I saw that cow a-swimmin around I called her and she came to me. I jumped from the fence right straight and grabbed her by the tail. The water was about twenty feet deep, and that cow swam for the shore, or I should say the higher ground, with me a-hangin' on to her tail.

We soon reached shore, and then I hired a fellow with his boat to row me back to the house, as I was uneasy about my family. I, at length got them out and in a place of safety. I never seen the like since or before and I'm an old man of over seventy," was his final remark as he walked away.

Must Go

Six handsleighs at 25 cents will be sold for 18 cents; four 40 cent sleighs for 27 cents; two 75 cent sleighs for 45 cents, and two, high beam, steel runners and beams, regular $2.50 sleigh, for $1.50. Times Bookstore, Market Block.

Wednesday—Little colder.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 9, 1904

BOARD OF WORKS

Figures for the Cost of a Portable Stone Crushing Outfit to be Obtained

At Monday night's Council meeting, Ald. Best submitted the following report, which was adopted as read;

Gentlemen,—Your Board of Works beg leave to report and recommend as follows;

1. That that portion of Wolfe street, from George street to a line in extension of the eastern boundary of the Leonard property, be closed and conveyed to the Matthews Co. upon their conveying a street in lieu thereof to the Town adjoining the C.P.R. property, to be not less than 45 feet wide at George street, and 55 feet at the rear, with a satisfactory turn to the wharf, the Matthews Co. to build and maintain a close fence or wall 10 feet high next the C.P.R. line and grade and water table the new street, such new street to be laid out and work to be done to the satisfaction of the Town Engineer.

2. That the Chairman and Engineer be authorized to advertise for tenders for the supply of cement required for this year to be delivered f.o.b. at Peterborough and to be subject to inspection and test by the Town Engineer.

3. That the Town Engineer be instructed to take the necessary steps to carry out the proposed diversion of the stream through the east (No. 5) ward, as provided by By-Law of the Village of Ashburnham, and report to the Council at the same time as he files the necessary plans and specifications with the Town Clerk.

4. That the Clerk, under instructions by the Chairman, get figures for the cost of a portable stone crushing outfit.

5. That Ald. Rush, Best and Mason be a sub-committee to consider the opening of George street south to Lansdowne street, and report on its cost and advisability, and also on the opening of Aylmer street to Romaine street.

All of which is respectfully submitted.

PROPERTY COMMITTEE REPORT.

Ald. Batten submitted the following, which was adopted as read;

Gentlemen,—Your Property committee begs leave to report that they have considered the offer of Mr. W. Taylor to purchase and remove several of the buildings on the land purchased by the Town from Mr. W. F. Hilliard, and recommend that the Town do not sell them.

All of which is respectfully submitted.

Rheumatism Conquered!

DRIVEN FROM THE SYSTEM BY ELIMINATING POISONOUS URATES IN THE BLOOD

Stubborn Cases Quickly Relieved, Chronic Sufferers Absolutely Cured by an Internal Remedy

This disease originates in the blood. It's the poisons in the blood that cause the pain. Get rid of these poisons and you cure the pain. Doesn't that seem logical.

These poisons are composed largely of uric acid which dissolves and quickly passes out of the system if Ferrozone is employed, it being a complete and perfect solvent for all the poisons that give rise to rheumatic pain. No case is too chronic no person too old to be forever released from the agonies of rheumatism if Ferrozone is used; it cures after all other treatments proved useless. You may have been disappointed with other remedies. But don't let this deter you from using Ferrozone. It's not like the ordinary "cure"—it possesses peculiar qualities not found in any other remedy.

FERROZONE CURES RHEUMATISM

Mr. Edgar F. Richmond, an old and well known resident of Winchester says; "My endorsement of Ferrozone is cheerfully given for I know that I am speaking for a sure cure for rheumatism. Ferrozone cured me so the pain didn't come back again. I honestly believe that no medicine on the face of the globe can do as much for rheumatism as Ferrozone."

Mrs. D. J. Thurston, of Burton, P. O., writes; "As a long sufferer from rheumatism I can say that Ferrozone is the most satisfactory remedy that I used. Quite frequently I would get a bad attack and be laid up in bed. Ferrozone removed every trace of the disease and I have been well ever since."

Ferrozone is beyond all question the proper remedy to use in rheumatism. There is none better. Beware of substitutes and don't allow a druggist to palm off something he may say is just as good. Insist on having Ferrozone, use it as directed and you will be cured. Price 50c. per box or six boxes for $2.50, at all druggists or by mail, from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

PROSPEROUS MINING CONCERN

The Oregon Mining and Smelting Company Has a Bright Future

One of the most progressive and prosperous mining companies in America is that known as The Oregon Mining and Smelting Company. With a capital of $200,000, it is incorporated under the laws of the State of Colorado in 200,000 shares of $1.00 each, fully paid and non-assessable. It is a universally recognised fact that no investment compares with gold mining. Gold is the only article of which it can be said that the demand always exceeds the supply. The price of the metal never varies and the harder the times the greater is the hunger for gold. Dull times invariably succeed busy periods in business life, therefore in times of unusual prosperity the matter of investment is one of the greatest importance. For this latter reason, and because it is generally believed that money invested in a gold mining enterprise, that is honestly and economically managed, is a good and safe investment, that the proposals of this substantial company should be carefully considered.

The property of the well-known company is located in the Tarryall Mining District, Park County, Colorado, and consists of 16 lode claims and also 160 acres of placer ground, known as "Willauer Placer," making a total of 325 acres in all. The ground on which these lode mining claims are located, not only resembles the gold belt of the famous Leadville District in contents and formation, but is in reality a continuation of the Gold Belt of that district. The Placer Ground below the company's property has for years been famous for the millions of dollars in gold taken from it.

The Oregon claim is located near Silver Heels Mountain, at an altitude of 12,200 feet, and the property has been thoroughly prospected and developed with a shaft and drifts, of about 125 feet. On this property there is a vein seven feet wide, the ore in which ranges from $7 to $14 in gold per ton, while several smaller veins have given values as high as $300 per ton. This property has been fully equipped and all the necessary ore buckets, etc., provided, to develop it to a depth of 250 feet, and all is covered by a good substantial shaft-house.

The Brooklyn Group of claims is located at the head of Montgomery Gulch, which is between Silver Heels and Round Mountain, crossing the Gulch and over Round Mountain. The principal work on this claim, a shaft on the Brooklyn claim, is about 150 feet deep and contains over 100 feet of drifting from the 100-foot level. All the equipments are most modern, and the ore on the property shows values near the surface ranging from $9 to $18, and the conditions are continuing to improve as the work of development progresses. In this group there are two dykes passing through the property for over 6,000 feet, one a porphyry, and the other an iron dyke. These dykes show values near the surface ranging from $9 to $131 per ton, and a small vein cut in the drift on the 100-foot level has shown values as high as $29 per ton in gold, silver and lead, the principal value being gold.

The remaining claims in this group have all been opened up, and thoroughly investigated, and the value of the ore contained therein has been satisfactorily proved. There are thousands of tons of high grade ore on all the various properties, which can be treated at an immense profit, and a plant of one hundred tons daily capacity can easily be kept busy for many years to come.

The future prospects of the company are most promising, and as the work of the company is being done by experienced miners, there can be no doubt whatever of its continued success. Valuable ore of itself cannot make money. There must be "plants" to treat the ore cheaply, and for this purpose the management intend building a plant on the ground to treat the ore. The exact method of treatment will, of course, depend upon the character of the ore in the property as more fully developed, and upon which it will be decided in a few months. In the mean time all the ore taken out in working the shaft will be most carefully protected.

The company has been and is being managed in an economical, business-like but aggressive manner, and Mr. F. J. Woodward, the able manager, is to be complimented on his success in elevating his company to such a high position. To quote the opinion of a contemporary, "He is a high-grade man, one who has had an eye to obtaining possession of this property for a number of years. Everybody who knows Mr. Woodward speaks highly of him, and the company could not be in better hands."

The company is all fully paid for, there are no debts, and the balance of the Treasury Stock, now to be sold, is about 27,000 shares. This stock has been and will be sold at par, but the Board of Directors reserve the rights to withdraw any unsold Treasury Stock from the market at any time the conditions warrant it. It may be added that any person investing money with this progressive company may rest assured that it will be the constant care of Manager Woodward, as far as it is in his power, to make the enterprise a profitable one.

The fullest investigation of the property by intending purchasers is invited, and Mr. Roland Kidd, the Toronto and Peterborough representative will be only too pleased to thoroughly explain or furnish further information regarding this growing

FRANCE AND FASHODA.

IF WAR HAD COME RUSSIA WOULD HAVE HELPED HER

Important Revelation as to the Strength of the Franco-Russian Alliance

The Paris Figaro has lifted the veil on the incidents in connection with the now almost forgotten Fashoda controversy. Count Muravieff's sensational interview with M. Felix Faure took place at the Elysee on October 17, 1898, but by order of the Czar solemnly to promise the French Government the military co-operation of Russia, was the outcome of negotiations that had begun on September 1. In fact, M. Delcasse had on that date sent to the Marquis de Montebello, the following despatch the text of which, as well as sense, is guaranteed by The Figaro;—

"At the moment the Anglo-Egyptian forces are advancing towards Khartoum, we cannot lose sight of the grave consequences that may issue, in the near future, from the events that are occurring on the Upper Nile. I shall be obliged if you will call the attention of Count Muravieff with regard to the eventualities that may happen, and let me know how they are regarded by the Imperial Minister of Foreign Affairs."

On September 12, M. Tontain, Charge d'Affaires of France at St. Petersburg, sent the following reply to M. Delcasse;—

"I have communicated to the Minister of Foreign Affairs the indications you have addressed to me relative to events on the Upper Nile. Count Muravieff begs me to reiterate his assurance that in this affair as in all others connected with Egypt, the Imperial Government has resolved to act in agreement with us, and to conform its attitude with that of the French Government."

The Figaro does not omit to lay stress on the fact of reiteration as showing that the assurance referred to had been given at least once before, probably after M. Delcasse's despatch of September 1. When Count Muravieff paid his visit to M. Felix Faure the aspect of affairs had changed. Although France had decided not to maintain her position at Fashoda, the formal declaration, handed to Lord Salisbury by Baron de Courcel, on November 4, had not yet been made. Eighteen days before the French Government, on November 4, declared that it would recall Marchand, Count Muravieff, by order of Nicholas II., said to M. Felix Faure "If you fight, we will join you."

These things are narrated in order to fix a point in history, and to bring out into the light of day the loyalty of the "nation amie et alliee."

Teacher—How far is Philadelphia from Pittsburg?

Tommy—Just about as fur as it kin be. Pittsburg's got de pennant cinched, an' Philadelphia's wid de tail-enders.—Philadelphia Press.

How, says Mary, with many sighs,
Shall I prevent those nasty flighs
From spoiling this, the best of pighs?
A welcome step is heard—"Arighs!
Sighing will never win the prighs:
Success is hers who only trighs
Poison the crust, and each one dighs!"
Now Mary turns, and with surprighs
Reflected in her wondrous eighs
Before her sees dear Cousin Lighs.

$40,000.00 IN FREE GOLD

has been mined from near the surface. Value of ore, $20 to $125 per ton in free gold. A long tunnel is being driven to intersect this rich ledge at great depth. The tunnel is now into the mountain 550 feet, and the work is being prosecuted night and day.

Capital stock $1,000,000.00, par value $1.00 per share.

Treasury stock selling at TWENTY-FIVE CENTS PER SHARE for development purposes only.

The property is managed by business men and mining men of Prescott, Ariz.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 1-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 1-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

JAPANSSE SHIPS OPEN FIRE ON SUVAROFF.

And Port of Linevitch on The Roadstead Along the Valley of the River

Special to The Times.

St. Petersburg, March 7—Viceroy Alexieff telegraphs the Czar from Mukden under to-day's date as follows:—

Supplementary to my telegrams of March 6th I most humbly report that at 1.25 p.m. five out of seven of the enemy's ships opened fire on Port Luvaroff and Linevitch and the town on the roadstead along the valley of the river Obyasnendiye. The firing lasted until 2.15 p.m. at which hour the Japanese squadron began to steam to the southward, disappearing out of sight at 5.30 p.m.

There were no losses on the batteries on the fortifications. In the town one seaman was wounded and one woman killed.

According to information just received the enemy's squadron again appeared in sight of the fortress at 8 o'clock this morning.

A later message from the Viceroy says the commandant at Vladivostock reports that yesterday's bombardment resulted in no serious damage to the fort. The fortress did not return the enemy's fire. To-day at midday the enemy againentered Ussuri Bay and approached to a point from which they bombarded the harbor on March 6. They left again, making for the open seas.

Special to The Times.

Win Kow, March 7—An official despatch received here says the Japanese are again bombarding Vladivostock. This news lacks confirmation from other sources.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema.

January 29th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peakes Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that it w not permanently cure.

How's This

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Hall's Family Pills are the best.

Written in a Hurry.

How "For God and the Czar" came to be written is rather interesting. Mr. Muddock happened to be at Tit-Bits offices, talking to his friend Mr. Galloway Fraser, when Mr. Newnes, as he then was, came in. "Look here, Mr. Muddock," he said abruptly, "can you write us a serial? I've got one running that's not doing us any good." Mr. Muddock replied that he had a story in his mind dealing with the persecution of the Jews in Russia. "That'll do," said Mr. Newnes. "When can I have it?" "Oh, I haven't thought it out yet," answered Mr. Muddock, slightly taken aback at such promptitude, "Say in six months." "Six months!" echoed Mr. Newnes scornfully. "I must have it in a fortnight." As usual, Mr. Newnes got his way, at least to this extent, that Mr. Muddock went away, shut himself up, and delivered the first three instalments in three weeks, keeping them up weekly afterwards. The serial thus quickly commissioned and quickly written was a huge success, and stirred the heart of Jewish communities the world over.

T. M. Healy a Lawyer.

Before long English newspaper readers will be noting that Mr. T. M. Healy, M.P., conducted a brilliant cross-examination in the Law Courts or made an effective appeal to the jury. The ablest and wittiest of all the Irish members of Parliament was a fortnight ago "called" as a member of Gray's Inn, and thus became qualified as a member of the English Bar. It is understood that he will practise chiefly in the English courts. Probably only a small section of the English public is aware that, besides being the cleverest of the Nationalists, Mr. Healy has for some years been one of the shining lights of the Irish Bar. Among lawyers it is thought quite likely that his career at the English Bar may be as remarkable as that of Sir Edward Carson, who leaped into a new fame as soon as he crossed the Irish Channel. While qualifying for the Irish Bar, Mr. Healy "dined" at Gray's Inn in 1880, and some of his speeches as the junior student are still remembered. He was then twenty-five years of age, so that now he is forty-eight. He was consequently the senior "student" of the dozen who were "called" last evening. It is understood that his sponsors were Mr. W. Mattinson, K.C., and Mr. Duke, K.C., M.P. After the ceremony Mr. Healy attended the usual "call night dinner," and in accordance with ancient custom, after the Benchers had withdrawn for dessert, the senior member present, Mr. Lawrence Counsel, who is eighty-one years of age, proposed the health of the newly "called" members, to which Mr. Healy, as the senior of the band, replied. In becoming a member of Gray's Inn Mr. Healy is following the example of Mr. John Redmond, the leader of the Irish party, who was called some years ago.

Science and Matrimony.

He (the accepted one, enthusiastically discussing their projects for the future) —I think it would be a splendid idea, when we marry, to have the kitchen fitted with a radium cooking range!

The Betrothed (who doesn't believe in long engagements, very sweetly)—Er—ye-es, darling, but if radium does not come into use, say, in one month's time from to-day, we won't wait for it, dear, will we?

TIMES BOOKSTORE
MARKET BLOCK, - PETERBOROUGH

WHO OR WHAT IS YOUR MASTER?

HUTCHENS C. BISHOP, Rector St. Philip's Church (P. E.), New York City.

No man can serve two masters.—St. Mat., vi., 24.

It is always impressive and helpful to have a statement intended as a rule of life uttered with authority and in language so simple and direct that it cannot be misunderstood.

Jesus Christ, whose words these are, was not only the "Lord of Life," but the Master of living. He spoke not only as one having authority, but out of an experience that had tested in His own life the rules He gave for guidance of others.

That He exemplified both in letter and spirit the principle expressed in the text is so clearly a matter of history that even His most persistent critics have not been able to gainsay. Nor should anyone fail to understand the force of the axiom:—"No man can serve two masters." It is a universal negative and asserts an impossible condition of service. It does not destroy the free exercise of the human will, but it places a limitation upon the functions of that will.

We are so constituted that, though one may boast of his independence in thought and action, nevertheless there is a mastery to which every one is ever rendering an obedient service. We must serve some master, but "no man can serve two masters." Nevertheless we are confronted with the fact that the great majority of men are endeavoring to do the very thing which is here pronounced impossible and proved to be so by all experience. Alas! how many have fallen victims to this vain endeavor; how many are still engaged in the hopeless task of a dual service!

The proposition is as true in the affairs of everyday life, in the questions affecting political, civic, ethical, commercial and social relations and the numerous situations in which we are called upon to assume an attitude of service, as in the realm of religion and morals. The tendency of the age is to be non-committal, to straddle, to be on the fence, to serve two masters, when, as a matter of fact, such an effort is a delusion and a snare, and in the end subverts the best interests of the individual and of the common weal. Compromise is always a sign of weakness. Conservatism is a sort of fetich of the day. In questions of honor and dishonor, of good report and evil report, of right and wrong, there is no middle ground upon which honest men can afford to stand. In such we are at the "parting of the ways," and we must follow one or the other.

Especially is this true in matters of religion. Here the line of separation is so clearly defined that it cannot honestly be escaped. The Great Teacher gives a concrete example:—"Ye cannot serve God and Mammon." God, as representing the very highest, because most perfect, mastery, and Mammon, as demanding the very lowest, because the most degrading, service—each is an imperious and exacting master, and no man can be loyal to both. Their wills are so different, their commands so opposite and their ends so antagonistic that the occasion must frequently rise when one or the other will have to be despised and disobeyed if the other be honored and served. Try as we may to elude the difficulty of the situation, we are forced to enlist in the service of the one or the other. Beyond a doubt Mammon rule—Mammon worship—is one of the distinctive features of the day, and few realize how deep is the impress upon life and character.

There is an expression about "every man" or "everything" having its price, and the fact that it calls forth a resentment that steadily grows less pronounced indicates how far we have gone in this direction. However, there is no necessary conflict between God and Mammon, between the acquisition of wealth and the highest duty of life, but there is a necessary conflict between the mastership of wealth and the mastership of God. When men are so dominated by the love of gain that it becomes an absorbing passion and the higher claims of duty are made secondary they should at least be honest with themselves and know in what service they are enlisted, and not be deluded by the thought that they can "hold to the one" and not "despise the other." Unworthy service assumes other forms. Society, fashion, pleasure may be substituted for "Mammon," and we have identically the same situation. It is not a question of inconsistency or incongruity. It is not "ye ought," but "ye cannot."

If, therefore, every man must serve some master, and "no man can serve two masters," and every man really does serve one master, ought not each one to deal honestly and fairly with himself, and as an intelligent and responsible being demand an answer to this very pertinent question, "Who or what is my master?"

At the Rothamstead, England, Experimental Farm, conducted so long by Lawes and Gilbert, a field is this year carrying its sixteenth successive crop of wheat.

In estimating the profit from a butter cow something is due the cow for the skim milk and butter milk furnished the pigs. A lot of pigs should always be kept where cream is sold or butter sent to market. The pigs provide a source for the disposal of refuse milk, and a portion of the profit should be credited to the cow.

Mr. J. A. Kinsella, at one time a dairy instructor for eastern Ontario, has been appointed to take charge of the dairy work for the Transvaal Government. Mr. Kinsella came from Brockville and had a practical training in dairy work. Two years ago he was appointed a dairy instructor for New Zealand and upon the resignation of Mr. Ruddick was made superintendent in New Zealand.

Her Own Opinion.

Miss Askew—So your marriage is put off?

Miss Crummy—Yes, papa is not at all satisfied with his position; mamma doesn't like his family connections, auntie thinks he is too careless in his dress, and I think——

Miss Askew—Yes, what do you think?

Miss Crummy—I think I ought to wait till he asks me.—"Town and Country."

She—Do thoughts that came to you long ago ever return?

He (a poet)—Sure, if I enclose a stamped envelope.—Denver "Republican."

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.63 and $79.05 respectively, thus being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

H. C. LANE, President. G. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 200 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 20th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE CLUTCH OF CHANCE.

"The race is not to the swift, nor the battle to the strong, . . . but time and chance happeneth to them all."—Eccl. IX:11

For the man who wins, there is pomp and pride,
And the laurel wreath, and the cheer, beside;
And for him who fights but in fighting, falls,
There are echoes still of the trumpet calls—
But there is no balm in his bitter lot
If he meets defeat with his fight unfought.

There are sore defeats that are all unknown,
And they send their gloom to the proudest throne;
And they plunge their shade on the humblest life—
For they bring no stress and they bring no strife;
By a time or chance is the loser caught,
And he knows defeat ere his fight is fought.

There are singers mute—and their hearts are wrung,
And their souls are thrilled with the songs unsung;
There are men who dreamed of a picture fair—
But the hand is still and the canvas bare;
And the others, too, with the goals unsought—
They have seen defeat with their fights unfought.

If a man goes down with his sword aflash,
And has heard the lance and the armor crash—
If he loses then, he will shed no tears,
He hath dealt his blows, he has heard the cheers;
But is soul must shrink from he knows not what
When he meets defeat with his fight unfought.

—Chicago Daily Tribune.

MISMATED

By
WILLARD JONES

(Copyright, [illegible], by Daily Story Pub. Co.)

TWO men and two women, two romances and two tragedies—and the sequel, that's all.

But stay, perhaps it was four romances and four tragedies. Judge of that for yourself from the story.

It was all natural enough—the most natural thing in the world, and very strange and unconventional, too. Two splendid young fellows, two attractive girls—all comrades from childhood One young fellow an artist by nature and environment, by heredity and cultivation; the other a matter-of-fact boy gifted with an allotment of common sense which amounted, if he only had known it, to positive genius; and two girls, one a beauty of so rare perfection that she would fill every aspiration of the most artistic mind—form, features, coloring, expression, all so perfect that she would have been an ideal model for any painter, sculptor or poet; the other a peculiar sort of girl, with none of the conventional attributes of beauty, irregular—even homely— of feature and complexion, and so far devoid of attractions and graces as to repel rather than attract admirers and friends, except that she was lithe of body and springy of step—but gifted with a fire of eye and a vivacity of movement and of manner that compelled attention and admiration even while the keen analysis and biting sarcasm of her original mind repelled it. With the one there was the attraction of physical perfection, with the other the more insidious influence of essential vitality.

Of course, Clarence Cole, artist that he was, was enamored of Gracia, with her soft, correct lines and rich glowing color. And equally, of course, John Bedwell, became the slave of Alice Beattie.

And here lies the story.

For years all four had been chums and companions Clarence and Gracia had been accepted juvenile sweethearts, as also had John and Alice. So, in the natural order of things there were two weddings, and the four young people were paired off in matrimony as they had been as sweethearts, took a wedding trip together and settled down to live happy ever afterward after the manner of heroes and heroines in all well-regulated stories.

And now comes the strange part of it all.

Odd as it may seem, after these two well-paired young couples had been married for a twelvemonth and had lived most happily, it all began to pall upon all four of them—in a way.

For the first few months Clarence lived in a perfect dream of bliss. All of the perfection of Gracia's physical perfection sank into his artistic consciousness. And Gracia—well, what more had she to desire than this handsome and talented consort—perfect in form, manner and devotion and advancing all the time in the estimation of the world?

And yet there was not the most perfect harmony of life and impulse with these two—sad as it may seem. Clarence sought,—alas, in vain—beneath the surface perfection of Gracia's wonderful beauty the real attributes of character promised so abundantly. And he found them not—alas and alack, he found them not! He saw all the promises turn to ashes and finally suspected that his beautiful wife was but a whitened sepulcher—from his point of view. Of course, he asked too much, being an artist.

And Gracia? The long months brought to her also the bitterness of dead leaves. Her handsome and talented husband did not yield to her the adoration and happiness she had so warmly craved. She could not guess why, but there was something lacking—something real and essential to her nature. As the months went by he appeared more and more to her as a promise than a reality. She was not at all an idealist; she wanted to see and feel—not dream.

And so they drifted apart and came almost to despise one another, because, alas, they understood one another not at all.

And the other couple—John and Alice—life went almost as badly with them. Alice, with her superabundant intelligence and vitality, grew to feel as the months went by that her sturdy and commonplace husband did not understand her. She appreciated his sterling worth and his unyielding reliability, but she could always touch bottom—there was no depth to explore. Her unconquerable vitality rebelled at the hard-and-fast bounds she found in his character. She adored his manly and she told herself again and again that he was the sort of man to tie to—one of the salt of the earth; but her unquenchable spirit rebelled at bounds and rules, and it got so she fairly hated figures, facts and reason. She longed for flights into the mystic realm of ideality, into those realms where vital forces could override rules and methods.

Well, you can see for yourself that John could not understand anything of that sort. Honest, conscientious, sterling John could move only along the lines of his own understanding. And he resented, in a manly and honest way, the breach Alice had placed between them. He had disregarded no obligation, no duty, no sacrifice. He had been altogether unselfish and faithful, and somehow he had not succeeded in welding his life with that of his wife. His hopes, his ideals had been shattered.

Now, mind you, all this time, while these thoughts and ideas had been percolating through the minds of these four simpletons, they had, all of them, been constant companions and friends.

So it was that the artistic mind of Clarence began to appreciate the depths and wealth of the nature of Alice—contrasting it to the narrowness and poverty of that of Gracia. And by that same token Alice awoke one day all of a quiver with an appreciation of the tremendous sweep of the nature of Clarence along the lines of her own aspirations.

It was a dangerous discovery, and as it came to these two people it nearly floored them.

The harder they fought the more tense the new situation grew. To the soul of each the commonplace qualities of wife and husband grew more oppressive as they realized in each other the joys of perfect appreciation and perfect fellowship. The end was certain as the multiplication table, and finally they gave up the struggle for conventionality and honor and resolved to shatter their vows and their reputations, to give up kindred, associates and home and wreck the structure they had been building since childhood and flee to an unknown country, there to begin a new life in which their mutual love would be ample compensation for all they left.

Brave in their resolution, but guilty in the consciousness of the great wrong they were doing their loyal consorts, the two slipped into a close carriage on the evening of the 16th of June, 1899, and were driven rapidly to the depot, where they boarded a train bound for New York, there to sail for European shores, where they had planned to begin their new life.

In the meantime both John Bedwell and Gracia Cole had felt the widening breach in their respective homes, although neither had the slightest suspicion of the state of affairs between Clarence Cole and Alice Bedwell. Being thrown together much, Gracia began to take a new delight in the society of the sturdy John Bedwell. She could understand his mental attitude, his plain, everyday talk, his natural human methods, whereas Clarence's high-strung, artistic impulses and idealities oppressed and bewildered her. And John, disappointed and puzzled at his failure to understand Alice and weld his life with hers, and resenting the attitude of inferiority she placed him in, looked with new eyes upon Gracia and realized her surpassing beauty. And as he talked more and more to her and found that she understood so thoroughly his thoughts and aspirations, his heart warmed toward her Finally he awakened with a start to the realization that he loved her and that his love for Alice was dead And presently she found her own heart had gone out to John. So when the fires of the new love had attained fever heat both were more ready to obey their impulses than the others, for they had not the condescending pity—rather a sting of injured pride.

John methodically wound up his business affairs and looked up a new location where he could reestablish himself safely, and it came to pass that on the evening of June 16, 1899, he entered a close carriage with Gracia and they were driven rapidly to the depot, where they boarded a train bound for San Francisco, there to take steamer for Australia.

The two trains stood on the same track, the engines heading in opposite directions. Both left at exactly 11 o'clock. Shortly before that hour the two couples, who had left the same depot on their wedding journeys only two short years before, and who were now fleeing from each other, passed through the gate but a moment or two apart, boarded the separate trains and were whirled away in opposite directions as fast as the steam monsters could carry them.

The strange part of the affair is that neither couple ever knew that the other had eloped, and the friends of both had no suspicion of anything wrong, but wondered deeply at the sudden and mysterious departure of the four.

A Handy Affair.

There is an emergency clause in the sultan's constitution, says the Chicago Tribune, which always enables him to act at once when he needs money from any of his rich subjects.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, - - - - - - - - President
E. P. CHAPTON, - - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - - Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to the new patent machine upon all the land it may own, acquire, lease, or operate, in Arizona. We invite special attention to great commercial value and profit of this machine, and what be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine been invented which will handle the dry placer gold gravel with water, and in large quantities. This machine will save 98 per of all the gold in the gravel, and will do it at a lower working than by any existing process. It is operated by a small, comp engine, using crude oil as fuel. A complete plant, capable of han ing 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be work which could command large supplies of water, hence the imme bodies of dry placer lands remote from water have never b worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions gold, of which fifteen hundred millions—or more than 75 per cen were the product of its placers.

Ninety per cent. of the world's total gold supply has been t en from placers by processes which have admittedly lost the bulk the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and op tion that any intending investor can operate it instantly. He take a peck or more of sand, either ordinary house of sea sand, such as is found in the placer lands of Arizona and California, into this sand ten or a hundred pieces of gold as small as the p of a toothpick, and from that to the head of an ordinary pin, mix sand and the gold thoroughly, turn them into the hopper or feed the machine, and in a few seconds the machine will separate the from the gravel and recover from 98 to 100 per cent of the gold is an absolute, infallible, ocular demonstration of the merits of machine. It has solved the problem of handling sand or gravel taining gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can easily moved by a few laborers.

The two greatest authorities in the world on the moving of terial are "Haswell" and "Trautwine." They say in their stand publications that a laborer can shovel horizontally, 12 feet, vertic 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Governmen Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona New Mexico are handled quite as easily as those of Sa Hook.

Ten laborers can easily supply one machine with 204 cubic y of gravel in 12 hours, working at the same speed as shown by Hasw Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per c yard.

Do You Want Monthly Dividends

We make a special offer of a limited number of shares of st at this time, because the company requires immediately sufficient build several machines to operate in the field.

Every machine at work will increase the intrinsic value of stock.

Twenty machines in the field will increase the price and valu the stock more than double the present offering, and every additi machine means a further increase in price and value.

The Company intends to divide its net earnings every month that the stockholders may count absolutely on receiving mont dividends in proportion to monthly earnings.

WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs; Silver 92 40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper. $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

A ZACUALPA RUBBER PLANTATION COMPANY

ncorporated Under the Laws of the State of California.

La Zalualpa Rubber Plantation is situated in the best location in Mexico for cultivation of rubber. It has been own for a great many years as a y choice strip of rubber land and subse ent experience has shown that it is ual to all that has been claimed for The affairs of the company are in hands of men of undoubted integrity high reputation as successful men business. To those seeking a safe in ment which will secure a good in e for life, this proposition offers a vorable opportunity

hares in La Zacualpa Rubber Planta are not capital stock of a corpora and carry none of the responsi lities and obligations, or liability to of capital stock; but repre nt an undivided interest in the planta itself.

The twelve thousand acres comprising plantation are divided into twelve shares, each share representing one acre of land, and the holders shares in La Zacualpa Rubber Plan are the actual owners of one un ided acre of land for each share held, h a guarantee expressed upon the rtificate by La Zacualpa Rubber Plan tion Company, under its official seal, plant two hundred or more rubber per acre for each share sold, and care for same for a period of five and at the expiration of that time gather the first harvest and deliver net proceeds thereof to the share

n other words, La Zacualpa Rubber Company sells to each share one undivided acre of land in La cualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
13 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

OUR FAR EAST COMMERCE.

Canada's Trade With Japan, Russia and China—What We Import and the Wares We Export.

According to the trade returns of the Dominion Government for the fiscal year ending June 30 last, the aggregate trade of the Dominion, on the basis of goods entered for consumption and exported, with China and Japan, amounted to $2,440,999, as compared with $1,709,856 in 1873. On the value of exports the trade with the same two countries was $501,057, as against $46,466 in 1873.

To Japan our exports in the last fiscal year amounted to $625,146, the most important items of which follows: Coal $3,605, pickled salmon $158,209, planks and boards $68,140, other lumber $640, butter $1,816, cheese $1,076, condensed milk $18,183, fruit, etc. $1,291, grain $480, flour $2,176, books, etc. $1,057, cotton fabrics $20,250, drugs $2,138, fertilizers $3,707, houshold effects $2,254, machinery $1,419, steel and mfrs. $1,150, whiskey $828, metals $6,991, tin manufacturers $4,840, bicycles $6,362, wood pulp $7,588, miscellaneous $7,985.

The total exports to China amounted in the last fiscal year, to $175,776, of which the leading items were: Gold quartz $1,991, planks and boards $57,497, butter $141, cheese $1,734, condensed milk $55,145, peas $770, flour $2,331, cotton fabrics $39,757, other cotton $4,046, drugs $1,398, household effects $4,845, steel and mfrs. $2,300, miscellaneous articles $2,052.

Through the United States we imported from China $89,250; from Japan, $333,993; from Russia, $156,490. Through the United States we exported to these countries respectively $36,432, $11,467 and $187,654. Our exports to Russia are by this route four times as great as to the other two nations combined.

From Japan we imported direct during the last fiscal year:

Dutiable goods	$ 741,135
Free goods	746,316
	$1,487,451

On the $681,669 worth of goods imported for home consumption was collected $222,914.69 duty.

Canada's import trade with China aggregated $512,167, on the dutiable portion of which we collected $133,057.23.

With Russia our import trade totals $205,976, $39,202 being dutiable, and $166,674 free, the duty collected amounting to $6,190.45.

Our main imports from China are as follows: Boots and shoes $6,716, biscuits $592, rice $62,576, rice uncleaned $14,834, rice flour, etc., $564, clothing $2,527, drugs $2,543, chinaware $1,069, eggs $961, fans $675, fireworks $6,307, fish $6,398, carpeting, etc., $419, fruits $722, furniture $630, furs $4,882, mats and rugs $525, packages $9,263, paper pads, etc., $1,753, provisions $5,221, silks $6,000, handkerchiefs $3,722, clothing $1,821, spices $4,042, ginger $4,182, cordials, wines, etc., $15,215, starch $556, carpeting $8,081, sugar candy $1,942, tea $808, tobacco $751, tomatoes, etc., $10,564, wood manufactures $1,246.

Of free imports. Hides and skins $23,402, wool $1,865, florist stock $447, plaits, etc., $2,438, coffee $500, tea $257,767.

The total amount of imports from Russia into Canada during the last fiscal year is $205,876, of which $39,202 only was dutiable, being chiefly: Furs $34,607, Russia iron $676, mats and rugs $502. Of free imports: Hides and skins $9,718.

Our total exports to Russia amounted to $224,583, being in chief: Coal $3,876, lobsters (canned) $8,400, flour $22,019, agricultural implements $121,945, organs $3,440, tin and manufactures $150.

Our shipping with Japan consisted of 26 vessels entered inwards, and 22 entered outwards, with 68,368 and 24,919 tons measurement of freight respectively.

With China, 18 vessels were entered inwards and 9 outwards, and with Russia 1 vessel was entered inwards and 5 outwards.

Miss Hamilton for the Stage.

Says the London St. James' Gazette: "The Right Rev. Charles Hamilton, Anglican Bishop of Ottawa, one of whose daughters has created a sensation by declaring her intention of going on the stage, is of the Hamiltons of Hamwood, County Meath. The head of this branch was Charles Hamilton, youngest son of Alexander Hamilton, M. P., of Knock. His third son, George, went to Quebec, and made his fortune, and many other people's at the same time, by founding the Hawkesbury Lumber Limits, on the Ottawa River. The Bishop, who is his fourth son, came home to Oxford for his education, and is regarded as a learned and pious churchman. He is well known in England."

AUTHORS & COX
15 CHURCH ST TORONTO

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 100 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 400 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

WANTED—GOOD AGENTS IN EVERY CITY,

Lung, Throat and Catarrhal Troubles

Cold in the Head Cured Quickly if You Breathe Fragrant, Healing

Catarrhozone

The ordinary method of treating catarrh by the stomach is a very indirect way and, as experience has demonstrated, a very useless method to employ.

Fragrant, healing Catarrhozone, is breathed. the air, laden with minute particles of this healing balsamic liquid, spreads itself over the whole area of inflammation.

It reaches the very root of disease instantly destroying by its antiseptic properties the germ life which excites and maintains the disease. Its soothing and healing action is at once apparent to the whole diseased surfaces. It cures quickly and it cures permanently.

We affirm that no proprietory medicine has ever brought forth from the people as many voluntary testimonials as Catarrhozone has received.

MRS. M. J. WHITNEY, Clay Street, Topeca, Kan., was cured of nasal catarrh, and say, "I owe Catarrhozone an immense debt of gratitude. It cured me of the most disagreeable catarrh after many doctors had pronounced my case incurable. I do not cough any more, my breath is sweet, and my respiration regular since using Catarrhozone.'

MRS. JAMES TWEEDIE, of Jay Bridge, says; "For years my daughter doctored for catarrh. She had dropping in the throat, hawking, nausea, and could not sleep at night. The first day's use of Catarrhozone benefitted and it cured so the catarrh never returned.'

MR. R. SHELDON, of Leamington, Ont., says; "For two years I unsuccessfully sought a remedy to cure my son of catarrh but permanent results were not attained until Catarrhozone was used. It cured my little boy like magic and he has been quite free from catarrh ever since.'

REV. D. R. SMITH, of Whitehead, N.S., says; "Catarrhozone permanently cured me of chronic catarrh of the nose and throat from which I suffered for many years, I heartily recommend Catarrhozone.'

MR. R. McCALLUM, of Spring Brook, Ont., says; "A sample of Catarrhozone benefitted me more than years of treatment with doctors, and by using the dollar outfit I was completely cured in a few weeks. I recommend Catarrhozone as the most satisfactory cure for catarrh on the market. Every word said for it is true.'

MR. S. T. WRIGHT of Skeads Mills Ont., says; "I had a bad attack of sore throat, with inflamed tonsils and sore chest. I inhaled Catarrhozone and it cured my trouble. I greatly admire its pleasant and soothing effect.'

MR. JAMES FERGUSON, of Perth, Ont., writes;—"I have used Catarrhozone for sore throat and cold in the head and find it is a good remedy. I highly recommend it.'

MISS CLARA B. COLBY, of London, Ont., writes;—"I had a continuous cold in the head for years, and never used anything giving such quick results as Catarrhozone. I am delighted at last to find a remedy that positively cures colds. I strongly advocate Catarrhozone; it cures every time.'

Catarrhozone cures without drugs and disagreeable medicine. It is Nature's cure—soothing, healing and pleasant to use. You simply inhale this medicated vapor of Catarrhozone through a Catarrhozone Inahler and get cured quickly. Two months treatment costs only one dollar. It can be sent by mail and used right at home any time during the night or day. Sold by druggists or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn, U.S.A.

Watch Lost

Lost, on Saturday last, a lady's silver watch. The finder will be suitably rewarded by leaving it at Times Bookstore.

Lady's Wristbag Found

On Saturday night, on George st., a lady's wristbag, containing a small sum of money. Loser can have it by calling at Times Bookstore.

800 Miles on Snowshoes

Mr. George Boucher, of York Factory, and Manager of the Hudson Bay Company's post at that point, visited his parents, Dr. and Mrs. Boucher of Brock street, on Saturday last, and left on Sunday evening for his western home. On his return he will snowshoe 800 miles from Winnipeg to his place of destination.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write to us regarding our correspondence course.

WM. PRINGLE.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

Lost

A ladies' hunting case gold watch with initials "I.M." Lost at the carnival or between the rink and the Munroe House. Finder will be rewarded by leaving the same at the Munroe House. 553t

An Open Meeting

The Royal Templars held an open meeting in their hall last evening, and a goodly attendance was present. An interesting musical and literary programme, consisting of songs and recitations was thoroughly enjoyed by all present.

Lenten Services

Rev. W. A. Gustin, M.A., of Port Hope will have charge of the Lenten service at St. Luke's church this evening. Everyone who knows of Mr. Gustin's excellent ability as an orator speaks highly of him, and the address will be most interesting and instructive.

The Cleat Gave Way

The recent tug of war contest in which the Quaker Oats men were defeated, has encouraged them to more frequent practices, and yesterday at noon while pulling; Mr. Sam Newal had his leg badly sprained. One of the cleats gave way during a pull and Newall fell with two or three other fellows on top of him. He had to be conveyed to his home, when Dr. Halliday attended to his injuries

Single Tax Debate

The Young Men's Guild of St. Andrews church held its regular meeting in the Guild room last night, and the many present thoroughly enjoyed themselves. Each member had the privilege of bringing a friend, and as a result many visitors were present. The programme consisted of a debate on the Single Tax Question, and those of the young men who took part in the discussion, showed wonderful ability in dealing with this great political problem.

A Valuable Work

The Farmer's Handy Book for 1904, issued in connection with The Farming World, Toronto, has just reached us. The book is neatly bound, containing 256 pages of reading matter. On every one of these pages something of vital interest to a farmer may be found, no matter what special branch of agriculture he may be pursuing. The sections devoted to the Soil, Dairying, Live Stock, Poultry Raising and the Orchard, are particularly practical and interesting and adapted to present requirements; every farmer should have this book for ready reference at all times. It is so well indexed that no time need be lost in looking for the information contained in the work."

Ticket Agents' Jaunt

The members of the Canadian Ticket Agents' Association are not superstitious, for they are to begin a trip to the St. Louis Exposition on Friday, the 13th of May next. There was a meeting of the Executive of the association at the King Edward Hotel Toronto, on Monday, when an itinerary prepared by President W. Buntin of Peterborough, and ex-President Jackson, of Clinton, was submitted and adopted. About two hundred and fifty ticket agents will leave London via the Grand Trunk and Illinois Central Railways, and will spend four days at the fair. They will leave St. Louis on Thursday, May 19th, on the Wabash for London, via Detroit.

Father Galvin at Lindsay

At St. Mary's church last Sunday evening, at vespers, Rev. Fr. Galvin, of St. Peter's cathedral, Peterboro, delivered a sermon, taking for his text the words found in the 9th chapter of St. Luke, sixty-second verse, "No man putting his hand to the plough and looking back, is fit for the Kingdom of Heaven." To the young man he would say the same sentiments prevails to-day — no man revelling in the pleasures of the past can afford to look back. He must be whole-hearted in the way of religion. Luke-warmness in God's service will not lead to life eternal—we must love God with our whole heart and soul, strenght and mind. It is commonly said by worldlings, "God will not deal harshly with us—he will not be a severe judge," yet he expects us to earn our reward. The speaker more particularly appealed to the young men and asked them to look back on the many who have started out in life after their first communion, determined to live up to the resolution made then, but who grew careless when forced to mingle with men of the world. He exhorted the half-hearted and luke-warm to walk closer to God and avoid an eternity of torments in hell. God wishes all to be saved and lavishes His grace on us, and in return for our small services to him has a crown of glory awaiting those who love and serve him.—Lindsay Post.

ST. PATRICK'S CONCERT

Grand Concert, Under the Auspices of St. Peter's T. A. S. on Thursday, March 17th, in Bradburn's Opera House. Master Harold Gahan, the Clever Boy Violinist; Also Mr. Robert Wilson, the Celebrated Humorist, of Toronto, Assisted by the Best Local Talent Plan of Hall will be Open on Thursday, 10th at Lynch's Drug Store

HE WILL NOT "CALL AGAIN."

A Citizen Fined for Trespassing—A Costly Morning Call

At an early hour yesterday morning a man under the influence of liquor called at a Rubidge street residence and sought admittance. Later on in the morning he was escorted to the police station by P. C. Adams. Still later on he was ushered into the presence of His Worship, Magistrate Dumble, who dismissed him at a still later hour, $4.50 poorer than when he came in. The charge against him was that of trespass and His Worship claimed that taking whisky to excess was no excuse in law for trespassing. Next time the sentence will be more severe.

—The cheese makers of Peterborough intend holding two public meetings in the Council Chamber at ten and one o'clock, on Saturday next. Mr. G. G. Publow, and Mitchell, of the Kingston Dairy School, will deliver addresses.

A FIENDISH ACT

Young Lady Assaulted on Aylmer Street Last Evening

The second attempt at highway robbery within a week occurred last evening on Aylmer street, above the G.T.R. tracks. A young lady was walking rapidly homeward when an inhuman brute pounced upon her, and after beating her unmercifully about the face, snatched her purse, containing a small sum of money. The ruffian had caught his victim by the throat and commenced pounding the poor girl about the face with his clenched fist. The screams of the girl attracted the attention of a woman who was passing and she immediately called for help. Several citizens who resided near and also heard the screams for help, rushed out just in time to see the scoundrel disappear into the darkness. The police were immediately communicated with and every endeavor will be made to locate the villain.

BREEZY LOCAL BREVITIE

Gathered by The Times Reporters on Their Daily Rounds

—Get your feet wet early and avoid the rush.

—Japan will have to do better in her future bombardments. Any first class hockey match could show up a better list of casualties.

—The regular monthly meeting of the Board of Managers of St. Paul's church, was held in the church parlors yesterday evening.

—Rev. Dr. Macklem, Provost of Trinity College, Toronto, will conduct the weekly Lenten services at St. John's Church this evening.

—The funeral of the late Mrs. Henderson, who died at Nichols Hospital on Sunday night, will be held this afternoon to the Little Lake Cemetery.

—Miss Carey will read a paper on Father Matthew at the St. Peter's T.A.S. Literary Association meeting tomorrow evening.

—The roads and streets are still in a frightful condition, and the recent rain and yesterday's thaw resulted in their being covered with pools of water.

—The large store and warehouse of J. J. Long & Bro., of Collingwood, were destroyed by fire yesterday morning. The loss is estimated at $100,000.

—The hockey season is nearly over and it will take some of the players all summer to get the necessary repairs to their anatomies completed in time for next winter's sport.

The regular meeting of St. Paul's Guild was held in the lecture room of the church last evening, and a most enjoyable time spent by all present. The meeting was mostly of a business nature. Several names were proposed for membership.

—Rev. T. Albert Moore, travelling secretary of the Lord's Day Alliance, drove a horse through a heavy rainstorm, for a distance of ten miles and back, rather than ride on the electric car. If the reverend gentleman had no thought of himself, he should have thought of the poor dumb brute.

—A contemporary recently published an article, respecting the arrival of a crow in the suburbs of Peterborough county, and cited the instance as a notification of spring. A citizen from the South Ward called at our sanctum yesterday and asked that this be denied. "There have been crows in the south end all winter," said the old gentleman. Probably the writer meant a white crow,—or a scarecrow.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Hugh O'Leary of Lindsay was in town yesterday.

—Mr. Walter Oke returned last evening from a visit to Toronto friends.

—Mr. E. C. S. Huycke, ex-mayor of Cobourg, has been appointed county judge.

—Mr. O. A. Langley, barrister, of Lakefield, was in town yesterday on business at the local courts.

—Mr. Bert Downing, formerly of the Peterborough Light & Power Co., left the city yesterday for Muskoka.

—Mr. Scrigley, of the Collegiate Institute staff is confined to his house with a renewed attack of lagrippe.

—Mr. W. A. Smith, of Washington, D.C., who has been visiting his sister, Mrs. T. J. Mowatt, left yesterday morning for his western home.

—Mr. Graham, sr., of Lakefield, was in town yesterday attending the meeting of the Presbytery held in St. Paul's church.

—Rev. J. G. Potter, B.A., of St. Andrew's Church, left for Toronto yesterday to attend the meeting of the Home Mission Committee, in connection with the Presbyterian church.

—At the Snowden—A. M. Stevenson Chatham; B. Steacy, Lorneville; O. McGivern, Toronto; H. Daly, Napanee; O. S. Lord, Grafton; C. Sparling, Toronto; W. Stewart, Montreal; M. R. Rombough, Toronto; W. R. Anderson, Cordova.

MIKADO THANKS COREANS

Declares War is Solely to Secure Peace in East

Tokio, March 9.—The Emperor has sent by telegraph a personal message to the Emperor of Corea informsolely in order to secure permanent ing him that war has been declared peace in the far east and expressing deep satisfaction at the conclusion of the recent protocol which would lead to increased intimacy between the two countries. His Majesty went on to thank the Corean Emperor and his two sons for their munificent grants on behalf of the Japanese troops.

EVERYBODY READS THE TIMES.

The distracting headaches from which so many women suffer make life a daily purgatory. If men suffered with headache as women do, business would be almost at a standstill. Does not the fact that women only suffer from these severe headaches suggest that there must be a womanly cause for them?

When the womanly organism is diseased, headache, backache, nervousness and sleeplessness are consequences which are sure to follow.

$500 Reward for Women Who Cannot be Cured.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

"I took two bottles of your 'Favorite Prescription' and two of the 'Golden Medical Discovery' and am feeling well," writes Mrs. Dan McKenzie, of Lorway Mines, Cape Breton Co., Nova Scotia. "I had uterine trouble, pain in the side and headache. After taking your medicines I got well. You may publish this or use it in any way you think best, as I cannot speak too highly of Dr. Pierce and his medicines."

FREE. Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for the cloth-bound volume. Address Dr. R. V. Pierce Buffalo, N. Y.

COURT OF REVISION

NOTICE is hereby given that a sitting of the Court of Revision of the Town of Peterborough will be held at the Town Council Chamber in the said town on WEDNESDAY, THE 23RD DAY OF MARCH, 1904, at the hour of 7 30 o'clock in the afternoon for the confirmation of the following special Assessments upon property fronting upon the streets and parts of streets named below for the construction of Sewers or of Granolithic Sidewalks on the said streets and parts of streets; and the total amount to be assessed upon the said property fronting upon said streets or parts of streets is, as stated below, namely:—

For the Construction of Sewers—

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ourey knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amont of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

RUSSIANS FORCES WILL NOT ABANDON NEW-CHANG

Will Not Wait the Arrival of Japanese--Main Forces will be Landed Between Port Arthur and Yalu River

London, Wednesday, March 9—A despatch to the Morning Post from Shanghai says that the Russians are not preparing to hold New-Chwang, which probably will be occupied by the Japanese as soon as the ice allows navigation, which is expected to be about March 18. The Japanese mobilization is proceeding methodically and without undue haste. Everything points to the main force being landed somewhere between Port Arthur and the mouth of the Yalu River. A second expedition is being sent to New Chwang. It is probable that the Russians will withdraw from the Yalu and concentrate at a position more suited for meeting an attack. The correspondent repeats the statement that the Russians intend to leave Port Arthur to save itself.

RUSSIANS ON THE DEFENSIVE

According to late reports yesterday evening and last night the Japanese succeeded in capturing and destroying the Russian Vladivostok squadron at sea. This report however has not been confirmed and owing to the indirect manner in which it was reported, it is highly improbable that so much damage was done. In case this report really does prove accurate Japan should have no further difficulty in the transportation of her troops by way of the sea.

The Russians are becoming more cautious and have refused to march into this trap prepared for them in Northern Corea, and it is quite probable that, should Japan land troops at Neuchwang, the former's position on the river Yalu may also be abandoned. The Russians are not anxious to push forward at present, but are content to remain strictly on the defensive, in the land campaign and will await the action of the Japanese.

It is believed in military circles here that Togo's squadron had nothing whatever to do with the attack on Vladivostok, but that the Japanese Admiral will remain on guard off Port Arthur until all the Russian vessels have been destroyed, then. It is quite likely that the Russians will fight hard to prevent the Japanese from crossing the Yalu river, and in event of them doing so there will likely be a repetition of that memorable scene at the Tugela River in the British Boer War.

The St. Petersburg Government is fully convinced that China honestly intends to maintain a strict neutrality, but her recent concentration of troops would endanger such neutrality. The Pekin Government is not sure of its troops. Yuan Shi Kai, the Chinese Commander in Chief, would hardly disobey orders, but it is different when it comes to subordinates and soldiery. It must be remembered that the Chunchus (bandits), who are already beginning to make trouble in Manchuria, are for the most part ex-Chinese soldiers, who deserted; often in entire regiments, and taking modern weapons and even cannon with them, to lead a robber life in Manchuria. If Chinese troops are now stationed on the frontier, there exists danger that at some favorable opportunity they will desert and join the Chunchus. This would make it necessary to detach Russian troops from the front to fight the marauders in the rear, Consequently Russia protests against the concentration.

RUSSIANS REPORTED TO HAVE BEEN DEFEATED

Their Land Forces Near Chemulpo Said to Have Been Defeated by the Japs

Special to The Times.
St. Petersburg, March 9—The Associated Press has received direct advices from Vladivostock since 5 o'clock this p.m. They do not mention an engagement.

Special to The Times.
London, March 10—A despatch to The Times from Wei Hai Wei, dated March 9, says;—

"It is reported on good authority that a collision between Japanese and Russian troops has occurred near Hai Ju, Corea, 54 miles north-west of Chemulpo, which resulted in the defeat of the Russians."

DEATH DUE TO POISONING.

MR. JAS. CRAIG DIED AS RESULT OF EATING SARDINES

Death Occurred at Lakefield Yesterday—Morning—Inquest to be Held This Afternoon.

The sad news reached town yesterday, concerning the sudden death of Mr. James Craig, a young citizen of Lakefield, and a nephew of Mr. J. C. Craig, proprietor of the Craig house, of that place. Previous to his retiring, on Tuesday night, deceased partook of some tinned sardines, and soon after eating them, complained of their peculiar taste. He shortly after went to bed, without feeling any bad effects from his late luncheon.

About 1 o'clock yesterday morning he awakened, feeling very sick and Drs. Baker and Fraser were immediately summoned, but nothing could be done to alleviate the man's sufferings. From the first the physicians saw he was beyond their aid, and the poor man gradually sank until 5.30 o'clock, when he passed away.

Deceased was born in Peterborough 7 years ago, and was a son of the late Thomas Craig, who was well and favorably known in Peterborough County. He married Miss Jamieson, of this city about twelve years ago, and he leaves, in addition to his wife, one daughter, aged thirteen. Deceased was a member of the C.O.F., the A. F., and the Independent Order of Oddfellows.

Coroner Gray left for Lakefield at noon yesterday and an inquest will be held this afternoon at 2 o'clock.

HE DRESDEN FACTORY MAY COME HERE

pt. Jas Davidson Writes that Matter Remains Unsettled—Much Depends on Government.

In reference to an article appeat. in a recent issue of the Morning Times, and quoted from the Chigo Record-Herald, pertaining to e Dresden, (Ont.) Beet Sugar Facry and its removal to Janesville, s., we have been favored with the llowing paragraph, from a letter t received by the Peterborough gar Company, from Capt. Jas. Davon, of Bay City, Mich.;—

"As indicated to you before, there is no question about your ity, or about your locality. Everything there is in good shape, and nobody could find fault with he same. As far as we are concerned, we do not know what will e done, as the proposition is very unsettled at the present time. There are several things that we ave in view and in mind, and perhaps later on one of these will materi...

The above quotation would indicate hat the Dresden Sugar plant is yet necessarily lost to Peterborgh. The Managing Director of the erborough Sugar Company is of opinion that, if the Ontario Govment grants in a few days the ension of the 1-2 a cent per pound unty, Peterborough will yet see the magnificent sugar factory, w at Dresden, Ont.

ANSPORTATION COMMISSION

yor Roger Receives Letter from Chairman of the Commission

The following letter has been reved by His Worship, Mayor Roger, reference to the Transportation mmission,—

at Victoria Sreet,
Toronto, March 8, 1904.

. M. Roger, Mayor, Peterborough, Ont.;

My Dear Sir,—Your favor of the h inst. received this morning, and answer to your questions would that the object of the Transporion Commission is to enquire into d report on the different routes of nsportation from west to east, and e versa, the object being so far as sible to facilitate and cheapen The flow of produce through Canadian ritory; to do this we have to come Canadian with American routes m the west to the ocean, the ipment of Canadian ports in tran- and the different routes by d and water to the St. Lawrence Maritime province ports.

t has been represented to the Comsion that the Trent Valley Canal completed would form the most dit and cheapest route whereby in could be carried from Fort Wilm to Montreal and it is principally bear evidence on this point that propose to sit at Peterborough doubt if the canal were finished re would be incidental advantages manufacturers and others in the trict, and while giving due weight any evidence offered on that point more for the purpose of examining the general question that the Commission was constituted.

You quote universal opinion in the district that the best time to meet would be when the Canal is open during the summer; the work has to be taken up as the Commission can get at it, and while we by no means wish to force a meeting on the 24th of the month, if the date does not suit the parties interested, the meeting can be postponed indefinitely.

Yours very truly,
JONH BERTRAM.

MUTUAL LIFE OF CANADA

34th Annual Report shows Progress During Past Year—Officers Elected

One of the most progressive and flourishing insurance companies in America, is that widely known as the Mutual Life of Canada, which held its 34th annual meeting on Thursday, March 3rd. In all branches the business of the year was most gratifying, and that the new business was largely in excess of that of any other year in the history of the company, is ample evidence of its increasing popularity. The surplus earnings were such as enabled a continuance of the same liberal scale of distribution to the policyholders as in the past. The death rate was much below the expectation, and the lapses and surrenders were comparatively moderate.

The applications for new business numbered 3,518 for $5,178,112, of which 47 for $72,500 were declined, and the amount of insurance now in force is $37,567,551.56, under 25,730 policies, being an increase in amount of $3,118,631. The net income from premiums, less reinsurance, was $1,254,966.47, and the total income amounted to $1,561,070.03. The total assets of the Company are $7,296,552.12, being an increase over 1902 of $838,772.04. The surplus of the Company's standard of valuation is $616,633.46, and on government standard, $878,466.

During the year 1903 the demand for money was most active, and the funds were fully invested, at an increased rate of interest, and in a class of securities entirely outside anything of a hazardous or speculative character. The payments on principal and interest were unusually well met, there being only $5,998 overdue interest at the end of the year, most of which has since been paid.

Considering the above handsome standing, together with the straightforward, honest manner in which the dealings of the Company are carried on, it is to be expected that the current year's business will show a still more substantial increase. Mr. J. F. Willcox, of Water street, is the Company's representative for Peterborough County, and he will be pleased to furnish full particulars to any desirous of taking out insurance.

Local Sports

HOCKEY.

The Wm. Hamilton Colts are expected to play the American Cereal Company's team in the near future.

The Brandon team were defeated at Ottawa last night in the first game for the Stanley Cup by a score of 6 to 4.

Two teams of Peterborough ladies will play hockey this evening, under the names of the "Japs" and the "Russians." We may expect a rushin' business. It is expected that the spectators will divide their support, as it would hardly be safe to favor either Jap or Russian in this case.

The line-up will be as follows,—

Japs —Goal, Jean Scott; point, Frankie Burritt; cover, Annie Burnham; centre, Edith Scott; left wing, Linda Hall; right wing, Allison Hamilton; rover, Lulu Scott, (Capt.)

Russians—Goal, Mary Sheffield; point, Maude Bogue; cover Mona Cavanah; centre, Gwen Hall; left wing, Irene Perks; right wing, Vieva Hunter; rover, Gertrude McClellan.

Referee—Horace W[illegible]

The Sporting Editor of the Belleville Intelligencer had a couple of hours spare time recently, and thought to compose something witty. After the loss of several handfuls of hair and the loss of much perspiration, he at length threw down his pen, mopped his brow, combed his hair, stood before the mirror and read;

"Taken altogether, this has been the worst season the O.H.A. has ever known. Here is the junior championship not decided yet, and the Kingston Beechgroves, prospective champions, haven't had a game for three weeks. They have been waiting so long for a game with Listowel that the Kingston lads have nearly forgotten how to play. It really does appear that the O.H.A. should confine itself to towns and cities on the main line of the railroad. These little Jim Crow places like Listowel, Pumpkinville, Peterborough, etc., which, owing to the snow blockades, have to be reached by dog sleighs, should be put into a back country league and allowed to play for a load of hay, or something like that."

The man who writes the sports felt satisfied. He forgot that on a busy day in the Mute city a cannon could be fired down the main street and nothing would be struck but a load of hay or a stray cow. Even the principal citizens never boast of their town. They are "mute" on the subject. If Belleville thinks she can furnish a better team than Peterborough, let her trot them along any old time, and they'll get the severest drubbing they can stand. It is a good thing for Belleville that the import duty is not too high.

A meeting of the Old Country Wanderers' Club was held at the Crown Hotel last evening and a good representation of members was present. Not much business was transacted, but arrangements were made to commence practice on April 1st, for which temporary grounds have been procured in the Fifth Ward, but the club hopes to have permanent grounds in the near future. It was decided that the team should enter the Midland League and Messrs. E. W. Allan and E. Head were appointed delegates to attend the meeting, to be held on Saturday, March 19th.

The annual meeting of the Midland Football League will be held on Saturday afternoon, March 19th, in the Y.M.C.A. hall, and representatives of each club desiring to enter the League are requested to be present. It is expected that many more clubs will join this year than there were in 1903, and the meeting is being held early in order that the schedule may be arranged before the season opens.

LACROSSE.

A meeting of the Havelock Lacrosse club was held at that town last week for the purpose of reorganizing and discussing the advisability of forming a Trent Valley Lacrosse League, consisting of Peterborough, Belleville, Hastings and other towns in this district.

CURLING.

Two intermediate games in the Kendry Cup series were played on Tuesday evening.

The scores and rinks were;

E. H I	G. Stevenson
D. Hall	T. Brightman
H. Morphet	T. J. Mowat
J. Connal, skip 14	S. Clegg, skip 9
McInto..	E. Cox
Mather	A. Parker
R. Sturgeon	F. Lount
R. Kerr, skip 12	R. Neill, skip 1..

A scratch match was also played last evening, resulting,—

R. J. Kidd	R. J. Winch
W. Smith	J. Gibson
H. P. Kennedy	Dr Wrightman
W. G. Morrow, s 11	W. Thompson, s 6

The cold spell of yesterday was heartily welcomed by the curlers as it will enable them to play off the postponed game with Orillia for the Sheppard-Neill trophy. The skips will likely be the same as announced last week.

INTERESTING LENTEN SERVICE.

Rev. Mr. Gustin, of Port Hope, Delivered Most Able Discourse

At the regular Wednesday evening Lenten service at St. Luke's church last evening, Rev. Alfred W. Gustin M.A., of St. Mark's church, Port Hope conducted the service. His subject was, "Thou Shalt Not," taken from the 17th verse of the 2nd chapter of Genesis.

None of us like to be told that we must do this or that. We much prefer to do as we please. We also dislike to feel that we can't do as we like. Yet in both the moral and physical world we are brought face to face with the necessity of personal restraint and the duty of self discipline, contrary to the common though careless idea that by the opposite course true freedom is realized, honesty forces us to admit that true freedom is realized only by the exercise of self-restraint or discipline. Man's true position is found and human need manifested in accordance with this law.

A review of the human race justifies this view. In Eden there stood before our first parents the danger signal, "Thou shalt not." Eight of the ten commandments begin in a similar way. The history of man's fall and the story of his redemption proclaims the glory of restraint and self-control. By the one, Paradise was lost, and by the other Paradise was regained. Relations with our fellowmen teach the same doctrine. One man's liberty ends where his neighbor's rights begin and one of the greatest needs of the day is to bring forward into its proper place the spirit of "Thou shalt not," and to enforce its legitimate discipline in thought, word, and deed and to bring himself completely into the obedience of Christ, the great teacher, and exemplar. It is especially the wisdom of the Christian to bow to this law of God, most natural and revealed. It is his duty to follow the example of Christ, who pleased, not Himself, but for us endured the discipline of the wilderness and the cross and likewise bids us to take up the cross or burden of restraint and discipline and carry it, to do which he supplies his grace, so that it becomes to the true follower even easy and light.

The difficulties, and things hard to be borne, will have proved, not hindrances, but helps to perfect freedom, and aids to development in regaining the Divine likeness, even the measure of the Perfect Man, the measure of the stature of the fullness of Christ

IGNORES BRITAIN'S ADVICE

LONDON GOVERNMENT ANXIOUS TO AVOID CLASH

Various Nations Desire to Confine Theatre of War to Manchuria and China

Berlin, March 10.—It is said in diplomatic circles at St. Petersburg that Count Benckendorf, the Russian Ambassador in London, in a recent conversation with Lord Lamsdorff expressed the conviction that Great Britain, far from exciting Japan to hostilities, exerted herself to prevent an outbreak of war. It was to her own interests, Count Benckendorff asserted, that Great Britain desires peace, but her counsels were ignored by Japan.

The ambassador said in regard to the Thibetan question that Great Britain, which required several years to recover from the effects of the South African war, had no intention of entering into a serious quarrel with Russia. On that account, in Russian communications to the continental press, the Russian Government has reasons for believing that both Great Britain and France are endeavoring to prevent an extension of the theater of war beyond Manchuria and China. As, however, neither they nor the other powers associated with Italy's recent proposals can undertake to guarantee the neutrality of China it is feared that before the war is many months older China will break from the leash and enter the conflict on the side of Japan.

Even in that eventuality Russia diplomats declare that such action in its present form, in view of assurances from London, does not render necessary any immediate counter demonstration in Central Asia, which is a part of Russia.

St. Petersburg, March 10.—The Novosti prints a significant editorial article which is very conciliatory toward Great Britain. The paper argues that the understanding between the two countries with regard to an Asiatic policy will assure peace in Asia, without which normal development of Russian and British interests there would be impossible. If Great Britain, the Novosti says, would agree to an outlet for Russia to the Indian Ocean, Great Britain's possessions in India would be unconditionally guaranteed by Russia.

The Novoe Vreyma also discusses the offers of British friendship, but with bad grace, saying; "John Bull believes he has a better chance of reaching the winning post with Great Britain and Japan in double harness than with a troika, including the American mustang."

USED FALSE LIGHTS

And Took the Russian Ships Unawares After Crews Had Retired

St. Petersburg, March 8.—A letter from an officer of the Russian cruiser Pallada has been received here describing the first attack by the Japanese upon Port Arthur. The writer denies the story that the officers of the Russian fleet were ashore and confirms the statement that the Japanese made use of false lights.

He asserts that at 11 o'clock at night a practice drill to repel a torpedo attack was executed and that toward midnight four Russian torpedo boats, which simulated the enemy headed back towards Dalny, from which place they had come. The crews of the fleet had retired, only the watch remaining on deck. The ships were in the outer harbor, and the captain of the Pallada, which vessel occupied the advanced position had descended from the bridge for a last look around before going below, when he perceived lights advancing. The ship's lights shown were white above red, being those of the Russian warships when entering the harbor.

The captain of the Pallada supposed the approaching vessels were the Russian torpedo boats returning from Dalny, and his suspicions were only aroused when upon drawing nearer they covered and uncovered their lights at irregular intervals. The signal tower signalled that the lights were not understood.

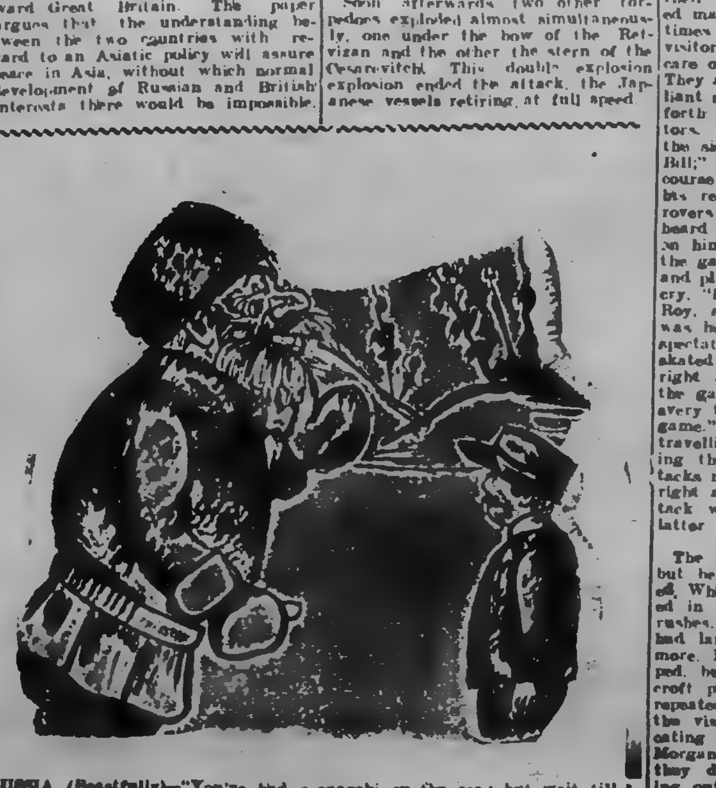
At this moment the Pallada's captain, through the thick night made out the outlines of the torpedo boat destroyers smokestacks, in pairs, amidships. As the stacks of the Russian destroyers are in line fore and aft, the crews of the Russian ships were instantly called to quarters.

In less than three minutes the Pallada's men were at their posts orders were given that the guns be charged with grape and a fierce fire was opened on the on-coming Japanese.

The battleships Cesarevitch and Retvizan, which were in the first line, a short distance astern of the Pallada, also opened fire almost immediately.

A terrific explosion occurred under the hull of the Pallada, raising a torrent of water, which submerged the cruiser's deck, but did not stop her firing or manoeuvring, which now, however were complicated by the measures taken to close a breach amidships, below the water-line, made by the explosion of the torpedo.

Soon afterwards two other torpedoes exploded almost simultaneously, one under the bow of the Retvizan and the other the stern of the Cesarevitch. This double explosion explosion ended the attack, the Japanese vessels retiring at full speed.



RUSSIA (Boastfully)—"You've had a snapski on the sea; but wait till I get you on the landski."

TOO MANY FOR THE MARLBOROS

Peterborough Seven Outclass the Senior Dukes Last Night

THE SCORE WAS 20 TO 4

The Visitors Did Not Have "A Look In" At Any Stage of the Game

The hockey match last night between the Marlboros, the senior champions of the O.H.A., and the Peterborough septette resulted in a win for the latter by the overwhelming score of 20 to 4, the half time score being 10—2.

The visiting team have won great fame as a hockey aggregation, and as well as being senior champions distinguished themselves last Monday by winning the city championship of Toronto. They were also considerably heard of in hockey circles when they went after the Stanley Cup, but which they failed to raise from the present holders at Ottawa. Great things were expected from the locals last night, and they certainly covered themselves with glory.

That the Peterborough team are capable of travelling in senior company last night's score indicates. The visitors were without the assistance of Tom Philips and Charlton, who were replaced by Brown and Clemes.

There was a good crowd present to witness the game, which was delayed until about nine o'clock owing to the train not being on time, but it was a good natured crowd—and how could they help being anything else but good natured—for the Grasshopper Club was there, under the able leadership of Moses Lowry, who was greatly assisted by bass soloist "Beefen" Rogers. These young choirsters have taken great pains in training the minstrels to the high efficiency they have attained and for 15 or 20 minutes before the game was called those present were entertained with such selections as—

"One grasshopper sat upon another grasshoppers' back," to the tune of "John Brown's body lies," etc; composed by Texas Kennedy.

In fact the game was interspersed at intervals all through with choruses from the small boy to the old man—they all had hockey fever.

The ice was in good shape for fast hockey, and the locals played it, for the visitors were outclassed from the first sound of the bell to the finish, although in the second half the game was much faster than the first. For the visitors, Giroux in goal, played a good game, and did some clever work, but it was impossible for him to do anything with the shots poured in on him by the local forwards. Brown, at point, played a good game and Reid, Winchester, and Birmingham showed up fairly well on the forward line, but could not at any stage of the game cope with the Peterborough defence—they were simply out of their class.

Mercer in goal for the locals, stopped some hot ones and cleared well, and certainly was the pick of the two goal tenders. Howell, at point, and Bill Cavanah at cover point, played their usual good game and intercepted many a dangerous attack which at times looked like a sure thing for the visitors, but the old reliables took care of everything coming their way. They also figured in a number of brilliant rushes up the ice, which brought forth loud applause from the spectators. And at intervals a voice from the side would call out, "Look out Bill;" or "Take it up Eddie." Of course Harold Armstrong sustained his reputation as one of the best rovers in the game. The visitors had heard of him and had their eagle eyes on him. Whitcroft, at centre, was in the game from the "drop of the hat" and played a very fast game. The old cry, "Bring her up Mag," or "Shoot Roy, shoot," time and time again was heard to come from the excited spectators; and Roy did shoot. He skated with heaps of speed and was right after the rubber throughout the game. Harry Morgan was there every time and played a "horse of a game." He checked back hard, travelling from end to end, assisting the defence considerably in attacks made by the visitors. He was right after Giroux every time an attack was made, which worried the latter considerably.

The game started in with a rush, but before half a minute had expired, Whitcroft scored. The next started in with a series of end to end rushes, but in six minutes Morgan had landed another, followed by one more. Morgan shooting, Giroux stopped, but failed to clear, and Whitcroft put it through in 3 minutes, repeated again in 10 seconds. Then the visitors tallied, Birmingham locating the net in four minutes, but Morgan offset this in 1 min. Then they did come fast, the visitors being outclassed. Whitcroft tallied in 1-6 a minute; Roy Armstrong twice in 2 and 4 minutes. It was time to give the visitors a look in, and Birmingham scored, but Roy Armstrong put in another twister which dazzled Giroux and found the net. Then Morgan landed one, and the spectators lost track of the score, but it is said that it was 10—2 at half time—and say, they "Rolled the Old Chariot Along," and the Grasshopper Club got in their work. It was whispered by one in the crowd—thought to be a Toronto sport—that the Marlboros had met with one of the biggest surprises since they entered hockey. In the second half the visitors were determined to make a better showing and the game was faster, but the locals had speed to burn, and seemed to score almost at will. In this half a fine exhibition of combination was displayed by the locals' forward line, the visitors defence being unable to do anything with them. They broke through time after time bringing the disc down the whole length of the ice. Now and again Cavanah and Howell would take a run up to keep themselves warm. The scoring in this half commenced with a neat piece of combination in which Roy and Harold Armstrong figured principally, Harold scoring on a pass from Roy. Then the man at the score board was kept busy chalking them down, for 9 more were added for the locals, the visitors adding two to their number, the score at the finish being 20 to 4.

Following is the line-up;—

Peterborough		Marlboros
	Goal.	
Mercer		Giroux
	Point	
Howell		Brown
	Cover Point	
Cavanah		Earls
	Rover.	
H. Armstrong		Reid
	Centre.	
Whitcroft		Birmingham
	Right Wing	
R. Armstrong		Clemes
	Left Wing	
Morgan		Winchester
	Goal Umpire.	
Kenner		Johnston
	Timekeeper.	
McCabe		Waghorn

Referee—Wasson.

Cavanah and Harold Armstrong were the only two on the fence.

A feature of the game was the speedy skating of Roy Armstrong. He had speed by the yard and fairly threw it at the visitors. He and Morgan figured frequently in some very effective combination plays.

Fred. Whitcroft's man had certainly "got a line on him" for he stuck to him like glue, but "Mag" was too many for him.

The much talked of Giroux can't hold a candle to Bob Mercer.

Harold Armstrong certainly had his man "all in" at the finish.

Eddie Howell and Cavanah just picked the rubber off the visitors' sticks. They had them going.

Mr. Kenner carries a cane. He was struck on the foot by one of Roy Armstrong's hot shots.

Wonder what excuse the visitors will give for such a beating! Five of the team figured in the game for the Stanley Cup and for the championship of the city of Toronto, Clemes, who replaced Philips, is a senior man and played in senior company all season.

Birmingham and Reid were the pick of the visitors.

ENGLAND'S VIEWS

English M. P. Says Treatment of Warships Should be Defined

London, March 8—Two most interesting questions were answered by Premier Balfour in today's Parliamentary papers giving replies to questions.

One raised the question of the use of neutral ports by belligerents. The member who asked the question referred to the use which Russian warships recently made, and are still making of the ports of Candia, Suez, and Port Said and suggested the desirability of communicating to the neutral powers possessing seaboard on trade, routes between Great Britain and the East, particularly the Mediterranean and the Red Sea, the views of his Majesty's Government as to the duties of neutrals in regard to the treatment of the warships of belligerents seeking to use neutral ports in connection with operations interrupting trading ships of neutral powers.

ADMITS ITS IMPORTANCE

Mr. Balfour, while not explaining the Government's attitude, admitted that the points raised were of the tion on the ground that some mem- greatest international importance and said they were receiving the attention of the Government.

In reply to the other question, Mr. Balfour said; "The declared policy of his Majesty's Government does not include the taxation of food, and it is is not proposed to deal with the fiscal question during the currency of the present Parliament."

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotency, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room
Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 10, 1904

JOHN BULL PROTECTING HIMSELF

Great Britain has now completed a treaty of arbitration with Spain. The three principal Mediterranean powers—Italy, France and Spain—are thus under special agreement not to quarrel with Great Britain beyond the limits of a law suit if it can possibly be avoided. These three treaties of arbitration, if backed up by sympathetic diplomacy on the part of Great Britain, as they undoubtedly will be, are likely to be strong elements of peace in western and southern Europe. They undoubtedly strengthen the position of Great Britain in the Mediterranean Sea.

Rich, Red Blood, Basis of Health

Strong Blood Fortifies the Nerves, Strengthens the Heart, Keeps You in the Swim. How to Nourish the Blood

To keep abreast in the unceasing race that confronts us, both energy and reserve strength are essential. Strength is power. Power is money—that's the way we resolve it today; yet even when evidence of failing strength and dwindling power becomes manifest, very few of us face the actual condition and deal with it as we would with something involving monetary value.

Thousands of people are falling behind in the race of life simply because they are failing in strength. Instead of using Ferrozone, which revitalizes all the functions of the body, forms rich, red blood, improves digestion, thereby renewing vitality and endurance, they simply drift along until the doctor or undertaker confronts them.

If Ferrozone was unpleasant to take, or if its action were not immediate and permanent, if physical improvement were not of the highest value to the individual, there might be some excuse for deferring the use of this remarkable tonic.

If your health is inconsequential, then Ferrozone may be dispensed with. But if health and vigor give you more power and comfort, can't you see the foolishness of denying yourself the many advantages of using such a grand medicine?

Do the fair thing by yourself, go right to your druggist and get Ferrozone. You will then know what perfect health, good spirits, and strong nerves really mean.

Ferrozone, like other good things, is grossly substituted, so insist on getting Ferrozone, which is prepared in tablet form and sold only 50c. boxes, six boxes for $2.50, at all dealers, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn. U.S.A.

ANOTHER LYNCHING

The Mob Stayed Up All Night Stoning the Corpse

Springfield, Ohio, March 8—All night crowds of men and boys passed the body of Richard Dixon, who was lynched by a mob last night, hooting at it and occasionally firing a shot or throwing a stone. The negro residents of the city, with few exceptions went to their homes upon learning of the lynching. A few of them, however, were with the mob to the end, and seemed to enter into the night's work in the same spirit as the white men.

Dixon's body is literally riddled with bullets. The few remnants of clothing still hanging to him flutter in the wind like rags.

While the whole affair was done in the glare of electric lights, no masks were used, and handkerchiefs were not even resorted to by any of the men to conceal their faces. It is nevertheless the general opinion here that it will be a difficult task to secure the conviction of any of the participants in the tragedy.

The affair is greatly regretted by the better class of citizens, although there is no attempt made anywhere to conceal the gratification at the outcome.

A NEW CANNON

For the British Army—Unrivalled in Europe

London, March 8—On formally introducing the army estimates for the coming year in the House of Commons yesterday, War Secretary Arnold-Forster announced that a new field and horse artillery gun had been adopted. The Secretary added that it would be unrivalled in Europe. It was hoped to complete 108 field guns and 18 horse artillery guns during the financial year. Practically the whole of the first year's supply of the new guns would be sent to India, which was the only possible place of contact with a great European army, and the place where long ranges were common. The guns would fire 18 1-2 and 12 1-2 pound projectiles.

A new rifle was also in course of manufacture, the Secretary further announced, and India would take 71,000 stands thereof the coming year.

The Mutual Life of Canada

34th ANNUAL REPORT

PRESENTED TO THE ANNUAL MEETING OF POLICYHOLDERS THURSDAY, MARCH 3, 1904

Gentlemen,—Your Directors respectfully submit for your consideration their report of the business for the year ended December 31st, 1903, with the *Financial Statement* duly audited.

We are pleased to inform you that, in all branches, the business was of a most gratifying character, and the new business was largely in excess of that *of any* other year in the history of the Company. The Surplus earnings were such as enabled us to continue the same very liberal scale of distribution to the Policyholders as in the past. The death rate was slightly in advance of that of 1902, but still much below the expectation. The Lapses and Surrenders have been gradually decreasing for some time, and for the past year were comparatively moderate.

NEW AND OLD BUSINESS.—The applications received for new business were 3,518 for $5,173,112, of which 47 for $72,500 were declined. The Policies issued were 3,333 for $5,011,300, and the amount of insurance now in force is $37,587,551.58, under 25,790 policies, being an increase in amount of $3,118,631.

INCOME.—The net premium income, less re-insurance, was $1,254,986.47; Interest and Rents, $306,007.48; Profit and Loss, $76.08; Total Income, $1,561,070.03.

PAYMENTS TO POLICYHOLDERS.—The payments to Policyholders were; Death Claims, $253,536.95; Endowments, $122,587; Purchased Policies, $31,972.18; Surplus, $77,300.28; Annuities, $8,274.90; Total, $493,721.31. Expense Account, $282,728.43; Total Disbursements, $776,449.74. Excess of income over expenditure, $784,620.29.

The Cash Assets amount to $6,882,953.83; the Total Assets are $7,298,552.12, an increase over 1902 of $838,772.004.

LIABILITIES.—The total Liabilities are $6,676,224.19, including the requisite reserve of $6,617,714.80 for the security of Policyholders, computed at 4 per cent., 3 1-2 per cent., and 3 per cent.

SURPLUS.—The Surplus of the Company's standard of valuation is $616,633.46, and on Government standard, $878,465.00. The increase in Surplus is $117,483.22.

During the year the demand for money was active, and the funds were fully invested, at a somewhat better rate of interest, and in a class of securities entirely outside anything of a hazardous or speculative character. The payments on Principal and Interest were unusually well met, there being only $5,996 overdue interest at the close of the year, most of which has since been paid.

Thw Executive Committee examined all the securities, and compared them with the records, all of which were found correct, and in accordance with the statement herewith submitted.

The Manager, officers, and Staff continue to discharge their respective duties to the satisfaction o the Board.

You will be called upon to elect our Directors, in the place of the Hon. Mr. Justice Britton, Francis C. Bruce, M.P., J. Kerr Fisken, and Geo. A. Somerville, whose term of office has expired, but all of whom are eligible for re-election.

On behalf of the Board,

ROBERT MELVIN, President.

GEO. WEGENAST,
Manager.

The growth of the Company during the past year may be seen in the following table;

	1902.	1903,	Increase.
New Assurance	$ 4,627,878	$ 5,011,300	$ 483,512
Assurance in Force	34,468,920	37,587,551	3,118,631
Income	1,391,099	1,561,070	169,971
Assets	6,459,780	7,298,552	838,772
Surplus (Company's standard)	499,150	616,633	117,483

The record of progress during the past thirty years is shown in the following figures for each five-year period;

Year.	Income.	Payments to Policyholders.	Assets.	Surplus.	Assurance.
1873	$ 16,435	$ 2,667	$ 23,144	$ 5,624	$ 701,000
1878	59,277	12,487	142,619	29,149	6,752,719
1883	199,182	56,223	533,705	43,761	12,041,914
1888	398,075	121,507	1,313,853	90,337	12,041,914
1893	626,208	212,272	2,593,424	238,120	17,751,107
1898	923,941	359,975	4,136,129	271,196	23,703,979
1903	1,561,070	493,721	7,298,552	616,633	37,587,551

The various reports having been adopted, the retiring Directors were unanimously re-elected. After a number of able and thoughtful addresses had been made by members of the Board, prominent Policyholders, the agents, and others, the meeting adjourned.

The Directors met subsequently and re-elected Mr. Robert Melvin, President; Mr. Alfred Hoskin, K.C., First Vice-President; and the Hon. Mr. Justice Britton, Second Vice-President of the Company for the ensuing year.

(Booklets containing full report, comprising lists of death and endowment claims paid, of securities held, and other interesting and instructive particulars are being issued and will in due course be distributed among Policyholders and intending insurants.)

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuoble. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

Pleasure in the home is increased wonderfully by the presence of a perfect piano. There is a charm about the

Heintzman & Co., Piano

that makes it essentially a home instrument.

Art is shown in every line of its construction. The polish and finish of the exterior ot this instrument is only equalled in beauty by the marvellous purity and richness of its tone quality.

The construction is complete and exact and the mechanical action is unsurpassed.

As an instrument that appeals to people of culture and refinement this piano has no equal.

WORTH WHILE.

Oh, they were pleasant, the ways that you
walked with me!
Roses ne'er bloomed as they bloomed in
those days!
Oh, they were pleasant, the days that you
talked to me!
Birds never caroled so sweetly their lays!
Oh, they were pleasant by day and by
night!
The world—never world was so full of delight!

Glad were the evenings your sweet voice
rang out to me!
Heaven was open, and angels peeped
through!
A thrush in the thicket out yonder sang
out to me!
The breeze brought sweet perfume to me
and to you!
And, oh, life was glad! no heart hath
throbbed high
As my own heart then throbbed at the look
from your eye!

And, oh, I was glad! and the whole world
seemed glad to me!
"Glad?" Why not glad, since I lived and
loved you?
And never a rift in the lute made life
sad to me
And never a doubt flecked your eyes
bonny blue!
Life was enchantment! a dream! and
worth while!
When my soul spread its pinions and
basked in your smile!

—I. M. Lewis, in Houston Post.

The Minister's Wooing

By JULIA TRUITT BISHOP

(Copyright, 1903, by Daily Story Pub. Co.)

"LAND!" said little Mrs Darrow, who the new boarder had irritated to the last degree.

Somehow, it had come to be understood that every single minister of her persuasion should board with Mrs. Darrow; and that without exception they were all benedicts when their term of incumbency had expired. Her husband had been a minister, in the first place, and though he had passed to his reward many years before, her house was still a home for all the brethren who wandered her way. The last minister, a widower of several years standing, had been mothered by Mrs. Darrow, and by her had been introduced to that pretty Mrs Ingle, who was just laying aside "second mourning" and venturing into the lavender which was so becoming. As a result, they had been married just before the annual conference which called him to another fold. It was conceded that Mrs. Darrow had some talent as a match-maker. Mrs Darrow had heard it whispered about, herself, and while denying that she had anything to do with it, there had been a twinkle in her eyes. It was not good for any man to live alone, least of all a minister. She had been a minister's wife—she hoped she knew what was best for all of them.

And now had come this tall and handsome man of 30—and still unmarried! On Sunday, Mrs. Darrow, from her coign of vantage in the Amen corner, looked abroad over the congregation and saw what a large contingent there was of devout young women; picture hats waving airy plumes; curling tendrils of hair; eyes softly drooping; flushed cheeks—she knew all the signs of interest in a Christian life that were visiable when the minister was young, did that astute little woman in the amen corner. Why, there was even old Miss Fannie Jennings, in the very first row, hanging on every word the minister uttered, with such a look!—and casting scornful glances between whiles at the younger sisterhood. "She'll come to see me now from morning till night," said Mrs Darrow to herself when she should have been thinking of higher things, and after she had marked the text in her Bible she wandered off mentally into a thoughtful review of the picture hats and the faces under them.

And Mrs. Darrow and circumstance proceeded to lay traps for the Rev. Marcus Fairing. When he emerged from his study at the call for dinner, blushing young ladies were there, beruffled and white-aproned and pretending to help Mrs. Darrow serve the meal; and the Rev. Marcus ate absently and went back to his study without even an apology. When he was ready for prayer meeting, on Wednesday evening, and came forth to walk to the church with Mrs. Darrow, white garments glimmered through the moonlight, and Mrs. Darrow said innocently:

"Oh, Mr. Fairing, Daisy came over this evening, and I made her stop and go to prayer meeting with us."

And the young minister walked beside Mrs Darrow and helped her over the rough places, and talked to her; and a pretty girl went home from prayer meeting with flushed face and tearful eyes.

Mrs Darrow talked in the most impersonal manner, at the Sunday evening table:

"Juliet Marcy sent me word to come by for her this evening—but it is so far out of my way—and I find that I don't get about as easily as I used. It is such a pity—she won't have any company."

The minister looked up in surprise. "Mrs. Dane lives next door to Miss Marcy—and never fails to be at church," he said. Mrs. Darrow was filled with resentment. "I can't see why a minister shouldn't think about saving the girls and young women of his congregation," she said to herself. "Of course he'll never be able to do as much good, holding himself aloof this way. It's enough to make heathens of the girls, that's what it is."

But when she intimated something of the kind to him, in a more abstract way, there was a gleam of something that might have been laughter under his lashes.

"I feel quite sure that my work doesn't lie among the young ladies," he said absently. "Somehow, I don't feel called that way. Perhaps the next minister will be an older man—one who has been set aside by Providence for this particular—"

But Mrs. Darrow had flounced out to the kitchen for more biscuits, and the minister did not finish his speech. He went to church with Mrs. Darrow that night. Miss Juliet Marcy came in very late, with one of the little Dane boys, and was distinctly cool to Mrs. Darrow.

But never mind. Mrs. Darrow had met all these rebuffs with a feeling of triumph. There was still Maggie Clyde. He had never seen Maggie yet. Maggie was the best girl in the world—the best and sweetest, and almost the prettiest. What minister could want more than a girl who had sacrified the pleasures of youth for the sake of an invalid father, for whom she cared day and night. There never was such a girl as Maggie—and this was the kind of marriage that would be certain to be made in Heaven. She mentioned Maggie to him in the most incidental way. *Not for worlds would Mrs. Darrow have him believe that Maggie was to be won by any man alive*—so devoted was she to her father. Her only thought was to get some one to take care of the old man for a few days, and give little Maggie a rest. She needed it, poor girl.

Next day the minister looked into the face of pretty, demure Maggie Clyde. Long watching had made her pale, and had set dark circles under her eyes; and Mrs Darrow hastened to explain that poor Maggie was worn out with caring for her father, and she had brought her in for a rest.

And the minister murmured a polite speech, after which he searched for a book he had misplaced, and found it, and went to his study.

If Mrs. Darrow shook a small fist in the direction of the study door when no one was looking, who can wonder? But there was still to-morrow—and who could tell what would come to pass? Certainly, there was not an unmarried minister on earth who could resist a girl like Maggie, if he were given time enough, and Mrs. Darrow meant to give him time. They had employed an old man to take care of Maggie's father for one whole week. Much may be accomplished in a week. If it were necessary, Mrs. Darrow would extend the week to another week.

So the days passed, and at every turn Rev. Marcus Fairing came upon the pretty, quiet girl, who went about the house helping Mrs. Darrow, and every day he attended to his duties in the most humdrum manner, and did not abate one visit to snuffy old women or tiresome old men, or leave off a page of his daily reading. Mr. Darrow began to pass sleepless nights.

"I knows what I'll do!" she declared to herself at last. "I'll send for that baggage, Lena Morrison. Think of a girl like that being a niece of mine! Let him see a real society butterfly once in contrast with little Maggie—and then maybe his eyes'll be opened."

A hurried note of invitation was dispatched the next morning, and as hurriedly accepted.

"She's worn out with her season's gayety, I suppose," said Mrs. Darrow, grimly to Maggie. "Such a girl!—parties and theaters and receptions and journeys—and I hear that this winter she's been gayer than ever. Well, it'll be an experience for you—and for the minister, too, I should think. I only hope she won't drive him away from the house with her frivolity."

They were just arising from the table the next day, when there was a commotion out at the front, and a sound of light footfalls and rustle of skirts, and she came running in—a girl from another world. She tossed her hat away as she came. It was a moment or two before her eyes had grown accustomed to the darkness, then she saw the tall figure at the other side of the table, and the pallid face, and the somber eyes that were gazing at her.

"And you are here!" she cried, drawing herself up and speaking with bitter emphasis.

"You also," he replied. He was very sad.

"I can easily return," she retorted angrily. "I was not expecting to find you here."

"Stay, I beg of you," he answered. "I will go, instead. You must know that I had no wish to see you again."

She flashed an amazed look at him and then broke into a laugh, and moved toward the door. It might have been the laugh that made him start as though he had been stabbed, but in an instant he was before her.

"Wait," he cried. "I said what was not true. I have never ceased to wish that I could see you again, if it were only for a moment. I knew you were not for me—you had no need to tell me that—with such pride—but you see that I am glad of this chance—whatever brought it about—just to look upon your face again—and to tell you that I have loved you as no man will ever love you again. That is all—now I can say good-bye."

She had turned away from him, and her hand was on the knob. But she did not open the door. She stood there for a long time. After awhile she whispered, without turning her head:

"Mark!"

He held out his hand toward her, tremblingly.

"Do you think," she said, with the look of an embarrassed child—"do you think—that you could bear with my faults for awhile—and give me a little time—to be good?"

It was Maggie, pale little Maggie, who touched Mrs. Darrow's shoulder.

"I am going home!" she whispered.

But Mrs. Darrow sat motionless, staring toward the door with dilated eyes.

"Land!" was her only remark.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:

J. R. CHAPTON, - - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX J. CHAPTON, - - - - - - Treasurer

Trustees

J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever nonassessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded sixteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

JAPAN READY TO STRIKE ON LAND

Blow will Again Surgrise and Shock Russia--Know What They are About to Do

Special to The Times.

Tokio, March 7—Affairs have been very quiet here after the excitement consequent on the opening victories of the war. The Japanese do not give way to emotion in the same manner as Europeans when engaged in war. People are going about their business at Tokio as if nothing in particular were afoot.

Preparations are going rapidly forward for the commencement of the land operations. It is expected that important events will be heard of in the course of a few days.

The Japanese Government is not anxious to begin its land campaign prematurely, and is organizing its forces with marvelous foresight and completeness, for every possible contingence.

The opening of hostilities ashore is likely to furnish Russia with as great a surprise as did the naval actions.

It is impossible for one, of course, to give the detaisl, but events will soon show the capacity of the men who are directing Japanese affairs an the quality of the troops at their disposal.

According to reports received here, the Russians are moving large masses of troops toward the Chinese frontier. The population is in a state of unrest and is leaving large towns.

THE VLADIVOSTOCK FLEET DESTROYED?

Japan Believed to Have Captured or Destroyed Russian Fleet

Special to The Times.

Vladivostock, Wednesday, March 9—The military commandant here has ordered all foreigners to have their passports vised by the local government and commercial agents o their respective countries. Most of the residents of Vladivostock are sending their families into the interior. The girls' school and boy ' gymnasium will be transferred into the interior.

The prices of foodstuffs are becoming exhorbitant.

Special to The Times.

London, Wednesday, March 9—The Daily Telegraph this morning publishes a despatch from Tokio dated March 7, and saying;—

"It is reported that the Japanese fleet engaged the Russian Vladivostock squadron at sea yesterday. The result of the engagement is not announced, but it is believed the Russian ships were destroyed or captured.

IRISH CHEER FOR RUSSIA

Enmity to England Dominant at the Emmet Anniversary

Chicago, March 9.—Russia has a friend in every Irishman who attended the celebration of Robert Emmet's anniversary at the Y.M.C.A. auditorium last night and every sympathizer with Russia was just as apparently the implacable foe of England. No hostility was shown toward Japan, but there were cheers and hand-clapping and stamping of feet whenever the speakers made reference to the friendship Russia had manifested for the United States.

The celebration was under the auspices of the Irish Nationalists of Chicago.

Chairman O'Neill in his opening address won from the audience the first expression of sympathy for Russia.

"A crisis has come in the world's history," he said. "England's puppet, Japan, is at war with England's arch enemy, Russia. As American citizens, grateful for the unbroken friendship of Russia for more than 100 years, and especially during the civil war, our sympathies are with Russia, but while the contest is between Russia and Japan we must preserve strict neutrality. But let England take the field against Russia without first making peace with Ireland and where will the Irish be found? An Irishman will be found wherever an English flag is to be pulled down."

"That's the talk," cried an enthusiast in the gallery, and a storm of cheers arose from the audience.

"If England takes the part of Japan in this contest," continued Mr. O'Neill, "the war will not be confined to Corea or Manchuria. England will have to meet Russia on the frontiers of India and she will have business on this continent, too. When that crisis arises the fate of Emmet shall not be forgotten."

RUSSIA DISMANTLING SHIPS

They May be Moving the Guns to Port Arthur Forts

Tokio, March 9.—According to a merchant who arrived in this city today, and who was a resident in Port Arthur up to the time of the exodus of its inhabitants ordered by Admiral Alexieff, the Russians are working day and night to dismantle the injured battleships now lying in the inner harbor. The big guns are being taken from the turrets with all possible speed and being mounted on the forts. The refugee estimated that there are 40,000 Russian troops within four hours' radius of Port Arthur.

The Unpopularity of Whiskers

Commenting on the fact that Governor Alexander Monroe Dockery has just divested his countenance of a celebrated and almost immortal set of whiskers, the New York "Sun" says: "The twentieth century is beginning somewhat as the nineteenth century began, though, of course, not so strictly and universally smooth, but it is doubtful if it will run parallel through all its quarters with its predecessor. There were no mustaches, no beards, when the nineteenth century dawned. Side whiskers began to curl and sprout before it had run far in its course, and they grew bolder after a time and encircled the throat and chin, leaving bare the upper lip. The lip was submerged about 1860, and in the later years of destruction was last to yield to the assaults of the barber. The human countenance began to exhibit itself again not long after the war, and from that time down to the very recent past the unsupported mustache was the prevailing mode. Now fashion is changing again, so that the young men are commonly completely shaved, and their fathers have covered lips. The youth of to-day have the weight of civilised precedent with them. An examination of the family albums of the last four centuries will demonstrate that the unwhiskered have had by far the better of it. For nearly two hundred years of that time the beard was not permitted to sprout. A great deal of encouragement for the shaven but ambitious young man may be found in the Presidency of the United States. From the beginning with Washington down to Lincoln's time whiskers found lodgment in the White House only three times, and in every case they were of the remote variety known as sideboards, which offered no considerable obstruction to the observation of the faces to which they were linked. John Quincy Adams presented a stubborn pair, Martin Van Buren's were amiable in their moods, and Zachary Taylor's were evidently the unobtrusive expression of a fancy for trimmings. Lincoln inaugurated the bearded era, which was carried on by Grant, Hayes, Garfield, Arthur (with Dundrearys), and Harrison, though Harrison yielded not a little of his expanse before he retired from office. Cleveland was the first mustached President and Roosevelt the second, while McKinley preserved the tradition of the smooth face.

Already Provided.

A certain small village, far removed from the noise and bustle of commerce, boasts a female preacher, and the lady's duties are many. One day she may visit the sick, another attend a funeral, and the next baptize a baby. One afternoon she was preparing the sermon for the following Sabbath when she heard a timid knock at the parsonage door. Answering the summons she found a bashful young German standing on the step and twirling his straw hat in his hands.

"Good afternoon!" the preacheress remarked. "What do you wish?"

"Dey say der minister lifed in dis house, hey?"

"Yes, sir."

"Yess! Vell, I vant me to kit merriet."

"All right; I can marry you," she said

The lady's hair is beginning to silver, and the German glanced at it. Then he jammed his hat on his head and hurried down the path. "What's the matter?" she called after him.

"You gite no chance mit me," he called back. "I don't vant you; I haf got me girl already."—"Modern Society."

A Lesson in Tact.

A few weeks ago, says James MacArthur in "Harper's Weekly," I quote some passages in these columns from a correspondence between the Brownings in the days of their early acquaintance on Carlyle's strong dislike of poetry. I have just heard of a new story on the same theme which is told by Professor Goldwin Smith. It appears that Professor Smith was once a visitor with Carlyle at Lady Ashburton's house when Tennyson was one of the circle at "The Grange." Tennyson was asked to read one of his own poems aloud, but, to the surprise and disappointment of his gentle hostess and her company, he refused —a thing he was never apt to do. Looking across the room, Professor Smith saw the cause of the difficulty. Close to Tennyson sat Carlyle, who was wont to make a universal sweep of poetry in its relation to common sense when aroused by the proximity of the Muse. Professor Smith, devoting himself to the public good, and, we may add, in courteous consideration of his hostess, crossed the room, and invited Carlyle to take a stroll in the grounds. The Sage accepted the invitation, and, during the stroll, the poet brought off his reading.

A volcano.—What is a volcano asked the teacher.

"A mountain with a fire inside," said one.

A smile of comprehension spread over the puzzled face of the smallest scholar as she asked, surprisedly, "Is that a mountain range?"—Harper's Magazine.

Reeder—Scott said a clever thing today; said that luck is a good bit like lightning, for it seldom strikes twice in the same place.

Heeder—Yes, and as a rule neither of them needs to.—Pennsylvania Punch Bowl.

"Do you think you could ever marry for money?"

"No. But I'm sure I could soon learn to love a girl who had a million or two."—Chicago Record-Herald.

"I told you she would dismiss you if I came in between."

"Yes, she has, all right, but you're a dead one, too."

"Why?"

"She told me everything between us was at an end."—Cincinnati Commercial Tribune.

Ancient British Wheat Fields.

A wheat field a thousand years old is quite a common sight in this country. Of course, it has not grown a crop of corn every year in the ten centuries, but during that long sequence of ages, in the fixed and abiding order of this ancient country, that particular area of land has been cultivated, with the production of wheat as its main object, and it has remained as a part of the English granary from the days of Edward the Confessor until those of Victoria. Many of the wheat fields are far more ancient than this, but the records of Doomsday Book is a practical voucher for a period of 1,000 years. The custom of the Saxon cultivators, and the evidence of local names, are proof of a still greater antiquity of cultivation on some of the best corn land; and beyond the days of the Saxons lie the last two centuries of Roman occupation, when England was the great wheat-growing country of the West, and supplied the population of Rome with daily bread.—London Weekly Country Life.

May—Don't you consider Miss Smith handsome?

Jack—Well, not handsome enough to praise to another lady.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.63 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $61.63 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 600 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $3,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

PROSPFCTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000. 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President.
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE E. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM C. CORVES, Miner, Meriden, Conn., Superintendent.
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE E. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 527 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 4.02 ozs.; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

A ZACUALPA RUBBER PLANTATION COMPANY

corporated Under the Laws of the State of California.

a Zaluaipa Rubber Plantation is situ- ed in the best location in Mexico for cultivation of rubber. It has been own for a great many years as a y choice strip of rubber land and subse ent experience has shown that it is al to all that has been claimed for The affairs of the company are in hands of men of undoubted integrity d high reputation as successful men business. To those seeking a safe in- tment which will secure a good in- me for life, this proposition offers a orable opportunity

Shares in La Zacualpa Rubber Planta- n are not capital stock of a corpora- n, and carry none of the responsi- ities and obligations, or liability to sessment of capital stock; but repre- nt an undivided interest in the planta- n itself.

The twelve thousand acres comprising plantation are divided into twelve thousand shares, each share represent- one acre of land, and the holders shares in La Zacualpa Rubber Plan- n are the actual owners of one un- ided acre of land, for each share held, h a guarantee expressed upon the tificate by La Zacualpa Rubber Plan- ion Company, under its official seal, plant two hundred or more rubber es per acre for each share sold, and care for same for a period of five ars, and at the expiration of that time gather the first harvest and deliver net proceeds thereof to the share- lder.

In other words, La Zacualpa Rubber antation Company sells to each share- lder one undivided acre of land in La cualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

FRANCE AND FASHODA.

IF WAR HAD COME RUSSIA WOULD HAVE HELPED HER

Important Revelation as to the Strength of the Franco-Russian Alliance

The Paris Figaro has lifted the veil on the incidents in connection with the now almost forgotten Fashoda controversy. Count Muravieff's sensational interview with M. Felix Faure took place at the Elysee on October 17, 1898, but by order of the Czar solemnly to promise the French Government the military cooperation of Russia, was the outcome of negotiations that had begun on September 1. In fact, M. Delcasse had on that date sent to the Marquis de Montebello, the following despatch the text of which, as well as sense, is guaranteed by the Figaro,—

"At the moment the Anglo-Egyptian forces are advancing towards Khartoum, we cannot lose sight of the grave consequences that may issue, in the near future, from the events that are occurring on the Upper Nile. I shall be obliged if you will call the attention of Count Muravieff with regard to the eventualities that may happen, and let me know how they are regarded by the Imperial Minister of Foreign Affairs."

On September 12, M. Tontain, Charge d'Affaires of France at St. Petersburg, sent the following reply to M. Delcasse;

"I have communicated to the Minister of Foreign Affairs the indications you have addressed to me relative to events on the Upper Nile. Count Muravieff begs me to reiterate his assurance that in this affair as in all others connected with Egypt, the Imperial Government has resolved to act in agreement with us, and to conform its attitude with that of the French Government."

The Figaro does not omit to lay stress on the fact of reiteration as showing that the assurance referred to had been given at least once before, probably after M. Delcasse's despatch of September 1. When Count Muravieff paid his visit to M. Felix Faure the aspect of affairs had changed. Although France had decided not to maintain her position at Fashoda, the formal declaration, handed to Lord Salisbury by Baron de Courcel, on November 4, had not yet been made. Eighteen days before the French Government, on November 4, declared that it would recall Marchand, Count Mauravieff, by order of Nicholas II., said to M. Felix Faure 'If you fight, we will join you."

These things are narrated in order to fix a point in history, and to bring out into the light of day the loyalty of the "nation amie et alliee."

FOR CHAMBERLAIN

All the Self-Governing Colonies Declar for Preference

London, March 8.—This week's developments have greatly strengthened the movement for Imperial reciprocity. The debate in the House of Lords and the Ministerial speeches of Lord Lansdowne and the Duke of Marlborough served to convince most Englishmen that Canada New Zealand and South Africa are firm in their desire for a fair 'give and take' preferential arrangement with the Mother Country as soon as the British electorate will authorize the British ministers to negotiate.

AUSTRALIA IS FIRM.

Australia was a doubtful factor, but Melbourne telegrams show that Australia is also now in line with the other colonies. Premier Deakin, as the Federal Premier, has formally announced that his Government is 'prepared to alter the present tariff in favor of Britain, making sacrifices if necessary, to secure reciprocal preferences from the Mother Country.' As is pointed out, Premier Deakin would not take this definite stand unless he was assured that Australian opinion generally was with him. This morning, it is announced, that Mr. Watson, the leader of the Labor party, declared in the Federal House of Representatives, that he objected to a preference without reciprocity, but promised hearty reciprocation to a British preference.

WHAT CANADA SHOULD DO.

Thus the whole self-governing Empire stands behind Chamberlain's policy in its preferential aspect. Among Canada's friends here the expectation is that an early occasion will be taken at the approaching session of the Canadian Parliament by formal resolution to put Canada's national position in an unmistakably clear light before the British people.

LABOR TROUBLE EXPECTED

Union Men From States Stir Up Canadian Building Trades

Hamilton, March 9.—With the coming of spring Hamilton promises to have its share of labor troubles, especially in the building lines. The large influx of American workmen, due to the building here of many big factories, is in large measure the cause of the threatened difficulty. The local unions are now practically ruled by men from across the border who came here to work on the new industries.

CONTRABAND SILK

A Big Seizure of Silk Made at Brockville Ont

Brockville, March 9.—Three custom officers got a "tip" last night, and in response to the information supplied visited a boat house situated on the river front and found eleven bales of upholstering silk each weighing 100 pounds, which is supposed to have been smuggled from Morristown, N.Y., just across the river from here. The whole lot was confiscated. It is valued at $12,000. The officers say they are on the right track of more goods of the same kind.

Must Go

Six handsleighs at 25 cents will be sold for 18 cents; four 40 cent sleighs for 27 cents; two 75 cent sleighs for 45 cents, and two, high beam, steel runners and beams, regular $2.50 sleigh, for $1.50. Times Bookstore, Market Block.

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 5000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 100 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 200 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

Tuberculosis of The Lungs Cured

The World's Greatest Physician Eulogize Catarrhozone, which kills all the Germs Heals the Membranes, Cures Thoroughly.

That consumption is due to the presence of germs in the air passages is now admitted by all physicians. Before the disease can be cured of course those germs must be killed. Liquid medicine taken into the stomach can't possibly reach the air cells of the lungs, and is therefore useless.

Catarrhozone never fails to kill the bacilli of consumption for the following reasons, which are plain to every thinking person;

First—Each breath of medicated air you draw through Catarrhozone Inhaler is at once sent through every air cell and air passage in the throat, bronchial tubes and lungs; it is then sure to reach the nest of the consumption germs.

Being a powerful antiseptic Catarrhozone at once kills these germs and establishes such a healthy condition in the lungs that microbes can't live there. Once the cause of the disease is removed it is only a matter of time till you get well and strong again.

That Catharrhozone does permanently cure Tubercular Trouble can no longer be doubted. Ample evidence of its marvellous merit is witnessed every day. Thousands have been cured after all else has failed by this great germ destroyer, which is inhaled to the very source of the disease.

Mrs. G. P. McCluskly, writing from Salt Lake City, U.S., says; "My doctor ordered me to Colorado, where I first used Catarrhozone. I inhaled it probably twenty times a day. In one week it stopped my cough completely, and it was not very long in taking every bit of soreness and hoarseness out of my throat. The antiseptic vapor of Catarrhozone must certainly have killed all the germs of consumption in my lungs, for I came home in seven months a cure. My doctor says Catarrhozone is a marvel. It is of the greatest assistance in lung trouble, and cured me permanently."

Not only consumption but every form of catarrh and throat trouble is easily cured by Catarrhozone. Two months' treatment costs $1.00. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont. For a quick and certain cure use only Catarrhozone.

SPECIAL MEETING CALLED

A special meeting of Otonabee Lodge, No. 13, I.O.O.F., is called for this evening at 8 o'clock sharp in the ante-room, for the purpose of arranging for the funeral of our late Bro. Jas. Craig. All members are requested to be present.

Cows Struck by Train

The noon train on the G.T.R., from Toronto, struck two cows belonging to Mr. Hetherington, at the Park street crossing yesterday. One of the cows, a valuable Jersey, had a leg broken, and may have to be killed. The other was not seriously hurt.

A Runaway

Yesterday evening a team of horses, attached to a coal sleigh and owned by R. J. Wolstenholm, wood dealer, were left standing on Water st. They suddenly became frightened and bolted away. Except for a portion of the coal being scattered along the street no damage was done.

Obituary

The friends of Mr. and Mrs. Sam Greer, Carlisle avenue, with regret to learn of the death of their little boy, Lloyd, aged 1 1-2 years, whose death occurred on Tuesday, after a few days' illness, with pneumonia. The funeral will take place from the family residence at two o'clock this afternoon to the Little Lake Cemetery.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE.

A. O. F. Meeting

A very pleasant open meeting of the A.O.F., local court was held in the S.O.E. Hall on Tuesday night. The programme was most interesting, especially a game of carpet ball between the A.O.F., and the Maccabee teams, which was won by the former. A number of applications for membership were received.

The Call to Christian Citizenship

Rev. Dr. Macklem, Provost of Trinity College, Toronto, was the speaker at the Lenten service held at St. John's church last night, and his eloquent address was based on "The Call to Christian Citizenship." The Doctor spoke upon the great duty Christians owe to the civic and national government, and dwelt with emphasis upon the fact that the great success of such governments would be ensured, if they were conducted by Christian citizens. A goodly number were in attendance, and the earnest remarks of the speaker were much appreciated by all present.

DEATH OF MRS. ROBERTSON

Passed Away After Lingering Illness, at Keene Yesterday Morning

Mrs. Peter Robertson died at her home near Keene today, after an illness of about two months duration. The deceased lady had been sick since Christmas, although few thought it to be of a serious nature. Complications, however, made her recovery impossible, and her death resulted yesterday morning. The late Mrs. Robertson's maiden name was Mary McEwan, and she was very highly respected. She leaves a husband and a family of four girls and two boys.

NO MORE YANKEE SILVER

After April 1st.—Local Banks will Refuse to Accept It

It is decided by the local banks to refuse the acceptance of American silver after April 1st. Printed notices to this effect are posted up in all the banks bearing the signatures of the local managers. Previous to this the banks have suffered considerable loss in handling American silver and this action has been taken on the request of prominent Peterborough merchants. This will greatly inconvenience those who have any American silver on hand after the above date.

SUCCESSFUL AT HOME

At the Residence of Mrs. John Smith, Fifth Ward

The residence of Mrs. John Smith, Stewart street, Fifth Ward, was the scene of a very pretty "At Home" on Tuesday evening, the event being under the supervision of the Ladies' Aid of Mark street church. An excellent programme was enjoyed by the large number present. Miss Belleghem's beautiful solos were rendered in her usual most acceptable manner, and responded to several encores. The others who added to the pleasure of the evening were Mr. and Miss Torphy, Miss Grace Cox, Mr. J. Miller, Mrs Doidge, Misses Chasty and Messrs. J. Miller, J. Speer, W. Hooper and A. Watley. The accompanists of the evening were Miss Chasty, Miss Spear and Mr. Schneider.

At the conclusion of the programme, refreshments were served, and all departed for home after spending a most enjoyable evening.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—There was no police court again yesterday morning.

—The Peterborough Quintette have been engaged to play at a ball in Lakefield this evening.

—Daniel Henwood, a Napanee blacksmith, committed suicide by hanging himself in his own shop, early Tuesday morning.

—A Peterborough man claims to have shot a black wild rabbit. The white crow will be the next surprise we may expect.

—Joseph Smith, head of the Mormon Church, has 42 children. A photograph of Joe with his children on his knee, would be an excellent study.

—The initiating team of the White Rose degree of the Sons of England, will go to Lindsay next Tuesday evening to place on a White Rose degree at that place.

—The Belleville City Council has appointed Mayor Chown and Ald. Panter to advocate before the Transportation Commission the building of the Trent Valley Canal to Trenton.

—Fire again visited Toronto on Tuesday afternoon, when the D. W. Thompson Company's factory and other buildings, were totally destroyed, the loss being estimated at $80,000

The regular monthly meeting of the W. F. M. S. will be held in the lecture room of St. Paul's church on Friday, March 11th, at 3.30 o'clock. Miss Macdonald, Dominion Secretary, of the Y.W.C.A., who leaves for Japan in the autumn, will address this meeting. 2td

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Tully, of Midland, is in town the guest of Miss Eva Weir.

—Mrs. T. J. Mowat is in Toronto, attending the opening of the Metropolitan church organ.

—We are pleased to state that Mr. R. J. Kidd, who was injured by falling ice on Tuesday, is much better, and expects to be all right in a few days.

—Mr. T. A. Somerville, of Hartney, Man., who has been visiting friends on Brock street, started for his home in the West yesterday.

—Miss Lulu Chambers, of Pontypool, who has been visiting her sister, Miss M. Chambers, Water street, left for her home this morning.

—Mr. Lorne McCaughey, assistant general manager of the G.N.W., is in town for a few days relieving Mr. F. W. Skitch, of the Canadian General Electric Company, who is ill.

—Mrs. William C. Rountree, (nee Thompson) will receive for the first time since her marriage at 47 Howland Avenue, Thursday afternoon and evening, and afterwards at her own home on the first and third Fridays.—Toronto Globe.

THINGS GENERALLY

BY SI JONES

A few days ago a young woman was before His Worship in the police court, charged with assaulting another girl of her own class, on the public street. She received her sentence with a laugh, and went down to her cell singing, and apparently happy. There surely must be something wrong when a young girl, in the bloom of maidenhood, will descend so low as to even shun the blush of shame. It was her first offence, so she said, and yet she experienced no regret. She feared not the prison cell, and no thought of the attendant disgrace crossed her mind. We cannot but think that the influence of a happy home had never been enjoyed by the fair prisoner, else she never would have been called upon to enter a police court, from which to depart with the dye of shame that time cannot erase.

• • •

You, dear reader, have no doubt heard of places where it was so cold that when you stood in front of a blazing hot fire cold chills were chasing each other down your spinal column whilst the front half of you enjoyed a tropical temperature. I know all about it, because I have experienced the sensation myself within the past two weeks. As soon as one side was comfortably warm the other side was near the freezing point, and I kept whirling round every few minutes to accomodate myself to the constantly changing conditions. It gave me plenty of exercise, and at the same time I experienced the climates of the torrid and frigid zones in about equal chunks.

• • •

This has been the most severe winter in Peterborough in one hundred years, so it is said, and although the memory of the oldest inhabitant does not reach back that far into the past, I can well believe the statement. I only hope that it will be another hundred years before there is another winter like it. This winter of 1903-04 has made me feel that it wouldn't be a serious mishap if the earth could drop a cog and skip that particular season in future. I know some people who used to expatiate upon the glories of a "real old-fashioned Canadian winter," but this winter has been just a little "to tooty too," so to speak, even for them.

• • •

It was a pathetic scene. An innocent looking youth, with a well shaped head and face that betokened anything rather than criminal propensities, stood up in the police court a few weeks ago, and received his sentence. The room was crowded but the youth who had just received his sentence seemed to be the least concerned about the matter of anyone present. He pleaded guilty to the theft of a number of articles of very little value—so little, indeed, that one wondered what his motive was, and the question naturally suggested itself. "Is he one of those unfortunate known as kleptomaniacs, who find it impossible to resist the temptation to take whatever they see?" Or, is he merely a common thief who makes it his business to steal? Notwithstanding his innocent looking face, he had already served a term in prison, and was once allowed to go on suspended sentence, and in both instances the charges were for theft. The natural inference, therefore, is that he had deliberately chosen to lead a criminal life. As in many other similar cases this young man was respectably connected and I could not help thinking what a terrible blow his disgraceful conduct must have been to them. It is sad to think of a bright, intelligent looking young man starting out in a life of crime, when so many opportunities present themselves by grasping any one of which he might become a useful and honest citizen.

Mrs. Stratton's Reception

Mrs. J. R. Stratton received on Tuesday afternoon in the Speaker's Chambers, Legislative Buildings. The reception room was fragrant with American beauties and many clusters of pink carnations and roses. Mrs. Stratton was gowned in pink crepe de soie, daintily shirred, and trimmed with a deep guimpe and panels of Venetian lace, bordered with narrow bands of swansdown, some handsome diamond ornaments on the corsage, and a white tulle bow in the coiffure. Her little neice, Miss Alberta Gooding, in a gown of white point d'esprit, and narrow satin ribbon, with a French touch of red, carried out in slippers, stockings and coral beads made friends with many of the callers. Hon Mr. Stratton came in towards the end, with the other members of the House. The tea table was in pink, a handsome lace centre over silk quantities of flowers and prettily shaded lights. Miss V. McLeid, Miss Loudon and Miss Temple Dixon were in charge.—News.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

ANOTHER LYNCHING

The Mob Stayed Up All Night Stoning the Corpse

Springfield, Ohio, March 8.—All night crowds of men and boys passed the body of Richard Dixon, who was lynched by a mob last night, hooting at it and occasionally firing a shot or throwing a stone. The negro residents of the city, with few exceptions went to their homes upon learning of the lynching. A few of them, however, were with the mob to the end, and seemed to enter into the night's work in the same spirit as the white men.

Dixon's body is literally riddled with bullets. The few remnants of clothing still hanging to him flutter in the wind like rags.

While the whole affair was done in the glare of electric lights, no masks were used, and handkerchiefs were not even resorted to by any of the men to conceal their faces. It is nevertheless the general opinion here that it will be a difficult task to secure the conviction of any of the participants in the tragedy.

The affair is greatly regretted by the better class of citizens, although there is no attempt made anywhere to conceal the gratification at the outcome.

Are Your Lungs Weak?

Dr. Pierce's Golden Medical Discovery CURES Weak Lungs.

$3,000 FORFEIT

Will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"When I commenced taking your medicines, eighteen months ago, my health was completely broken down," writes Mrs. Cora L. Sunderland, of Chaneyville, Calvert Co., Md. "At times I could not even walk across the room without pains in my chest. *The doctor who attended me said I had lung trouble, and that I would never be well again.* At last I concluded to try Dr. Pierce's medicines. I bought a bottle of 'Golden Medical Discovery,' took it, and soon commenced to feel a little better, then you directed me to take both the 'Golden Medical Discovery' and the 'Favorite Prescription,' which I did. Altogether I have taken eighteen bottles of 'Golden Medical Discovery,' twelve of the 'Favorite Prescription,' and five vials of 'Pellets.' I am now almost entirely well, and do all my work without any pain whatever, and can run with more ease than I could formerly *walk*."

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

JAPANESE CAPTURE FUNWANGCHANG?

According to the Tienstin Correspondent of the Daily Telegraph, the Japanese Advanced from the Yalu River, Captured Funwangchang and Drove Out the Russians in the Vicinity to the Takuling Eastern Pass--The Russians with 75,000 Men are Entrenched Strongly at Liaoyang and Haicheng

London, March 11—Special.—Accordining to the Tien-Tsin correspondent of the Daily Telegraph, the Japanese advance from the Yalu River, captured Fungwangchang, and drove out the Russians in the vicinity to the Takuling, eastern pass, and are in force seventy miles east of Neuchwang. The Russians with seventy five thousand men, are ntrenched strongly at Liaoyang, and Haicheng, where fighting is imminent. Some small engagements already have been fought, the Russians retiring with losses.

Washington, March 10—The Government here has received advices by cable from Chefoo, opposite Port Arthur, to the effect that Japanese land forces have appeared at Fungwangchang and Takushan. No details are furnished. The first named place is about forty-five miles north of Antung, in Manchuria, and the latter is a few miles from the mouth of the Yalu River, according to the calculations of naval officers here. They believe that this movement has placed the Japanese on the Russian flank, and perhaps in the rear, and on their line of communications. It is believed that yesterday's attack on Port Arthur and Talienwan was a diversion, perhaps to cover this move of the Japanese forces, who were probably landed from transports at some point west of the Yalu River.

WAR WITH GREAT BRITAIN IS CERTAIN

Result of Russo-Japanese Complications--View of Czar's Court

FLEET STILL NEAR PORT ARTHUR.

ecial to The Times.

rt Arthur, March 10—A message from the signal station at eleven o'clock, announced the appearance of the Japanese squadron on the horizon. Fifty minutes later the shore batteries opened fire on the Japanese vessels. A gale sprang up and the attacking fleet soon withdrew.

WHAT HAPPENED TO IT?

nea, Island of Crete, March 10—A Russian transport from Port Said has arrived here. Members of her crew say that the Russian torpedo boat "No. 231" was lost while on her way to this port. The crew of the torpedo boat were rescued by the transport.

JAPANESE STRATEGIC PLANS

Japanese seamanship is not inferior to that of the Russians and if the Vladivostock divison is not under the guns of the harbour forts its fate should by this time be cealed in accordance with the estimates formed at Tokio. It is hard to read the purpose of the movements in the scraps of news that are allowed to come over the wires. The Tokio despatch is artless in its statement that the Japanese Admiral expected to find the Vladivostock divison in the harbour.

It was a daring venture to send Japanese warships to attack the Vladivostock division in the shelter of the Vladivostock forts. The Japanese Admirals, Togo especially, do not shirk an exchange of shots with fortress guns. At present the Japanese aim at inflicting great loss on the enemy without exposing their own navy to losses.

Wonson, the nearest point at which a victorious fleet would call with news, is over 500 miles south of the probable scene of battle between the Vladivostock division and its pursuers. It is not certain that Japan would hasten to proclaim the destruction of the Vladivostock division. Such news could not be long concealed. If the division was in Vladivostock harbour or if it had beaten off a Japanese attack, the Russians are in a position to report at once to St. Petersburg. Again, the silence of St. Petersburg is a good sign for Japan, and the unofficial reports of Japanese victory in a sea fight with the Vladivostock division are well within the limits of probability,

It is reported that a Japanese fleet again atracked Port Arthur on Tuesday last, and the latest despatch states that they have landed at Takushan, a port about half way between the rvier Yalu and Port Arthur. They have marched into Manchuria and have by this move turned the flank of the Russians on the river Yalu. It remains to be seen that the Japs landed at Takusham will intercept the retreat of the Russians, who will very soon be compelled to do more by th e Jupanese advancing from Corea. It is expected that when the two armies meet on the Yalu, some firce fighting will take place, as the Russians have about 30,000 men entrenched at various points along the river.

The Manchurian bandits are being organized by the Japs and they will assist in harassing the Russian retreat. These bandits should prove fine fighters and as they consist of thousands of fierce men armed to the teeth, they should prove of great assistance to the Japanese. The Russians are preparing for an attack at Neuchwong and another large gun was landed there yesterday. The Russians are preparing defenses along the line of Manchurian railway around this point and an immense army is in readiness for action.

THE JAPANESE AGAIN ATTACK PT. ARTHUR

Mounted Scouts Also Have an Engagement Near Ping Yang

Special to The Times.

Tokio, March 10—Russian and Japanese mounted scouts met south of Ping Yang yesterday. After a brief engagement the Russians retreated. No casualties are reported on either side.

Special to The Times.

St. Petersburg, March 10—The Czar has received the following message from Viceroy Alexieff, dated to-day at Mukden;—

"The commandant of the fortress at Port Arthur reports that at about 1 o'clock this morning, the outlines of vessels, apparently torpedo boats were seen at sea within the area swept by our searchlights.

Our battery opened fire upon these vessels. Our torpedo boats put out to sea at 2.40 a.m., and about 4 o'clock, met the enemy west of the Liaotishin lighthouse. After firing several shots, they retired to the south in the direction of Shandun. Our torpedo boats returned to the harbor at 6 o'clock. Later torpedo boats were again sent to sea to reconnoiter. They returned in half an hour having learned that the enemy's squadron was approaching At 8 o'clock the Japanese opened fire on our cruisers and fortress. The enemy had 14 ships that fired the entire time from behind Liaotishin. I have the honor to report the above to your Majesty. (Signed) ALEXIEFF.

WO GAMES LAST NIGHT.

Clarry's C.D.As' Go Down to Defeat--"Japs Defeat Russians."

One of the greatest acrobatic par- rmances (on ice) that has been wit- ssed in Peterborough for some time s that given at Brock street rink t evening, when the Eko Camp ven defeated the C.D.A.'s by a score 2 to 1. Jack Davidson's fancy ating wasn't in it, and Barnum's cus was on the other side of the ce.

At the start it was such a fine dis- ay of "shinney" that the schoolboy lapped with both hands," and his at never had a chance to grow old. ven the dog barked loudly, as he itnessed some of the finest hand- rings and somersaults to be seen tside of the Toronto Fair Ground. Belly" Glover rushed business from e start and when by mistake, he t on the fence, he took the affair od naturedly. Of course it was the feree's error. Then the Eko's scor- d the first goal, and the air rang ith cheers, till the echo died away as m Hamilton struck the ice several mes in rapid succession. Rush fell wn too often, and the referee led m off by the hand, and the bell ng for half time.

During the second half several rilliant feats were performed, and veral of the performers were off eir feet more than they were on em. Alf. Smith, in his white duck ousers, managed to keep up, but e miracle has not been explained as e go to press. Clark of the Eko's "The Man in the Overalls," played ell, and the ladies all applauded.

The line-up of the two teams was s follows.—

he Camp	C. D. A.
Goal	
. Comstock	J. Hamilton.
Point.	
larke	E. Clarry
Cover Point	
Glover	H. Rush
Forwards.	
Alf. Smith	L. Hall
. Gemmell	F. Bradburn
. Watt	O. Dumble
R. Watt	Milne Hamilton

Mr. E. Wasson acted as referee to he satisfaction of all present.

One of the most interesting games f hockey played on the Brock street ink this winter, was the contest between the "Japs" and "Russians" two teams composed of young ladies from this city, which came off last evening. About 500 spectators were present, and the proceeds amounted to 60, which will be used for charitable purposes.

Both "armies" were in fine condition, and at the commencement it was difficult to decide whether it would be a Japanese or a Russian victory. Each team consisted of seven of Peterborough's fairest young ladies, and the Russians were conspicuous in red and black striped sweaters, while the Japs were white sweaters. The teams representing the two nations now at war played a fine game, although, to be true to history, the Japs had a slight advantage.

Miss Lulu Scott became prominent early in the game by making a fine rush, resulting in a score for the "Japs." The "Russians" then remained on the defensive. Miss Jean O'Brien, in goal, stopped some "swift" shots. Miss Helen Whiten, who played point, played an excellent game, as also did Miss Burritt, the clever cover point. Miss Lulu Scott was the "Jap" rover, and she roved all over the ice, playing a star game. Little Miss Nellie Graham, the smallest of the fair hockeyists, received well merited applause, and Misses Edith Scott and Allison Hamilton handled their sticks well.

For the defeated septette Miss Irene Perks, as point, stopped several beauties, and the cover point, Miss Mona Cavanah, did good work. The remaining "Russian" players did a "rushin'" business, but at the end of the second half the score stood 2 to 0 in favor of the "Japs." It was a decisive victory and the ladies retired amid enthusiastic applause.

Mr. Ernest Wasson acted as referee and he was criticized by some as favoring the ladies.

The following is a list of the players;—

"Japs"	"Russians"
Goal	
Jean Scott	Jean O'Brien
Point.	
Henel Whiten	Irene Perks
Cover Point.	
Frankie Burritt	Mona Cavanah
Rover	
Lulu Scott	Viva Hunter
Centre.	
Allison Hamilton	Gwen. Hall
Right Wing	
Nellie Graham	Mabel Bogue
Left Wing.	
Edith Scott	Gertie McClellan

OBITUARY

Mr. Jas. Watson, Once a Resident of This City, Passed Away at Lindsay

By the recent death of Mr. James Watson, Lindsay has lost one of its oldest and most respected citizens. He was, indeed, a strenuous, upright and industrious man. He was born at Irvine, in Ayrshire, Scotland, in 1821; arrived in New York in 1849; moved to Peterborough, Ont., in 1861, where his uncle, the late Rev. John Gilmour, a Baptist minister, then resided, entered into mercantile business with his brother, Thomas Watson, at Napierville, Que., in 1853; and finally opened up business for himself in Lindsay, in 1857, when the population barely reached one thousand. This he carried on continuously until his retirement only a few years ago.

Mr. Watson was noted for his strict business integrity, as well as for his cheerful assistance in works of benevolence and charity. He served some time as a member of the Town Council, and contributed liberally of his time and money towards educational and religious objects. For many years he was a prominent Elder of St. Andrew's Presbyterian church, Lindsay, where his quiet, unassuming interest in the work of that congregation will be long remembered. In politics Mr. Watson was a Reform of the old school and an ardent admirer of the late Hon Alexander McKenzie.

In 1856 he married Agnes Graham of Henrysburg, Que., who predeceased him only 12 months ago. His family consists of two sons and six daughters, all well known and deservedly popular.

Rev. Jas. Wallace, of St. Andrew's church conducted the funeral services both at the home and at Riverside cemetery.—Post.

KEY OF ASIATIC WAR

Trans-Siberian Railroad Put to Severe Test

A VERY COSTLY HIGHWAY

Problem of Conveying Troops to Orient is All Important

Harbin, Manchuria, Feb. 10.—Upon 6,000 miles of single track railway, nearly 3,000 miles of which skirts or lies within Chinese territory, hangs Russia's chance for victory in her war with Japan.

This great Trans-Siberian Railway was built by the Russian Government at a cost of $390,000,000, for just such an emergency as that which confronts her today. Whether it paid or not was a matter of secondary consideration to the Czar. Indeed, it is said that he never expected it to pay, but he calculated that it would enable him to handle his troops along the Asiatic frontier with a scope and facility which would make Russia predominant in the eastern hemisphere.

In conjunction with the Trans-Caspian Railway, which is not likely to be a factor in this contest, he was prepared to throw forces into India and the whole of northern Asia on a few days' notice. With a standing army computed at from 1,500,000 to 2,000,000 men, which she could quickly put on a war footing of from 4,000,000 to 5,000,000 of well-equipped soldiers, it only remained for the Czar to prepare means for transporting them.

This was the situation as it was given out by Russia and the world accepted it. Inquisitive Japan has recently announced that she has discovered the army figures to be exaggerated, and it is stated on no less an authority than Prince M. Hilkoff, builder and manager of the Trans-Siberian Railway, and one of the chief members of the Czar's cabinet, that the railway itself is inadequate.

ENTIRELY INADEQUATE.

Siberia, with its 8,000,000 of people, scattered over a territory considerably larger than the United States and Alaska, began to build up cities and towns along the Czar's military railroad. The peasants began to travel extensively and they developed a business capacity which soon taxed the freight managers almost beyond their resources.

In an interview last July Prince Hilkoff explained conditions officially as follows;

"The road was built as a military and state enterprise. The traffic has grown beyond our wildest expectations. We are already running ten trains each way a day, and we shall have to increase this number to fifteen or sixteen very soon. The passenger traffic is growing and the freight traffic is growing in the same ratio.

"The traffic is so heavy that the rails will not stand it. They are too light, and we shall have to relay the whole road. I did not approve of those light rails, but I had no idea of the possibilities of the line. We expected to run about three trains each way daily. The road was hardly completed before we had twice that number.

From Lake Baikal on the Russians are anticipating trouble from Japanese raiders and agents. Twenty-four miles of the road is laid on the ice of the lake, and there are many bridges which the Czar's troops will find it hard to guard from their active foes. From Harbin south to Port Arthur runs a branch of the Trans-Siberian Railway, where the Japs are already reported to have blown up a bridge, and where they will undoubtedly concentrate their efforts to break or destroy the R s sian artery of supplies.

When it comes to the transportation of troops and supplies under war pressure over the Trans-Siberian Railroad in the course of present events His Imperial Majesty, Nicholas Alexandrovich, autocrat of all the Russians and "most august president of the committee of the Siberian Railroad," has cause to feel thankful that he autocrat enough to call himself only an honorary figurehead regarding the affairs of the railroad. The great Trans-Siberian road was built as a war measure, but its critics have said that it would never justify itself in this sense, but would prove of greatest value as a facotr in the colonization and development of Siberia. The test comes all too soon for the Russian Government. What its capacity may prove in the way of moving soldiers and war material can only be estimated by what the road has done in the past, compared with conditions that obtain to day.

KEENE.

A very sad death occurred on Wednesday morning when Mrs. Peter Robinson passed away, after a short illness. The deceased lady has not been well for some time, but took worse a short time ago, when it was seen that there were no hopes for her recovery. The late Mrs. Robinson, who was [illegible] years of age, had been twice married. Her first husband was the late James McGregor. Her husband and five children are left to mourn the loss of a loving wife and mother, Jennie, Ethel, Nellie and Duncan McGregor and Peter Robinson, who is only three years old. Her parents reside in Toronto, where there are several sisters also. The deceased was in religion a Methodist and always took a deep interest in church matters. The funeral, which took place on Thursday to Keene cemetery, was very large, Rev. Mr. Seccombe officiated.

Mrs. S. Laing, of Toronto, is the guest of her sister, Miss L. Drummond.

While going into the yard last week, Miss Emma Lane slipped on the icy steps and dislocated her wrist.

We are sorry to learn that Mr. T. J. Wallace, the efficient principal of Keene Public School, is leaving at Easter, having accepted a lucrative position elsewhere. As Mr. Wallace intimated at the meeting of the School Board, that he would try to better his position unless given an increase of salary. The trustees have certainly made a mistake in not retaining the services of Mr. Wallace as it will be a long time before they will get a teacher who will give as much of his time and attention to the advancement of the children under his charge. His loss will also be felt in the Improvement Society, of which he was an enthusiastic member.

Mr Bell shipped three carloads of hogs to Peterborough on Tuesday.

Several local sports attended the races at Harwood on Wednesday and Thursday.

Messrs. Pryce and McCamus are at present working at the town hall. When finished the hall will accomodate about 100 more than formerly, and the unsightly posts replaced by iron supports.

FAITH IN THEIR ARMY

Russians Hope Eventually to Overwhelm Foe

WITH AN ENORMOUS ARMY

Feeling at St. Petersburg That War Has Hardly Begun

St. Petersburg, March 10.—Although almost four weeks have elapsed since the Japanese first attacked Port Arthur, here the war is considered hardly to have begun. Heavy land fighting, upon which the fate of the campaign depends, is not expected much before the end of April. By this time Russia will have in the field, exclusive of the large army of men required to guard the railroads, four army corps, each with a cavalry division and an artillery brigade. All that has happened so far, or is going to happen until these forces are in the field, is considered, according to the Russian view, to be nothing more than the prologue to the real drama.

The crippling of the Port Arthur fleet was unfortunate in that it gave the enemy command of the sea at the very outset. It is, however, of relatively small importance from the standpoint of the main strategy of the war whether Port Arthur stands or falls. But as long as it holds out and the fleet is harbored there it will constitute a potential menace which will restrict and hamper the Japanese operations.

Will Make Heroic Defense.

The Russians are determined to defend Port Arthur as heroically as they did Sebastopol. No large garrison will be retained there; 10,000 men are as good as 100,000 for defense; while the more men the more mouths to feed. There are enough provisions there now to last for eight months. In addition there will be a division of Cossacks, with mountain batteries on the peninsula to oppose landings and harrass the enemy if they succeed in investing the city.

The Cossacks, the mounted infantry and the light guns now across the Yalu river will serve to harass the enemy in every possible way, as well as to hold him in check until the Russian main armies and reserves are concentrated and disposed. Sharp fighting may occur between the advance parties, but nothing of a decisive character is anticipated.

The Russian plans do not contemplate taking any chances on the score of inferior numbers. By sheer weight of men and guns, if nothing else, when the proper time arrives Russia counts on overwhelming the Japanese and rolling them back through Corea.

Think Heathens Can't Whip Christians

It is a mistake to suppose that the Russians underestimate the prowess of their adversaries. On the contrary, they admit the fine marksmanship of the Japanese and their marvelous ability in determining ranges; yet the Russians do not believe that the Japanese can face successfully the legions of the czar. On the sea the maritime life of the Japanese gives them a natural advantage, on dry land, where belong all the traditions of the Russian army, the men of the empire have perfect faith born of their numerous experiences with pagan tribes and the fatalism inherent in the Russian character. They believe that Asiatics cannot meet Europeans in battle array, that a yellow race cannot triumph over a white, or heathens over Christians.

Local Sports

HOCKEY.

The Marlboros say that Peterborough has one of the swiftest hockey teams in the country.—Toronto Star,

Dr. Wright and Pete Charlton were unable to accompany the Marlborough team to Peterborough last night.—Toronto Star,

The Executive of the T.A.S. Hockey Club will give an "At Home" on Easter Monday.

The T.A.S. team will take a trip to Fenelon Falls and Lindsay next week playing at the former town Monday and in the latter on Tuesday.

"What's this game they call hockey?" said Mr. Hennessy.

"'Tis a great game," said Mr. Dooley, "an' may be classyfied as a mixthur av hurley, crokay, and assault an' batthry. Ye take seevin young fellehs, Hinnissy, who are fairly light on their feet and have a bump of aggressiveness as big as a hen's egg, feed them on rare beef, thry toast and aotmale, for the wind, and in time ye'll make a fine hockey team out of thim. The object of the game, Hinnissy, is to put the puck through the inimy's gool posts, and the things the byes do to ache other would make yer hair stand on ind. 'Twould be a gran' game for Donnybrook Fair, Hinnissy, but radther too rough fo. an Irishmen whin he has his timper up."

"What do they call the playeral" asked Mr. Hennessy.

"They call them cuckoos whin they win," said Mr. Dooley, "an' lobsters whin they lose."

CURLING.

Peterborough curlers will hold the Shepherd-Neill trophy this year. Word was received from Orillia that quite a number of their men could not, on account of illness, play in the matches called for yesterday, and that they would therefore default. The cup is now on its way to Peterborough.

Four rinks of local curlers went to Lindsay yesterday afternoon to make an attempt in the redemption of a cup which was once the object of competition between the two towns, but which for a year or two has received little or no attention. The rinks are;

R. Sturgeon	J. Gibson
F. Lount	T. F. Matthews
R. Frost	T. Brightman
R. Neill, skip	W. G. Morrow, skip.
W. Talbot	H. Foote
D. Hall	W. Thompson
D. Davidson	R. Waddell
J. S. Knapman, skip	G. Gireux, skip.

A similar number of Lindsay curlers will play here today.

At the Curling Rink Wednesday night, Arthur Blade won from J. S. Knapman in a Kendry Cup game by 18 to 15. In a scratch match W. G. Morrow defeated G. E. Whiten by 13 to 10, and R. Waddell lost to R. J. Frost by 7 to 11.

WRESTLING.

The Peterborough Athletic Club intend holding a grand amateur boxing and wrestling tournament, the end of this month, as a final for this season. Geo. Gauthier and Jack McDonough will compete for the heavy weight wrestling championship.

FOOTBALL.

There will be a meeting of the Quaker Football team at the Crown Hotel this evening at 8 o'clock. All employees of the American Cereal Co., who are interested, are requested to attend.

Weather Notes

Friday—Unsettled.

CITY ALMOST IMPREGNABLE

RUSSIA HAS SPENT MILLIONS ON THE FORTRESSES

Vladivostok Regarded by Military Experts as a Second Gibraltar

London, March 10.—Russia has patiently toiled by day and by night at the self-imposed task of making her fortress on the far eastern shores of the Pacific as nearly impregnable as science, combined with the advantages of nature, could make the Czar's first great seat of power and prestige in the Orient. It is now proclaimed as the Czar's Gibraltar of the north. It is the eastern terminal of the Trans-Siberian Railway and the Russian Government has expended millions of roubles on its harbor defenses and countless hidden land batteries.

Vladivostok differentiates itself in many ways from other Oriental cities. Russians, Japanese, Chinese, and Coreans are the predominating classes and they have built a city architecturally rude in character, but capable of resisting all assaults. The harbor entrance from Peter the Great Bay resembles that of San Francisco; not only are the entrances almost identical in formation, but also are the names; you pass through the Golden Gate at San Francisco and enter the Golden Horn at Vladivostok.

The harbor is admirably located, with narrow entrances, bordered on all sides by hills of ample height, to give excellent elevation to batteries and afford splendid protection to gun positions. All the channels from the sea are superbly commanded by many batteries of modern ordnance. Few of the guns are, however, of greater caliber than ten inches. Within the past two years many old guns have been replaced by new ones.

The city of Vladivostok is almost at the toe of the Muravey Amurski peninsula, on a harbor which affords excellent anchorage for warships as well as merchantmen. There is here a large navy yard, with adequate dry docks and repair shop facilities. In an admirably formed depression on the Muravey promonotory, across the harbor, south of the city, is a large battery of powerful mortars. The entrance to the harbor is heavily mined.

Within the last two years a ship canal was built near the upper end of the Saperni peninsula. The strategical value of this is to permit torpedo craft from the defences an opportunity to sortie against an enemy bombarding the city from a distance without attempting to run the batteries. All these are connected in the rear by sunken roads, which permit the rapid transportation of ammunition from one to another without danger from the enemy's fire.

From a land attack, which is possible only from the north, the city is well protected by strings of land batteries.

St. Petersburg, March 8.—A letter from an officer of the Russian cruiser Pallada has been received here describing the first attack by the Japanese upon Port Arthur. The writer denies the story that the officers of the Russian fleet were ashore and confirms the statement that the Japanese made use of false lights.

CHARLES FIELDING DEAD

Halifax, March 8—Charles Fielding, an old and respected resident of Noel, and father of Hon. W. B. Fielding, Minister of Finance, died this morning. His son was present at the bedside.

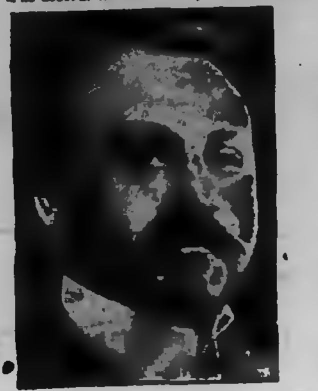
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Some-
tirely New for the C
Disease in
ining Mr
ure of Men's
eir Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures Your Method and Full Particulars Sent Free —Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, [illegible] Woodward Ave., Room
Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

UNION LABEL

PETERBOROUGH, MARCH 11, 1904

DOMESTIC SCIENCE

Beginning April 1 the University of Chicago will have for its women students a school of domestic science. The curriculum will include hygiene, domestic economy, the science of foodstuffs and the theory of cooking and laboratory method of teaching will be employed. Some may think such a course of instruction beneath the dignity of a university, but dignity is not the only object of a university, and practical utility is certainly an object entitled to some consideration.

Inasmuch as, in the division of labor between the sexes, domestic work necessarily falls to women, it is generally assumed that they have a special gift for it and are all adepts in it. The fact is, however, even in this department of labor they are deficient and not one of them in a thousand possesses such a theoretical and scientific acquaintance with household operations as is necessary to carry them on with a high degree of efficiency.

In the department of hygiene, for instance, women are constitutionally opposed to light and air. The more enthusiastic they become in housekeeping the more bent they are in hanging out the sunlight. As to ventilation, if a room is well "aired" in the morning they cannot understand why any more air should be let into it during the day, although it may be occupied by a dozen persons.

All that women know about domestic science at the present day they have learned from their mothers, and that is not much. Their mothers do not know much to begin with, and the daughters are too busy, first at school and afterward in society, to learn what their mothers could teach them. If they could only get well grounded in the subject and become thoroughly interested in it at school there would be a possibility that they might become, some time or other, competent to guide a household.

The coeds at the university ought to devote themselves heart and soul to this course of domestic science, as it has a more direct bearing on their future usefulness and happiness than any other branch of study. One of the commonest causes of marital unhappiness is th wife as a [illegible] e inefficiency of the housekeeper. Perhaps it [illegible] ld be better to put in conversely and say that the greatest security for happiness in married life is the skill and efficiency of the wife in domestic science. Personal charms may win a man's affections, but it takes good housekeeping to hold them.

The Times does not pretend to the gifts of prophecy, but it ventures the prediction that the young woman who takes the highest honors in this new school of domestic science will receive the first offer of marriage and have the happiest married life of all the members of her class.

A POSSIBLE CHURCH UNION

An informal meeting of great significance was held in Toronto the other day. Representatives of the Presbyterians, Methodist and Congregational Churches met to discuss, "without prejudice," as the lawyers would say, the possibility of union between these three churches which have so much in common and so little to divide them. The men who attended this meeting were of the highest position in their respective churches; and they were one and all in favor of the coming together of their respective bodies. The Presbyterians were led by Rev. Dr. Caven and Rev. Dr. Warden, the Methodists by Rev. Dr. Carman and Rev. Dr. Sutherland, and the Congregationalists by Rev. J. W. Pedley and Mr. Henry O'Hara. "One" Methodist minister who could not be present—Dr. Rose—wrote that he was out-and-out for union.

This wears the appearance of one of the signs of the times. Nationally and religiously, the spirit of the age is against small bodies and in favor of large and powerful combinations. We are Imperialists, even in religion. Canada has seen the union of the Presbyterian Churches and of the Methodist Churches; and both unions have resulted in splendid success.

A preliminary union is now in force; the Methodists and Presbyterians already co-operate in the western mission fields, thus saving men and money and providing against useless and costly over-lapping. The missionary authorities report that this arrangement has resulted in an augmentation of the usefulness of both bodies in that vast harvest field of the West; and what is possible in the breaking of new ground and the establishment of new outposts ought surely to be much easier in the settled East where neither denomination has much to gain or lose.

The first fruits of such a union would be a telling economy in all branches of church work. The central officers need not be duplicated. The machinery for connexional endeavor could be welded into one, and much costly triplication saved. In small communities, one minister might often do the work now divided among two or three; and the spare men and money expended upon fields now necessarily left vacant. As a fighting machine, a united Methodist-Presbyterian-Congregational Church would be much more effective than the three bodies marching separately.

The foreign and home mission fields would gain; and so ought the moral movements in the self-supporting districts. Upon practically all points of battle against evil influences, these churches agreed; and fighting together, they would fight much more successfully. The occasional co-operation of today would be replaced by a constant and intimate union of forces tomorrow. Counsels would be united; leadership would be identical; they would be an army, and not a loose collection of sympathetic companies.

A committee was appointed to arrange for further conferences and the future will be watched with the liveliest interest.

Another proof of the determination of France to keep out of the eastern war was furnished in the chamber of Deputies when Deputy Faure attempted to draw out Marine Minister Pelletan on the preparedness of the French navy for national defense. The result was that the interpellation was adjourned by a vote of 328 to 251, which was the largest majority given the government in a long time, and is supposed to signify that the French Government is not thinking of becoming the active ally of Russia.

LOSE NAVAL SIGNALS

Precious Book Disappears from the British Fleet

London, March 8—One of the most important signal books carried by the British navy has been discovered missing from the Prince George, one of the ships of the Channel fleet. One lieutenant one warrant officer and two seamen have been placed under arrest. With the exception of the secret war code, the lost book is the most important one supplied the navy and would be of inestimable value to a foreign power. This is the third disappearance of an important naval document within a few years, and excites much uneasiness.

CHOKED TO DEATH

Montreal, March 9—David Kay, 28 years of age, who resides at 88 Cathcart street, was accidentally choked to death last night by a piece of meat sticking in his windpipe while he was eating in the Cecil Cafe, 127 McGill street. Those in the cafe did everything possible to assist the unfortunate man, and the ambulance was summoned from the General Hospital, but before it arrived the man was dead.

Langtry & King Edward.

In commenting on that interesting and now historical episode in which she was said to have playfully sent a lump of ice tobogganing down the spinal column of the present Edward Rex, Lily Langtry said to Acton Davies the other day: "There is no reason in the world why I shouldn't tell the truth about that little matter, for the very good reason that it never occurred. When the King, then the Prince of Wales, heard the story, he asked me if I knew how on earth it could have been started. Of course I couldn't. However, my old friend, Mrs. Cornwallis-West, finally solved the mystery of how the story started, and her explanation, though a very weak one I admit, is the only peg on which any of us have been able to hang this story. An informal dinner was given one night at which Mr. and Mrs. Cornwallis-West and myself were guests. The Prince of Wales was not present. It was a very jolly little party; we all knew each other very well, and everyone was having a beautiful time, with the exception of Mr. Cornwallis-West, who was tired and wanted to go home. Several times he asked his wife to make a start, but she was enjoying herself and refused point blank. Finally he became quite angry and begged her to start. The ices were still on the table, and, taking a spoonful of hers, Mrs. Cornwallis-West laughingly slipped it under her husband's collar, with the remark: 'There, my dear boy, that will cool you off for a few moments.' This story must have been repeated by some of the guests, and enlarged upon until it was landed upon his Royal Highness and myself. That, I assure you, is all I know about the matter. Even my enemies must admit that I have always been noted for gentle manners, and that I or any other woman would ever have dared take such a liberty with the prince is too ridiculous. His Royal Highness was charming and most good-natured about the whole matter. In fact, only this past summer, when the King was talking to me at Newmarket about my last American tour, he remarked, with a twinkle in his eyes: 'I suppose they are still telling that lump of ice story on us in America,' and I answered, 'Yes, and I'm afraid their time grinding about like marionettes.'"

Kill or Cure.

A short time ago a veterinary surgeon summoned a man to the Winkletown County Court for two guineas for attendance on a dog, reports an English paper.

He swore that he had been called in and found the dog suffering from distemper, and that he had paid so many visits and had supplied such and such medicines, for which he claimed two pounds two shillings as per agreement. Then came the defendant's turn.

"You say that I agreed to pay you two guineas?" questioned the defendant.

"Certainly you did!" replied the plaintiff.

"Do you remember what our arrangement was?"

"Perfectly."

"Didn't I say that I was afraid of you running up a long bill, but that if you would agree to take two quid, 'kill or cure,' you might have the case?"

"Quite right; and I said that if you would make it guineas I would take it on," answered the plaintiff, with a gleam of triumph.

"Well, now, on your oath, did you kill my dog?" demanded the defendant, with a sudden energy that woke up the judge and made the usher jump again.

"Certainly not," replied the other, with a bluster that was perhaps justifiable in the circumstances.

"And you didn't cure him, cos he's dead; and as I promised to pay, and you agreed to accept, two guineas, 'kill or cure,' and you haven't done either, I wonder how you've got the nerve to ask for the money even, let alone bring me here."

At this point the learned judge intervened, and the case was remanded for further consideration.

KILLED BY PASSING TRAIN

Harvey Smith resident of Niagara Falls South, and employed on the power works, while crossing the M. C. R. tracks at Falls View this morning at half past seven o'clock on his way home from work was run over by a passing train and instantly killed, his body being frightfully mangled. The unfortunate man stepped off one track out of the way of a train approaching him in front of another going in an opposite direction. He leaves a wife and family of two small children.

Nature Sounds A Warning Call

To Everyone in poor health, Now is the Time to get Strong, Build Up and Increase Your Weight. Use Ferrozone the Great Food Tonic.

Most of us make the mistake of neglecting the first message that comes from our tired body demanding more strength and less nervous strain.

When any organ of the body becomes feeble, when the brain wearies and the nerves rebel against work, it is time to take Ferrozone and build up. The purpose of Ferrozone is to stimulate appetite, improve digestion, convert food into nourishment and supply the kind of blood and building material that fortifies the nervous system and strengthens the whole body.

Ferrozone is not an unnatural stimulant, but a food medicine combining the most strengthening elements known to science. Unlike sickly cod liver oil mixtures and bitters, Ferrozone is prepared in tablet form, convenient to take and always of uniform strength. Its health-giving properties are at once felt, and it is sure to help you quickly. Striking proof of its merits is found in the letter of Mr. N. W. Burke, a well-known lawyer in Meriden, who says: "When I first took Ferrozone I was in a nervous, run-down condition, almost sick enough to give up work. I lacked strength and felt as if I could not get down to work. Ferrozone at once gave me a good appetite and drove away the nervous apprehensive feelings that formerly made my life miserable. As I continued the use of Ferrozone I grew stronger and am glad to say it has brought me back to perfect health. I know that Ferrozone is an excellent tonic for business men, and people inclined to a sedentary life. I can recommend it to such."

Ferrozone is endorsed by prominent people in every walk of life, because it never fails to bring the good health that sick folks are looking for.

You must be sure to get Ferrozone and firmly refuse any substitute. Price 50c per box, or six boxes for $2.50, all druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

Double Yolked Eggs.

Many poultry dealers are proud that their hens produce double-yolked eggs, and I have known numerous cases in my experience of hens laying eggs with three yolks. The habit, however, is one to be discouraged in every possible way, says a writer in London Farmer and Stockbreeder, for it is not an indication of productiveness, but rather of disease. It is caused either by some sudden disturbance from the ordinary conditions of life, as a severe fright, or else it is due to weakness of the egg organs—the natural process of formation not being gone through properly and regularly. In almost every case this condition is brought about by overfeeding—a too rapid development of the yolks causing more than one to leave the ovary at a time to enter the oviduct. A hen which once gets into this habit will always be liable to illness, which usually takes the form of loss of power in the legs, even if an actual rupture does not occur internally. Such a hen should therefore be put at once on short rations with a view to checking for the time being the development of eggs. It is not the hen which lays a double-yolked egg occasionally that is a profitable hen. What the poultry farmer should aim at is a higher general standard in egg production—a better average size and more regular laying. Some hens only lay once every two or three days. These are the "unprofitables," and they are often the birds which are addicted to the "double yolk" evil.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuoble. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.

CONSULTATION FREE. BOOKS FREE.

If unable to call, write for a QUESTION BLANK for Home Treatment.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— • • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

RUSSIANS REPORTED TO HAVE BEEN DEFEATED

Their Land Forces Near Chemulpo Said to Have Been Defeated by the Japs

Special to The Times.

St. Petersburg, March 9—The Associated Press has received direct advices from Vladivostock since 5 o'clock this p.m. They do not mention an engagement.

Special to The Times.

London, March 10—A despatch to The Times from Wei Hai Wei, dated March 9, says;—

"It is reported on good authority that a collision between Japanese and Russian troops has occurred near Hai Ju, Corea, 54 miles north-west of Chemulpo, which resulted in the defeat of the Russians.

IGNORES BRITAIN'S ADVICE

LONDON GOVERNMENT ANXIOUS TO AVOID CLASH

Various Nations Desire to Confine Theatre of War to Manchuria and China

Berlin, March 10.—It is said in diplomatic circles at St. Petersburg that Count Beckendorf, the Russian Ambassador in London, in a recent conversation with Lord Lamsdorff expressed the conviction that Great Britain, far from exciting Japan to hostilities, exerted herself to prevent an outbreak of war. It was to her own interests, Count Beckendorff asserted, that Great Britain desires peace, but her counsels were ignored by Japan.

The ambassador said in regard to the Thibetan question that Great Britain, which required several years to recover from the effects of the South African war, had no intention of entering into a serious quarrel with Russia. On that account, in Russian communications to the continental press, the Russian Government has reasons for believing that both Great Britain and France are endeavoring to prevent an extension of the theater of war beyond Manchuria and China. As, however, neither they nor the other powers associated with Italy's recent proposals can undertake to guarantee the neutrality of China it is feared that before the war is many months older China will break from the leash and enter the conflict on the side of Japan.

Even in that eventuality Russia diplomats declare that such action in its present form, in view of assurances from London, does not render necessary any immediate counter demonstration in Central Asia, which is a part of Russia.

St. Petersburg, March 10.—The Novosti prints a significant editorial article which is very conciliatory toward Great Britain. The paper argues that the understanding between the two countries with regard to an Asiatic policy will assure peace in Asia, without which normal development of Russian and British interests there would be impossible. If Great Britain, the Novosti says, would agree to an outlet for Russia to the Indian Ocean, Great Britain's possessions in India would be unconditionally guaranteed by Russia.

The Novoe Vreyma also discusses the offers of British friendship, but with bad grace, saying; "John Bull believes he has a better chance of reaching the winning post with Great Britain and Japan in double harness than with a troika, including the American mustang."

USED FALSE LIGHTS

And Took the Russian Ships Unawares After Crews Had Retired

St. Petersburg, March 8.—A letter from an officer of the Russian cruiser Pallada has been received here describing the first attack by the Japanese upon Port Arthur. The writer denies the story that the officers of the Russian fleet were ashore and confirms the statement that the Japanese made use of false lights.

He asserts that at 11 o'clock at night a practice drill to repel a torpedo attack was executed and that toward midnight four Russian torpedo boats, which simulated the enemy, headed back towards Dalny, from which place they had come. The crews of the fleet had retired, only the watch remaining on deck. The ships were in the outer harbor, and the captain of the Pallada, which vessel occupied the advanced position had descended from the bridge for a last look around before going below, when he perceived lights advancing. The ship's lights shown were white above red, being those of the Russian warships when entering the harbor.

The captain of the Pallada supposed the approaching vessels were the Russian torpedo boats returning from Dalny, and his suspicions were only aroused when upon drawing nearer they covered and uncovered their lights at irregular intervals. The signal tower signalled that the lights were not understood.

At this moment the Pallada's captain, through the thick night made out the outlines of the torpedo boat destroyers smokestacks, in pairs, amidships. As the stacks of the Russian destroyers are in line fore and aft, the crews of the Russian ships were instantly called to quarters.

In less than three minutes the Pallada's men were at their posts orders were given that the guns be charged with grape and a fierce fire was opened on the on-coming Japanese.

The battleships Cesarevitch and Retvizan, which were in the first line, a short distance astern of the Pallada, also opened fire almost immediately.

A terrific explosion occurred under the hull of the Pallada, raising a torrent of water, which submerged the cruiser's deck, but did not stop her firing or manoeuvring, which now, however, were complicated by the measures taken to close a breach amidships, below the water-line, made by the explosion of the torpedo.

Soon afterwards two other torpedoes exploded almost simultaneously, one under the bow of the Retvizan and the other the stern of the Cesarevitch. This double explosion explosion ended the attack, the Japanese vessels retiring at full speed.

LABOR TROUBLE EXPECTED

Union Men From States Stir Up Canadian Building Trades

Hamilton, March 9.—With the coming of spring Hamilton promises to have its share of labor troubles, especially in the building lines. The large influx of American workmen, due to the building here of many big factories, is in large measure the cause of the threatened difficulty. The local unions are now practically ruled by men from across the border who came here to work on the new industries.

The Unpopularity of Whiskers

Commenting on the fact that Governor Alexander Monroe Dockery has just divested his countenance of a celebrated and almost immortal set of whiskers, the New York "Sun" says: "The twentieth century is beginning somewhat as the nineteenth century began, though, of course, not so strictly and universally smooth, but it is doubtful if it will run parallel through all its quarters with its predecessor. There were no mustaches, no beards, when the nineteenth century dawned. Side whiskers began to curl and sprout before it had run far in its course, and they grew bolder after a time and encircled the throat and chin, leaving bare the upper lip. The lip was submerged about 1860, and in the later years of destruction was last to yield to the assaults of the barber. The human countenance began to exhibit itself again not long after the war, and from that time down to the very recent past the unsupported mustache was the prevailing mode. Now fashion is changing again, so that the young men are commonly completely shaved, and their fathers have covered lips. The youth of to-day have the weight of civilized precedent with them. An examination of the family albums of the last four centuries will demonstrate that the unwhiskered have had by far the better of it. For nearly two hundred years of that time the beard was not permitted to sprout. A great deal of encouragement for the shaven but ambitious young man may be found in the Presidency of the United States. From the beginning with Washington down to Lincoln's time whiskers found lodgment in the White House only three times, and in every case they were of the remote variety known as sideboards, which offered no considerable obstruction to the observation of the faces to which they were linked. John Quincy Adams presented a stubborn pair, Martin Van Buren's were amiable in their moods, and Zachary Taylor's were evidently the unobtrusive expression of a fancy for trimmings. Lincoln inaugurated the bearded era, which was carried on by Grant, Hayes, Garfield, Arthur (with Dundrearys), and Harrison, though Harrison yielded not a little of his expanse before he retired from office. Cleveland was the first mustached President and Roosevelt the second, while McKinley preserved the tradition of the smooth face.

Already Provided.

A certain small village, far removed from the noise and bustle of commerce, boasts a female preacher, and the lady's duties are many. One day she may visit the sick, another attend a funeral, and the next baptize a baby. One afternoon she was preparing the sermon for the following Sabbath when she heard a timid knock at the parsonage door. Answering the summons she found a bashful young German standing on the step and twirling his straw hat in his hands.

"Good afternoon!" the preacheress remarked. "What do you wish?"

"Dey say der minister lifed in dis house, hey?"

"Yes, sir."

"Yess! Vell, I vant me to kit married."

"All right; I can marry you," she said. The lady's hair is beginning to silver and the German glanced at it. Then he jammed his hat on his head and hurried down the path. "What's the matter?" she called after him.

"You gits no chance mit me," he called back. "I don't vant you; I haf got me girl already."—"Modern Society."

A Lesson in Tact.

A few weeks ago, says James MacArthur in "Harper's Weekly," I quote some passages in these columns from a correspondence between the Brownings in the days of their early acquaintance on Carlyle's strong dislike of poetry. I have just heard of a new story on the same theme which is told by Professor Goldwin Smith. It appears that Professor Smith was once a visitor with Carlyle at Lady Ashburton's house when Tennyson was one of the circle at "The Grange." Tennyson was asked to read one of his own poems aloud, but, to the surprise and disappointment of his gentle hostess and her company, he refused—a thing he was never apt to do. Looking across the room, Professor Smith saw the cause of the difficulty. Close to Tennyson sat Carlyle, who was wont to make a universal sweep of poetry in its relation to common sense when aroused by the proximity of the Muse. Professor Smith, devoting himself to the public good, and, we may add, in courteous consideration of his hostess, crossed the room, and invited Carlyle to take a stroll in the grounds. The Sage accepted the invitation, and, during the stroll, the poet brought off his reading.

A Volcano.—"What is a volcano?" asked the teacher.

"A mountain with a fire inside," said one.

A smile of comprehension spread over the puzzled face of the smallest scholar as she asked, surprisedly, "Is that a mountain range?"—Harper's Magazine.

Reeder—Scott said a clever thing today; said that luck is a good bit like lightning, for it seldom strikes twice in the same place.

Heeder—Yes, and as a rule neither of them needs to.—Pennsylvania Punch Bowl.

"Do you think you could ever marry for money?"

"No. But I'm sure I could soon learn to love a girl who had a million or two."—Chicago Record-Herald.

"I told you she would dismiss you if I came in between."

"Yes, she has, all right, but you're a dead one, too."

"Why?"

"She told me everything between us was at an end."—Cincinnati Commercial Tribune.

Ancient British Wheat Fields.

A wheat field a thousand years old is quite a common sight in this country. Of course, it has not grown a crop of corn every year in the ten centuries, but during that long sequence of ages, in the fixed and abiding order of this ancient country, that particular area of land has been cultivated, with the production of wheat as its main object, and it has remained as a part of the English granary from the days of Edward the Confessor until those of Victoria. Many of the wheat fields are far more ancient than this, but the records of Doomsday Book is a practical voucher for a period of 1,000 years. The custom of the Saxon cultivators, and the evidence of local names, are proof of a still greater antiquity of cultivation on some of the best corn land; and beyond the days of the Saxons lie the last two centuries of Roman occupation, when England was the great wheat-growing country of the West, and supplied the population of Rome with daily bread.—London Weekly Country Life.

Jack—Well, not handsome enough to sonize to another lady.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon those two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Huie winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 540 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

EYE TO EYE.

"And they shall see eye to eye when the Lord shall turn again to Zion."
Blessed promise of a golden day,
Checkered by no blasts of blinding sorrow,
Clear and all-cheering as the sun's bright ray,
Telling to-night the comfort of to-morrow.
All carking cares forever take their flight,
Tear-shadowed eyes, by love wiped ever dry,
When we shall pass the goal of earth's dark night
And scan the future undimmed, eye to eye.

Blessed hope, which, like a golden anchor,
Binding the soul to that fair world on high,
Where neither rust nor earth's corroding canker
Touches the treasure far beyond the sky:
O'er all the storms of life securely riding,
Fearing them not as they go sweeping by,
Safe in His dear pavilion there abiding,
We'll find our loved ones, and see eye to eye.

Blessed truth that comes to cheer our sadness,
Lifting us up above earth's petty care,
Bringing us joy and hope and peace and gladness,
Where once we knew but grief and dark despair,
Shining with steady glow, to light our tired feet
Treading the thorny path that we decry,
Ending whene'er we gain that blest retreat,
Where truth triumphant we see, eye to eye.

Blessed faith, from God the glorious Giver,
Blessed promise to the human soul,
Blessed peace that like a mighty river
Comes now to nourish and sustain the whole.
Blessed faith that lifts the misty curtain,
Blessed hope that holds where treasures lie,
Blessed truth that makes things hoped for certain,
May we soon know and see them eye to eye.

—E. H. Foss, in United Presbyterian.

He Believed in Signs

"WHAT rot," said Mr. Thompkins, standing still and gazing at the front door of a house he was passing.

"Come, dear," said Mrs Thompkins, nervously. "We shall be late."

"Why don't people try to be sensible if not coherent?" went on Mr Thompkins, gazing steadfastly at the door.

"What is the matter?" asked Mrs. Thompkins.

"Look at that sign above the bell," said Mr. Thompkins, pointing majestically.

Mrs. Thompkins looked. There was a small brass plate above the electrical button at one side of the door. The plate said:

"Ring the bell."

"Well," said Mrs. Thompkins. "Well?"

"Well," repeated her liege. "Merciful heavens, woman, are you, too, utterly devoid of brains?"

"No-o, I think not," replied Mrs. Thompkins, doubtfully. "Still, I don't see what you are objecting to."

"Remain here," said Mr Thompkins. "It is no use to waste explanations upon you. I will show you, if you will but listen to what I object. And I commence forthwith with a crusade I have long contemplated."

Mr Thompkins moved majestically up the steps of the house and proceeded to ring the bell again and again. A housemaid came to the door and asked what he wanted. Mr Thompkins paid no attention to her and continued to ring the bell. The housemaid disappeared and returned with her mistress.

"What do you want?" demanded the woman.

"Nothing," said Mr Thompkins, and he again jingled the bell.

"Why are you standing there ringing my bell?" asked the woman, looking down the street to see if there were any policemen near by who could take the lunatic in charge.

"I am ringing the bell," said Mr Thompkins, "because the little brass sign above the bell commands me to. I was passing the house and I saw the words here, 'Ring the bell.' Although it is causing me a good deal of inconvenience, I obey." And Mr. Thompkins continued to push the button.

"But," said the woman in a tone of voice which plainly showed she was following the injunction to always humor crazy people, "if you do not wish to see anyone in my household why do you stand there and ring the bell?"

"And why, if I do not wish to see anyone in your household," said Mr. Thompkins, "should a brass sign be displayed commanding me to ring the bell?"

"You are not commanded to ring my bell."

"The brass sign, madam, says: 'Ring the bell.' The phrase is apparently addressed to all who pass this way. If you wish to command only those who have business at this house to ring the bell then change the phraseology of the sign and do not leave it so worded that it appeals as a command to all who pass this way."

"I wish my husband were home," snapped the woman. "He would kick you off those steps."

"That depends," returned Mr. Thompkins, politely. "Anyhow, I have explained this matter to you, and if you do not institute a reform the fault is not mine. Good day."

"Idiot," hissed the woman.

Mr. and Mrs Thompkins resumed their walk downtown. Mrs. Thompkins had gloomy forebodings. She saw that her liege had started out to institute a reform and he would not rest until he encountered disaster.

They entered an art store, where Mrs. Thompkins wished to look at some picture frames. The next she heard from Mr. Thompkins he was standing in front of the cashier's desk.

"The suburban train No. 445, which is due to leave our station at 9:23 a. m., did not leave until 9:33 this morning," "The elevators throughout the building worked badly yesterday, and the janitor on our floor did not sweep the corridors."

"Where do you think you are?" asked the proprietor, gently. "Don't you want to come back in my office and lie down on the sofa for awhile?"

Mr. Thompkins pointed to a placard that hung in front of the cashier's desk. It said:

"Make All Complaints Here."

"I am making all the complaints I can think of," he said, pleasantly. "The telephone in our house—"

"That sign," said the proprietor, stiffly, "refers, of course, to complaints in regard to our employes or to other matters concerned with this store."

"Then," returned Mr. Thompkins, "might I ask why doesn't the sign so specify?"

"Every fool ought to know that," said the proprietor, sourly.

"Ah, yes," said Mr. Thompkins. "Every fool ought to. But, just the same, you have no right to object if anyone follows the instructions you have here given and makes all complaints as requested. You have no right to command people to make complaints unless you are prepared to hear them. I would suggest that you immediately change the phraseology of that sign."

Mrs Thompkins and the proprietor managed to get Mr Thompkins outside. But he was so worked up over his crusade by this time that Mrs Thompkins was only counting the minutes until the catastrophe occurred. Mrs. Thompkins in her desire to make her liege forget his crusade led him into a department store. They had no sooner got inside than Mr Thompkins made a dash for a district messenger call box, where there was a sign displayed:

DISTRICT MESSENGER CALL BOX
PULL BUTTON CLEAR DOWN
AND LET GO

Mr Thompkins pulled down the button and let it go, and then as soon as it was back in its original position pulled it down again. He stood in front of the box working the button as fast as it would work. Soon a uniformed messenger boy appeared and shoved a book and pencil into Mr Thompkins' hands.

"Whachyouwant?" he demanded.

"Not a thing," said Mr Thompkins, pleasantly, again pulling down the button.

"What did yer call a messenger fer, then?" demanded the boy.

"Because the sign over this box requested me to do so," replied Mr Thompkins.

"Ah, yer nutty," said the wrathful messenger. "Git me way over here an' nothin' doin'."

Another messenger boy appeared and behind him another, and the face of still one more appeared at the door. The first boy eagerly called to the later arrivals to approach.

"De ole guy is batts," he whispered, hoarsely, "clean dippy."

"Say, mister," said the first boy to Mr Thompkins, "if you got enuff messenger boys here an' don't want nothin', w'y cut it out."

"There is nothing specified here as to how many times I must pull this button down," said Mr. Thompkins. "It merely commands me to pull the button and, as I understand it, to keep on pulling it indefinitely."

"Gee," said one of the messenger boys. "Say, he's wearin' out de battery on dat box. De manager will chew his ear off, an' he's got all de boys in de office over here, too. Say, back pedle, old man, you've had fun enuff."

Mr Thompkins only smiled and continued pulling down the button. The first messenger boy made a rush and butted Mr. Thompkins in the stomach. Another boy took him in the back. He went down with a crash and women in the store screamed and clerks and floorwalkers came rushing up as the messenger boys piled enthusiastically on top of Mr. Thompkins, and one of them grabbed him by the ears and bumped his head on the floor. Mrs. Thompkins tried to fight them off with her parasol, but a clerk restrained her. Finally a policeman appeared and dragged Mr Thompkins away from the messenger boys. Mr. Thompkins attempted to tell his story, but the boys insisted on telling theirs first.

"Go on, all of you," said the policeman. "You boys hustle back to where you belong, and here, lady, you'd better take this husband of yours back home. He oughten ter git too far from the house. You talk about obeying signs, mister," he continued, addressing Mr. Thompkins. "Keep it up. There's a sign out there that's just intended for you." He pointed to a sign which read: "Take care here."

"But—" began Mr. Thompkins, feebly.

"Go on, now," said the policeman. "That's your sign. You're so gay about doin' everything signs say, you do what that one says. You take the car right there, and do it quick, or I'll run you in."

And Mr. Thompkins obeyed.—Chicago Tribune.

To Rid City of Beggars.

Police Commissioner Greene, of New York city, has announced that by an arrangement with the Charity Organization society all professional beggars and vagrants arrested hereafter will have their pictures taken for a gallery to be kept at the society rooms. An organized effort will be made to rid the city of the beggars, the worst class of whom are said to have formed themselves into a society known as "Y[illegible]

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN	Secretary
ALEX J. CHAPTON,	Treasurer

Trustees

J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES.

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5?7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 6.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.
or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely certain that the interest of each shareholder ... others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address.

GEO. W. E. DORSEY, President,
Boise City, Idaho,

J. W. DOUGHTY, Fiscal Agent,
Peterborough.

Anecdotal.

A Western Congressman was asked if he did not think President Roosevelt certain to be re-elected, barring any "big mistake" the candidate might make. "Yes," was the reply, "but let me tell you that the biggest mistake he possibly could make would be to allow the crops to fail next year."

A friend of Edward MacDowell attended a recital given by a mediocre teacher's pupils, and when he met the American composer he remarked: "I heard one of the pupils, a little girl of eight, play your 'To a Wild Rose.'" The composer sighed dejectedly. "I suppose," MacDowell remarked, "that she pulled it up by the roots."

During the protracted sessions of the Parnell commission, Justice Day habitually sat with closed eyes. It was commonly supposed that his lordship was sleeping, and the late Sir Frank Lockwood, observing that the learned judge was very much awakened by a little tiff between the president and Sir Charles Russell, exclaimed, quite audibly: "This is the dawn of Day!"

Chauncey M. Depew declares that when King Edward, as Prince of Wales, visited the United States, the old Duke of Newcastle used to scan the accounts of expenditure. At the end of one hotel bill he one day found a charge which he couldn't make out. "What's that charge for?" asked the Duke of the hotel proprietor. "For making such a damned fuss," was the immediate reply.

General Nelson A. Miles says that during the Civil War there was one conscription fakir who made thousands of dollars before the authorities restrained him. This rascal would send letters broadcast, wherein he said he would communicate for two dollars a sure means of escaping the conscription. Letters, enclosing two-dollar notes, poured in on him, and in reply to each letter he would send a printed slip reading: "Join the nearest volunteer regiment."

An old negro living in Carrollton was taken ill recently, and called in a physician of his race to prescribe for him. But the old man did not seem to be getting any better, and finally a white physician was called. Soon after arriving, Dr. S.—— felt the darkey's pulse for a moment, and then examined his tongue. "Did your other doctor take your temperature?" he asked. "I don't know, sah," he answered, feebly; "I hain't missed anything but my watch as yit, boss."

One of Pere Ollivier's flock, a very beautiful and handsomely dressed woman, coming very late to church one Sunday morning, caused some disturbance and stir among the worshippers by her entrance, and interrupted the flow of eloquence of the worthy father, who, very irritable and easily put out, said: "Madame perhaps waited to take her chocolate before coming to church?" To this, madame, by no means abashed, graciously replied: "Yes, mon pere; and two rolls with it."

It is related that the American commissioner of fine arts at a Paris exposition once wrote to several artists—to Whistler among them—saying that he would be in Paris shortly, and mentioning the time at which, and the place where he would like them to call upon him. Whistler was asked to call at four-thirty precisely. He wrote: "Dear Sir — I have received your letter announcing that you will be in Paris on the —th. I congratulate you. I have never been able and never shall be able to be anywhere at 'four-thirty precisely.' Yours most faithfully, J. McN. Whistler."

By his tact and amiability Sir Thomas Lipton has made thousands of friends during his visit in New York City. One day recently on the "Erin" he was watching the "Shamrock" from the bridge, and his guests, among whom were some pretty girls, were on the deck below, screened from the sun by awnings. Sir Thomas went down to chat with them for a few minutes, and then said: "I think I'll have the awning taken down." "Don't, Sir Thomas," the women all exclaimed in chorus, "we'll roast here." "But," tactfully replied the baronet, "I'm lonely on the bridge, and I miss your pretty faces." No one objected to the awning coming in after that.

Here is one of Lew Dockstader's latest stories: Two brothers had more or less trouble with the boy next door, and hadn't always come out victors. In fact, the boy next door was so much bigger that he seemed to have the best of it invariably. So it wasn't an unusual thing when one of the boys came into the house with a badly bruised eye. Moreover, he was crying when his aunt stopped him in the hall. "Hush, Willie," she said; "you mustn't make any noise." "What—what's the ma-matter?" he asked, between his sobs. "You may disturb your new brother," said his aunt, soothingly. He dried his eyes in a minute. "Have I got a new brother?" he asked. His aunt nodded. "One besides Jim?" She nodded again. "Bully!" he exclaimed. "You're glad of it?" she asked. "You bet!" Willie fairly shouted. "If Jim and me and the new one can't lick that feller next door, we'd better move."

A pretty story, illustrative of the change of feeling which has come over the Irish peasant toward King Edward since the recent royal visit, appears in the English press. Two London journalists, on their way from Dublin to Cork accosted a shaggy, farmer-looking native at a Queen's County station with the words: "Well, Pat, what do you think of the King of England now?" "King of England, is it?" replied the Irishman, and there stole over his face an inimitable expression of drollery as he went on in a stage whisper: "Sure, avic, ye'll want a viceroy over there, I'm thinkin'. Himself an' herself are not goin' back to yez at all!" An old dame in Galway who had spoken with the King was questioned as to what she thought of his Majesty. She delivered herself of a long and enthusiastic eulogy, to the effect that "Edward the First of Ireland" was "a grand man entirely," closing with the remark that she had "only wan thrifling fault to find with him," and that was that "they keep the poor man so long in the Phaynix Park beyant that they have him talkin' with a strong Dublin accent."

Scribbler—I've got a winner this time. Friend—New historical novel? Scribbler—No; it's a book of excuses for borrowing money. They're all catalogued. Five for every day in the year.—Chicago "Daily News."

Larry—Phwat are you doin' wid thim dog-biscuit, Pat?

Pat—Sure, the doctor said I needed more animal food.—Philadelphia "Record."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, *Fiscal Agent,* Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY,

Not Only Relief, but Lasting Cure

Is What You Get From Catarrhozone Which Eradicates Every Trace of Catarrh From the System.

Relief is a good thing, but we soon get tired of it and look for a remedy that will drive the seeds of Catarrh right out of the system. It is only a waste of time to trifle with internal dosing. You must treat Catarrh locally because it is a local disease.

The most sensible treatment is Catarrhozone which really does reach the diseased membranes in a most thorough way. Every case of catarrh can be cured if Catarrhozone is used. It unquestionably penetrates every air cell and air passage of the breathing organs. It completely destroys the catarrh germs and heals all the inflamed surfaces.

Every requirement of an ideal catarrh cure is embraced in Catarrhozone. Other treatments may have failed to even bring relief, but one trial is sufficient to prove merit in Catarrhozone not found in the ordinary snuff or wash that unscrupulous people sometimes recommend for catarrh.

If you are subject to colds, catarrh or throat trouble you will find quick relief and lasting cure in fragrant, healing Catarrhozone. Mrs E. P. Fairbanks, of Durham, was cured of chronic catarrh by this remedy and endorses it in the following letter, which speaks for itself;

"I suffered continually from catarrh which affected my throat. My nostrils were usually inflammed and I was greatly bothered with droppings in the throat which made me sick at my stomach. I had a bad taste in my mouth, and felt a ringing in my ears. I read of Catarrhozone and commenced to use it. In a few days it helped me more than I ever expected. I used it four times daily and in two weeks most of the disagreeable symptoms disappeared. I continued the Catarrhozone treatment for six weeks and was perfectly cured. The catarrh has never returned."

Every complete outfit of Catarrhozone sufficient for two months' use is guaranteed to permanently cure; trial size 25c. Sold by druggists or by mail from N. C. Polson & Co. Hartford, Conn., U.S.A., or Kingston, Ont.

Died at Lindsay

The funeral of the late Robert Nugent, who died suddenly at Lindsay on Tuesday evening, will be held there today. Deceased was an uncle of Mr. John Nugent, of this city, who left last evening to attend the funeral.

Designed by Mr. T.A.S. Hay

Mr. T. A. S. Hay has completed a beautiful design for a corporate seal which may be adopted by the Council. The design contains the motto, "Nature Provides and Industry Develops," and is most appropriate.

Will Visit Schools

In connection with the Ministerial visitation of schools this afternoon, Rev. J. A. Wilson and Rev. J. P. Wilson will visit the Ashburnham school, and Revs. J. G. Lewis and J. Bastow the Barnardo avenue school.

Preparing for Next Season

Mr. Geo. H. Brown, the genial proprietor of the Chemong Park Hotel, was a visitor in town yesterday, and while here was a pleasant caller at our sanctum. Mr. Brown is having his house thoroughly renovated in anticipation of a large tourist trade next summer. Last year was a most successful one, in fact, a record breaker, so far as the number of guests, and the general business was concerned, but Mr. Brown has reason to believe that this year's business will be even greater.

The attendance at the
Peterboro' Business College
is larger this year than ever
WHY?
Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.
NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course
WM. PRINGLE.

Primary and Junior Union

Miss A. Roberts and Rev. Dr. Torrance will have charge of the Sunday school lesson at the meeting of the union to be held to-morrow evening in the Y.M.C.A. Mr. J. W. Garvin will also give a short talk on Psychology.

Lumbermen Arrive in Town

A number of the Dickson Company's shantymen arrived in town yesterday from the northern woods, near Buckhorn. During the winter they cut over 45,000 feet of timber, but were seriously hampered, owing to the heavy snowfalls.

Mr. Alf. Kingscote Honored

The recording secretary of Lansdowne Lodge, S.O.E., Mr. Alf Kingscote, was presented with a handsome jewel of merit, at the last meeting of the lodge. The medal consists of a silver star, with a sovereign in the centre, on which are inscribed the words "Sons of England." The badge is of blue with silver clasps.

15 Days to Sober Up

An Indian, named Anderson, of Hiawatha, appeared before His Worship Magistrate Dumble, yesterday morning on a charge of drunkenness. He refused to disclose the name of the hotel, at which the whisky was purchased, and His Worship imposed a fine, which the redman was unable to pay, so he will take up his abode in the city jail for the next 15 days.

Funeral Notice

The members of Otonabee Lodge, No. 13, I.O.O.F., are requested to be present at the rooms of the I.O.O.F. (corner of George and Hunter streets) on Sunday, March 13th, at 1.30 o'clock p.m., sharp, for the purpose of attending the funeral of our late Bro. W. J. Craig.

The members of Peterborough Lodge, No 111, and all members of the order in the district, are also respectfully invited to be present.

W. F. GREEN, Rec.-Sec.
Otonabee Lodge, No. 13.

A COMPLAINT

Editor Morning Times :—

Sir,—The management of the skating rink have been extensively advertising for the last week or two that the Marlboro Hockey team, of Toronto—O.H.A. champion seniors—would play our local team here last night, and announced that it would be the last and best game of the season, and that there was a guarantee that the full senior team would play, and thus induced a large turnout. It is today announced by the press that the Marlboros sent a crippled team to Peterborough, and that only three of the seniors figured on the team. All this is borne out by the result. Surely this is not sportsmanlike, and if the management has a spark of sporting blood in its veins, it will return the gate money, obtained by such untruthful representations.

Yours &c.,
FAIR PLAY.
March 10, 1904.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Don't miss the chance of getting a ping pong set for 45 cents. Regular price 85 cents. Times Bookstore.

—The Peterborough Quintette left last evening for Lakefield, where they played at a ball.

—While cutting ice on Chemong the other day, a large black bass was found frozen in the ice. The fish made an excellent Lenten dinner for the ice men.

—We have about 50 copies left of the bargain list of floral design, cloth bound books, which are on sale at only 15 cents each. Some very choice titles. Times Bookstore.

—Some one evidently laughed too heartily on Charlotte street the other evening, and as a result lost an upper set of teeth. They were recently handed to the police.

—The annual meeting of the Women's Mission Circle of the Murray street Baptist Church will be held this evening at eight o'clock. All women interested in missions are cordially invited to attend.

—Mr. Arthur Blade, and Mrs. A. R. Ringer, of Reid street, have received the sad news of the death of their brother William, who recently passed away at his home in Sydney, New South Wales.

—The Canadian Express Company received two curios yesterday, in the form of Gladstone bags, whose autobiography is most interesting. They were originally dispatched from South America about five years ago, and since that time have toured through America, Europe, Africa, Asia and Australia, and their present condition bespeaks much travelling. Numerous tickets were found attached to them, and the bags were sent on their journey from Peterborough yesterday afternoon.

—The remains of the late Mr. J. T. George arrived in town on the 10.48 train Tuesday evening from Peterborough. The casket was one that Mr. George took with him to England, and was trimmed by one of his grandsons here. It was enclosed in a shell lined with lead, and it required six men to carry it from the sleigh. The features of the deceased gentleman looked as natural as if he had only been dead a few days. The funeral took place yesterday afternoon from his late residence, Ridout street. From a letter received with the casket, we learn that death was due to a cold contracted while attending the funeral of an old friend.—Port Hope Guide.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Flossie Wyatt, of the Fifth Ward, is visiting friends in Lindsay.

—Mr. John O. Craig, of the Craig House, Lakefield, was in town yesterday.

—Mr. Thos. Perdue, who has charge of the Sylvester Co's interests in this city, visited Lindsay on Tuesday last.

—Miss Maggie Heffernan, of Westwood, who has been visiting Peterborough friends, has returned home.

—Mrs. E. J. Lynch and Master Rodge, of Westwood, visited friends at Peterborough on Saturday and Sunday.—Hastings Star.

—Mr. E. W. Argus has returned from Ambaratburgh, which place he was suddenly called recently on account of the death of his son.

—Mrs. Armstrong, of Peterborough visited her mother, Mrs. Londerville during the past week.—Hastings Star.

—Lieut.-Col. Rogers, of Grafton, visited our city yesterday.

—Mrs. R. Johnson, of Lakefield, has been visiting Peterborough friends.

—Miss Julia O'Donnell, of Peterborough, has been visiting her cousin Miss Kate English, of Caughnawaga, for the past week.

—Mr. A. E. Leck, of Montreal and formerly of this city, spent yesterday in town, renewing acquaintances.

—Miss W. Miller, who has been visiting in the city, and the guest of Miss Ethel Tully, returned to her home in Keene yesterday.

—Miss Jessie Hills, who has been conducting a cooking school here in connection with the Y.W.C.A., left for Toronto yesterday afternoon. Miss Hills has made many warm friends during her brief stay here and she will always be a welcome visitor among them.

INQUEST ON DEATH OF MR. JAS. CRAIG.

Was Held by Coroner Gray Yesterday Afternoon—

Strychnine Poisoning Suspected—Victim's Stomach Sent to Toronto for Analysis

The inquest on the death of Mr. Jas. Craig, who was poisoned at Lakefield on Wednesday morning, as a result of eating canned sardines, was held yesterday afternoon. A jury was empannelled in the forenoon, and after viewing the body, adjourned till 2 o'clock in the afternoon.

Dr. Fraser of Lakefield, testified that he had been called in to attend deceased about 1 o'clock in the morning. When he arrived he immediately considered the symptoms as those following a dose of strychnine, but on the patient becoming conscious, he denied any knowledge of his having taken that poison. Deceased informed him that he had at one time had the poison in the house, but had used it all to poison rats. He had had no tea, and had ordered two tins of sardines from Kennedy's shop. From these he ate two or three, not more than three, and then noticing them very bitter, he threw them out in the back yard. Dr. Fraser sent for Dr. Baker, while the patient was still conscious, but on the doctor's arrival, he had again lapsed into an unconscious state.

Dr. Baker gave evidence to the fact that he was called in about 5 o'clock in the morning and on his arrival he found the deceased unconscious. He thought as Dr. Fraser did that the unfortunate young man was a victim of strychnine poisoning.

Mr. John Craig, an uncle of deceased, testified that the dead man had been employed at the Craig House in the capacity of cook and that, on the night of his death, he had last seen him about 10 o'clock. At that time he had said he intended to set bread. About 11 p.m. he went to bed without complaining, and about 1 o'clock next morning deceased's wife told witness of his being ill. He was never in better spirits than on the night he took sick.

Edward Tanner, a druggist, of Lakefield, swore that deceased had purchased strychnine from him on Oct. 12th last, supposing it was for the destruction of rats.

James Long, hostler at the Craig House, swore that on Jan. 10th last he had purchased poison for deceased in order to poison rats.

Mrs. Lily Craig, widow of deceased, swore that she was at home on the night of his death, and noticed nothing unusual in his manner. He was sleeping on a sofa when she went to bed and she knew nothing of his intending to send for sardines. He retired about 11 o'clock, apparently all right, and was soon asleep. In about an hour and a half he awakened moaning. She immediately gave the alarm and Dr. Fraser was sent for. She knew of no cause for his taking poison.

The deceased's daughter, and Miss Sadie Yates, the dining-room girl, also gave similar evidence.

The jury consisted of the following:—

John English, Wm. Cox, John Murdoo, F. Lillicrap, John Balsdon, T. Webster, W. S. Reynolds, J. C. Gulle, John Bickle, Wm. Cox, Frank Richardson, Chas. Shannon, L. Steele.

The deceased's stomach was sent to Toronto for analysis, and the inquest was adjourned till March 23d, in order to get a report of the analysis.

MARRIED

OLIN—HUFFMAN — On Thursday, March 10th, at the George street Methodist parsonage, by Rev. J. P. Wilson, George Olin to Rachael Huffman, daughter of Robert Huffman, all of Millbrook.

HELPING THE CONSUMPTIVES

Friends in Peterborough Who Have Contributed to the Muskoka Free Hospital For Consumptives

How true it is that "one touch of nature makes the whole world kin" is well illustrated in the response that is being made to the appeal of the trustees of the Muskoka Free Hospital for Consumptives. The secretary, at the head office, Mail building, Toronto, tells us that the contributions are coming from the most divergent points of the Dominion, east and west. In fact monies have been received from the Arctic Ocean, Bermuda and the Yukon. It will be difficult, when one remembers the nature of tuberculosis, to think of a charity that is more deserving of support from every one. Recent contributions received from this town include:

M Laura Bennett......	$ 6	00

The burnished plumage of the peacock owes its brilliancy and splendor to a healthful condition. Let the bird be sickly, and the plumage droops and grows dull. There is no exception in nature to the rule that beauty depends on health.

Women who see their beauty waning rarely associate the external change with failure of the womanly health. They do not understand the close relation of the general physical health to the health of the delicate womanly organism, until after being cured of womanly diseases by the use of Dr. Pierce's Favorite Prescription they find the color returning to the cheek and the flesh to the body.

"Favorite Prescription" establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness.

"Several years ago I was very poorly," writes Mrs. May Kelley, of Sylvia, Kans., "so weak I could hardly walk across the floor, and at times suffered severely. I took two bottles of Dr. Pierce's Favorite Prescription and got well and hardy—gained twelve pounds in two months and was the picture of health. Your medicines have cured me. Almost everybody I meet says, 'You look so much better than you have for several years; you look well now.'"

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Pleasant Pellets are a lady's laxative. Nothing equals them for gentleness and thoroughness.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men.

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

RUSSIANS ATTACK JAPANESE FLEET AT DAYBREAK.

Lost a Torpedo Boat Destroyer and Sunk a Jap Boat in Rush at Enemy's Fleet.

Special to The Times.

St. Petersburg, March 11, 7.10 p.m.—The Russian torpedo boat flotilla left Port Arthur at broad daylight this morning and attacked the Japanese fleet. One Russian torpedo boat was destroyed and one Japanese torpedo boat was sunk. The name of the Russian boat was the Bespashtchadni. The fate of the Russian crew is not known.

MOUNT SEIGE GUN.

Special to The Times.

Tien-Tsin, March 11—One field battery has been installed in the fort at New Chwang and also one company of infantry, while preparations are being made to mount a seige gun.

PARADED PRISONERS.

Special to The Times.

Tien-Tsin, March 11—One officer and four Japanese soldiers, who recently were captured near Wiju, Corea, were paraded through the streets of Mukden on Tuesday, March 8.

KEEP TROOPS READY.

Special to The Times.

Mukden, March 11—It is officially announced that in consequence of the many conflicting accounts of the landing of Japanese troops at different points and the various reports of the intentions of the Japanese commanders, the Russian army corps which has arrived at Harbin will be detained there.

It will be most difficult to find accommodation for this great body of troops and their detention at Harbin will entail much hardship on the soldiers.

MUCH COAL AT WIJU.

Special to The Times.

Tokio, March 11—The Wiju-Seoul Railway concession was signed yesterday by the Japanese and Korean authorities.

The Russians are engaged in building defences at Wiju, which will co-operate with the fortifications already constructed on the left bank of the Yalu.

It is reported that the Russians have 15,000 tons of coal at Wiju, which they keep drenched with kerosene in readiness to burn should the Japanese land there.

LATEST FROM SEAT OF WAR

London, March 12,—The fighting has been renewed at Port Arthur, but no definite results of the bombardment have been reported here. The attacks have served to occupy the attention of the Russians, while the Japanese are landing troops at other points. There has been more skirmishing in Northern Corea, but no very important battles have been fought. The Russians have placed mines in the Yalu River where the Japs are expected to cross, and the port of New-Chwang is being closed with hulks to prevent the Japanese vessels from entering. The British and United States gunboats have been there spending the winter and unless they are allowed to leave both nations will enter a protest.

No trace has yet been found of the lost Russian Vladivostock squadron. The Japanese Admiral who had charge of the bombardment reports that the vessels were invisible. In some quarters it is thought that they have steamed away to some home port, perhaps in South America, but it will be a month or so before it reaches there.

A report last night states that about fifteen ships of the Japanese fleet took part in the last bombardment of Port Arthur, and that the losses were but slight. Several Japanese were killed and wounded, but the exact number is not given. In the harbor and town there was considerable loss of life. Alexiff's reports do not quote any figures, but it is expected that the Russian loss could not have been very slight.

The Russians have issued an order that the Chinese soldiers must keep within the great wall, and this is likely to change China's policy of neutrality. The bandits who have declared themselves on the side of the Japs, have threatened to destroy the Manchurian Railway, and this has aroused the ire of the Russians, and they have asked that they be controlled. In the event of the Chinese refusing to comply with these "requests," this may tend to arouse the "Chinks" to take a hand in the war. In event of their doing so, China will ally with Japan and Russia will go down to an untimely grave.

Thousands of copies of a revolutionary manifesto appealing to citizens not to contribute to the war fund were distributed throughout St. Petersburg yesterday. Some were posted on walls until the police removed them. The manifesto also warns citizens not to support the Government because it brought about for frivolously dynastic purposes a war which will cost millions of roubles and ruin the country.

Y.W.C.A. BUILDING FUND

Young Women are Meeting with Liberal Response - Many Shares Sold

At a recent meeting of the Y.W.C.A., it was decided that subscriptions towards the building fund of the proposed new apartments, would be asked for. One method adopted by several of the young ladies, was to have books of shares printed, the shares to sell to any unmarried man or woman at 25 cents each. Each book contains 25 shares and one purchaser can obtain as many certificates as he desires.

The girls report that they are meeting with great success, as nearly every person they approach recognizes the excellent aim they have in view, signs for one or more shares. The secretary also has these shares for sale, and the results of the young ladies' efforts are, so far, most encouraging. It is expected those who first refuse, will, when they reconsider the matter, subscribe towards this good cause.

A PLEASANT EVENING SPENT

Pastor and Deacons Spend Pleasant Evening on Thursday Evening Last

A very pleasant evening was spent at the parsonage of the Park street Baptist Church, on Thursday evening, when the pastor and deacons met to talk over business in connection with the church.

Refreshments were served after which the business meeting was held in the study, while the ladies remained in conference at the "Round Table" The deacons are full of hope and faith, and are confident that the church has settled down to real business.

Among those who had responded to the Pastor's invitation were; Deacon and Mrs. Gillespie; Deacon and Mrs. Barrie; Deacon and Mrs. Hunt, and Deacon and Mrs. Kemp.

—A flock of wild geese were noticed passing over our city on Tuesday. This is another indication of spring.

FIRST ANNUAL CONCERT

Under Auspices of Otonabee Lodge I.O.O.F on Monday April 11th

The First Annual Concert held under the auspices of Otonabee Lodge, I.O.O.F., will be held in Bradburn's Opera House, Peterborough on the evening of Monday, April 11th. The following high class artists will take part in an excellent programme. — Miss Ladell, America's greatest elocutionist; H. Ruthven McDonald, America's greatest baritone; Master Harold Rich, the phenomenal boy soloist, and Mrs. H. R. McDonald, pianist. Admission, reserved seats, 50 cents; general seats, 25 cents, and gallery 25 cents. James A. Dawson, Secretary of Committee.

—The many friends of Mrs. Alex. Stewart, of Brock street, will regret to learn that she is seriously ill. The Times joins in sincere wishes that her recovery may be speedy.

ANOTHER ENGAGEMENT BETWEEN RUSSIANS AND JAPS.

The Two Fleets Have a Hot Encounter---The Japanese Bombarb Port Arthur Again

Special to The Times.

St. Petersburg, March 12—The Emperor has received a message from Viceroy Alexieff from Admiral Makaroff commanding fleet and forts at Port Arthur, under date of March 10—

"Six torpedo boats went out to sea on the night of March 10. Four of them, being under the general command of Capt. Matleusseviteh, encountered the enemy's torpedo boats, followed by cruisers. A brief action ensued, in which the torpedo boat destroyer Vlastini discharged Whitehead torpedoes and sunk one of the enemy's torpedo boats. On the way back the torpedo boat destroyer Stiredusdichi, commanded by Lieut. Serguerieff, sustained damages; her engine was disabled and she began to founder.

"By eight o'clock in the next morning 5 of our torpedo boats had returned.

"When the critical position of the Sterevastchi became evident, I hoisted my flag on the cruiser Novik and went with the Novik and the cruiser Bogarin to the rescue, but as five of the enemy's vessels surrounded our destroyer and as their battleship squadron was approaching, I did not succeed in saving the Stirevustchi, which foundered. Part of the crew were made prisoners, and part drowned.

"On the ships which participated in the night attacks, one of the crew was seriously injured, and 3 others were slightly wounded, but two soldiers were killed and 18 wounded.

"At 9 o'clock 14 of the enemy's ships assembled before Port Arthur and bombardment commenced with the heavy guns of their battleship squadron at long range. This lasted until 1 o'clock in the afternoon. It is estimated that the enemy fired 154 12-inch shells. The damage to our vessels was insignificant, and they are again ready for battle. Our losses were 1 officer slightly wounded, and one soldier killed and four wounded.

"The illumination of the sea at night by the searchlights mounted on our batteries, was most satisfactory, and several times isolated shots from our battery forced the enemy's torpedo boats to retire.

"At the commencement of the bombardment at dawn, the guns at the fortress replied to the enemy's fire.

"The crews of all the ships engaged gave proof of remarkable coolness in action. Below deck the work of the day followed its ordinary course in spite of the shells falling between the vessels and covering them with missiles.

"A bombardment at such a distance must be considered ineffective, but the Japanese cruiser Takesahago is reported to have been seen to suffer serious damage. The damage it is impossible to ascertain at a distance of 5 miles. Many shells were fired at a range of 7 1-2 miles.

"I have the honor to report the foregoing to Your Majesty.

"(Signed) ALEXIEFF".

MAY SHUT OFF COAL

Great Problem Will Arise When Baltic Fleet Sails

FUEL IN BRITISH PORTS

Which May be Refused on Ground that it is to be Used Against Ally

Paris, March 12.—A grave question involving the neutrality of France and Great Britain will rise when the Russian Baltic fleet starts for the east in the early summer. This fleet will be accompanied by colliers and it is understood that the French Government will raise no objection to the fleet coaling at French ports from their own ships.

After the fleet passes Jibutil French Somaliland, there are no French ports until it reaches Saigon, French Indo-China, and it will undoubtedly put in at an Indian or Ceylonese port for more coal.

A SERIOUS QUESTION.

This will develop the questions—can belligerent ships be allowed to receive coal when their purpose is to attack the Japanese fleet, and will not such action be a violation of neutrality.

A diplomat who expressed an opinion on the question pointed out that belligerent ships could properly demand at a neutral port enough coal to enable them to reach the nearest home port and that in this case the nearest home port was Port Arthur. It was possible, the diplomat added, that Great Britain would decline to permit the Russians to take coal except from their own colliery and even then probably not in British waters.

This would immediately tend to place Great Britain even more firmly alongside Japan and might cause renewed hard feelings on the part of Russia, which Count Benckendorff the Russian Ambassador to Great Britain, has attempted to allay.

There is little doubt that France would solve the problem more liberally that Great Britain and grant a Russian request to coal. The diplomat concluded by remarking that the question was most important and one which it was fortunate the powers would have an opportunity to settle before the Russian Baltic fleet moves eastward.

LAUGH AT RUSSIA'S PLEA

Japanese Amused by St. Petersburg's Protests to the Powers

Tokio, March 10.—Japan addressed a note to the powers today in response to the recent communication from Russia. The note has not been published here and its contents are unknown.

Russia's various communications to the powers, attacking Japan for its conduct of diplomatic negotiations before their rupture, for the attack upon Russia without declaration of war and its alleged violation of the neutrality of Corea, have been received in Japan largely in the spirit of amusement. The Japanese resent what is alleged to be a deliberate attempt to place them in a false position regarding certain incidents but in the main do not take the correspondence seriously.

Responding to the charge of violating the neutrality of Corea, the [illegible] pointed to the action of Russia in Manchuria, where thousands of troops were assembled long before a diplomatic rupture occurred. They say they are fully prepared to accept the judgment of the world on a comparison of their course in Corea, where they landed troops only after a state of war existed and upon the written permission of the Emperor of Corea.

They deny that Chemulpo was a neutral port after the Japanese landed on Feb. 8, but whether it was neutral or belligerent Russia began hostilities there. When the Russian gunboat Korietz steamed out of the harbor of Chemulpo on the afternoon of Feb. 8, she opened fire on the Japanese squadron, making the opening shot of the war. The Japanese guns did not respond, but the Japanese torpedo-boat destroyers answered the fire of anti-Russian sentiment in the English press, which he fears may later on land his country in complications of the gravest kind.

Count Benckendorff, the Russian Ambassador, recently went to St. Petersburg at the request of the King to bear to the Czar his strongest assurances of friendship and the expression of the determination of the British Government to preserve the strictest neutrality.

Count Benckendorff had yesterday a private interview of two hours with the King at Buckingham Palace, and it is said in diplomatic circles that the gist of the Czar's reply was that while warmly reciprocating the King's friendship he could not be wholly accountable for the consequences if the Russophobe campaign was continued in the English press.

NOT MUCH CONSOLATION

Electric Lines do Not Pay on Long Reaches

Promoters and investors interested in electric lines will not find consolation in the report of the Railroad Commissioners of Massachusetts. Out of 105 companies in that State no less than 65, new and old, declared and paid no dividends. A gentleman of very large experience interested in electric lines operations in Massachusetts recently stated that electric lines do not pay except when operated within densely populated city districts or within a very short radius thereof—like Boston and its immediate suburbs. Judged by this standard electric lines in Ontario outside of those operated within cities, will not be able to earn dividends at least for many years to come when the population of that province becomes more dense than Massachusetts where so many electric lines are not profitable. At present there is in Massachusetts a population of 349 per square mile against approximately 10 per square mile in Ontario, or roughly 34 to 1. Aside from this indication as to Ontario being an unfavorable field for electric line operation, it is interesting to note that Ontario now enjoys tree times as large steam railway mileage as Massachusetts to each one thousand of population.—Kingston News and Times. February 25th, 1904

RESOLUTIONS RECEIVED

Ottawa, March 10.—Twenty members of the Canadian Live Stock Association today presented to the Hon. Sydney Fisher, the resolutions passed in convention. The first asked that the minimum value for duty on a horse should be $75, to keep out scrub animals. Another asked that hogs be not imported free as settlers effects.

R. Miller, of Stouffville, presented the resolution, affecting the importation of fine bred stock duty free, which will require to be recorded in the Canadian Herd Book, and the country of origin, and owned by a [illegible] and the resolution dealt with [illegible]

... SPORTING NEWS

HOCKEY.

The Y.M.C.A. have issued a challenge to the Fifth Ward team.

—The "Up-town Hustlers" will play the Y.M.C.A. team at an early date.

On Tuesday evening next the local firemen will face the puck against the band team.

The Examiner and Review teams will collide to-night, and, after hearing so much of their "coming out," this announcement will be widely welcomed. Each team is confident of victory. We are asked to deny the report that the Review "fellers" had signed several of the "Japs."

—The T.A.S. hockey team of Peterborough, will appear on Lindsay ice against the Lindsay team on Tuesday night next, March 15th. Our boys will put in some hot practise and feel sure that they can give their old lacrosse rivals a game all the way and all spectators their money's worth.—Post.

The Sporting Editor of this g. f. j. has received another communication from "Fair Play" re Marlboro hockey match, which is published this morning. We would suggest that he go to the Secretary, who has already notified him that his paltry 25c. will be refunded, and get the same. It was the chronic kicker and not the public that fathered that senseless growl that came from the "grouches" on Thursday.

CURLING.

The first of the series of games for the Peterborough-Lindsay cup, were played at Lindsay on Thursday, and the scores made by the different skips were as follows—

R. Neil, sk 21	O'Connor, sk 10
J. S. Knapman, sk. 20	Walters, sk 11
W. G. Morrow, sk. 11	McElweyn sk 15
J. H. Giroux sk 20	Harstone sk 12
72	4

Yesterday a series of four games was played at the Curling rink, on Charlotte street, and a most interesting time was spent by all the participants. At times the games were quite exciting and some excellent shots were witnessed. The different rinks were composed of the following players,—

Peterborough	Lindsay
H. LeBrun	R. Harstone
Bradburn	F. Cranwiel
Hatten	W. H. Cuthbert
Hamilton, sk. 6	J. D. Flavelle, sk. 17
F. H. Dixon	Breathour
G. L. Hay	Boxall
J. H. Connal	Sutton
R. Waddell, sk 17	Little, sk 18
Highland	J. Smith
Morphet	W. Widden
C. N. Brown	Knowlson
R. J. Frost, sk. 18	McClellan, sk 23
M. Tooley	Fiske
H. Blade	Butler
T. Rutherford	Hungerford
A. Blade, sk 13	Burke, sk 9

Four rinks of Peterborough curlers on their way to Orillia to play for the concluding game in the Neill-Shepherd Cup series, stopped off here Thursday afternoon to play the opening game for the Peterborough-Lindsay Cup. This trophy has been competed for annually for some years until last season, and the resumption of the games is pleasing to our curlers, who look back with pleasure to many hard-fought games with Peterborough for the possession of the trophy. Four Lindsay rinks will go to Peterborough in the morning to play in the same series.—Post.

THE LATEST WAR NEWS.

By special permission of Admiral Korpiaykancoxiski, via wingless pigeon, from Che Foo Shanghi Yany Tank, Kobe, Yokohama;—

Mr. Wm. Croft will play Mr. Harry LeBrun on Monday afternoon at 3 o'clock sharp. The general public will be admitted free to this great game, as this is absolutely the last game of the season. Mr. Croft is very proud to know that Mr. LeBrun has the courage of his convictions to accept this challenge, as Mr. Rustufrod and Mr. Guyatone have refused.

(Signed)
Admiral Korpiaykankoxickt.

CARPET-BALL

A number of games of carpet-bal have been played between the S.O.E. and the Macabees, the losing team at the completion of the series, having to provide an oyster supper. The results of the games already played are as follows;—Macabees, 133; Sons of England, 128.

A Reply to "Fair Play."

The Times is pleased to publish the following, which appeared in yesterday's evening papers;—

Peterborough, March 10th, 1904

Dear Sir,—In connection with the letter which appeared in the morning paper, the management of the hockey club desire to state that of the seven players who represented the Marlboro Hockey Club on Wednesday night, five of them went to Ottawa and participated in the Stanley Cup games, six of them played in the Wilson Trophy matches against the St. Georges, for the championship of the City of Toronto, and the seven are all senior players. The team received $150 for coming to Peterborough, and the fact of Peterborough defeating them does not go to show that they were a weak team but that Peterborough was very strong. The writer of the letter, who did not sign his name, will please call at the Examiner Office and receive his money back from the undersigned.

R. M. GLOVER,
Secretary-Treasurer Peterborough Hockey Club.

A COMPLAINT?

March 12, '04.

Editor Morning Times;—

Sir,—Apropos of a communication in your issue of yesterday's date re hockey match between Marlboros (Seniors) vs. Peterborough Intermediates, your correspondent states, under the nom-de-plume "Fair Play" that a "crippled team" played our locals and that he was dissatisfied, thinking that the management was deceiving the public by bringing an inferior team and wishing to have the gate money refunded. But in justice to ourselves we should kill the kicker. There is in every town one man who has accumulated so much knowledge in one large cranium that it [illegible] soured. He begins to hate himself and all the world beside, and he feels called upon to do things that there is no law to prevent, but which are nevertheless worse than misdemeanors. We might set a good example by killing all these kickers —and there would be an end of the whiskers of the Whig.

"A FRIEND OF SPORTS."

MARLBORO HOCKEYISTS

Editor Morning Times;

Dear Sir,—I see by the Examiner of today that the management of our Hockey Club, while essaying to deny my complaint in this morning's Times admit, in part, at least, its truthfulness by acknowledging that the full senior team of the Marlboros did not play here on Wednesday night, as guaranteed by their posters. But they seek to convey the impression that a greater percentage did play than stated in my letter. I refer them to the fact as stated by the Toronto World of yesterday, which said they "sent a crippled team to Peterborough." And again; "Only three of the Dukes' seniors figured on the team. Dr. Wright and Charlton did not come down, much to the disappointment of the Peterborough people, who wanted to see the famous defense duet perform. Stan Clemes, of the Bank of Toronto team, also figured on the visitors line up." &c.

The management can settle their differences with the Sporting Editor of the World. They admit their right to return the gate money by magnanimously offering me mine, but which, of course, I decline unless they treat all alike and make good their guarantee, whereby they were enabled to charge fancy prices, ranging all the way up to 75c. for sitting on the soft side of a cold plank.

Yours &c.
FAIR PLAY.

11th March, 1904.

CHEAP SPORT

Peterborough, March 11. 1904

Editor Morning Times:

Dear Sir,—In your issue of the 11th inst. there appears a letter, written by "Fair Play." Will the writer pardon me for accusing him of misrepresenting himself,—the article, every true sport will agree, would have been much more appropriate bearing the signature "Cheap Sport."

We are sorry to have to acknowledge that Peterborough possesses an individual with such a small degree of "true sportsmanship." The kicker has no doubt based his complaint upon the remarks of the Sporting Editor of the Toronto World which are certainly very shallow. It does not take one a month to comprehend such.

The World says that only three of the senior Marlboros were playing, at the same time only naming two that were unable to come. Why not name the others? This is a profound falsehood, as every man who played was a senior man. Five of the team played for the Stanley Cup, viz., Lal Earle, (Capt.) Giroux, Winchester Birmingham and Reid. The above players, with McLaren, won the senior championship of Toronto on Monday night. The same team came to Peterborough, strengthened by one of the best senior players in Toronto, viz., Stan Clemes, whom the Toronto papers have time and again cracked up as one of the best in the business. They were also accompanied by another 'picked" senior man in the person of Brown. The Marlboros no doubt gathered this team together with the intention of giving Peterborough a rap, but have since acknowledged meeting with one of the biggest surprises ever meted out to them.

We venture to say that it is very doubtful if "Fair Play,"—more suitably "Cheap Sport" witnessed the game. We feel certain that he had no license to raise a complaint, but there is always some "grouchy" individual who cannot get his money's worth.

It seems absurd for a man with the average amount of intelligence to ask the management of the rink to refund the money. Let "Fair Play" speak for himself above his own name, and we feel certain that his money will be refunded, if he attended the game!

A SPECTATOR.

BASEBALL.

A meeting of the members of the Intermediate championship team was held in the Y.M.C.A. Thursday evening, to arrange plans for the coming season. The following officers were elected:—

Hon. President—Hon. J. R. Stratton.

President—G. H. Williamson.

1st Vice-President—S. S. Aptin.

2nd Vice-President —W. D. Campbell.

Sec.-Treasurer—F. McCoy.

Manager—E. Poole.

Team Committee — Manager, Capt and N. Miller.

IS CHAMBERLAIN SICK?

London, March 10 — Disquieting rumours regarding Mr. Chamberlain's condition are being circulated among the members of the House of Commons. Some say he is suffering from incurable mental trouble, in fact some go as far as to state that he is in the incipient stages of softening of the brain. These reports find little credence among the friends of Mr. Chamberlain, while those opposed to his fiscal policy are quite ready to regard the reports as within the realms of probability. Some said if it were true it would explain why he went off to Egypt right in the middle of his fight, leaving his tariff reform campaign practically without a head. The suggestion is heard that Mr. Chamberlain's present condition is probably the sequel to the cab accident in the coronation year, in which he was seriously injured.

ALIEN LABOR LAW

London, March 10— In reply to a question by E. Robertson, M.P. for Dundee, Colonial Secretary Lyttleton said he could not undertake to represent to the Australian Government the propriety of repealing the legislation which prohibits British workers from landing under contract to perform manual labor.

EVERYBODY READS THE TIMES

HAMILTON PROVIDENT AND LOAN SOCIETY.

Thirty-Second Annual Meeting—Showing Most Successful Year's Business

The thirty-second annual meeting of the shareholders of the Hamilton Provident and Loan Society was held at the Head Office last week, and the annual reports presented. The past year has been one of wonderful prosperity, and the reports have been most gratifying, and expressive of the high esteem in which the company is held by the general public.

The net profits for the year amounted to $95,247.02, and there remained to the credit of the contingent fund, $14,178.46, after writing off all losses. The reserve fund now amounts to $390,000, and the present investment on first mortgages on real estate, amounts to $3,269,[illegible], out of total investments of $3,454,612.90, the balance being invested in municipal debentures, and on call loans on high class securities.

A large and rapidly increasing business is done in the Peterborough district, and it is to be expected that next year's annual report of this flourishing financial corporation will show even greater success than that of last year.

JUST LIKE AMERICANS

But the New York Sun Admits We Have Reason to Boast

New York, March 10—The Sun, in referring to the recent banquet of the Canadian Manufacturers' Association at Quebec, says; "Naturally the speakers at the banquet turned loose a good deal of high flown talk about the greatness of Canada, its illimitable resources and its important place in the world of today. It is evident that an American guest might easily have thought himself in his own country, listening to speeches from his own countrymen. But a little buncombe talk hurts no one, and our neighbors across the northern line are rapidly acquiring a perfect right to shout as loudly about their commercial achievements as some of us do about ours.

"This is made evident by the interesting illustration used at the dinner by Hon. Mr. Fitzpatrick, that in the last seven years Great Britain's exports of manufactured articles increased 26 per cent., those of the United States 47 per cent., and those of Canada 107 per cent.

"More power to the Canadian elbow and more trade to Canada's wide awake people."

KING AND CABINET

New York, March 10— A special from London says it is reported that there is great friction between the King and the Cabinet over the proposed army reforms. The King favors the scheme recommended by Mr. Arnold Forster, Secretary of War while the Cabinet prefers the plan of former Secretary Brodrick.

It is possible the King may dismiss the Cabinet.

A Snap

Very best ping pong sets will be sold while they last for 45c. a set. The size and quality of this set has positively never been sold before for less than 85 cents. Parties ordering by mail may have set reserved, or we will send by express prepaid for 10 cents extra. Times Bookstore, Market Block.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 diplomas and certificates from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing about. Write at once.

Morning Times

PETERBOROUGH, MARCH 19, 1904

PROMISES OF THE N-RAYS

As yet we have only the most meagre information about the rays which, according to Dr. Charpentier, are emitted by the human body, but it begins to look as if we should soon learn the cause of total depravity, original sin and all other ills once laid to the fall of Adam and Eve. It looks too, as if we should some time be able to correct and control these ills by directing attention to nerve centers and brain cells. Instead of tracts and sermons for moral improvement N-rays will indicate the character of the disorder and the skilful physician will intensify or moderate the vigor of radiation.

Everyone knows that much of the wickedness in the world is due to highly wrought nervous conditions, and this gentleness and amiability are due to inward harmony rather than to outward circumstances. Now the fact is stated in other terms; Whoever has the good fortune to have the N-rays which his body emits thrown off in the proper degree is sane and happy in spite of himself. Whoever has the particles thrown off too rapidly or too slowly is irritable or inefficient. The "invisible luminosity" must be just right to produce the right character. Another promise which is given by a knowledge of the N-rays is the explanations of hypnotism, telepathy and unconscious influence. When the N-rays can once be put into good working order and directed as the individual wishes there will be no need of persuasive urgings or of any kind of apparent force in order to accomplish one's object. Increase the intensity of human radiation, send it in the right direction, and the innocent person at the other end volunteers his services and anticipates, as it were, your desire.

All this may not be so remote as it seems. Science is advancing with seven-league boots and the unexpected is just what happens every day. It is aggravating to think this "invisible luminosity" has been going on for ages and that we have not taken advantage of it or even known of its existence, but now that the French scientists have proclaimed its possibilities we shall be ready to utilize them at the earliest moment.

Learn The Art of Resting

Rest is a True Food for the Body and Strength for the Spirit. Almost a Lost Art Now.

The absence of rest accounts for much of the ill-health, irritability and despondency that we find everywhere about us. We can't eat our pudding and have it, nor can we go on wasting our energies without soon reaching the limit of our reserve power.

Better not let it go on this far. Much wiser to take Ferrozone when that tired enervated feeling is first noticed. Nervous collapse is avoided in this way. If you feel the need of rest, but can't get it because of overwrought nerves, nothing in the world will do you as much good as Ferrozone, which is noted for promptly restoring perfect health in just such cases as yours.

Perhaps you wonder how Ferrozone does this. The first result of Ferrozone is a better appetite. Everything you eat is digested and properly assimilated. The natural outcome of this is the formation of pure blood, the fundamental cause of health. When the body is given a new supply of blood the circulation is quickened. This gives the weak nerves something to feed upon. They quickly lose their sensitiveness, and your old irritable companions become a help instead of a drawback. Pretty soon you begin to feel the vim and buoyancy that Ferrozone always brings. Your strength increases, you can work longer, toil harder, sleep better than ever before.

If half the pale, nervous people could only realize how beneficial Ferrozone is, there would be a lot more happiness in the world. No remedy applies so directly to the peculiar ills from which women suffer. It is a specific for anaemia and brings a ruddy glow of health to pale cheeks in a remarkably short time. In all diseases arising from impairment of blood or nerve tone, in cases where a tonic is needed to stimulate appetite and digestion, nothing is more helpful than Ferrozone. It replaces tiredness and lack of energy by a reserve of force, and maintains such a healthy condition of the system that sickness is impossible.

Every person, man, woman, or child who wants more strength, more flesh, stronger nerves, purer blood, should use Ferrozone. Price 50c. a box, or six boxes for $2.50, at druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

THE THIRTY-SECOND ANNUAL MEETING

OF THE DIRECTORS OF

THE HAMILTON PROVIDENT AND LOAN SOCIETY.

The thirty-second annual meeting of the shareholders of the society was held in the society's head office at 11 o'clock this forenoon. Among those present were the following; Alex. Turner, James Webster, H. W. Clarkson, D. F. Sutherland, John Kenrick, H. H. Anderson, John H. Coon, George Rutherford, James W. Simpson, J. T. Glasson, Alex. Main, Judge Snider, George Hope, John McCoy, George LeRiche, David Kidd, Rev. George Forneret, Hon. Wm. Gibson, Col. A. H. Moore, P. D. Crerar, Richard Butler, T. H. Crerar, William Wilson, John Eastwood, D'Arcy Martin, W. J. Reid, A. McEachern, William Dixon, C. Ferrie, W. F. Findlay, Judge Robertson, D. M. Cameron, and Charles Judd.

The president, Alexander Turner was in the chair.

C. Ferrie, treasurer, acted as secretary.

The secretary read the report and annual statements, as follows;

The directors have much pleasure in submitting the thirty-second annual report of the society's affairs and accompanying financial statements, duly audited.

The net profits of the year, after paying and providing for all due and accrued interest on borrowed capital, paying cost of management and other charges, amount to $95,247.92, out of which two half-yearly dividends at the rate of 6 per cent. per annum were paid, together with taxes on capital and income and the balance...... ....$28,008.02 have been applied as follows;

Added to reserve fund......	$25,000.00
Credited to contingent fund......	3,008.02
	$28,008.02

After writing off all losses, providing for possible shrinkage in value of securities, also writing $2,800 off the society's buildings, there remains at the credit of the contingent fund, $14,178.46.

The reserve fund now amounts to $300,000.

The society now has $3,300,000 invested on first mortgages on real estate, out of total investments of $3,454,512.90, the balance being invested in municipal debentures and on call loans on high-class securities.

The repayments by mortgagors have been very satisfactory.

The records have to record with deep regret, the death, during the year, of their late vice-president, Mr. T. H. Macpherson. The vacancy on the board created by his death has not been filled, and the shareholders will be asked to confirm a by-law reducing the number of directors to six, and otherwise amending the society's present by-law, No. 14.

At a meeting of the board held on June 22, Mr. George Rutherford was unanimously elected vice-president.

All of which is respectfully submitted.

ALEX. TURNER,
President

Feb. 1, 1904.

C. FERRIE,
Treasurer.

Jan. 27, 1904.

We hereby certify that we have examined the books, accounts and vouchers of the Hamilton Provident and Loan Society, and have found the same correct. We have also examined the securities (excepting those relating to the Manitoba loans, and find them in perfect order, and correct as set forth in the above statement;

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

SINFUL HABITS IN YOUTH
MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk. 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-25-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

THE JAPANESE AGAIN ATTACK PT. ARTHUR

Mounted Scouts Also Have an Engagement Near Ping Yang

Special to The Times.

Tokio, March 10—Russian and Japanese mounted scouts met south of Ping Yang yesterday. After a brief engagement the Russians retreated. No casualties are reported on either side.

Special to The Times.

St. Petersburg, March 10—The Czar has received the following message from Viceroy Alexieff, dated to-day at Mukden;—

"The commandant of the fortress at Port Arthur reports that at about 1 o'clock this morning, the outlines of vessels, apparently torpedo boats were seen at sea within the area swept by our searchlights.

Our battery opened fire upon these vessels. Our torpedo boats put out to sea at 2.40 a.m., and about 4 o'clock, met the enemy west of the Liaotishin lighthouse. After firing several shots, they retired to the south in the direction of Shandun. Our torpedo boats returned to the harbor at 6 o'clock. Later torpedo boats were again sent to sea to reconnoiter. They returned in half an hour having learned that the enemy's squadron was approaching At 8 o'clock the Japanese opened fire on our cruisers and fortress. The enemy had 14 ships that fired the entire time from behind Liaotishin. I have the honor to report the above to your Majesty (Signed) ALEXIEFF.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for. and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

KEY OF ASIATIC WAR

Trans-Siberian Railroad Put to Severe Test

A VERY COSTLY HIGHWAY

Problem of Conveying Troops to Orient is All Important

Harbin, Manchuria, Feb. 10.—Upon 6,000 miles of single track railway, nearly 3,000 miles of which skirts or lies within Chinese territory, hangs Russia's chance for victory in her war with Japan.

This great Trans-Siberian Railway was built by the Russian Government at a cost of $390,000,000, for just such an emergency as that which confronts her today. Whether it paid or not was a matter of secondary consideration to the Czar. Indeed, it is said that he never expected it to pay, but be calculated that it would enable him to handle his troops along the Asiatic frontier with a scope and facility which would make Russia predominant in the eastern hemisphere.

In conjunction with the Trans-Caspian Railway, which is not likely to be a factor in this contest, he was prepared to throw forces into India and the whole of northern Asia on a few days' notice. With a standing army computed at from 1,500,060 to 2,000,000 men, which she could quickly put on a war footing of from 4,000,000 to 5,000,000 of well-equipped soldiers, it only remained for the Czar to prepare means for transporting them.

This was the situation as it was given out by Russia and the world accepted it. Inquisitive Japan has recently announced that she has discovered the army figures to be exaggerated, and it is stated on no less an authority than Prince M. Hilkoff, builder and manager of the Trans-Siberian Railway, and one of the chief members of the Czar's cabinet, that the railway itself is inadequate.

ENTIRELY INADEQUATE.

Siberia, with its 8,000,000 of people, scattered over a territory considerably larger than the United States and Alaska, began to build up cities and towns along the Czar's military railroad. The peasants began to travel extensively and they developed a business capacity which soon taxed the freight managers almost beyond their resources.

In an interview last July Prince Hilkoff explained conditions officially as follows;

"The road was built as a military and state enterprise. The traffic has grown beyond our wildest expectations. We are already running ten trains each way a day, and we shall have to increase this number to fifteen or sixteen very soon. The passenger traffic is growing and the freight traffic is growing in the same ratio.

"The traffic is so heavy that the rails will not stand it. They are too light, and we shall have to relay the whole road. I did not approve of these light rails, but I had no idea of the possibilities of the line. We expected to run about three trains each way daily. The road was hardly completed before we had twice that number.

From Lake Baikal on the Russians are anticipating trouble from Japanese raiders and agents. Twenty-four miles of the road is laid on the ice of the lake, and there are many bridges which the Czar's troops will find it hard to guard from their active foes. From Harbin south to Port Arthur runs a branch of the Trans-Siberian Railway, where the Japs are already reported to have blown up a bridge, and where they will undoubtedly concentrate their efforts to break or destroy the Russian artery of supplies.

When it comes to the transportation of troops and supplies under war pressure over the Trans-Siberian Railroad in the course of present events His Imperial Majesty, Nicholas Alexandrovich, autocrat of all the Russians and "most august president of the committee of the Siberian Railroad," has cause to feel thankful that he autocrat enough to call himself only an honorary figurehead regarding the affairs of the railroad. The great Trans-Siberian road was built as a war measure, but its critics have said that it would never justify itself in this sense, but would prove of greatest value as a facotr in the colonization and development of Siberia. The test comes all too soon for the Russian Government. What its capacity may prove in the way of moving soldiers and war material can only be estimated by what the road has done in the past, compared with conditions that obtain to day.

CHARLES FIELDING DEAD

Halifax, March 9—Charles Fielding, an old and respected resident of Noel, and father of Hon. W. S. Fielding, Minister of Finance, died this morning. His son was present at the bedside.

St. Petersburg, March 8.—A letter from an officer of the Russian cruiser Pallada has been received here describing the first attack by the Japanese upon Port Arthur. The writer denies the story that the officers of the Russian fleet were ashore and confirms the statement that the Japanese made use of false lights.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along this vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are $42.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $100,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 325-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

WAR WITH GREAT BRITAIN IS CERTAIN

Result of Russo-Japanese Complications--View of Czar's Court

Special to The Times.
Rome, March 10—A news agency has a telegram from Tokio saying the Japanese fleet has destroyed the Russian Vladivostock squadron, but sustained fearful damage.

WAR WITH GREAT BRITAIN.

Special to The Times.
New York, March 10—A despatch from Berlin says; A leading newspaper here asserts that the opinion prevails in Government circles in Russia that war with England is certain as a result of the Russo-Japanese complications. Preparations are accordingly being made for a conflict.

STILL BANGING AT PT. ARTHUR.

Special to The Times.
Port Arthur, March 10—The Japanese fleet appeared off this city at midnight and bombarded it intermittently until 8 o'clock this morning.

FLEET STILL NEAR PORT ARTHUR.

Special to The Times.
Port Arthur, March 10—A message from the signal station at eleven o'clock, announced the appearance of the Japanese squadron on the horizon. Fifty minutes later the shore batteries opened fire on the Japenese vessels. A gale sprang up and the attacking fleet soon withdrew.

WHAT HAPPENED TO IT?

Canea, Island of Crete, March 10—A Russian transport from Port Said has arrived here. Members of her crew say that the Russian torpedo boat "No. 231" was lost while on her way to this port. The crew of the torpedo boat were rescued by the transport.

FAITH IN THEIR ARMY

Russians Hope Eventually to Overwhelm Foe

WITH AN ENORMOUS ARMY

Feeling at St. Petersburg That War Has Hardly Begun

St. Petersburg, March 10.—Although almost four weeks have elapsed since the Japanese first attacked Port Arthur, here the war is considered hardly to have begun. Heavy land fighting, upon which the fate of the campaign depends, is not expected much before the end of April. By this time Russia will have in the field, exclusive of the large army of men required to guard the railroads, four army corps, each with a cavalry division and an artillery brigade. All that has happened so far, or is going to happen until these forces are in the field, is considered, according to the Russian view, to be nothing more than the prologue to the real drama.

The crippling of the Port Arthur fleet was unfortunate in that it gave the enemy command of the sea at the very outset. It is, however, of relatively small importance from the standpoint of the main strategy of the war whether Port Arthur stands or falls. But, as long as it holds out and the fleet is harbored there it will constitute a potential menace which will restrict and hamper the Japanese operations.

Will Make Heroic Defense.

The Russians are determined to defend Port Arthur as heroically as they did Sebastopol. No large garrison will be retained there; 10,000 men are as good as 100,000 for defense; while the more men the more mouths to feed. There are enough provisions there now to last for eight months. In addition there will be a division of Cossacks, with mountain batteries on the peninsula to oppose landings and harrass the enemy if they succeed in investing the city.

The Cossacks, the mounted infantry and the light guns now across the Yalu river will serve to harass the enemy in every possible way, as well as to hold him in check until the Russian main armies and reserves are concentrated and disposed. Sharp fighting may occur between the advance parties, but nothing of a decisive character is anticipated.

The Russian plans do not contemplate taking any chances on the score of inferior numbers. By sheer weight of men and guns, if nothing else, when the proper time arrives Russia counts on overwhelming the Japanese and rolling them back through Corea.

Think Heathens Can't Whip Christians

It is a mistake to suppose that the Russians underestimate the prowness of their adversaries. On the contrary, they admit the fine marksmanship of the Japanese and their marvelous ability in determining ranges, yet the Russians do not believe that the Japanese can face successfully the legions of the czar. On the sea the maritime life of the Japanese gives them a natural advantage, on dry land, where belong all the traditions of the Russian army, the men of the empire have perfect faith born of their numerous experiences with pagan tribes and the fatalism inherent in the Russian character. They believe that Asiatics cannot meet Europeans in battle array, that a yellow race cannot triumph over a white, or heathens over Christians.

TO MAKE HOME HAPPY

The Bach Specialty Company Have an Article That Will Help—Of Interest to Every Householder.

In its survey of the business world, the world of discovery, invention and improvement it has ever been the aim of the Mercantile and Financial Times to keep its readers informed on all things that in any way tend to lighten the burdens of life, and add pleasures to existence. It is this ambition that leads us to draw their attention to the Bach Specialty Company's Ball Bearing Washers, of 117 Victoria street, Toronto, Canada.

Every person knows that "cleanliness is next to Godliness," and has long been accepted as a truth almost as emphatic in its importance as those of Holy writ. Certain is it that whatever makes for cleanliness, makes for health and civilization. We therefore hail with pleasure the announcement of the Bach Specialty [illegible] of the onward movement in Canada's fast growing population which tending toward betterment of conditions increases the demand for the [illegible] advance, representative of a higher mode of life.

The 1900 ball-bearing washing machine is not merely the active auxiliary of cleanliness and sanitation; it is also a very practical labor saver. Into the toilsome tedium of wash day it brings a ray of light and the beaming of a star of hope upon the scene of a weary woman's work. With this ingenious contrivance the old, monotonous song of "rub, rub, rub" has been abruptly terminated by its valuable qualities and the dirt disappears beneath its magic agitator like the vanishing morning mist before the rising sun. It is certainly the simplest easiest and most efficient machine for washing clothes ever invented. Its construction is on scientific principles It revolves on ball bearings, which render the rotary movement as easy as the wheels of a high-grade bicycle. The 1900 junior washer will wash any garment without boiling, without scrubbing, and without wear or tear. There is absolutely no need of using chemicals, soap and water being the only necessary things to do perfect work. It is so simple that a child could operate, requiring merely to be kept in motion. Tens of thousands of these washing machines have been sold in the United States, and are now in use in almost every country on the earth's surface. Why should not the housekeeper be provided with the best labor saving devices? The husband avails himself of every labor saving machine. Mr Bach has such unbounded confidence in his machines that he does not ask any money in advance or on deposit in any way before sending the washer on trial. Remember the address when ordering, or writing for descriptive catalogue, 117 Victoria street, Toronto.

(This affords a rare opportunity for agents to make money rapidly.)

CITY ALMOST IMPREGNABLE

RUSSIA HAS SPENT MILLIONS ON THE FORTRESSES

Vladivostok Regarded by Military Experts as a Second Gibraltar

London, March 10.—Russia has patiently toiled by day and by night at the self-imposed task of making her fortress on the far eastern shores of the Pacific as nearly impregnable as science, combined with the advantages of nature, could make the Czar's first great seat of power and prestige in the Orient. It is now proclaimed as the Czar's Gibraltar of the north. It is the eastern terminal of the Trans-Siberian Railway and the Russian Government has expended millions of roubles on its harbor defences and countless hidden land batteries.

Vladivostok differentiates itself in many ways from other Oriental cities. Russians, Japanese, Chinese, and Coreans are the predominating classes and they have built a city architecturally rude in character, but capable of resisting all assaults. The narrow entrance from Peter the Great Bay resembles that of San Francisco, not only are the entrances almost identical in formation, but also are the names, you pass through the Golden Gate at San Francisco and enter the Golden Horn at Vladivostok.

The harbor is admirably located, with narrow entrances, bordered on all sides by hills of ample height, to give excellent elevation to batteries and afford splendid protection to gun positions. All the channels from the sea are superbly commanded by many batteries of modern ordnance. Few of the guns are, however, of greater caliber than ten inches. Within the past two years many old guns have been replaced by new ones.

The city of Vladivostok is almost at the toe of the Muravey Amurski peninsula, on a harbor which affords excellent anchorage for warships as well as merchantmen. There is here a large navy yard, with adequate dry docks and repair shop facilities. In an admirably formed depression on the Muravey promonotory, across the harbor, south of the city, is a large battery of powerful mortars. The entrance to the harbor is heavily mined.

Within the last two years a ship canal was built near the upper end of the Sapernui peninsula. The strategical value of this is to permit torpedo craft from the defences an opportunity to sortie against an enemy bombarding the city from a distance without attempting to run the batteries. All these are connected in the rear by sunken roads, which permit the rapid transportation of ammunition from one to another without danger from the enemy's fire.

From a land attack, which is possible only from the north, the city is well protected by strings of land batteries.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00
Officers:
J. R. CHAPTON, - - - President
E. P. CHAPTON, - - - Vice-President
A. J. SANBORN, - - - Secretary
ALEX J. CHAPTON, - - - Treasurer
Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CH[illegible]ON.
Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of the company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material.

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000. 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President.
J. M. A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE B. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM C. CORVES, Miner, Meriden, Conn., Superintendent.
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR B. GARLICK, B. F. BARNES.

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hinsdale County, Colorado.

Over $25,000 has been spent on this property in getting it to its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 4.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been shown for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

Anecdotal.

At a circuit dinner in Ireland a barrister was relating some shooting stories, and wound up by stating that he had once shot thirty-one hares before breakfast. "I don't doubt it, sir," remarked Lord Norbury, "but you must have been firing at a wig."

A Maine country doctor tells this story on himself:—He responded one night to a note left at his door by a farmer asking him to go as soon as possible to see his little boy, who was ill with a very bad cold. The doctor gave one look at the child and asked severely: "Don't you know that your boy is coming down with the measles?" "Yes," replied the wife. "I knowed it." "Then what in the world did you mean by saying he had a bad cold?" asked the doctor. The woman hesitated a moment; then, looking at her husband, she said, hesitatingly: "Neither me or him knowed how to spell measles."

A Nottinghamshire clergyman, in baptizing a baby, paused in the midst of the service to inquire the name of the infant, to which the mother, with a profound courtesy, replied, "Shady, sir, if you please." "Shady!" replied the minister. "Then it's a boy, and you mean Shadrach, eh?" "No, please your reverence, it's a girl." "And pray," asked the inquisitive pastor, "how happened you to call the child by such a strange name?" "Why, sir," responded the woman, "if you must know, our name is Bower, and my husband said as how he should like her to be called Shady, because Shady Bower sounds so pretty!"

An amusing story is told of President Loubet's humble brother-in-law, whom an enterprising interviewer called upon directly after the French President's election. "How did you take the news?" asked the interviewer. "Oh, fairly well; without any rejoicings, of course. Now, here am I, for example, an ironmonger; in what way do you suppose it will benefit me that my brother-in-law is President of the republic? Why, this very morning I received three letters from people begging me to get them Government tobacco shops. That is the only advantage that the election will bestow upon me. People fancy that I have influence, and I shall therefore be worried."

Andrew Carnegie tells a story of a Yankee in Scotland that illustrates well the imperturbability of the Scottish temperament. The Yankee, a bicycler, came to the shore of a lonely lake, and saw in a boat a man examining the depths of the water with a water telescope. The man conducted this examination languidly. He would pause every little while to light his pipe and to converse on the weather or some such indifferent subject with a friend who sat upon the bank, now reading a newspaper and now tossing pebbles idly into the stream. The Yankee got off his bicycle to rest, and in an interval of silence he said to the man seated on the bank: "What is your friend looking for? Oysters?" "No. My brother-in-law," was the reply.

Charlemagne Tower, the United States Ambassador to Russia, was talking at Atlantic City about the Russian moujik. "This naive fellow," he said, "is something like a boy and something like an Irishman. He is, as a rule, very simple, very kind. A typical moujik entered one day a railroad station. He approached the agent and asked when a certain train would leave for a certain place. The agent told him distinctly, and, seeming satisfied, he departed. But a moment later he was back again, and again he asked the agent the same question. 'Why,' the agent exclaimed, 'I told you that only a minute ago!' 'You did, truly,' the moujik answered, 'but it isn't myself that wants to know this time. It's my mate outside!'"

Senator Edmund W. Pettus of Alabama is eighty-two years old. A man called at his law office in Selma one day and wanted to read him a thirty-page abstract of a will. Senator Pettus said: "I am too old to listen to all that. Tell me in a few words the abstract's contents." "I prefer to read it to you," the man insisted. "Ah," said Mr. Pettus, "you have the author's vanity. You are like Barthe, the comedian. Barthe called on a dying man one day with a new comedy. He unrolled it. He said: 'Let me read this to you. You will laugh.' 'But consider,' said the other, 'I am a dying man.' Barthe, ignoring that objection, smiled and cleared his throat to begin. 'Consider,' the victim resumed, 'I have only an hour to live.' 'But to read my comedy will occupy only a half hour,' said Barthe."

At the Portsmouth luncheon to the United States squadron, United States Consul Swalm of Southampton, who was stationed at Montevideo during the war with Spain, told the following story:—"They were expecting the 'Oregon' during the Spanish-American war, and they also expected that she would be short of coal. He could not buy so much as a pound of fuel, but one evening a Scotsman came to his door and said: 'You want coal?' The Consul replied that he never wanted a drink as badly as he wanted coal at that moment. The Scotsman had no power to sell, but he pointed out that he had eight hundred tons on board, and said he pitied the American captain who could not put his ship alongside, take out the bags of coal and then 'cut the painter.' It so happened that the 'Oregon' did not call, but such an act of friendship which defied law and order touched his heart."

David Belasco was born in San Francisco and educated at Lincoln College. He said recently: "I remember a chum of my boyhood who was a great traveller. He used to entertain me during recitations with tales of his adventures by land and sea. 'Never go by boat,' he said one day 'from New York to San Francisco. They crowd those boats dreadfully. There's no comfort aboard them at all. This will give you some idea, David,' he went on, 'of the way the boats are crowded. In course of my last trip a mild mannered man approached the captain, and, in my hearing, said: "Skipper, can't you rig me up a berth somewhere or other? I have no place to sleep." We had already been two days out, and, therefore, the skipper said in a surly way to the man, "Sleep where you did last night and the night before." "I can't do it, captain," the other answered. "You can't do it? Well, why can't you?" "Because I've been sleeping atop of a seasick man, and he's got well now, and won't stand it any longer."'"

Mrs. Place-Nee—I can congratulate myself that all my daughters have married well. Mrs. Lorgnette—H'm! All my daughters have married well twice.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $170,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

Air Carries Healing Medicine

THAT CURES COLDS, CATARRH AND DISEASES OF THE THROAT LUNGS AND BRONCHIAL TUBES

About the healing power of the air of the pine woods everybody knows, but to supply it in the form of medicine seemed almost beyond realization. After many years of careful study a scientific remedy now known as Catarrhozone has been produced which enables the sufferer to breathe into his lungs all the healing properties of the balsamic pine woods air. This marvellous remedy has cured catarrh. It unquestionably does cure it permanently.

You cannot fail to be cured by Catarrhozone, because it reaches and destroys the cause of the disease. You simply inhale the antiseptic vapor. It instantly spreads to every part of the breathing organs. The micro-organisms infecting the diseased tissues of your nose, throat and lungs die instantly. There is nothing left to cause inflammation. Any spots that are raw and sore are quickly healed by Catarrhozone and you are soon completely cured.

It is impossible to breathe through a Catarrhozone inhaler without at once feeling better. Your head is cleared of mucous discharge, your nostrils are cleansed of all putrid matter, the phlegm is removed from your throat. Every trace of catarrh is searched out of the system by Catarrhozone, which thoroughly disinfects and purifies every organ of the body.

Catarrhozone is the only natural remedy for catarrh. It cures by cleansing and purifying all diseased tissues, not by deadening the stomach by drugs. It is a clean, simple and satisfactory remedy that is endorsed by the clergy, and universally prescribed by the medical profession because it is scientific and absolutely certain to effect lasting cures.

Don't be misled into accepting a substitute for Catarrhozone, which alone can cure thoroughly. It is so powerfully healing that colds disappear in an hour, coughs in two hours and even chronic catarrh in a comparatively short time. Two months' treatment $1, sample size 25c. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

Refrigerator Wanted

A second hand refrigerator wanted at once. Apply to "Advertiser" care P. O. Drawer "O," Peterborough, or at Times Bookstore.

Y.M.C.A.

Mr. R. J. Colville, Secretary of Railway Y.M.C.A. Toronto, will speak to men only in the Y.M.C.A. Hall to-morrow evening.

PRESBYTERIAN APPOINTMENTS

Among the Home Mission Committee's list of appointments, we notice the following:—

Peterborough—Rev. T. W. Goodwill, Messrs. A. R. Evans, S. H. Pickup, A. Laing and D. S. Black.

St. Paul's Church

At 8.15 Sunday evening in St. Paul's church, Miss Macdonald and Mr. Colville, formerly secretary of the Y.M.C.A. of this town, and now Railroad Secretary in Toronto, will address a meeting for the general public. A very cordial invitation to this meeting is extended to all.

Y.W.C.A.

On Sunday afternoon, March 13th, at 4.15 Miss A. C. Macdonald, National City Secretary, will address a mass meeting for women at the Charlotte street Methodist church, taking as her subject, "Association Work in Japan." Miss Helen Davies will sing.

He Lost His Hat

Yesterday morning, as one of Peterborough's young men was walking up George street, his new christy suddenly blew off and started across the street. A passing farmer's team happened to be in the path of the hat, and one of the horses soon had it trampled flat on the hard street. It proved a paying experience for the nearest hatter.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating or placed in positions in Peterborough. Attend school [illegible] you have such prospects.

NOW IS THE TIME TO ENTER

[illegible]

WM. PRINGLE.

Ancient Order of Hibernians

The regular meeting of Division No. 1, Ancient Order of Hibernians, was held on Thursday evening, when it was decided to observe the feast of Ireland's Patron Saint by receiving Holy Communion tomorrow morning at 8 o'clock in St. Peter's Cathedral. The members will assemble in the convent hall and march to the church en masse.

Fuel and Cartage Co.

The new offices of the Peterborough Fuel and Cartage Company are fast nearing completion, and the elaborate fixtures that are being placed therein will make it one of the most attractive offices in the city. The Company's stock is being rapidly bought up, and there is every prospect of its future being crowned with the most brilliant success.

A Popular Steamer

The steamer Empress, of the Trent Valley Navigation Co. is being thoroughly overhauled at her quarters in Bobcaygeon. The vessel is being repainted throughout, in anticipation of an increased tourist trade during the coming summer. This boat has always been a popular one and her more beautiful appearance this year will greatly add to this popularity.

Park Street Baptist Church

Rev. W. E. Orton, of Campbellford, will (D.V.) preach at both morning and evening services to-morrow. A short session of the Sunday School will be followed by an interesting presentation by the children, of their share towards the purchase of a lot. Great excitement prevails among the children, and they have no doubt, a great surprise in store for the trustees. Services short. Hearty singing. Seats free. Hymn books provided. Strangers made welcome.

St. Andrew's Church

The services in St. Andrew's tomorrow will be conducted by the Rev. J. G. Potter, B.A., both morning and night. At the morning service the choir will render Shelley's "Christian the Morn Breaks Sweetly O'er Thee," the solo parts being taken by Miss Florence Miller, Peterborough, and Miss Violet B. Smith, Mr. Sydney Glass, and Mr. A. E. Young, of Toronto. The evening service will be one of sacred song, the choir singing, "Hark, Hark, my Soul," the soloists mentioned assisting. The address will be specially to the young women of the congregation, the title being "Hath chosen that good part which will not be taken away." M. A. E. Young, baritone, will sing. "The Heavenly Song."

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—There was no police court yesterday morning.

—Next Thursday will be the "17th of Ireland."

—The Lakefield train was cancelled no less than 22 times during the present winter.

—Mr. Frank Mason has kindly donated four pretty plants to the Y.M.C.A.

—Russian soldiers fight for an income of $3.60 a year. They must be paid according to their ability.

—Russia fears, not only that China is awakening, but that she is going to get up on the wrong side of the bed.

—A week from tonight will be "Irishmen's Night," at the Y.M.C.A. An interesting programme is being arranged.

—If your name does not already appear on our subscription lists, drop in and subscribe for a month on trial. You will find The Times contains all the very latest local and foreign news.

—The regular monthly meeting of Court Peterborough, No. 29, C.O.F. was held last night, but no important business was transacted.

—It has been suggested by several ex-Toronto boys that a Toronto Old Boys' club be formed in this city. We should be pleased to hear from Torontonians residing here upon this subject.

—Mr. Lou Dayman, of Adam Hall's, Peterborough, drove to his home in Fenelon Falls, Thursday, being obliged to take a forced holiday through having his finger badly cut.

—The greatest convention ever held by the International Typographical Union of North America will convene in the World's Fair city next August. About every typographical union in the United States and Canada will send one or more delegates.

—Mr. T. J. Wallace, of Keene, has been appointed to fill a vacancy on the Peterborough public school staff at a salary of $600 a year, and will enter upon his duties after Easter.

—The thanks of the Y.W.C.A. are due the Ladies Hockey Team for the very generous contribution of $18.75 to the general fund.

—A young lady explained to a Peterborough printer the difference in printing and publishing, and in conclusion said; "Now you may print a kiss on my cheek, but you must not publish it." With that he locked the fair form in his arms and went to press.

—A complaint was made on Thursday to the County Constable that near Rathburn's Lumber Camp in the Township of Cavendish, hounds were being permitted to run at large and were destroying the deer. Not long ago five dogs were seen attacking one of these harmless creatures which was finally killed.

—In the North-West, where wood is very scarce and has to be brought long distances, prices are lower than in Peterborough, although we are pratically on the edge of the forests. Dry tamarac is quoted in the Winnipeg Free Press as selling at $5.75 per cord, while $7 and $8 was paid on the market here a couple of weeks ago.

—Last year the snow was gone in town by March 4th; by the 12th it had completely disappeared in the country. The creek was in full flood on the 10th. The first robins were seen on the 12th, and were plentiful after the 17th. Blackbirds arrived on the 16th. Roads began to get dry on the 18th, and on the following day bicycles were on the streets. Watering carts were out on the 21st. Swallows did not arrive until April 17th.

—The concert given in the town hall on Tuesday evening by Mrs. W. J. Morrow, of Peterborough, was certainly a treat to the people of Lakefield. Mrs. Morrow was ably assisted by Mr. E. A. Frowde, tenor, of Peterborough, and Mr. Gilbert Markle violinist, of Toronto. The artists were greeted with a well filled and most appreciative house and judging from the hearty encores with which every number was received, the company will ever be welcome in Lakefield.—News.

—A baby was recently born to a certain minister in a neighboring village. That evening the officers of the church waited on his wife with $50 in cash. The next morning when the congregation assembled, two wags stood at the church door, one bet the minister would thank the Lord for the money first, and the other bet he would thank Him for the baby first. When the reverend gentlemen arose to pray, he said; "Lord, we desire to thank Thee for this timely succor." The boys are as yet undecided as to which was the winner.

—The greatest flood that Peterborough ever saw was in the spring of 1870. A large quantity of snow had fallen during the winter, and this was augmented by a number of heavy falls in March. A heavy fall occurred on the 18th, and a particularly heavy one on the 26th. We are unable to give official figures for this snowfall, but there was at least over two feet. Perhaps some old reader of this paper can furnish the exact figures. This great snowfall was followed by warm weather, and every stream overflowed its banks. Great damage was done to dams and bridges on the river. The Little Lake extended up towards the Ashburnham school, while the river flowed south over Crescent street, making an island of the cemetery point. This was the year that Mr. S. Dickson was drowned.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Annie Hall, of Brasfort, visited Peterborough friends yesterday.

—Miss Laura Fee, of Omemee, visited the city yesterday.

—Mr. Jack Richards, of Smith's Falls, is visiting friends in town.

—Mr. J. Halpenny, of Peterborough, was in the village on Wednesday.—Lakefield News.

—Mr. G. B. Hilliard, of Lakefield, was in town yesterday, and called on The Times.

—Messrs. J. Crane and A. L. Davis have returned from a short visit to the Queen City.

—Mrs. Douglas has returned from a visit to her mother, Mrs. D. P. Hamilton, of Smith's Falls.

—Mr. Chas. Watson has secured a position in the establishment of D. Belleghem, Peterborough.—Lakefield News.

—Mr. A. D. Young, of Toronto, is the guest of Rev. J. G. Potter. Mr. Young will sing at to-morrow's services at St. Andrew's church.

—Mr. Tom Walker, late of the C. G. E. works, left yesterday for England. He sails today on the S. S. Pretorian and expects to return in May.

—Mr. Cameron Wilson of the Medical College, Toronto, is spending a few days with his parents, Rev. and Mrs. Wilson, Water street.

—Mr. W. R. Wright, of Toronto, is in the city, and will spend Sunday with his wife, who is at present the guest of Mr. and Mrs. Jones, Stewart street.

Found

Small, dark brown, lap dog. Owner will receive information by applying at The Times Office and paying for this advertisement.

The Pace That Tells.

In the six day bicycle races the pace tells terribly at the end. Man after man falls out exhausted. The victor wabbles wearily over the line. In the business race it's the same. Man after man drops out exhausted. The successful man is often a dyspeptic, unable to enjoy success. When the stomach is diseased there is not enough nutrition assimilated to sustain the body and repair the daily waste of tissues. The result is weakness, tending to collapse.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It enables the perfect assimilation of food by which the body is built up with sound, healthy flesh.

"I have taken one bottle of Doctor Pierce's Golden Medical Discovery for indigestion and liver complaint," writes Mr. C. M. Wilson, of Yadkin College, Davidson Co., N. C. [illegible]

Dr. Pierce's Pellets cure sick headache.

WOMEN WHO SUFFER

Listen to What Dr. Hartman Proposes to Do for You Without Charge.

Doubtless hundreds of thousands of women all over the United States have seen Dr. Hartman's offer in the papers—how he has undertaken to treat every woman suffering with any form of female disease who will write to him, free of charge.

To those who have not heard of this it may be said that Dr. Hartman is a physician and surgeon of great renown in medical circles, especially in the treatment of those diseases which women alone have to bear.

He has arranged to answer all letters that are sent to him from women troubled with any form of female weakness, free of charge, giving the benefit of knowledge which has cost him forty years to accumulate.

The medicines he prescribes are within the reach of any woman, and she can get them at any drug store.

All she is required to do is to send her name and address, together with her symptoms, duration of sickness and age. Address Dr. S. B. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Mrs. Senator Roach, of Larimore, N. Dak.; Mrs. Senator Warren, of Cheyenne, Wyo.; Belva Lockwood and Mrs. General Longstreet, of Washington, D. C., are among the prominent ladies who indorse Peruna.

Miss Helen Rolof, Kaukauna, Wis., writes:

"Several times during the past two years or more my system has been greatly in need of a tonic, and at those times Peruna has been of great help in building up the system, restoring my appetite and securing restful sleep."—Helen Rolof.

Miss Muriel Armitage, 36 Greenwood Ave., Detroit, Mich., District Organizer of the Royal Templars of Temperance, writes as follows:

"I suffered for five years with uterine irregularities, which brought on hysteria and made me a physical wreck. I tried doctors from the different schools of medicine, but without any perceptible change in my condition. In my despair I called on an old nurse, who advised me to try Peruna, and promised good results if I would persist and take it regularly. I kept this up for six months, and steadily gained strength and health, and when I had used fifteen bottles I considered myself entirely cured. I am a grateful, happy woman to-day."—Miss Muriel Armitage.

Miss Lucy M. Riley, 33 Davenport St., Cleveland, Ohio, writes:

"I wish to add my indorsement to thousands of other women who have been cured through the use of Peruna. I suffered for five years with severe backache, and when weary or worried in the least I had prolonged headache. I am now in perfect health, enjoy life and have neither an ache or pain, thanks to Peruna."—Lucy M. Riley.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

RUSSIANS SAID TO HAVE VIRTUALLY OPENED PT. ARTHUR

Russian Steamer, Mortlake Fires on British Steamer--Officers Go on Board to Inspect

Special to The Times.

London, March 13.—A dispatch to the Central News from Tokio says; It is asserted here that the Russians virtually have opened Port Arthur.

Special to The Times.

Port Arthur, March 13.—Everything is quiet here today.

Special to The Times.

Port Said, March 13.—The Russian cruiser Dimetri Venskoi, has stopped several vessels at sea, including the North German Lloyd Line steamer Steutagart, and demanded to know their destination. They fired across the bow of the British steamer Mortlake, at a point twelve miles north of Damietta, 31 miles north west of Port Said, and sent officers on board to inspect the ships papers.

London, March 11—The correspondent of the Times at Paris, says A St. Petersburg despatch gives curious particulars of the turn taken by Russian official anti-Semitism in the war preparations. It says that the Minister of the Interior, M. Plehve, claimed the privilege of partially revising the list of reservists called up. An enormous percentage of Jews were thereafter sent to the front, including most of the doctors of the Jewish persuasion in St. Petersburg. Out of one hundred and eighty medical men, who left at the beginning of the month, one hundred and ten were Jews. This measure was taken for two reasons, although it was against the wish of the Minister of War. Our reason was that the Jewish savants are all supposed to be liberals, whose presence in Russia at critical times is considered to be undesirable. The other reason was the reprehensible influences brought to bear on behalf of certain non-Jewish practitioners, who were only too glad to get their Jewish rivals off the war.

The families of the Jewish reservists are objects of vexatious measures on the part of the authorities, who expel them from the large towns, and oblige them to take refuge in the ghettos reserved for the Jews. Jewish doctors sent to the East have been deprived fo part of their emoluments, and receive only nine hundred roubles for travelling expenses, whereas Christian doctors get twelve hundred and fifty.

Pressure is being brought to bear on those Jews whose presence is tolerated outside the ghettos by subordinate officers and police agents, who claim "voluntary contributions" for the Red Cross and naval funds, and other institutions. The general opinion is that M. Plehve's power amounts to an irresponsible dictatorship, which is hardly of a nature to pacify public feeling.

THE WAR SITUATION TO-DAY

The recent attack of the Japanese outside of Port Arthur by the Russians under Makaroff, shows conclusively that Russia has at least a good man at the wheel. Although they only succeeded in destroying one Japanese vessel, and that, at the cost of thirty men and one torpedo destroyer, the attack was an evidence of the general's bravery. Makaraff is keeping on the alert, and will guard against any surprises by night. This great torpepo specialist has inspired the Port Arthur Garrison with his own alertness, and if Russia had a few more as able men as he, her future might be brighter. The condition of affairs in Russian military circles is most unsettled, and until the Japanese plans emerge from the present mist of conjecture they are likely to remain so.

The Russian generals contemplate over-running Corea with an army which will be irresistible by its numbers. At present, time appears to be a matter of little consequence in the estimation of the Russian powers that be. They are so confident of their power to ultimately overwhelm their numerically insignificent enemy, that when news arrives of Japanese successes they sing Te Deums and give loud cheers in honour of the great victories they are going to win, and the dread vengeance they are going to inflict upon "the insolent foe." Even those who do not share Russia's confidence in the ultimate victory for the Tsar must realize that the collision of the Russian and Japanese armies on the banks of the Yalu is not likely to be followed by a series of unbroken successes for the now jubilant Japs. The "shark" has followed the "elephant" ashore.

Rear-Admiral G. W. Melville, of the United States navy, retired, who has made three Arctic voyages, considers the plan of the Russians to take their Baltic squadron to the Far East through the Arctic Ocean is impracticable from a naval point of view. He himself does not believe that it is absolutely impracticable, but says it would take the squadron two years to make the voyage, if it succeeded, which would equal Nordskjold's record.

The Japanese-Corean protocol was published at Seoul in an extra edition of the Gazette Thursday. The Corean Government will publicly announce thas the publication of the protocol nullifies the concessions granted to the Russians, such as non-alienation of coal mining at Kochyo Island and Rose Island, and the forestry concessions in the Ulleungdo, Tuken and Yalu valleys.

NEARLY 70,000 JAPS HAVE BEEN LANDED IN NORTH COREA.

The Terribe Power of the Japanese "Shimos" Powder

London, March 13.—A Chefoo correspondent of The Daily Mail says Japanese embarkation is proceeding at Chemulpo and points to the northward with marvelous rapidity.

The correspondent calculates that up to the present, 70,000 Japanese have been landed in Northern Korea.

As an example of the terrible power of the Japanese "Shimose" powder, a corespondent of The Standard at Tokio relates that a Russian sailor, who was hurt in the naval fight off Chemulpo, has been brought to Matuysuma, Japan; the manhas 160 wounds.

THE REVIEW SEPTETTE GOES DOWN AND OUT.

Examiner Hockeyists Win the Round by Six Goals

"Examiner 5, Review 1!" So read the score-board at the completion of Saturday evening's contest between these two local teams. The game was witnessed by about 300 enthusiastic spectators, who divided their cheers between the two septettes. The coming together of these two well-known teams had been long talked of, long written of, and long thought of, and from the start all looked on with the keenest interest. From the commencement it was quite evident that the Examiners were there to win, but the review aggregation declined to allow a goal for about ten minutes. Then "by way of encouragement," as a player remarked, Henry was "permitted" to score one. The Exams felt so encouraged that they scored another soon after, and so on until at half time they had 4, while their opponents were "below zero." During the second half the contest became still more intering, and the Review team played faster than ever. The Review's scored, and a few minutes rest was taken in oder to allow a general handshaking. The Examiner's scored one during the second half and the final score stood 5 to 1 in their favor

To attempt an individual description of the players—or the plays, we should say—would be most difficult. Henry, for the victors, was perhaps the most prominent, although Caleb Jenkins Hutchinson and Colonel Sam Moore "acted their parts" well. Canniffe, for the Review, was up with the "Times," and gave an excellent exhibition of club-swinging. Smith of the same seven, (although his tennis suit becomes him better) did good work on the left wing. Jolliffe, with his Eskimo regalia, had several good ideas, but before he had them expressed they were nipped in the bud as it were, and "Jolly" smiled in his usual good-natured manner. Hutchinson decorated the fence for a brief period, as a result of using Jolliffe's stick too roughly, but was soon on again, and "gone again" with both hands and feet—especially hands. The two city editors became mixed up several times when the referee was not looking, but both shook hands at the finish and no hard feelings were held. "Hutch" feinted several times, but no serious damage was done, and Sam, throughout the game, his usual "smile that won't come off."

The line-up was as follows:

Examiner		Review
	Goal.	
Gilman		Lewis
	Point.	
Lapierre		Moore
	Cover-point.	
Hutchinson		Mowry
	Centre.	
Long		Jolliffe
	Right wing.	
Henry		Canniff
	Left wing.	
Bishop		Smith

Referee.
H. R. H. Kenner.

NOTES.

The "war of words" wasn't in it with the "war with sticks."

"Bert" Canniff scored the only goal for the Review team.

A new consignment of sticks has been ordered since Saturday evening's game.

"'Hutch' is the worst man outside of Ottawa," was the remark of Referee Kenner at the conclusion of the game.

ANNUAL MEETING

Of Women's Mission Circle of the Murray Street Baptist Church

The annual meeting of the Women's Mission Circle of the Murray street Baptist church, was held in the basement of the church on Friday evening, and was well attended. In response to an invitation, members of sister societies in town, showed by their presence interest in mission work by joining to celebrate the twenty-fifth anniversary of the society.

An excellent Bible-reading, on the Great Commission, was given by Miss Dickson. Business was then taken up and reports were read, the secretary's showing the membership to be eighty, ten more than last year.

An address by Mrs. Owen, of Barnardo Home, was listened to with much interest. Her remarks were drawn from personal observations while travelling in the North-West. She dwelt on the need and difficulty of giving the Gospel to all in that broad land, referring to the Indian, the foreign population pouring in and those from the older provinces of our Dominion. Miss McDonald, Dominion Secretary of the Y.W.C.A., and missionary elect to Japan, then addressed the meeting on the topic, "The Necessity of the World's Redemption." This was threefold. 1st, The need of the now Christian world. 2nd Need of the church. 3rd, Need of the knowledge of Christ in all the world. A solo by Miss Miller was much appreciated.

Kindly greetings were presented from the following societies; St. Paul's, George street, St. Andrew's and St. Pul's Mission. A few parting words from the retiring president, Mrs. Scott, who filled the office four years, called forth regret from the Circle that she could not accept the position for the ensuing year.

FINANCIAL STATEMENT.

Amount raised for Foreign Missions	$170.56
Amount raised for Home Missions	117.80
Amount raised Mission Band	85.00
Total	$373.36

The following officers were elected;

President—Miss Roberts.

Vice-Presidents—Mrs. Bastow and Mrs. Wood.

Secretary—Miss Mary Nicholl.

Home Mission Treasurer—Miss Aldridge.

Foreign Mission Treasurer—Mrs White.

Collectors—Mrs. J. Montgomery, Mrs. Wm. Montgomery, Miss Cochrane and Mrs. Harding.

ATTEMPT TO SELL SECRETS

French Paper Tells of Japan Being a Purchaser

Paris, March 13. The Figaro this morning gives gret promigence to the recital of an alleged attempt to sell French naval secrets to Japan, which, however, has been semi-officially declred to be unimportant. This communication was made through a news agency.

According to the Figaro story a certain non-commissioned officer has been arrested in the matter, and the paper alleges that a woman is also concerned. It adds that one important document is missing, although this statement has been semi-officially denied.

TURK SEEKS ALLY

Takes Advantage of Russia's Pressing Needs

BRITAIN'S PRESSING NEEDS

Passage of Dardanelles for a Free Hand in Balkans

Berlin, March 14.—The wily Turk has seized upon Russia's difficulties in the far east as the occasion for driving a hard bargain with the Czar. The Sultan wants a firm hand in the Balkans and an opportunity to crush the Macedonians and their Bulgarian allies, and when Russia applied for permission to send her Black Sea fleet through the Dardanelles the Porte replied offering to grant the desired permission on these conditions; That Russia break off or evade the fulfillment of her agreement with Austria in regard to the Balkans, give the Sultan full liberty to settle matters in his own way and assist him against Austria or any other powers that might object to his method of settling old scores with the Christian population of European Turkey.

REJECTS CONDITIONS.

Of course Russia could not accept these conditions, but is determined to get her Black Sea fleet into the fighting in the Orient. In rejecting the Sultan's conditions she renewed her application for permission to pass the Dardanelles, but the Sultan once more demanded that as a price of the concession he be allowed a free hand in the Balkans.

There is little likelihood of the Sultan yielding to Russia's request, as British diplomacy is active at Constantinople in urging on the Porte a strict observance of the Berlin treaty. France, so far as can be perceived here, has not seconded Russia in the matter. Such a step as permitting the Black Sea fleet to pass the Dardanelles would be regarded diplomatically as a breach of neutrality on the part of Turkey, though Great Britain's opposition to it, being aimed at the maintenance of the status quo is not so considered.

GERMANY'S FEARS.

Russia's diplomatic weight at Constantinople has been somewhat reduced by the occurrences in the far east. The Porte will give nothing without a heavy price. Germany expresses no opinion on the subject. The most that Germany will do in the presence fo a bargain between Russia and Turkey for the release of the Black Sea fleet would be to maintain silence, neither advising nor assisting either party.

The government here is looking ahead. It can conceive of a time when it will be to Germany's advantage to have a portion of the Russian navy locked up. Austria and Italy are not moving at Constantinople, where all the powers, therefore, except Russia and Great Britain are quiescent.

Russia would not use the Dardanelles now if she could, in the opinion of experts here, because her Black Sea fleet is not ready for a far eastern campaign, and if it were ready Russia would wait until her Baltic fleet was thoroughly equipped. It is believed that Russia could not hope for a decisive naval success without the Baltic, Black Sea and Mediterranean squadrons uniting and proceeding east together, as otherwise they could be destroyed piecemeal.

CHEER UP, IT WILL BE WORSE!

Apparently the czar has had an experience not unlike that of Napoleon III. Asked as to preparedness for war, Napoleon's Marshall informed him that everything was ready "down to the last gaiter button." Events proved that nothing was ready.

The czar is disappointed bitterly, not only at the existence of war, but that it should have come upon his realm along with the assurances of trusted officers that there would be no hostilities, but that if precipitated, a possibility so remote as hardly to be considered, the army and navy would be equipped and alert.

No wonder Russia is working with haste to make amends and reach a war footing. Meanwhile the general tone of the Russian press may be discerned in the counsel. "Cheer up, this worst is yet to come."

RUSSIANS FLEE TO EVADE SERVICE

Bribe Sentries to Allow Them to Cross Frontier

AGENTS ARRANGING EXODUS

Of 2065 Emigrants on One Steamer 1,800 are Russians

New York, March 12.—of the 2,065 steerage passengers brought here by the steamship Graf Waldersee today fully 1,800 are Russians, many of them, it is said, being refugees who fled to escape possible army service against Japan. An Imperial edict issued several weeks ago suspended the issuing of passports to any male between the ages 14 to 45, the prescribed period for army service, the result being, according to some of these on the Graf Waldersee, a large exodus from all villages within reach of the frontier. Alexis Kaplain, a dhrosky driver, with five companions, fled from the village of Vilna. "On a Monday morning some three weeks ago" said Kaplan, "the news went around that the Czar had ordered all who were amendable to military duty to report to the proper authorities in their district to be listed for draft. With five of my friends I left that night. We reached the frontier just before daylight, and there found a military post. I went forward, while my friends hid at a safe distance. When the soldier challenged me I found he was an old friend from my native village. He agreed for 12 roubles (6) apiece, which we paid him to turn his back while we made a dash across the line. He did as agreed, and we crossed the river. When we clambered out on the Prussian side the sentry fired off his gun and gave the alarm, but we were safe on Prussian soil."

HOCKEY.

It is possible that the Brandon hockey team may play here on their return from Ottawa.

On Friday evening last the Y.M.C.A. team defeated the "Up Town Hustlers" by a score of 6 to 2.

Many exciting games of hockey have been played here this winter and many attempts at hockey have also been witnessed. Tomorrow night the citizens of Peterborough will have another opportunity of witnessing an exciting contest between the Band and Firemen. The following is list of the players;

Band.		Firemen.
	Goal.	
Cronk		Methberal
	Point.	
Mein		moore
	Cover-point.	
Grange		Evans
	Rover	
Crowe		Butcher
	Centre.	
Irwin		Mitchell
	Left wing.	
Halpeny		Ringer
	Right wing.	
Wand		Wand

FOOTBALL.

A large and enthusiastic meeting of the Quakers was held at the Crown Hotel on Friday night last, for the purpose of organizing the Quaker Football Club for the coming season. The secretary-treasurer read the financial statement for last season and a good balance is on hand. The following officers were elected;

Honorary-President—A. P. MacDonald.

President—M. J. Kirn.

Manager—J. E. Sullivan

Secretary-Treasurer—I. D. Moore.

Captain and team committee to be elected at a meeting to be held in the near future.

It was decided that the team enter the Midland League and J. E. Sullivan was appointed to represent the club at the annual meeting of the league to be held on July 19th.

—The Salvation Army Band played "The Fall of Jericho" yesterday afternoon and in the evening, "Killarney."

EVERYBODY READS THE TIMES.

KING'S BROTHER ON CONSCRIPTION

Duke of Connaught Gives his Views on Defence Army

SHOULD TRAIN ALL YOUTHS

Country Needs an Army of Young Men Taught to Handle Rifle

Dublin, March 12.—H. R. H. the Duke of Connaught, Inspector-General of the British forces, speaking at a lecture under the auspices of the Irish Military Society in Dublin, given by Major Seely, M.P., on 'The Private Soldier in Modern War,' said the question of a voluntary versus a conscript army was a vexed one, and few officers would be found to agree as to the nature of the panacea which would give them an efficient and a cheap army. They should have a voluntary army for foreign service, but the question was what the home army was to be. They wanted a home army principally for defensive purposes, and was it not a fact that Englishmen should render certain services on account of the benefits obtained from being Englishmen with a navy and army to defend them? They should make some return service to the State.

It remained for the House of Commons, which after all had the deciding of the question to say what system they considered best. He thought some sort of defensive army without very long service, but sufficiently trained and complete in all arms, was the best for home stations, and from it they would call for volunteers for foreign service men who might expect a pension at the end of their service. They required two distinct services—a foreign, composed of long service men of good physique, and fit to take the field at a moment's notice, and an army of younger men well trained, especially in musketry, for the home defence. He thought it would come to something of that sort. If they could train all the youth of the country to military service it would be a great advantage.

ST. ANDREW'S CHURCH

Rev. J. G. Potter Delivered Interesting Address Yesterday Morning

A large number attended the services held in St. Andrew's Presbyterian church yesterday, and the pastor, Rev. Potter, preached both morning and evening. Several new voices were heard in the choir and four new soloists sang for the first time, in this church, yesterday morning, their names being, Miss Florence Miller Miss Violet B. Smith, Mr. Sydney Glass, and Mr. A. E. Young.

The pastor chose his morning subject from Matthew 25, 34, and based his remarks on the great tendency of people of the present day to think too highly of the future. To ponder over the future is natural, and even those of the earliest age were as much troubled about the future as any in the world's history. They held various views, but all agreed that there was a coming kingdom. They displayed great faith in a promised Messiah. The woman of Samaria showed great faith in a coming Saviour. The imaginings of the heart should not interfere with our future, and nothing will stand in the place of Christian living. The proof of the future is to be found in life principles, life acting, living for God and with God. The future life will be made up of the processes of life. God is a Spirit and must be worshipped in spirit, and the man or woman who has talents and hides them, cannot expect God's blessing. Your life should be in perfect harmony with that of your Heavenly Father. The Judgment Day should be looked forward to with feelings of pleasure, just as an apprentice looks froward to the day when he shall receive his diplomas from the master mechanic. God is our great Master Mechanic, and certificates are easily obtained. The life of the student will tell what Convocation Day will have in store for him—a day of blessing and brightness or a day of sorrow and misery.

—The Board of Health meets this morning at 9.30 o'clock.

LAID AT REST

Remains of the Late W. J. Craig Interred Yesterday

About four o'clock yesterday afternoon the funeral procession following the remains of the late W. J. Craig, who was poisoned at Lakefield last week, from eating sardines, passed through our city. A large number of friends and acquaintances from the deceased's former home, followed the body to the grave, and members of Otonabee and Peterborough Lodges, I.O.O.F., of which Order deceased was a member, met the funeral on the outskirts of the city and joined in the procession.

COURT OF ASSIZES

Eleven Cases to be Heard—Longest List for Many Years.

Eleven cases in all will be brought up at the Court of Assizes, which meets this afternoon, before Mr. Justice Teetzel. These consist of four jury and seven nonjury. This is a much longer list than has appeared here for some time.

The following is a list of the cases to be disposed of;

Pogue vs. Canada Foundry Co., Toronto.
Bladge vs. C.P.R.
McPherson vs. Watkins.
Hopkinson vs. Perdue.
Dafoe vs. Wilde, Basher and Dafoe.
Bogue vs. American Cereal Co.
Fife vs. Fife.
Fraser vs. Clarke.
Christie vs. Harrison and Walsh
Haslem vs. Equity Fire Insurance Company.
King vs. Crockford.
King vs. Paolo

ST. PAUL'S CHURCH

Pastor Rev. Dr. Torrance Spoke on "Safety Of Young Men" Last Evening

A large congregation listened to Rev. D. Torrance, at St. Paul's church last evening, and the sermon, a special address to young men, was based on Second Samuel 18; 32. The life of Absolem was specially referred to and held up as an example of a young man's lack of love for home and his surroundings. There are many things that contribute to the safety of our young men.

Respect for parental authority, and the careful carrying out of the Fifth Commandment was the first and most important thing to be considered. According to the great Chinese orator Confucius, the essence lies in the relationship existing in the family. It is natural for a child to love his parents, but as the child grows up the desire to cast off parental authority becomes greater. This is in many cases caused by bad management on the part of the parents. Happy is that young man who has a father whom he can respect and who respects him. Absolem was a striking example of a young man's rebelling against his father's and mother's commands. His mother was a heathen, but Absolem was a son, of whom his parents should have been proud.

The choice of proper associates and companions is another thing that contributes to the young man's safety. Man is a social being. It is not good for him to be alone, and he possesses an instructive desire for companionship. The young man may leave his country home, with all its pleasant associations; and enter the busy, bustling city. He is a stranger there and soon yearns for companions. How important it is that he should make a proper choice! Cicero has said, "a man is very careful in his choice of a dog or a horse, but it is a lamentable fact that men do not take the pains to enquire about their friends, as much as about a dog or a horse."

The young man should read good books. A wise man has said, in speaking of books; "There are the masters who instruct us without rods or ferules." "He who has a book will not need a faithful friend," says another philosopher. Let the young man be careful in the choice of his books. Avoid pernicious literature. Life is too short to read paltry literature. A few books that one should peruse carefully are, the Bible, Pilgrim's Progress, and Guthrie's "Test of a Saving Influence in Christ."

The successful young man must be attentive to business, honest in his transactions, and ever honorable in all his dealings. He must work hard and incessantly. No one will reach the top of the ladder without hard work.

MARRIAGES

FRANKS—McKEE.—At the Charlotte street church parsonage, by Rev. W. J. Jolliffe, B.C.L., on Wednesday, March 9th, 1904, Mr. Arthur Franks, of Moosejaw, N. W. T., to Miss Minnie McKee, of Cartwright.

BOWMAN—RUBIDGE.—In Toronto, on Tuesday, March 1st, at three o'clock, by Rev. Mr. Broughall, at St. Stephen's Church, Miss Maude Henrietta Theodore Rubidge, third daughter of the late Mr. Walter B. Rubidge, to Mr. Nerval T. Bowman, of Toronto, son of Mr. A. L. Bowman.

DEATH OF MRS. ALEX. STEWART

Another of Peterborough's Most Respected Citizens Passes Away.

Death has again visited our city, and it is with feelings of the deepest regret that we chronicle the sad demise of Mrs. Alex. Stewart, who passed quietly away on Saturday afternoon last, at the age of 65. Deceased was a staunch member of St. Andrew's Presbyterian church, and to quote the words of the pastor, Rev. Mr. Potter, "she ever displayed a loving, loyal, unobserved devotion to duty. Although of a quiet disposition, she, by her acts of kindness, and displays of true Christian fellowship, won many friends, in whose estimation she held the highest place.

The late Mrs. Stewart was born in Muirkirk, Scotland, in the year 1838, and when but ten years of age came to Canada, and settled in Peterborough, where she has resided almost continuously ever since. No family is left, and the deceased's husband died about two years ago. One sister, Mrs. Wm. Church, is left to mourn her loss.

The funeral will take place tomorrow afternoon at 3 o'clock, from the family residence on Brock street to the Little Lake cemetery.

TRENT WATERWAY ROUTE

Circulars Being Issued by Peterborough Board of Trade

The following circular is being issued by the Board of Trade and copies will be forwarded to the Secretaries of Boards of Trade, on the Trent Waterway Route Reeves of Villages, manufacturers, etc., thirty-one newspaper men in towns and villages, members of Parliament, members of Peterborough Board of Trade Mayor and Aldermen of the city, and all local manufacturers, merchants, etc.;

RE "ROYAL COMMISSION ON TRANSPORTATION."

In a letter received yesterday by Mr. Geo. M. Roger, Mayor of our town, from Mr. John Bertram, Chairman of the above commission, the following paragraph appears;

"It has been represented to the "Commission that the Trent Valley "Canal, if completed, would form the "most direct and cheapest route "whereby grain could be carried from "Fort William to Montreal, and it "is principally to hear evidence on "this point that we propose to sit in "Peterborough. No doubt if the "Canal were finished there would be "incidental advantages to manufac-"turers and others in the district, "and while giving due weight to any "evidence offered on that point, it "is more for the purpose of examin-"ing the general question that the "Commission was constituted."

They date of sitting of the Commission is suggested as the 24th inst., and on this Mr. Bertram writes;

"If that date does not suit the parties interested, the meeting can be postponed indefinitely."

It has, however, been considered expedient to hold the meeting on date suggested, viz.; 24th inst., and Mr Bertram has been notified accordingly.

In view of the above facts, and in order to present the "Trent Waterway Route" in all its importance and desirability to the Commission, our Board suggests that your Board of Trade appoint delegates to wait on the Commissioners here, and it is absolutely necessary that strong evidence and incontrovertible facts in favor of the Trent Waterway Route" be collected and that such evidence be thorough and proved up to the hilt; expert evidence being also strongly advocated as a powerful offset to the Kingston route via Welland Canal. Evidence was taken before the Commission at Kingston in favor of the enlargement of the Welland Canal to enable freighters to take grain from Lake Superior to Kingston, there to be transhipped into barges for Montreal. This means that the "Trent Waterway" will be completely ignored. Our contention is that it is cheaper to bring the grain to Midland and tran-ship there for Montreal. We should therefore be prepared to prove to the Commissioners that barges can be built and operated between Midland and Montreal so as to handle grain at a lower rate than by the Welland Canal route. Please give thismatter special attention and let our Board know the names of any expert witnesses who have studied the transportation question from this point of view, whose attendance before the Commissioners could be procured. Have any of your members or citizens experience in building or operating barges of a capacity of 800 tons, which will carry 25,000 bushels of grain? If we cannot procure evidence on this point locally, will your Board contribute to a fund for bringing experts from a distance? We are ready to do this.

We need not further expatiate on the importance of our evidence being thorough, succinct and strongly arrayed and marshalled before the Commissioners. Our mutual interests will surely inspire us all to greater efforts and renewed strength to bring this most vital matter to a successful issue.

Yours faithfully,
D. HUGHES CHARLES,
President.
T. Q. QUARTERMAINE
Secretary.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free —Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

UNION LABEL

PETERBOROUGH, MARCH 14, 1904

KING EDWARD AND THE PEACE OF EUROPE

A few days ago Count Benckendorff, the Russian ambassador at London, made a personal trip to St. Petersburg, bearing with him an autograph letter from King Edward to the Czar. The purpose of that letter, we are sufficiently well advised, was to assure Russia that England had no secret engagement with Japan beyond the published treaty, and that short of the contingencies named in that treaty England would not permit even the slightest infraction of the rules of neutrality against Russia. It may be laid in large part to this communication that there has been a noticeable decrease since then in Russia of the publicly expressed fear of hostile action, whether on the part of England, or on the part of the United States.

It would be wrong, of course, to say that the maintenance of the peace in Europe has become assured, however the course of the war may go. While neither France nor England nor Germany has any heart for fighting, the recognized danger still exists that Russia, if beaten—ingloriously, as she would think—by Japan will force hostilities on England even at the certainty of being worse beaten, the reasoning being that defeat by two powers combined would be less inglorious and consequently less hurtful to her Asiatic prestige. But that is a danger of the future, to avert which no direct step can be taken by England now.

There remains, however, an immediate source of possible trouble to England in the rising tide of pro-Russian feeling in France. Should the Combes ministry fall, and should a ministry less cautious in its foreign policy succeed to power, this pro-Russian spirit spirit might be manipulated so as to produce entirely unnecessary and highly unfortunate complications. Here again King Edward has taken a wise step for the maintenance of peace.

This time he has had to address not a fellow monarch but a people. Manifestly he could not issue a proclamation to the French, so instead he saw to it that a "personage intimate with King Edward" should in an interview repeat the "king's words" to a correspondent of the Paris Matin. The circumstances are sufficient warrant of the authenticity of the interview. "I consider," says the king, "that our good understanding with France has never been more useful than it is at present, and believe that it is likely to become more and more useful, not only in the interest of France and Great Britain, but in the highest interest of general peace. That union must be closely maintained for the good of all, whatever may happen.

Such an expression from King Edward can hardly fail to have great weight. It is a proffer of friendliness, and if the French people receive it in the spirit in which it is offered Emperor William of Germany will have less chance than ever of realising what must be his great desire, namely, to sit quietly in the background and gloat while his rivals destroy each other's navies.

CHEER UP, IT WILL BE WORSE!

Apparently the czar has had an experience not unlike that of Napoleon III. Asked as to preparedness for war, Napoleon's Marshall informed him that everything was ready "down to the last gaiter button." Events proved that nothing was ready.

The czar is disappointed bitterly, not only at the existence of war, but that it should have come upon his realm along with the assurances of trusted officers that there would be no hostilities, but that if precipitated, a possibility so remote as hardly to be considered, the army and navy would be equipped and alert.

No wonder Russia is working with haste to make amends and reach a war footing. Meanwhile the general tone of the Russian press may be discerned in the counsel: "Cheer up, the worst is yet to come."

EDITORIAL COMMENT

The Italian fencing master Pini, who visited Canada during the world's fair at Chicago, and Baron Athos Di San Malato are said to have fought a remarkable duel last Sunday at Neuilly, near Paris. The weapons were swords, and the combatants fought three hours without either one getting a scratch. The baron, however, got a blister in the palm of his hand, and that stopped the duel. It will take more than the assurances of these two mountebanks to convince the world that they were trying to injure each other. The baron probably rubbed his palms with croton oil before time was called.

When King Peter of Servia was telling his cutthroat army of the great days that are to come, referring, no doubt, to the possibility of another fight with the Turks, he might have referred to the "great day" now passed when its leaders shot a king and queen in the back and boasted of it as a glorious achievement.

Are You Nearing the Turn of Life?

Unmistakable signs of "the change" are Headache, Sleepless Nights, Nervousness, Hysteria and Melancholia—Watch for these Symptoms if past Forty five.

When the turn or change of life make its appearance you will notice severe pains shooting through the loins. As a rule the change is gradual. In most cases it is marked by irregularity of the menstrual flow. It is most important to maintain as high a degree of vigor as possible. All strength should be conserved, and Ferrozone should be taken three times daily until the crisis is past. Ferrozone not only acts on the blood giving it purity and richness, but acts directly on the womanly organs in such a way as to lessen the strain and severity of this trying time.

Mrs. Martha M. Macadam, of St. George, writes: "About two years ago I was greatly run down and felt as if I was going to die. I was in a nervous excited state, and had the most dreadful pains every month. Irregularities that I never had before commenced, and I didn't know what was wrong. I consulted the doctor and learned I was approaching a very critical time. I started on a course of Ferrozone, and took one tablet along with every meal for about six months. Ferrozone had a direct action, and helped me immensely. My nervousness went away, and so did all the other worrying symptoms. Ferrozone is a remedy that all women should use, because it insures regularity, freedom from pain and headache. It is a remarkable re-builder and tonic, and saw me safely through my trouble."

Ferrozone is exactly the remedy you need. Don't believe an unscrupulous dealer who may try to sell you a base substitute that affords him more profit. Insist on Ferrozone. Price 50c per box or six boxes for $2.50, at all druggists or by mail, from The Ferrozone Company, Kingston, Ont.

A Snap

Very best ping pong sets will be sold while they last for 45c. a set. The size and quality of this set has positively never been sold before for less than 85 cents. Parties ordering by mail may have set reserved, or we will send by express prepaid for 10 cents extra. Times Bookstore, Market Block.

Ran Away.

The young lady who made seven hundred words out of "conservatory" last summer has run away from home. Her mother wanted her to make three loaves of bread out of flour.

A St. Bernard.

One dog of the Convent of St. Bernard is said to have saved more than forty human lives.

Humor of the Hour.

The Family Friend—I suppose the baby is the sunshine of your home?

Mama—Sometimes. Frequently he is the storm centre.—Puck.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor."—London "Truth"

NOTICE.

Take notice that the Municipal Council of the Corporation of the Town of Peterborough intends, after one month after the last publication of this notice, to undertake the construction of granolithic sidewalks on the following streets and parts of streets in the Town of Peterborough, as local improvements, under section 678 of the Consolidated Municipal Act, 1903, and the other provisions of the said Act and the By-laws of the said town relating to local improvements and applicable thereto;

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

AS THE FIORDS OF NORWAY.

Newfoundland's Picturesque Coast Line Described by an Enthusiast—May Be in Canada Some Day.

Newfoundland has a unique, important and commanding position. It is at no great distance from the North American continent, and practically stretches across the Gulf of St. Lawrence. In shape it is quite roughly triangular, and its longest distance across in any direction is only about 216 miles. In approaching the island one is impressed with the thought that it is pretty completely 'rock bound,' which to a great extent proves to be a stubborn fact, but so varied in character as to render it exceedingly picturesque and interesting, says W. H. Yeamans in Country Gentleman.

The entire coast is indented with bays of various shapes and sizes—in some instances these extend so far into land as to almost meet from different directions, leaving only a very narrow isthmus for the connection of the land. In the larger of the bays there are many islands, giving in some instances as great variety and equal beauty as is found in the Thousand Islands of the St. Lawrence River. The general surface is as varied as the coast line, and presents almost every imaginable condition of land surface; mountains, hills and valleys abound, gorges, gulches and ravines, through which rush streams of water; lakes and rivers are numerous, and add to the beauty of the general landscape. If there is enjoyment in traversing and exploring the fiords of Norway, it can be duplicated in sailing in and about the bays and coast indentations of Newfoundland.

If the coast is rough and rugged, it is also picturesque and grand almost beyond description in some instances; nor is there uniformity in any line; in one case the cliffs and mountains will present a surface of bare rough rock; in another there will be sufficient soil upon the rock to sustain a growth of forest that presents a beautiful appearance in the various shades of the foliage; in still another case the hills will be rounded in form, well covered with soil, that has an abundance of herbage for cows or goats.

Within a few years there has been established various lines for steamboat travel, taking in all the principal bays, along a greater part of the coast of the island to Nova Scotia and to Labrador. The trips on and about the bays can be taken upon good steamers in a leisurely manner with stops between if desired.

Not a great time back in the past, settlements were confined almost exclusively to the seacoast, where the chief industry, fishing, was carried on, and is to a great extent at the present day; but quite recently little villages have sprung up in the interior on the line of the railway, induced by the establishment of the industries of lumbering and mining, the latter of which is assuming great importance.

Because of the interesting natural features of Newfoundland, taken in connection with the fishing and mining industries, that are an interesting study, and considering the delightful climate that the summer months afford, makes it a delightful resort for the weeks or months when the extreme heat of New England or middle states cities becomes almost unbearable. It is then that a trip upon one of the bays calls into use medium weight clothing and wraps, as experience has proved.

A. W. Wright Reminiscent

Mr. A. W. Wright, Conservative organizer, who was a resident of Dufferin in 1854, half a century ago, was present at the recent annual gathering of Dufferin Old Boys in Toronto. President Kyles called upon Mr. Wright for a speech, and he regaled the audience with reminiscences of those early days, when the pioneers were hewing out homes for themselves in the woods. He remembered distinctly when the long-drawn howl of the wolf was a common sound in Dufferin county. The settlers of Dufferin were a sturdy rugged race, and no wonder was it that their sons had achieved success and fame in the various walks of life. Mr. Wright referred to his old school teacher, Dr. Frame, of Mono Centre, who had died at the age of 100 years. A kindly man he was, and only once was known to thrash a boy. He had not a first-class nor yet a second-class certificate, but he was second to none of the teachers of the present day, although there was no James L. Hughes to look over them at that time.

Death of Abbe Casgrain.

Rev. Abbe H. Raymond Casgrain, the well known author of valuable literary and historical works, and formerly president of the Royal Society of Canada, died at Quebec recently, aged 75. He was, according to Morgan, a son of the late Hon. Charles E. Casgrain, and brother of Senator Hon. Charles E. Casgrain. Born at River Ouelle, December 16, 1831, he was educated at Ste. Anne's College, Quebec, and at the Quebec Seminary. He was for a time priest at the Basilica, Quebec, visited Europe in 1858, 1867 and 1873 in quest of historical material, and found many valuable manuscripts relating to early Canadian history, among them the journals and papers of Marechal de Levis, and some personal papers of Montcalm. In 1874 he was compelled, owing to a serious affection of his eyes, to give up ministerial work. In 1877 he received the degree of LL.D. from Laval, and in 1889 was President of the Royal Society of Canada.

A VALUABLE PAPER.

Legislative Proceedings of the First Session of Upper Canada.

In a recent report to the Legislature, Mr. Pardee, the Legislative Librarian, stated that he believed copies of parts at least of the missing journals of the early years of the Upper Canada Assembly and Council might be found among the papers of some of the older families. The suggestion has produced excellent fruit. The other day Mr. Christopher Robinson, K.C., delivered to the Librarian a manuscript of the first session of the first Parliament in Upper Canada in 1792, in the handwriting of Angus McDonell, Clerk of the House. The manuscript was accompanied by a letter from Hon. Alex. McDonell, ex-Speaker of the Legislature, to Chief Justice Powell, dated in 1821, committing the documents to the care of the Chief Justice and showing by its terms that even at the early date the absence of printed records was already beginning to be felt. Hon. A. McDonell was Speaker from 1805 to 1812, and C. J. Powell held his office from 1816 to 1825. This manuscript seems to have passed with his papers to his successor, Mr. Campbell, and from the latter to the next incumbent of this office, Hon. John Beverley Robinson, afterwards Sir J. B. Robinson, Bart., father of Christopher Robinson, K.C., the donor.

The document is a most interesting and valuable one. Mr. Pardee says that from a rapid inspection he is convinced that the M.S.S. is fully entitled to be called the original journal, so far as there was (or is) anything that can be called the original journal. Except this MSS. there is no other record of the proceedings of the House save the copy which had to be sent to the Colonial Office in London, and has heretofore been supposed to be the only record extant. A hasty comparison of the two gives reasonable grounds for believing that the Colonial Office copy was copied from Mr. McDonell's MSS., as the former is somewhat condensed here and there.

It is known from some entries in the accounts that a short time after 1792 the House began printing its journals from day to day, much in the same way as is done at present and a few of the daily numbers have come down, but previous to 1825-26 there was no yearly volume, and even the Colonial Office copy of the MSS. for some years has disappeared. It is supposed that the vessels carrying them were captured by French or American cruisers.

Mr. Christopher Robinson also presented to the library the following interesting papers:

A table of precedence in Upper Canada, taken from a rough copy, corrected by Hon. John Elmsley, Chief Justice, in 1797.

A statement showing expense of administration of justice for 1820; the original document as laid before the House.

A British-Canadian Extra of 7th August, 1845, being a map of Canada West, showing the route of the proposed railway from Toronto to Sarnia.

Following is the letter from Alex. McDonell referred to above.

"York, March 21, 1821.

"My dear sir: You will probably smile at my transmitting to you the accompanying document. The only importance, if any, that can attach to it is that it is the first journal of the first Parliament of Upper Canada, of which neither the original nor any other copy is now in existence. The whole is in the handwriting of my deceased brother, Angus. Some years hence the perusal of it cannot fail of being interesting, and to your charge I feel a gratification in committing it—mum, as to the clerk and chaplain. Believe me, my dear sir, ever yours, with great respect and affection.

"Alex. McDonell,

"The Hon. the Chief Justice.

Late for the Party.

Mr. Harry Gummer, well known among the newspaper fraternity of Canada as proprietor of The Guelph Herald and all-round good fellow, held a card party the other evening at his residence, Waterloo avenue, Guelph. Among the guests was a well known Brantford physician—Dr. Blank, for convenience.

The evening was a merry one, and the hours slipped by quickly, says The Toronto Star. The train that Dr. Blank was to arrive on was due in Guelph at 5.50, and when 8.30 came, and the resident from the Telephone City did not arrive, it was feared he had missed the train or been delayed by the storm.

Two-thirty found Mr. Gummer turning down the gas and preparing to retire, and "When the lights had fled, the garlands dead, and all but he departed," there was a loud ringing of the door-bell.

Mr. Gummer put his head out the window above.

"Hello!"

"Hello, yourself!"

"Well."

"It's me."

"Who's me?"

"Dr. Blank."

In a moment the door was open and Dr. Blank was inside. It took him nearly 24 hours to thaw out, as he had left the train five miles out of Guelph and walked in over the snow-drifts.

Wide Range of the Moose.

The range of the moose in North America is of enormous extent, from Nova Scotia in the extreme east, throughout Canada and certain of the northern United States to the limits of tree growth in the west and north of Alaska. Throughout this vast extent of territory but two species are recognized—the common moose, Alces americanus, and the Alaskan moose, Alces gigas, of the Kenai peninsula—but it is probable that further exploration will bring to light another species near the head waters of the Laird River and the Sassiar Mountains of British Columbia and still another farther north in the neighborhood of the Colville river.—Field and Stream.

Tree Within a Tree.

At Moulton, South Lincolnshire, England, there is a willow tree which in consequence of having been beheaded and having reached an old age has become hollow and rotten. From a seed which has dropped into the hollow a healthy sycamore tree has grown to a height of ten feet.

Miss Hamilton for the Stage.

Says the London St. James' Gazette: "The Right Rev. Charles Hamilton, Anglican Bishop of Ottawa, one of whose daughters has created a sensation by declaring her intention of going on the stage, is of the Hamiltons of Hamwood, County Meath. The head of this branch was Charles Hamilton, youngest son of Alexander Hamilton, M. P., of Knock. His third son, George, went to Quebec, and made his fortune, and many other people's at the same time, by founding the Hawkesbury Lumber Limits, on the Ottawa River. The Bishop, who is his fourth son, came home to Oxford for his education, and is regarded as a learned and pious churchman. He is well known in England."

—The greatest convention ever held by the International Typographical Union of North America will convene in the World's Fair city next August. About every typographical union in the United States and Canada will send one or more delegates.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, - - - - - - - - President
E. P. CHAPTON, - - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - - Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material.

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

NERVOUS DEBILITY
CURED.

No Names Used Without Written Consent.

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

We Treat and Cure Syphilis, Gleet, Varicocele, Emissions, Stricture, Unnatural Discharges, Seminal Weakness, Kidney and Bladder Diseases.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

ANOTHER ENGAGEMENT BETWEEN RUSSIANS AND JAPS.

The Two Fleets Have a Hot Encounter—The Japanese Bombarb Port Arthur Again

Special to The Times.

St. Petersburg, March 11—The Emperor has received a message from Viceroy Alexieff from Admiral Makaroff commanding fleet and ports at Port Arthur, under date of March 10—

"Six torpedo boats went out to sea on the night of March 10. Four of them, being under the general command of Capt. Matiousevitch, encountered the enemy's torpedo boats, followed by cruisers. A brief action ensued, in which the torpedo boat destroyer Vlastini discharged Whitehead torpedoes and sunk one of the enemy's torpedo boats. On the way back the torpedo boat destroyer Steregutchi, commanded by Lieut. Sergueieff, sustained damages: her engine was disabled and she began to founder.

"By eight o'clock in the next morning 5 of our torpedo boats had returned.

"When the critical position of the Steregutchi became evident, I hoisted my flag on the cruiser Novik and went with the Novik and the cruiser Bogarin to the rescue, but as five of the enemy's vessels surrounded our destroyer and as their battleship squadron was approaching, I did not succeed in saving the Steregutchi, which foundered. Part of the crew were made prisoners, and part drowned.

"On the ships which participated in the night attacks, one of the crew was seriously injured, and 3 others were slightly wounded, but two soldiers were killed and 18 wounded.

"At 9 o'clock 14 of the enemy's ships assembled before Port Arthur and bombardment commenced with the heavy guns of their battleship squadron at long range. This lasted until 1 o'clock in the afternoon. It is estimated that the enemy fired 154 12-inch shells. The damage to our vessels was insignificant, and they are again ready for battle. Our losses were 1 officer slightly wounded, and one soldier killed and four wounded.

"The illumination of the sea at night by the searchlights mounted on our batteries, was most satisfactory, and several times isolated shots from our battery forced the enemy's torpedo boats to retire.

"At the commencement of the bombardment at dawn, the guns at the fortress replied to the enemy's fire.

"The crews of all the ships engaged gave proof of remarkable coolness in action. Below deck the work of the day followed its ordinary course in spite of the shells falling between the vessels and covering them with missiles.

"A bombardment at such a distance must be considered ineffective, but the Japanese cruiser Takesago is reported to have been seen to suffer serious damage. The damage it is impossible to ascertain at a distance of 5 miles. Many shells were fired at a range of 7 1-2 miles.

"I have the honor to report the foregoing to Your Majesty.

"(Signed) ALEXIEFF".

RUSSIANS ATTACK JAPANESE FLEET AT DAYBREAK.

Lost a Torpedo Boat Destroyer and Sunk a Jap Boat in Rush at Enemy's Fleet.

Special to The Times.

St. Petersburg, March 11, 7.10 p.m.—The Russian torpedo boat flotilla left Port Arthur at broad daylight this morning and attacked the Japanese fleet. One Russian torpedo boat was destroyed and one Japanese torpedo boat was sunk. The name of the Russian boat was the Bezpaubtchedni. The fate of the Russian crew is not known.

MOUNT SEIGE GUN.

Special to The Times.

Tien-Tsin, March 11—One field battery has been installed in the fort at New Chwang and also one company of infantry, while preparations are being made to mount a seige gun.

PARADED PRISONERS.

Special to The Times.

Tien-Tsin, March 11—One officer and four Japanese soldiers, who recently were captured near Wiju, Corea, were paraded through the streets of Mukden on Tuesday, March 8.

LAUGH AT RUSSIA'S PLEA

Japanese Amused by St. Petersburg's Protests to the Powers

Tokio, March 10.—Japan addresses a note to the powers today in response to the recent communication from Russia. The note has not been published here and its contents are unknown.

Russia's various communications to the powers, attacking Japan for its conduct of diplomatic negotiations before their rupture, for the attack upon Russia without declaration of war and its alleged violation of the neutrality of Corea, have been received in Japan largely in the spirit of amusement. The Japanese resent what is alleged to be a deliberate attempt to place them in a false position regarding certain incidents but in the main do not take the correspondence seriously.

Responding to the charge of violating the neutrality of Corea, they point to the action of Russia in Manchuria, where thousands of troops were assembled long before a diplomatic rupture occurred. They say they are fully prepared to accept the judgemnt of the world on a comparison of their course in Corea, where they landed troops only after a state of war existed and upon the written permission of the Emperor of Corea.

They deny that Chemulpo was a neutral port after the Japanese landed on Feb. 8, but whether it was neutral or belligerent Russia began hostilities there. When the Russian gunboat Korietz steamed out of the harbor of Chemulpo on the afternoon of Feb. 8, she opened fire on the Japanese squadron, making the opening shot of the war. The Japanese guns did not respond, but the Japanese torpedo-boat destroyers answered the fire of anti-Russian sentiment in the English press, which he fears may later on land his country in complications of the gravest kind.

Count Benckendorff, the Russian Ambassador, recently went to St. Petersburg at the request of the King to bear to the Czar his strongest assurances of friendship and the expression of the determination of the British Government to preserve the strictest neutrality.

Count Benckendorff had yesterday a private interview of two hours with the King at Buckingham Palace, and it is said in diplomatic circles that the gist of the Czar's reply was that while warmly reciprocating the King's friendship he could not be wholly accountable for the consequences if the Russophobe campaign was continued in the English press.

MAY SHUT OFF COAL

Great Problem Will Arise When Baltic Fleet Sails

FUEL IN BRITISH PORTS

Which May be Refused on Ground that it is to be Used Against Ally

Paris, March 12.—A grave question involving the neutrality of France and Great Britain will rise when the Russian Baltic fleet starts for the east in the early summer. The fleet will be accompanied by colliers and it is understood that the French Government will raise no objection to the fleet coaling at French ports from their own ships.

After the fleet passes Jibutil French Somaliland, there are no French ports until it reaches Saigon, French Indo-China, and it will undoubtedly put in at an Indian or Ceylonese port for more coal.

A SERIOUS QUESTION.

This will develop the questions—can belligerent ships be allowed to receive coal when their purpose is to attack the Japanese fleet, and will not such action be a violation of neutrality.

A diplomat who expressed an opinion on the question pointed out that belligerent ships could properly demand at a neutral port enough coal to enable them to reach the nearest home port and that in this case the nearest home port was Port Arthur. It was possible, the diplomat added, that Great Britain would decline to permit the Russians to take coal except from their own colliery and even then probably not in British waters.

This would immediately tend to place Great Britain even more firmly alongside Japan and might cause renewed hard feelings on the part of Russia, which Count Benckendorf the Russian Ambassador to Great Britain, has attempted to allay.

There is little doubt that France would solve the problem more liberally that Great Britain and grant a Russian request to coal. The diplomat concluded by remarking that the question was most important and one which it was fortunate the powers would have an opportunity to settle before the Russian Baltic fleet moves eastward.

JUST LIKE AMERICANS

But the New York Sun Admits We Have Reason to Boast

New York, March 10—The Sun, in referring to the recent banquet of the Canadian Manufacturers' Association at Quebec, says: "Naturally the speakers at the banquet turned loose a good deal of high flown talk about the greatness of Canada, its illimitable resources and its important place in the world of today. It is evident that an American guest might easily have thought himself in his own country, listening to speeches from his own countrymen. But a little buncombe talk hurts no one, and our neighbors across the northern line are rapidly acquiring a perfect right to shout as loudly about their commercial achievements as some of us do about ours.

"This is made evident by the interesting illustration used at the dinner by Hon. Mr. Fitzpatrick, that in the last seven years Great Britain's exports of manufactured articles increased 26 per cent., those of the United States 47 per cent., and those of Canada 107 per cent.

"More power to the Canadian elbow and more trade to Canada's wide awake people."

EVERYBODY READS THE TIMES.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. E. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 8th, 1902, and partial payments have since been made. The Company is entitled to $8.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 285-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

ARTHUR B. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR B. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; *Gold*, $6.82; Silver, $254 31. *Total*, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the Largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

Mostly Men.

The writer, a Manitoban, and an Anglo-Indian bound for Penang were seated in the smoking-parlor of a Canadian Pacific Pullman car. The Manitoban was a cheery optimist; the Anglo-Indian a pessimist with a liver, who said he believed Canada's future lay with the United States. This my Manitoban resented, and when the Anglo-Indian ended a remark with a pious hope that Manitoba might some day be a desirable country, in spite of her severe winter, my Manitoban did not try to conceal his contempt.

"Huh!" he ejaculated. "I tell you, it's pretty prosperous right now, sir, winters and all, and don't you forget it. A fur coat's a lot cheaper than malarial fever anyway." (The Malay peninsula had been described.)

"Oh, yes! it's prosperous *enough* I dare say," replied the Anglo-Indian disdainfully; "but really when you talk of the Canadian North-West supplying the British wheat market . . ." and he shook his head pityingly.

"See here," said my Manitoban, "how much wheat did Great Britain import in 1902, anyway?"

The Anglo-Indian shook his head again. "Really," he began, "I'm not able to state offhand——"

"Well, I am," interrupted the other. "Great Britain imported in 1902 one hundred and fifty-one million bushels of wheat. In 1902 Manitoba's crop of all grains was one hundred million bushels, and the total wheat crop was fifty-three million bushels."

"And how much of that fifty-three million bushels found its way to England?" asked the Anglo-Indian sarcastically.

"That's all right," nodded the Manitoban; "little enough, maybe. But I'm coming to that. During the year ending June 30, 1902, the whole Dominion exported to Great Britain twenty-five and one-quarter million bushels of wheat and three-quarters of a million barrels of flour out of a total export of twenty-six million bushels and one million barrels. Now, sir, that fifty-three million bushels was raised on two million acres of land. By 1910 Manitoba may have six million acres of land under wheat cultivation—the land is there all right—and similar conditions to 1902 would mean a crop of one hundred and fifty-nine million bushels, or the total consumption of wheat in Great Britain for last year. And take notice, please, I am not saying a word about the millions of acres of rich soil in the North-West Territories awaiting colonization."

"Why is there so much unoccupied land in Manitoba?" I asked, watching the Anglo-Indian ponder on the figures quoted as I spoke. "Are they 'free' lands?"

"No, sir," replied the Manitoban; "you bet most all the free land that's any good has been taken up in Manitoba. The railways, the land companies, syndicates, private individuals, own thousands of acres of land in Manitoba, and they are selling them every day, cheap, too."

"What do you call cheap?" asked the Anglo-Indian.

"Ten dollars to twenty dollars, £2 to £4 per acre," replied the other. "Why, land which is not nearly so productive in Ontario sells from $40 to $60 per acre. The West is still supposed to be 'wild,' I guess," and he laughed merrily. "Last year the official average of wheat per acre in Manitoba was given at 26 bushels. Take an average price of 60 cents per bushel, and you have a gross return of $15 per acre. Farming by figures is easy—and delusive—so let's cut this return in half (and that provides for every contingency except annihilation) and you have a gross return of $7.50 per acre, which leaves a profit, after expenses, sufficient to warrant the price of good lands going to $30 per acre within a year or two."

"And what is the reverse side of this picture?" asked the Anglo-Indian, interested in spite of himself.

"Oh, that's there all right," laughed the Manitoban. "We've had bad crops, frozen crops, dry seasons. We get a six months' winter, which is gen—u—ine winter, all right. In the early days we had to team our wheat twenty-five to fifty miles to market, and that was no picnic when the thermometer was at 40 degrees below zero. Then the mosquitoes in summer, they worry a tenderfoot some, and . . . oh, dang it! that's about all, I reckon. But still," and he waved his hand out towards the darkness, "I tell you, sirs, it's a fine country, whether it's yellow with ripening wheat or white under the bright winter stars. Its men are mostly men—those who count are—and its women know how to make a farmhouse on the prairie a pretty good place for a fellow to get home to. It's a clean, healthy life, gentlemen, and a man keeps young on the prairie a long time after he has passed the 50-mark.

"We're a long way from the center of things up here, I guess, and maybe we are a bit rough, but that doesn't count. I've often watched the twilight steal along so gently it's like a dream, and the Northern Lights shoot across the sky like a mist of flame. And it's good to smell the spring rains when they start the old earth into greenness, and to hear the honk! honk! of the geese overhead, saying they are pleased to get home to the Northland again. You bet, gentlemen, it's a good country to live in and work in, and I guess it's all right to sleep in when the work is well done. Here's my station, and I'll bid you good-night, and I hope I haven't tired you with my talk."

And the Manitoban stepped off the car as we pulled up at a station.

The moving train had resumed its steady thud! thud! thud! before the Anglo-Indian spoke.

"The Canadian Government mayn't know of him," he said, "but that man is the best sort of emigration agent they have got." He rose and yawned. "I think I'll turn in," he said. "Good-night."

But I sat and smoked for a while, thinking of the Manitoban and the life he had sketched. And the train rushed steadily forward through the night, and I thought of the unseen and as yet untilled prairie stretching to the horizon on either hand, and tried to imagine its broad acres peopled with "men who were mostly men."—H. T. Munn in "Outlook."

The Prodigal.

I bought my laughter with the coin of grief,
I paid for happiness as kings might do,
Yet, though I beggared go beyond relief,
Oh, heart, the glad, mad spendthrift hours we knew!
—Theodosia Garrison in "Harper's Bazar."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore, as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1500 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $195,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

CATARRH

RUINS HEALTH AND BEAUTY CAUSES THE WEAK TO DIE Y UNG INVARIABLY LEADS TO CONSUMPTION.

Thousands Annualy Cured by Catarrhozone

MR. ARCHIBALD BASS, of New Harbor, writes; "Catarrhozone proved itself a remarkable remedy in my case. I suffered terribly from catarrh in the throat and my nose was so stuffed up every morning I could hardly draw my breath. The mucous dropped back into my stomach, upset my digestion and kept me sick all the time. Catarrhozone relieved in a short time and cured perfectly."

MRS. W. F. BREACH, of Chapman, writes; "I have used a great many catarrh remedies but none of them ever helped like Catarrhozone. It cleared out my nose and throat and stopped a ringing noise in my ears. Catarrhozone is very pleasant and simple to use and many times better than any other catarrh remedy."

MR. LAWRENCE KENNEDY, of New West Annan, says; "For three years I tried doctors but my catarrh grew worse and worse. I got no relief till I used Catarrhozone. It was not very long in curing me so perfectly that the disease has never returned."

MR. JOSEPH De ROCHE, one of the most prominent and highly respected citizens of Loggieville, N.B., says; "I used Catarrhozone for a sore throat, cold in the head and head ache. I always felt relief immediately. It cured the discharge from my nose and restored my sense of smell lost through the effects of catarrh."

Catarrhozone is simple, convenient and pleasant. It is warranted to instantly relieve and permanently cure.

Complete outfit consists of a beautiful polished hard rubber inhaler and sufficient liquid for recharging to last two months. Costs $1.00 or sample size 25c. Sold by all druggists, or sent by mail to any address if price is forwarded to N. C. Polson & Co., Kingston, Ont., or Hartford Conn., U.S.A.

Obituary

A very sad death was that which occurred Friday morning at St. Joseph's Hospital, when Miss Ellen Julia Dundas passed away after an illness of about five months. Deceased underwent an operation on Thursday with the hope of saving her life, but it was unsuccessful. She was 21 years of age. The funeral will take place this morning at ten o'clock from the residence of her sister, Mrs. Morency, 290 Townsend street, to the Little Lake cemetery.

Rev. R. T. Courtice Dead

Rev. J. P. Wilson received the sad news Saturday morning of the death in Frankfort, of Rev. R. T. Courtice, at the age of 58 years. Mr. Courtice's death occurred Friday after many years of faithful Christian ministry in the Methodist and Bible Christian churches. The late Mr. Courtice was at one time, some years ago, stationed in Lakefield, and was well known to the then residents of Peterborough and vicinity. The funeral service was held yesterday afternoon at 2.30, in Frankfort church, and interment will take place in Oshawa today. He leaves a wife and family to mourn his loss.

DEATHS

DUNDAS—At St. Joseph's Hospital on Friday, March 11th, 1904, Ellen Julia Dundas, daughter of Mr. Gustavus Dundas, aged 21 years.

Funeral on Monday, March 14th, at ten o'clock, from 290 Townsend street.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 50% of those graduating are placed in positions in Peterborough. Attend school ... you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write to us regarding our correspondence course

WM. PRINGLE.

FORMER RESIDENT DEAD

Mr. Wm. O'Toole, At One Time Mayor of Peterborough, Passes Away

On Sunday, March 6th, Mr. Wm. Toole, formerly mayor of this city, passed away at his former home in Grassmere, Manitoba, at the advanced age of 83. Deceased occupied the Chief Magistrate's chair from 1875 to 1876, and was a much respected citizen. The late Mr. Toole was a self-made man, and through energy and strict application to business, was most successful in business circles. He leaves one son, who resides in Winnipeg.

CHEESEMAKERS MEET

On Saturday Afternoon—Interesting Addresses Delivered

A meeting of thirty or forty of the cheesemakers of Peterborough district was held in the Council Chamber on Saturday afternoon, when cheese matters were discussed at some length. Two interesting addresses were delivered by Messrs. Publow, of Kingston, and Mitchell, of Strathroy. These two speakers dealt with the conditions of the cheese market, and gave many good instructions to patrons, cheese-makers and shippers. The advantages of cold storage were also spoken of, and both addresses were listened to with the greatest interest.

WILL GO TO GUELPH

Annual Joint Meeting of Peterborough and Durham's Farmers' Institute

A joint meeting of the Executive Committees of East and West Peterborough and East and West Durham, Farmers' Institutes was held in town on Saturday afternoon, in order to arrange for the annual excursion, held under the auspices of the Institutes. Among those present were; Mr. Birdsall, of Asphodel; E. M. Elliott, Reeve of Smith; R. Q. Dench, of Lakefield; T. A. Kelly and F. A. Fallis, of Millbrook; J. Deyell, Reeve of Otonabee; D. W. Mann, Smith, and Wm. Collins, Town.

Mr. Dench acted as chairman, and Mr. Collins as secretary of the meeting, and a committee, consisting of Messrs. Elliott and Collins, was appointed to arrange for railway rates, etc. It was decided to hold the annual excursion to the Ontario Agricultural College, Guelph, on Thursday, June 9th.

JESSE ARRIES ARRESTED

Held on the Charge of Brutal Assault and Highway Robbery

On Friday evening last the report spread around town that the man who so brutally assaulted the young lady on Aylmer street last week, had been captured. Excitement ran high, and a large crowd of citizens were in attendance at Saturday mornin's police court, anxious to obtain a glimpse of the brutal fellow.

The prisoner is, in appearance, far from rowdyish, and is a young man of about twenty-one years of age. His height is less than six feet, and his clear cut features and well-shaped head betoken anything but brutality. The man in custody lives at 70 Auburn street, and goes by the name of Jesse Arries.

One of the local reporters thought to bring away a momento, and commenced a sketch of the fair Jesse. This aroused his ire and he wanted "an interview" with the man of the pencil. Fortunately the latter had police protection, so he remained quite calm.

The police refused to speak concerning their knowledge of the prisoner, but they are quite certain that they have the right man. The young Jesse will remain behind the bars until next Saturday, when his case will be again brought up.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Dr. Bradd visited Cobourne last week.

—Mayor Moher, of Cobourg, was in te city on Saturday.

—Mr. Thomas Lain, of Young's Point, spent Sunday in town.

—Mr. J. A. Tate, of Cavan, was in town on business on Saturday.

—Miss Paisley, of Cressman's millinery department, left for New York on Friday evening to look up novelties for her department.

—Mr. J. F. Sherlock, representing The Sherlock-Manning Organ Co., of London, Ont., is spending a few days in the city.

—Miss Violet B. Smith, B.A., who sang at St. Andrew's church yesterday, is the guest of Mr. Hugh Waddell. Miss Smith is an honor graduate in Moderns, Queen's University and was a member of Mr. Wodel's chorus last fall, taking the contralto solo work in the "Creation."

THINGS GENERALLY

BY SI JONES

Ever since the two recent attempts at highway robbery the citizens of Peterborough have been on the alert while travelling after dark, and almost invariably take to the middle of the road. Several other reports of suspicious actions on the part of these "knights of the road," have been circulated, and it will go hard on the first offender who gets within the clutches of our police. If you bid a friend good-night, in passing, he is liable to take to his heels forthwith, unless he recognizes you, but in some cases a nervous "good-night" is received by way of reply. "I'm going to carry a gun," said one young lady as she handed a ten cent toy pistol, and others have signified their intention of arming themselves with pieces of broom sticks, etc.

• • •

Saturday looked much like spring, and if the "signs of the times," are any authority, we may feel satisfied that the bright season is at hand. A flock of wild geese has been seen, the return of the robin, which is generally regarded as the first authentic notification of spring, has been reported, the snow is gradually disappearing, and the poet has tuned up his lyre and is getting his rhyming apparatus into good shape.

—A lady's muff was found on Aylmer street on Saturday morning, and handed over to the police.

EVERYBODY READS THE TIMES

The King's Approval.

The King has approved the issue of letters creating the Seychelles (hitherto a dependency of Mauritius) a separate colony. The formal ceremony of publication has been postponed until November 7, when Sir C. Bruce, Governor of Mauritius, arrives. Mr. E. B. Sweet-Escott, the present Administrator of the group, will be the first Governor of the new colony. The Seychelles are among the hundred or more islands scattered over the Indian Ocean, which have hitherto been dependencies of Mauritius. They are between the parallels of 3. lat 4 deg. and 5 deg., 934 miles from Mauritius, 600 from Madagascar, and 970 from Zanzibar. Their total area is 50,120 acres and the population is nearly 20,000, the largest and most populous island being Mahe, which is about seventeen miles long and four to seven miles broad. Mahe was originally captured from the French in 1794, and on the capture of Mauritius in 1810 the whole group was formally taken possession of. The finances of the Seychelles were separated from those of the Mauritius in 1872 and in 1888 they were given a separate Administrator and Council, while in 1897 the Administrator was given the full powers of a Governor.

Mr. Balfour's Gallantry.

London Answers is responsible for the following:—Mr. Balfour has a gallant way of paying pretty compliments to ladies. Driving through Kingston one day, he passed a huge red motor car that stood before an imposing mansion of grey stone. A young girl in a white gown sat in the car, and as the Premier glided by she bowed to him, and smiled. But the Premier did not appear to see her.

The young girl looked embarrassed, vexed. She bit her lip. She thought a moment. Then she took hold of the wheel of her machine, pressed with her small foot the bulb that made the horn toot gruffly, and swiftly she shot after Mr. Balfour.

Soon the great car overtook the carriage, and halted. The young girl, an old friend of Mr. Balfour's, extended her hand, and, as he took it, she said reproachfully:

"You passed me a while ago without looking at me."

With a gallant smile and inclination of the head, the Premier answered:

"If I had looked at you I couldn't have passed you."

Praise for the Germans.

A special correspondent of The Times, who is making a tour of German commercial and industrial centres, and is writing a series of letters thereon, says in one of them:—The Germans appear to have grasped the fact that work is better done in a good than in a bad light, and great care is taken to secure it. Ventilation is also well managed. But the most striking feature of German factories is their clean, orderly, and well-kept condition. These qualities seem to be universal, and they extend to the dirtiest and most untidy departments. Outside the rooms German factories are well provided with sanitary washing and dressing accommodation. Baths are common, particularly shower baths with hot and cold water; and in summer they are much used. German employers certainly do a great deal more for their people than ours, or rather I should say that the practice of providing comforts and conveniences for them is commoner in Germany.

A Shorter and Faster Route.

On the coast of North Pembrokeshire the Great Western Railway Company are quietly carrying out a scheme with the intention of creating a shorter and faster route to Ireland. The scheme includes the construction of a breakwater 2,000 feet long. The material is obtained from the Clogwen rock, which shelters Fishguard Bay from the west, and the removal of this rock is necessary for the carrying out of the superintendent engineer's plans. As the result of one monster blast alone over 100,000 tons of rock were displaced. To receive the charge of 14,300 pounds of Chilworth gunpowder a T-shaped tunnel was bored into the base of the rock by means of drills worked by compressed air. The report of the explosion was comparatively feeble, but the upheaval of such an immense quantity of rock provided a magnificent spectacle, which was witnessed by hundreds of people.

Good Things to Know.

When tired, drink hot water as a tonic. When hot and thirsty drink it as a cooler, for it never disappoints, says The Philadelphia Press.

Headache almost instantly yields to the simultaneous application of hot water to the feet and back of the neck.

A strip of flannel or towel folded several times lengthwise and dipped in hot water, then slightly wrung out and applied to the neck of a child suffering with an acute attack of croup will usually relieve the sufferer in the course of ten minutes if the flannel is kept hot.

A towel folded, dipped in hot water, quickly wrung out and applied quickly over the seat of pain will in most cases promptly relieve.

There is no domestic remedy that so promptly cuts short congestion of the lungs, sore throat or rheumatism as hot water when applied promptly and thoroughly.

Many eminent bacteriologists call attention to the power of fruit juices to kill disease germs. Lemon juice and apple juice are especially mentioned, the one containing citric acid and the other malic acid. Cholera germs are killed in fifteen minutes by either, and typhoid germs in half an hour.

If a lemon be squeezed into a glass of water containing cholera germs, the water may be drunk with perfect safety if allowed to stand fifteen or twenty minutes. A fruit diet will cleanse the stomach and the alimentary canal and drive off any of the germs that cause disease.

Simple Toys Best.

A little girl in the Horace Mann Kindergarten in New York was asked by her mother what she would like for a birthday present, says Ethel McKinney in Good Housekeeping. She had so many things, beautiful toys and all else a child could wish, that what to give her next became a problem. After thinking a minute she said: "In school we have some boxes with little square blocks inside. Could I have one of those to play with all the time?" She had had fun building things with those cubes. It seemed greater bliss to have them at home to play and invent with, unhindered, than to possess any costly and perfect "boughten" toy, good for nothing but just to sit and look at.

Why is it that children prefer sticks and corncobs to French dolls and take more comfort in a house made out of a pasteboard box than in an electric-lighted doll's palace? Friedrich Froebel discovered that children's minds are not empty vessels, to be filled up by a judicious pouring in, but that they possess a wonderful force, "creative self-acting." So he invented a series of playthings, the "gifts" of the kindergarten to-day. They are absolutely simple, but they gave the child something to do, to invent with, to exercise his own thought and self-activity upon

Baby Costs Too Much

When the price paid is the mother's health and happiness. The father doesn't realize as he romps with the child what years of wifely suffering must be set against the baby's laughter.

Chronic invalidism is a high price to pay for the painful joy of maternity, yet it is at such a cost that many a woman becomes a mother. Such a price is too much because it is more than nature asks.

By the use of Dr. Pierce's Favorite Prescription maternity is made practically painless, and a quick convalescence is assured in almost every case.

$500 Reward for Women Who Cannot be Cured.

The proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"There are thousands of sick women dragging out a weary, miserable existence, who would be well and happy did they but have my experience with Dr. Pierce's Favorite Prescription," writes Mrs. Annie Leuman, Lady Commander Star of Bethlehem, Lodge No. 27, of 308 Jackson Street, Atlanta, Ga. "Four years ago I was nearly dead with inflammation and ulceration. I endured daily untold agony, and life was a burden to me. I had used medicines internally and externally until I had made up my mind that there was no relief in sight for me. A friend of mine endorsed your 'Favorite Prescription,' and I determined then to give it a trial. It took patience and perseverance for I was in a bad condition, and had to use your medicine for nearly four months before I was cured, but what a change it brought; from despair to happiness, from misery to the delightful, exhilarating feeling that only health brings. I would not change back for a thousand dollars. Your 'Prescription' is a grand medicine. I wish every sick woman would only try it and be convinced."

Dr. Pierce's Favorite Prescription contains no alcohol and is entirely free from opium, cocaine and all other narcotics.

The dealer who offers a substitute for "Favorite Prescription" does so to gain the little more profit paid on the sale of less meritorious medicines. His profit is your loss; therefore, accept no substitute.

Dr. Pierce's Pellets regulate the bowels.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for. and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $50 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

WHY RUSSIA CANNOT OVERWHELM JAPANESE TROOPS IN COREA

Estimate of the Carrying Capacity of the Trans-Siberian Railroad--What is Needed in the Way of Supply Trains

Special to The Times.

London March 15—The Japanese fleet having cleared the sea for the transport of the Japanese army, and that army having landed an immense force in Corea, the problem of Japan's success on land depends on the answer to the questions:—Can Russia move her army overland to the Far East, and can she keep it supplied when it has been concentrated on the Far Eastern frontier?

The Russian force now in the Far East is known fairly accurately. It mustered just before the war was declared 150,000 men and 266 guns, but it has to accomplish the following tasks;—

1. To guard the railway for the whole distance inside the Chinese frontier, 1,200 miles.

2. To garrison the fortresses of Port Arthur and Vladivostock, and the works on the Liaotong Peninsula, which must be kept strongly manned in view of the activity of the Japanese fleet.

3. To provide the field army now being massed upon the Yalu. Reinforcements have been sent to the extent of approximately 50,000 men. That would give Russia available field force of under 120,000.

TEN TRAINS A DAY.

Unless this army can be further and heavily reinforced, it has little chance of success against the Japanese, whose field army alone numbers 382,000 men, so that the Japanese could without difficulty place forces equal to the Russian army on the Yalu on either side of that army, and attack it simultaneously from Corea and Newchwang.

Everything then depends on the reinforcements which can be sent from Russia in Europe. According to Russian statements, troops can be forwarded over the Siberian railway at the rate of 4,000 men per day or 120,000 per month, the journey being accomplished in about a fortnight.

This, however, is an optimistic calculation, because it takes no account of the supplies and stores which must be forwarded day after day, to keep the army already in the Far East in fighting trim.

The movement of a British division requires thirty-eight trains of twenty-five carriages, or, taking an average of all arms, 300 men with guns, stores, and horses, can be moved in each train. If we allow 400 men for each Russian train—as the Russian army takes the field with less baggage and encumbrances— the movement of 4,000 men would require ten trains a day.

THE SIBERIAN RAILWAY.

There is some dispute as to the capacity of the Siberian railway, but the usual estimate of fourteen trains a day might be near the truth in the summer, and when there are no hindrances to tarffic. If, then 4,000 men were daily proceeding east, that would leave only four trains for the work of carrying coal for the ships to the further end of the line, keeping the locomotives supplied, and maintaining the stores and supplies of a force which was slowly rising day by day from 150,000 to 250,000 men.

For this four trains would be utterly inadequate. It is doubtful if more than one or two troop trains daily, if so many, could be intercalated between the supply, and coal trains going east. Much depends, of course, on the amount of supplies collected by the Russians on the spot before the war, but in view of the discovery made at Port Arthur a month before hostilities began, that the property quantities of food, forage and provisions were not forthcoming, it is not probable that these supplies will last for long.

So far it has been assumed that the trains were moving in summer under the best conditions, and that there is no ice, or broken bridges, no interruptions of any kind to traffic. There are, however, very formidable obstructions to be faced by the Russians, so formidable that the movement of troops seems to be almost out of the question, and the problem to be faced by the Russian General Staff is the far graver one—how are the troops already in the Far East to be kept supplied with food and ammunition.

LAKE BAIKAL.

The great obstacle to the rapid movement of trains is Lake Baikal. As is well known, the lake freezes to the depth of three feet. When the frosts begin a passage is ploughed through the ice by a powerful ice-breaker, on which the train is bodily embarked. But after a time the ice-breaker fails to cut through the ice, and there is no means of moving trains across the ice.

Once across the lake Manchuria is speedily entered. Here there will be danger at every bridge and culvert from Chinese bandits and Japanese emissaries. There have already been reports that mines have been found under bridges, and that the line has been in places destroyed. These reports are intrinsically probable, though of what is happening in the interior, we shall not be permitted to hear anything from Russian sources, and so these tales can rest on nothing but guess work. But arrangements are known to have been made for breaking the bridges.

Allowing for Lake Baikal, but not for the breaking of bridges, the calculations of the Japanese staff are that from four to six trains a day can be moved in each direction. When the ice begins to melt on Baikal, in the early spring, the number of trains each way is expected to fall to two. What interruption to traffic may be caused by the breaking of bridges, it is impossible to say. But in the zone in which it is likely to occur, Manchuria, the line is well laid, and can move fourteen trains a day, so that arrears caused by interruption of traffic, ought to be quickly overtaken.

It would thus appear that the serious obstacles in Russia's way are (1) the distance, which is immense; (2) the interruption at Lake Baikal. Temporary destruction of culverts and bridges in Manchuria may add considerably to the delay caused by these stupendous impediments.

Enough has been said here to show that it is preposterous to suppose that Russia will be able to move half a million or one million men to the Far East, or to overwhelm Japan "by her irresistible mass."

FORMERLY OF PETERBOROUGH

Mr. R. V. Winch Accepts a Prominent Position

The following is from the Vancouver Daily News-Advertiser;

"Last week marked an important change in the personnel of the well-known firm of Messrs. Robert Ward & Company, Limited, commission merchants, shipping, insurance and financial agents, of this city, and Victoria, when Mr. Robert Ward, the founder, who, for the past seven years, has resided in London, England, sold his controlling interest to Mr. R. V. Winch, who has been so intimately connected with the salmon canning industry for many years, in this Province, and on Puget Sound.

"This firm of Robert Ward & Company, Limited, in 1891 took over the business of Robert Ward & Company, (which was established in 1886), the original shareholders and officers being Robert Ward, President; W. A. Ward, Vice-President; and J. C. Maclure, secretary. A few years later Mr. Thomas R. Smith became a shareholder and director, and in 1899 Mr. W. A. Ward relinquished his interest. For the past five years the management has been in the hands of Mr. Thomas R. Smith, Victoria, and Mr. J. C. Maclure, Vancouver, as joint managing directors. In this regard there is to be no change, except that they will now have the benefit of the able advice and assistance of their new President, Mr. R. V. Winch, one of the oldest residents in Vancouver, whose past business achievements are largely due to abilities as a financier and sterling qualities generally. The shareholders and officers of the company now are;—R. V. Winch, president; Thomas R. Smith, and J. C. Maclure, joint managing directors; C. R. Stahlschmidt, director."

The Mr. Winch referred to is a former Peterborough boy, and a son of Mr. R. J. Winch, of this city.

LOCAL SPORTS

HOCKEY.

"Did ye iver see a game?" said Mr. Hennessy.

"I did that," said Mr. Dooley; "I seen the Examiner-Review game the other night, and did I Hinnissy. 'Twas a terrible night at sea. The byes was strenuous, Hinnissy. Several toimes they thried to knock boards off the sides of the rink wid their heads, and the way they flung themselves down trying to crack the ice was a shame. 'Tis a pretty game, Hinnissy, if ye're lookin for excitement, an' have no wish to sidestep the chance for an early pair of wings, but for me, Hinnissy, give me forty-five, fan-tan, or ping-pong."

The game between the T.A.S of Peterboro, champions of the Trent Valley League for two years, and Lindsay Seniors tonight in Lindsay street rink, will be the great hockey event of the season, "and should be witnessed by every citizen who enjoys seeing a hard-fought and evenly matched contest. There should be at least 1200 spectators to recoup the management arranging for the great game.—Post.

Because Peterborough beat a make shift Marlboro team The Examiner man rises to remark that Peterborough could just as easily have beaten Ottawa. "Ain't he the wise old owl!"—Globe.

HOCKEY.

The following will be the line-up of the young bandsmen and the tool makers of the Canadian General in their match tonight;

Bandsmen.		Toolroom.
	Goal.	
W. Hodgson		R. Holt
	Point.	
P. Blade		T. Henderson
	Cover-point.	
F. Miller		J. Anglesey
	Right wing.	
P. Doughty		J. Milligan
	Rover.	
D. Smith		G. Morris
	Centre.	
A. Seward		E. Hillard
	Left wing.	
H. Gordon		C. Delaney

The game between the firemen and the band tonight will be refereed by Mr. Harry Rush, who is a most competent official. Both teams are in elegant condition for fast work.

This evening from six to seven St. Andrew's Guild will play the senior intermediate of the Y M C A at the Brock street rink. A clean fast game is expected.

CURLING.

On Friday night the local Curling fraternity will hold a big bonspiel in the Charlotte street rink to bring the season to a suitable end. All curlers are asked to be present, and games of nine or ten ends will be played. Rinks in same class will probably consist of five or six men. At the conclusion of play a concert will be given in the club rooms upstairs.

In a keenly contested game of curling yesterday afternoon Mr. Croft defeated Mr. LeBrun by one shot. The game was resplendent with brilliant playing, and, although all done well, Mr. Croft must come in for special mention. He time and again, by his clever generalship and splendid shots, scored when defeat seemed almost inevitable. The game from start to finish was a combination of climaxes and surprises. Special mention might also well be made of the Peterborough Granite's veteran, Mr. Snowden who from time to time swept all obstacles from his way to find his resting place on the much envied tie. In conclusion, it may be said that Mr. Croft has practically demonstrated to the citizens of Peterborough and the world at large that the curler is yet unborn who is worthy of his biam. Having the courage of his convictions, Mr. Croft would like to play Mr. Flavelle, of Lindsay, for a car load of flour or its equivalent in buns, the buns in question to be distributed equally among the charitable institutions of both towns, as we understand they need the dough. Game to take place at Peterborough curling rink any time during March.

FOOTBALL.

A meeting for the purpose of re-organizing the Y. M. C. A. Football team will be held in the Y. M. C. A. Hall this evening at 7.30.

Continued on page six.

THROUGH SMOKE OF WAR.

The Times this morning affords the first authentic glimpse we have had for two weeks of conditions in Corea. Seoul is quiet, having a Japanese garrison of 3,000 men. Chemulpo has been abandoned as a base, and the harbor of Chinampo is now the chief landing place for the troops and supplies. The Japanese occupy the country north to Anju, and do not wish to march their armies farther through Corea than necessary because of the execrable roads. It will be some time therefore before any great achievement is attempted. The thoroughness of the Japanese preparations is a matter of wonder, as is the progress made in improving telegraphic and railway facilities. It is evident that Japan is in Corea this time to stay. The Times' correspondent apparently thinks the Russians will make a stand at the Yalu, but writes without knowledge of the landing in force alleged to have been made at Takushan and the march into Manchuria. As the days go by, however, and nothing further is heard of the Japanese army said to have invaded Manchuria, scepticism grows, and the statement that Japan has still her armies lying at her home ports awaiting the break-up of the ice secures more general belief. Native couriers who have passed through that part of southern Manchuria in which the Japanese were said to be saw, nothing of them.

As has been seen from the latest despatches, the loss of life and damage to property, during the recent bombardment of Port Arthur, have been greater than at first reported. It is now thought for a certainty that the Russians have evacuated the town. The Americans have become most uneasy since the injury to the battleship Retvisan, and the killing of twenty of her crew. The Japanese admiral, Togo, reports that no vessel of his fleet was lost, although several were slightly damaged, and eleven seamen were killed. The Russian destroyer, Stereguschtchi, sank after she had been captured by the Japanese.

A late despatch from Alexandra says that the Russian warships are in bad condition externally. There are women on board the larger vessels. The neutrality proclamation by Egypt will be strictly enforced against the Russian warships passing through the Suez Canal again. The Seoul correspondent of the The Times describes the Japanese troops who have already landed as being in splendid fettle. They are clothed a little heavily for marching, but quite sufficiently to stand the intense cold of the north. Besides each man carries a species of posteen blanket coat, with goats' hair inside. The enthusiasm and confidence inspired by the navy's success is exhilarating to see.

Are Preparing to Evacuate New-Chang

Russians will Retire on Mukden, Which They Have Strongly Fortified---British will Occupy New-Chang

Special to The Times.

London, March 14.—The Russians are preparing to evacuate New-Chwang They will retire on Mukden, which they have strongly fortified. A collision between the Russians and Japanese at or near New-Chwang is momentarily expected. On Advice of the various foreign consuls, women, children, and non-combatants generally are fleeing from the city and coming southward in this direction. Painful scenes accompanying the hurried evacuation, are witnessed everywhere.

"British troops are under orders to march into New-Chwang whenever it is evacuated by the Russians. This movement will be in the interests of protection of property of Europeans.

FAR EAST NOT LIKE BOER WAR

Great Britain at All Times Able to Keep Troops Supplied

RUSSIA NOT ABLE TO DO SO

Her Immense Resources Will Avail to Keep War Going

Special to The Times.

London, March 15—It is most natural that Englishmen, who have been long resident in Russia, should recognise the immense military power of that country, as shown by its vast armies, its costly establishments, the devotion to military development of a State equal in area and population to all the rest of Europe together, says the military correspondent of the London Telegraph. It is certainly not surprising that they should treat it as absurd that a comparatively small nation in the Far East, with a population not a tenth of that which the Tsar commands absolutely, should for a moment be supposed capable of contending with the Colossus of the North. Any suggestion that the successes of Japan are other than such as the Boers gained over us at the beginning of the South African war seems to them to belong to the region of dreams. Every criticism that we may apply to the facts of the situation they take to be based on the same gross ignorance which was shown as the condition of the British Empire by Russian newspapers when the Boer war began.

First, then, as to the comparison between the Boer war and the British Empire and the war in the Far East and the Russian. To take first the material differences which make for a catastrophe in the present war, and did not threaten it in that. Behind the British Army throughout that campaign there lay 6,000 miles of ocean. Thanks to the supremacy of our fleet over those 6,000 miles there flowed in one long wide and continuous stream, not only the whole of the required resources of the British Empire, but all that money could purchase or what was needed of the resources of Europe, America and Asia. Whatever else the report on the water has brought out it has shown conclusively that no army in the field was ever more perfectly supplied with food of all kinds, with stores of all kinds, and with ammunition and equipment. The analogous circumstance in regard to the Russian army in Manchuria is that it depends for these things, not on the free commerce of the sea, from which it has been utterly cut off, but on a railway so limited in its capacities that it is at least doubtful whether it will be able to deliver at its eastern end troops sufficient to compensate the waste of an army very much strained, very short of all things, and exposed to harassing attacks, not only from the enemy, but from those uncertain assailants whom it has provoked by its insolence and cruelty.

ARMING THE CONVICTS.

That railway in normal times carries to Siberia the greater part of the food of the population and of the numerous convicts, especially of those working in the mines. So hopeless has it already become to provide food even for these, that the Government, in order not to be guilty of actually starving them to death, and perhaps to avoid a general revolt, enforced by the starvation of guardians and prisoners alike, has resorted to the desperate expedient of putting arms into the hands of men who have many of them, been banished, because they were supposed to be dangerous to authority at home. Whatever may be the consequences of that act, however, it may affect the character of the army in the field, it is at least a proof of the straits to which the Government is already reduced, even to provide food for the civil population. As hitherto the army in the field must have been living chiefly on the produce stored from last year, and as scarcely any fresh supply can be obtained till after the next harvest, and all other supply depends on the overburdened railway, it is extremely difficult to see how, as the army increases, it can be fed at all. Napoleon's catastrophe was not due to Russian victories at all. On the contrary, he almost invariably even to the last, defeated them whenever they ventured to attack him. It was starvation and cold that ruined that army; it is starvation and an incomparably more severe cold that threatens a catastrophe for this one.

THE JAPANESE ARMY.

The Japanese, on the other hand, have every facility, and a most perfect organization for the feeding and supply of their army. They are in a climate which, compared to the climate of Siberia, is mild. The defects of the Boers, as a fighting force, were their want of discipline, their want of any manoeuvring capacity and of any willingness to incur losses in attack, as a rule. In almost the single instance alone of the one days' attack on Ladysmith, when they hopelessly failed, did they on any scale attempt it. The Japanese are admirably disciplined, they can manoeuver as well as any European army, and they are ready to make any sacrifices that may be necessary to success. The comparison with the situation of the Boers holds only in this, that at the beginning of the war the Boers very greatly outnumbered us, that they were—what the Japanese are not—very well mounted and very good riders. They shoot very well, so do the Japanese. Army for army, I do not think that there can be a doubt that, with anything like equal numbers, the Japanese is superior to the Russian; but when one speaks of a great catastrophe, that does not depend upon the success in battle of the Japanese over the gathered forces of Russia, but upon the almost impossibility, of feeding large numbers by means of the railway when she has at last delivered them at any point beyond the railway.

A THRILLING EXPERIENCE

Peterborough Young Lady's Display of Bravery

About 9 o'clock yesterday evening one of Peterborough's young ladies had a most thrilling experience, and but for her extraordinary display of bravery she might have received serious injuries. All the family were absent at a neighbors, and the young nineteen-year-old daughter sat alone reading in the parlor, when suddenly she heard footsteps on the verandah. As she expected a friend she arose just as the bell rang and went to the door. On opening it she was accosted by a stout-looking young fellow, who was apparently slightly under the influence of liquor. She asked him his business and he grunted out that he was "going to stay all night," and tried to push past the young lady and get into the house. With great presence of mind she stepped back and slammed the door quickly and thurned the key. While he stood without threatening to break open the door she ran to the telephone and began ringing. Without taking down the receiver she called out loudly, "Give me the police station, central quick." The tough evidently heard her voice and thought it best to depart. The young girl then remained locked inside until her parents came home about 10 o'clock. The matter was not reported to the police, as the young lady does not wish to figure prominently in the case. "I wasn't much afraid," was her closing remark, "and I don't think he'll come around here again."

THE FIRST LAND FIGHT NOW QUITE IMMINENT

A Force of 10,000 Japanese Nearing New-Chang --A Fierce Skirmish Between Scouts

Special to The Times.

London Monday, March 14, 4 a.m.—There is no real information of the land movements of the Japanese from any source, but as the Seoul correspondent of the Times points out, the practicable landing places are hardly yet free of ice. The sudden return of Winter has increased the difficulties. The Japanese have no intention of marching their main army any further than necessary along the execrable Corean roads. The troops already landed are sufficient to secure a footing in Corea and seize Ping-Yang.

ALL GONE TO THE FRONT.

Special to The Times.

London, Monday, March 14—A despatch to the Times fro, Wei-Hai-Wei describes a visit to Chemulpo. On the previous visit of the correspondent the anchorage there was crowded with transports, but now there are barely a dozen vessels to be seen, of which eight are warships. Few soldiers are visible, but there are pyramids of supplies. Practically all the troops have left Seoul, except the permanent garrison of 6,000 men. The observation force in touch with the Russians near Anju. Twenty Russians attacked a Japanese post of three men, killing one of them. It is believed no other fighting has occurred.

It is estimated that 1,500 Russians with a few guns, and a number of Cossacks, occupy the country north of Anju.

A PRETTY OTONABEE WEDDING.

Miss Edith Kent and Mr. Elmer Wood, were United Last Week

On Wednesday evening last a very pretty wedding was celebrated at "Riverview," Otonabee, the residence of Mr. Andrew Kent, when his only daughter, Edith, was united in matrimonial bonds to Mr. R. Wood, eldest son of Mr. R. Wood, also of Otonabee. The bride was assisted by her cousin, Miss Evelyn Robinson, and Mr. Alton Wood, brother of the groom, acted as best man. Two pretty little girls, Misses Eva Stewart, cousin of the bride, and Viola Palmer, were the maids of honor.

The bride looked charming in a beautiful dress of cream voil over cream silk, and wore the usual bridal veil, and orange blossoms. She carried a large bouquet of bridal roses, and the bridesmaid carried roses and carnations. The latter's dress was of white organdie over pale blue silk. The little flower girls were daintily dressed in white silk, and carried baskets of flowers.

Rev Mr. Sickem, of Keene, performed the ceremony, and the many presents received were beautiful and costly. The groom's present to the bride was a diamond brooch, to the bridesmaid, a gold bracelet, and to each of the maids of honor, a silver brooch. The bride has for some time officiated as organist at Zion church, Otonabee, and was a great favorite among a large circle of friends. About sixty-five guests sat down to a dainty wedding breakfast, consisting of all the choicest viands of the season, and the house was tastefully decorated for the occasion.

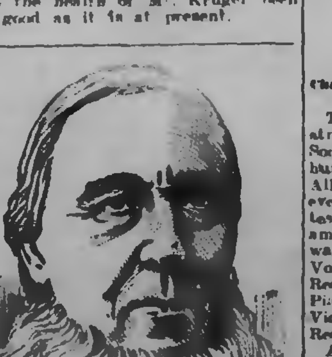
The happy couple will reside at "Maplegrove," Otonabee.

KRUGER'S HEALTH IS GOOD

ALARMING RUMORS TO THE CONTRARY EFFECT

The Old Man is Anxious That Britain Should Become Involved in War

Mentone, France, March 14— Contrary to the alarming reports circulated in regard to the health of Mr. Kruger, former president of the Transvaal, Dr. Huysmans, his physician, says that not for some years has the health of Mr. Kruger been as good as it is at present.



EX-PRESIDENT KRUGER.

Paris, March 14—The Mentone correspondent of the Presse says he saw Mr. Kruger taking his usual daily walk yesterday, and adds that he appeared to be in excellent health.

Mr. Kruger, in conversation with The Times correspondent, stated that he looked for the emancipation of his people at an early date, when Britain became involved in war. It was then the Boers' time to strike.

THE COURT OF ASSIZES.

OPENED BEFORE MR. JUSTICE TEETZEL YESTERDAY

Large Number of Cases on the List—Eleven Civil and Two Criminal Cases Heard

The Spring Assizes of the High Court of Justice opened yesterday afternoon at one o'clock before Mr. Justice Teetzel, of Toronto, whose first visit to Peterborough it is. The members of the bar present were; Messrs. D. W. Dumble, K.C., Geo. Edmison, K.C., E. B. Edwards, K.C., Hugh O'Leary, K.C., of Lindsay, Crown Prosecuting Attorney; R. T. Mold, Geo. J. Sherry, Lindsay; D. O'Connell, R. M. Dennistoun, F. D. Kerr, Jno. Green, R. F. McWilliams, O. A. Langley, Lakefield.

The following Grand Jury was empanelled;—J. H. McClelland, merchant, Peterborough; Frank Burgess, druggist, Lakefield; Robt. Darling, farmer, Smith; E. M. Elliott, farmer, Smith; Jas. Elmhirst, farmer, Otonabee; J. H. Fife, farmer, Otonabee; Jos. Foster, gentleman, Peterborough; Robt. Hunter, farmer, Dummer; Adam Hall, merchant, Peterborough; John McMillan, blacksmith, Norwood; P. McNulty, farmer, Asphodel; J. B. Peoples, farmer, Belmont; David Walsh, farmer, Burleigh.

In his address to the Grand Jury the Judge remarked that their duties would be light, as only two criminal cases were to be heard. The cases referred to were that of the Italian who stabbed his brother, and the other was a charge made by Rev. Lorrimer against Edward H. Crockford, accusing him of threatening to do him injury.

The only case disposed of was the criminal case in which the Italian, Panteleomo, was charged with stabbing his brother. The prisoner was found guilty and will receive his sentence this morning.

SOCIAL EVENING

Charlotte Street Epworth League Held Successful Social Last Evening

The Epworth League of Charlotte street church held a "Conundrum Social" last evening, and about one hundred young people were present. All present spent a most enjoyable evening. After the conundrum contest, which was most interesting and amusing, the following programme was rendered;

Vocal solo	Mr. W. Morris
Recitation	Little Miss Christie
Piano solo	Miss Sophia Elliott
Violin solo	Miss M. O'Neil
Recitation	Miss E. Ruth

At the conclusion of the programme dainty refreshments were served, and the meeting closed with the National Anthem.

RUSSIANS SINK FOUR OF THEIR STEAMERS

Special to The Times.

London, March 15.—A correspondent of the Daily Mail at New Chwang, says that after the removal of the battleship Retvizan, four Russian steamers, the Harbin, the Hailaar, the Ninguta, and the Sungari, were anchored at the mouth of the entrance to Port Arthur in proper positions, and sunk, leaving only a small space available. Vice Admiral Makaroff having previously ordered the whole fleet to remain outside with steam up, economy in coal being necessary.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

UNION LABEL

PETERBOROUGH, MARCH 15, 1904

DEMORALIZING NEWSPAPERS

I have in mind a certain yellow journal whose owner is a demagogue and grand-stand player of the most dangerous type. He panders to the lowest elements in humanity. If a labor union strikes he immediately arraigns all employers so villainously that his partly educated readers begin to hate employers, good and bad. His first act is to villify the man who pays out the money to work-people and flatter the workman, even after he becomes a violent law-breaker and criminal. Thus, for his own supposed gain, he arrays employe against employer—a direct tendency toward anarchy, and he does this for the purpose of gaining subscribers, so that he can charge heavy prices to the advertisers. The penny that he gets for the paper does not yield a profit. The support of his enterprise comes from the advertiser, yet he is using every means in his power to create a sentiment against the employing class, that will, if continued to its ultimatum, break down every form of law and order in this country.

It is time the advertiser ceased paying money out to an anarchist to use for the destruction of business and of law. I wish to protest most earnestly against the continued payment of money by employers to this class of publishers.

One great aim of the honest press is to bring into closer harmony the workman and the employe, who should both act as a unit, and not as opposing forces, each seeking the other's destruction.

Let the editorial columns of the newspapers ring with fair, just utterances that will make clear to employer and employe alike the need of continued and steady operation of our industrial enterprises.

It is not true policy for the editorial end of a newspaper to condemn universally employers and pander to employes, simply in an effort to build up circulation. That sort of policy is as sure to bring ruin as sin is sure to bring its reward. Just in proportion as a newspaper lowers its character and reputation for fairness and integrity, just in that proportion it lowers its standing and value to the readers.—C. W. Post, Prest. Association of American Advertisers in an address to the Buckeye Press Assn.—Rochester (N. Y.) Post Express.

SYMPATHY FOR COREA

With all the sympathy shown for Japan and for Russia in the present war few give a thought to Corea. Neither the powers nor the philanthropists concern themselves much in her behalf. As if fate had decreed she should be doomed, whatever happened to others, little interest is centered in this land, except as the inevitable battleground. "The Land of the Morning Calm," is the title given the country by the natives. If left to itself the name would not belie the condition, for the Coreans are shiftless, indifferent people, oriental in the extreme, so far as being satisfied with letting well enough alone, or, as in their case, bad enough. Midway between Japan and China, the territory has been overrun by the people of the one country and now by the other. Often it has paid tribute to both China and Japan at the same time.

It does not take many centuries of this worse than slavish life to degrade a nation into insensibility even if the people originally had vitality and self-reliance. Descended, as is believed, partly from the half-savage and nomadic tribes of Mongolia and northern Asia and partly from the Caucasian peoples of western Asia, the Coreans are a composite people distinct in type from their neighbors, the Chinese and the Japanese. Their speech and physical features, especially their folklore, indicate characteristics of their own as a separate people.

What they might have been if they had had opportunity to work out their own development is impossible to say. Repeated wars leave a survival of the unfit, and the Coreans as known today are incapable of enterprise, self-assertion or self-defence To give them much thought may be pity wasted, yet all the same it is deplorable that in this twentieth century an innocent people must continue to be the victim of circumstances and be forced to go still lower into the depths of degradation.

Cured Painful Irregularities

Strong Testimony From a Lady Resident of Clarksburg, Proving that Ferrozone Surpasses All Other Remedies For Diseases Peculiar to Women.

If the thousands of women who silently suffer from functional derangements were to tell their sad story, it would make a book of countless pages. The health of many women is constantly imperilled through failure of certain organs to work according to nature's requirements. Where this condition occurs there is no safer remedy to employ than Ferrozone, which has a specific action in female troubles. Not only does it act directly on the organs, ensuring regularity and freedom from pain, but by forming rich, red blood, fortifies the system against weakening drains.

Every young girl and woman will find a true friend in Ferrozone. It is a specific remedy for their troubles that offsets the deadening influence of ill health by restoring order and regularity. Ferrozone possesses a volume of merit totally absent in the ordinary medicine and its superiority is proclaimed by thousands of women it has restored to vigorous health. From Mrs. F. G. Caldwell comes the following endorsement, written from her home in Clarksburg. "I went through a most trying experience with what is commonly known as "Female Trouble.' It isn't necessary to state my symptoms but I suffered a great deal. My health was well nigh ruined, and I got into such a condition that I couldn't even sleep. I was dreadfully nervous, weak and pale. Different prescriptions were recommended, and I tried them. But Ferrozone was the first to help. I improved steadily under Ferrozone and normal conditions were finally established. I gained weight, my color and spirits improved, and my former health was restored. Ferrozone cured me, and with a full heart I recommend this good medicine to all other women.

FERROZONE MAKES STRONG WOMEN

No greater blessing ever came to suffering woman than Ferrozone. It deserves a trial because it is the best medicine, tonic and rebuilder money can buy. Beward of imitations. Don't allow a druggist ot palm off anything else for Ferro-zone, which costs 50c. per cent or six boxes for $2.50, at druggists or by mail from The Ferrozone Co., Kingston, Ont.

PECULIARITIES IN FORMATION IN BIG BUG BEING EXPLORED

Interesting Story of Chunks of Gold Found Clinging to Crevices in Rock of Old Mesa Gold Company's Property in Big Bug Mining District Arizona Territory.

Copied from the Weekly Arizona Journal-Miner, Prescott, Ariz.—

Papers have just been prepared by Herndon & Norris, attorneys for the Old Mesa Gold Company, for a contract which has been awarded to the mine contracting firm of Hahnel, Jones & Shipame, on what is known as the Old Mesa Tunnel in the Upper Big Bug, which adjoins the Poland Mines. This tunnel is being driven for the purpose of catching the Old Mesa ledge at a great depth, which is known to be a very rich one. The contract is for the purpose of continuing the tunnel which is already into the mountain 300 feet, 300 feet further. This is one of the most important undertakings in Northern Arizona, and the progress of the work will be watched with great interest. The old timers of Yavapai County, all of whom seem to be familiar with this property, say that it is the making of one of the greatest gold mines in the Territory of Arizona. There are some very interesting features and peculiarities connected with the property. The old mine was known to have existed when it was worked years ago, at a time when a great part of the inhabitants of Yavapai County were Indians. This old ledge for which the long tunnel is being driven, was known in the early days of Arizona as the Old Mesa Mine. At that time the only means of extracting the free gold from the quartz, was by the Old Mexican arrastra process, and a mule was used to furnish the motor power. During the short period that the Old Mesa was worked, it was a known fact that four or five men took therefrom forty thousand dollars in free gold, extracted through the old arrastra, which was on the creek at the foot of the hill. It is also known that the greatest depth that has been attained on the ledge is seventy-five feet below the surface, this point being at the breast of the tunnel. A portion of this old tunnel is still intact but it has caved in near the breast. This ledge has never been rightly in place. It shows evidence of having been disturbed by volcanic eruptions, but it is natural to suppose that when greater depth is attained, the ore bodies will be larger, and continuous, which is characteristic of gold mines in Arizona. The mountain side on which this property is located, is covered with lava and volcanic ash. Nearby is a very jagged point on the mountain, which is known as the old crater, and which undoubtedly merits the name. One of the peculiarities connected with this property which the old timers who still reside in this section well remember, is the existence of caves and large crevices in the rock, which seem to run down to a great depth into the bowels of the earth. At times when they were working in the tunnel, they would run into these crevices into the rock, and occasionally let a drill slip from their hands, which could be heard for a great distance, bounding from place to place in caves below. At one time when assessment work was being done in the tunnel, parties doing the work ran into quite a large cave, and all the rock that was broken in doing this assessment was thrown into this cave, and it entirely disappeared. Where these caves and crevices occurred, the miners would invariably find very rich ore, the richest of which would be found clinging to the sides of the crevices, and in some places, pieces the size of a man's fist would be found which would be more than one third pure gold. The ore which was run through the old arrastra gave returns of from $20 to $125 per ton in free gold, and a great deal of the value went to waste in the tailings, not being able to make a close saving with this crude method of treatment.

The title of the Old Mesa Mine, in connection with five promising prospects, was procured last April by the Old Mesa Gold Company, at the time when the Company was organized. The parties connected with this enterprise are principally citizens and business men of Prescott, namely, Morris Goldwater Bros., the dry goods firm; E. Block, clothier; D. M. F. Weeks, of the general merchandise firm of Bashford-Burmister Company; A. A. Johns, mining man; M. Salzman, merchant of Williams, Arizona; D. E. Daves, mining superintendent of Providence, Arizona, and B. H. Gray, mining superintendent of Poland, Arizona.

It is supposed that the Old Mesa ledge will be encountered in this tunnel at a distance of from 600 to 800 feet from the mouth. The distance depends wholly upon the pitch of the ledge at the point where the tunnel will intersect it. If the same amount of ore is found in solid formation in this tunnel, that is now in sight near the surface, it will certainly make a great mine, and the shareholders in this enterprise will be well repaid for their investment.

Ed. Block, the general manager of the Company, shipped to the mine today 500 feet of six inch air pipe and 600 feet of T rail and other supplies. The Company intends pushing their tunnel vigorously to completion

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 370 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

RUSSIANS SAID TO HAVE VIRTUALLY OPENED PT. ARTHUR

Russian Steamer, Mortlake Fires on British Steamer--Officers Go on Board to Inspect

Special to The Times.

London, March 13.—A dispatch to the Central News from Tokio says; It is asserted here that the Russians virtually have opened Port Arthur.

Special to The Times.

Port Arthur, March 13.—Everything is quiet here today.

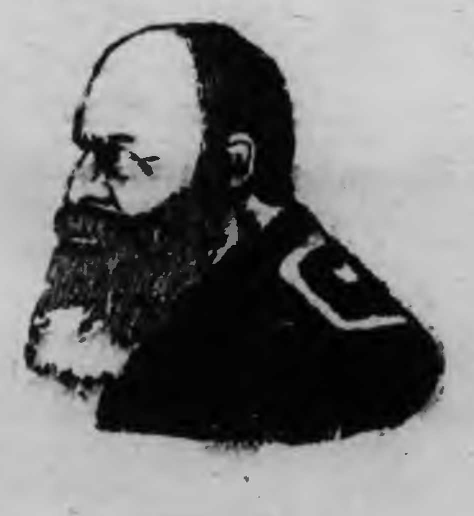
Special to The Times.

Port Said, March 13.—The Russian cruiser Dimetri Vonskoi, has stopped several vessels at sea, including the North German Lloyd Line steamer Steutegart, and demanded to know their destination. They fired across the bow of the British steamer Mortlake, at a point twelve miles north of Damietta, 31 miles north west of Port Said, and sent officers on board to inspect the ships papers.

London, March 11—The correspondent of the Times at Paris, says A St. Petersburg despatch gives curious particulars of the turn taken by Russian official anti-Semitism, in the war preparations. It says that the Minister of the Interior, M. Plehve, claimed the privilege of partially revising the list of reservists called up. An enormous percentage of Jews were thereafter sent to the front, including most of the doctors of the Jewish persuasion in St. Petersburg. Out of one hundred and eighty medical men, who left at the beginning of the month, one hundred and ten were Jews. This measure was taken for two reasons, although it was against the wish of the Minister of War. One reason was that the Jewish savants are all supposed to be liberals, whose presence in Russia at critical times is considered to be undesirable. The other reason was the reprehensible influences brought to bear on behalf of certain non-Jewish practitioners, who were only too glad to get their Jewish rivals off the war.

The families of the Jewish reservists are objects of vexatious measures on the part of the authorities, who expel them from the large towns, and oblige them to take refuge in the ghettos reserved for the Jews. Jewish doctors sent to the East have been deprived fo part of their emoluments, and receive only nine hundred roubles for travelling expenses, whereas Christian doctors get twelve hundred and fifty.

Pressure is being brought to bear on those Jews whose presence is tolered outside the ghettos by subordinate officers and police agents, who claim "voluntary contributions" for the Red Cross and naval funds, and other institutions. The general opinion is that M. Plehve's power amounts to an urresponsible dictatorship, which is hardly of a nature to pacify public feeling.



GENERAL MAKAROFF

The able Russian General in charge of the Forces at Pt. Arthur

RUSSIANS FLEE TO EVADE SERVICE

Bribe Sentries to Allow Them to Cross Frontier

AGENTS ARRANGING EXODUS

Of 2065 Emigrants on One Steamer 1,800 are Russians

New York, March 12.—of the 2,065 steerage passengers brought here by the steamship Graf Weldersee today fully 1,800 are Russians, many of them, it is said, being refugees who fled to escape possible army service against Japan. An Imperial edict issued several weeks ago suspended the issuing of passports to any male between the ages 14 to 45, the prescribed period for army service, the result being, according to some of those on the Graf Waldersee, a large exodus from all villages within reach of the frontier. Alexis Kaplam, a drosky driver, with five companions, fled from the village of Vilna. "On a Monday morning some three weeks ago" said Kaplan, "the news went around that the Czar had ordered all who were amendable to military duty to report to the proper authorities in their district to be listed for draft. With five of my friends I left that night. We reached the frontier just before daylight, and there found a military post. I went forward, while my friends hid at a safe distance. When the soldier challenged me I found he was an old friend from my native village. He agreed for 12 roubles (6) apiece, which we paid him to turn his back while we made a dash across the line. He did as agreed, and we crossed the river. When we clambered out on the Prussian side the sentry fired off his gun and gave the alarm, but we were safe on Prussian soil."

KING'S BROTHER ON CONSCRIPTION

Duke of Connaught Gives his Views on Defence Army

SHOULD TRAIN ALL YOUTHS

Country Needs an Army of Young Men Taught to Handle Rifle

Dublin, March 12.—H. R. H. the Duke of Connaught, Inspector-General of the British forces, speaking at a lecture under the auspices of the Irish Military Society in Dublin, given by Major Seely, M.P., on "The Private Soldier in Modern War," said the question of a voluntary versus a conscript army was a vexed one, and few officers would be found to agree as to the nature of the panacea which would give them an efficient and a cheap army. They should have a voluntary army for foreign service, but the question was what the home army was to be. They wanted a home army principally for defensive purposes, and was it not a fact that Englishmen should render certain services on account of the benefits obtained from being Englishmen with a navy and army to defend them? They should make some return service to the State.

It remained for the House of Commons, which after all had the deciding of the question to say what system they considered best. He thought some sort of defensive army without very long service, but sufficiently trained and complete in all arms, was the best for home stations, and from it they would call for volunteers for foreign service men who might expect a pension at the end of their service. They required two distinct services—a foreign, composed of long service men of good physique, and fit to take the field at a moment's notice, and an army of younger men, well trained, especially in musketry, for the home defence. He thought it would come to something of that sort. If they could train all the youth of the country to military service it would be a great advantage.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

EGBERT CHAMBERLAIN, ... NEW YORK
Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet, for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body, eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. R. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 20th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

THE WAR SITUATION TO-DAY

The recent attack of the Japanese outside of Port Arthur by the Russians under Makaroff, shows conclusively that Russia has at least a good man at the wheel. Although they only succeeded in destroying one Japanese vessel, and that, at the cost of thirty men and one torpedo destroyer, the attack was an evidence of the general's bravery. Makaraff is keeping on the alert, and will guard against any surprises by night. This great torpepo specialist has inspired the Port Arthur Garrison with his own alertness, and if Russia had a few more as able men as he, her future might be brighter. The condition of affairs in Russian military circles is most unsettled, and until the Japanese plans emerge from the present mist of conjecture they are likely to remain so.

The Russian generals contemplate over-running Corea with an army which will be irresistible by its numbers. At present, time appears to be a matter of little consequence in the estimation of the Russian powers that be. They are so confident of their power to ultimately overwhelm their numerically insignificent enemy, that when news arrives of Japanese successes they sing Te Deums and give loud cheers in honour of the great victories they are going to win, and the dread vengeance they are going to inflict upon "the insolent foe." Even those who do not share Russia's confidence in the ultimate victory for the Tsar must realize that the collision of the Russian and Japanese armies on the banks of the Yalu is not likely to be followed by a series of unbroken successes for the now jubilant Japs. The "shark" has followed the "elephant" ashore.

Rear-Admiral G. W. Melville, of the United States navy, retired, who has made three Arctic voyages, considers the plan of the Russians to take their Baltic squadron to the Far East through the Arctic Ocean is impracticable from a naval point of view. He himself does not believe that it is absolutely impracticable, but says it would take the squadron two years to make the voyage, if it succeeded, which would equal Nordskjold's record.

The Japanese-Corean protocol was published at Seoul in an extra edition of the Gazette Thursday. The Corean Government will publicly announce thas the publication of the protocol nullifies the concessions granted to the Russians, such as non-alienation of coal mining at Kochyo Island and Rose Island, and the forestry concessions in the Ulleungdo, Tuken and Yalu valleys.

NEARLY 70,000 JAPS HAVE BEEN LANDED IN NORTH COREA.

The Terribe Power of the Japanese "Shimos" Powder

London, March 13.—A Chefoo correspondent of The Daily Mail says Japanese embarkation is proceeding at Chemulpo and points to the northward with marvelous rapidity.

The correspondent calculates that up to the present, 70,000 Japanese have been landed in Northern Korea.

As an example of the terrible power of the Japanese "Shimose" powder, a corespondent of The Standard at Tokio relates that a Russian sailor, who was hurt in the naval fight off Chemulpo, has been brought to Matuysuma, Japan; the manhas 160 wounds.

TURK SEEKS ALLY

Takes Advantage of Russia's Pressing Needs

BRITAIN'S PRESSING NEEDS

Passage of Dardanelles for a Free Hand in Balkans

Berlin, March 14.—The wily Turk has seized upon Russia's difficulties in the far east as the occasion for driving a hard bargain with the Czar. The Sultan wants a firm hand in the Balkans and an opportunity to crush the Macedonians and their Bulgarian allies, and when Russia applied for permission to send her Black Sea fleet through the Dardanelles the Porte replied offering to grant the desired permission on these conditions; That Russia break off or evade the fulfillment of her agreement with Austria in regard to the Balkans, give the Sultan full liberty to settle matters in his own way and assist him against Austria or any other powers that might object to his method of settling old scores with the Christian population of European Turkey.

REJECTS CONDITIONS.

Of course Russia could not accept these conditions, but is determined to get her Black Sea fleet into the fighting in the Orient. In rejecting the Sultan's conditions she renewed her application for permission to pass the Dardanelles, but the Sultan once more demanded that as a price of the concession he be allowed a free hand in the Balkans.

There is little likelihood of the Sultan yielding to Russia's request, as British diplomacy is active at Constantinople in urging on the Porte a strict observance of the Berlin treaty. France, so far as can be perceived here, has not seconded Russia in the matter. Such a step as permitting the Black Sea fleet to pass the Dardanelles would be regarded diplomatically as a breach of neutrality on the part of Turkey, though Great Britain's opposition to it, being aimed at the maintenance of the status quo is not so considered.

GERMANY'S FEARS.

Russia's diplomatic weight at Constantinople has been somewhat reduced by the occurrences in the far east. The Porte will give nothing without a heavy price. Germany expresses no opinion on the subject. The most that Germany will do in the presence fo a bargain between Russia and Turkey for the release of the Black Sea fleet would be to maintain silence, neither advising nor assisting either party.

The government here is looking ahead. It can conceive of a time when it will be to Germany's advantage to have a portion of the Russian navy locked up. Austria and Italy are not moving at Constantinople, where all the powers, therefore, except Russia and Great Britain are quiescent.

Russia would not use the Dardanelles now if she could, in the opinion of experts here, because her Black Sea fleet is not ready for a far eastern campaign, and if it were ready Russia would wait until her Baltic fleet was thoroughly equipped. It is believed that Russia could not hope for a decisive naval success without the Baltic, Black Sea and Mediterranean squadrons uniting and proceeding east together, as otherwise they could be destroyed piecemeal.

CHEER UP, IT WILL BE WORSE!

Apparently the czar has had an experience not unlike that of Napoleon III. Asked as to preparedness for war, Napoleon's Marshall informed him that everything was ready "down to the last gaiter button." Events proved that nothing was ready.

The czar is disappointed bitterly, not only at the existence of war, but that it should have come upon his realm along with the assurances of trusted officers that there would be no hostilities, but that if precipitated, a possibility so remote as hardly to be considered, the army and navy would be equipped and alert.

No wonder Russia is working with haste to make amends and reach a war footing. Meanwhile the general tone of the Russian press may be discerned in the counsel. "Cheer up, the worst is yet to come."

—A lady's muff was found on Aylmer street on Saturday morning, and handed over to the police.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.63 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, these, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.54. This being a general sample taken from the dump. The other two assays are $42.64 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore..

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 1,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 435 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

BOARD OF DIRECTORS

JOHN A THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIE
WILLIAM GARLICK, ARTHUR S. GARLICK, B F. BARNES.

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hinsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining expers claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been shown for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address.

WHO OR WHAT IS YOUR MASTER?

HUTCHENS C. BISHOP, Rector St. Philip's Church (P. E.), New York City.

No man can serve two masters.—St. Mat., vi., 24.

It is always impressive and helpful to have a statement intended as a rule of life uttered with authority and in language so simple and direct that it cannot be misunderstood.

Jesus Christ, whose words these are, was not only the "Lord of Life," but the Master of living. He spoke not only as one having authority, but out of an experience that had tested in His own life the rules He gave for guidance of others.

That He exemplified both in letter and spirit the principle expressed in the text is so clearly a matter of history that even His most persistent critics have not been able to gainsay. Nor should anyone fail to understand the force of the axiom:—"No man can serve two masters." It is a universal negative and asserts an impossible condition of service. It does not destroy the free exercise of the human will, but it places a limitation upon the functions of that will.

We are so constituted that, though one may boast of his independence in thought and action, nevertheless there is a mastery to which every one is ever rendering an obedient service. We must serve some master, but "no man can serve two masters." Nevertheless we are confronted with the fact that the great majority of men are endeavoring to do the very thing which is here pronounced impossible and proved to be so by all experience. Alas! how many have fallen victims to this vain endeavor; how many are still engaged in the hopeless task of a dual service!

The proposition is as true in the affairs of everyday life, in the questions affecting political, civic, ethical, commercial and social relations and the numerous situations in which we are called upon to assume an attitude of service, as in the realm of religion and morals. The tendency of the age is to be non-committal, to straddle, to be on the fence, to serve two masters, when, as a matter of fact, such an effort is a delusion and a snare, and in the end subverts the best interests of the individual and of the common weal. Compromise is always a sign of weakness. Conservatism is a sort of fetich of the day. In questions of honor and dishonor, of good report and evil report, of right and wrong, there is no middle ground upon which honest men can afford to stand. In such we are at the "parting of the ways," and we must follow one or the other.

Especially is this true in matters of religion. Here the line of separation is so clearly defined that it cannot honestly be escaped. The Great Teacher gives a concrete example:—"Ye cannot serve God and Mammon." God, as representing the very highest, because most perfect, mastery, and Mammon, as demanding the very lowest, because the most degrading, service—each is an imperious and exacting master, and no man can be loyal to both. Their wills are so different, their commands so opposite and their ends so antagonistic that the occasion must frequently rise when one or the other will have to be despised and disobeyed if the other be honored and served. Try as we may to elude the difficulty of the situation, we are forced to enlist in the service of the one or the other. Beyond a doubt Mammon rule—Mammon worship—is one of the distinctive features of the day, and few realize how deep is the impress upon life and character.

There is an expression about "every man" or "everything" having its price, and the fact that it calls forth a resentment that steadily grows less pronounced indicates how far we have gone in this direction. However, there is no necessary conflict between God and Mammon, between the acquisition of wealth and the highest duty of life, but there is a necessary conflict between the mastership of wealth and the mastership of God. When men are so dominated by the love of gain that it becomes an absorbing passion and the higher claims of duty are made secondary they should at least be honest with themselves and know in what service they are enlisted, and not be deluded by the thought that they can "hold to the one" and not "despise the other." Unworthy service assumes other forms. Society, fashion, pleasure may be substituted for "Mammon," and we have identically the same situation. It is not a question of inconsistency or incongruity. It is not "ye ought," but "ye cannot."

If, therefore, every man must serve *some master*, and "no man can serve two masters," and every man really does serve one master, ought not each one to deal honestly and fairly with himself, and as an intelligent and responsible being demand an answer to this very pertinent question, "Who or what is my master?"

At the Rothamstead, England, Experimental Farm, conducted so long by Lawes and Gilbert, a field is this year carrying its sixteenth successive crop of wheat.

In estimating the profit from a butter cow something is due the cow for the skim milk and butter milk furnished the pigs. A lot of pigs should always be kept where cream is sold or butter sent to market. The pigs provide a source for the disposal of refuse milk, and a portion of the profit should be credited to the cow.

Mr. J. A. Kinsella, at one time a dairy instructor for eastern Ontario, has been appointed to take charge of the dairy work for the Transvaal Government. Mr. Kinsella came from Brockville and had a practical training in dairy work. Two years ago he was appointed a dairy instructor for New Zealand and upon the resignation of Mr. Ruddick was made superintendent in New Zealand.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1 00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 700 feet in addition to other claims approximating a total acreage of 240 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $13 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.
Selling at 75c a Share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL
The Peterborough Brokerage Co., Local Agents.

Catarrh Cannot be Cured by Dosing

IT IS A LOCAL DISEASE AND IF CURED MUST BE LOCALLY TREATED.

Seven people out of ten suffer from catarrh. There is no lack of medicines, and if dosing would cure, very few cases of catarrh would be found.

You probably have it yourself. How much benefit have you obtained so far from medicine-taking? A little relief is all that you have derived. You have spent lots of money and yet the catarrh is growing worse all the time.

Has it ever occurred to you how desirable and how successful a treatment would be that you could breathe to where the disease existed. Perhaps you have thought about this form of cure but you have been unable to find a remedy that could be pleasantly and safely used.

Try Catarrhozone, it can be broken up by the air and carried in small drops to every part of the breathing organism. It touches the catarrh with healing, that is why it cures.

This healing, balsamic, vegetable substance is so volatile that the air greedily takes up from the inhaler, so antiseptic that it instantly destroys the microbes which produce disease of the breathing organs, and so soothing that it relieves congestion subdues inflammation, and stops mucous discharge.

Plainly Catarrhozone is an ideal remedy for diseases of the throat, lungs and nasal passages. If you have catarrh, bronchitis or asthma, all are equally curable by Catarrhozone. You have been told why this is so. These diseases are all modifications of an inflammatory condition of the lining membranes of the throat and nasal passages.

Now, bear in mind, you breathe Catarrhozone. Do you not think this is a rational treatment—a certain way of reaching the diseased surfaces which lie so far in the cavity of the body or in the head that they can be reached in no other way.

You cannot possibly fail to obtain quick cure from any of these maladies if you use Catarrhozone.

All dealers in medicine sell Catarrhozone. Trial, 25c., complete outfit, $1.00, which will last two months, and is guaranteed to cure permanently. Sent postpaid to any address by N. C. Polson & Co., Kingston, Ont, and Hartford, Conn., U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Hab for Ireland!

On Saturday evening next the Y.M.C.A. will celebrate an "Irish night." A programme will be furnished by Irishmen and as those "paple from the ould sod," are world-famed for their wit, it will, no doubt, be most interesting.

Arries Has Not Confessed

The report circulated around town yesterday, to the effect that Jesse Arries had confessed, is denied by his counsel, Mr. R. F. McWilliams. The latter is quite confident that an alibi can be proved.

Order of Hibernians

The members of the Ancient Order of Hibernians, Division No. 1, attended Holy Communion in St. Peter's cathedral at 8 o'clock Sunday morning. Mass was celebrated by His Lordship Bishop O'Connor. The members to the number of about 110, assembled in the Convent Hall, and under the direction of Mr. H. Gainey marched to the cathedral.

Exciting Runaway

What might have resulted in a very serious accident occurred at the C.P.R. station on Saturday afternoon. A horse attached to a cutter, containing two men and a young woman, suddenly took fright at a passing engine and dashed away. The occupants were thrown out and the lady received slight injuries. The horse was soon caught, and no great damage was done to the cutter. No blame can be attached to the railway employees.

—A chatelaine bag, picked up on Saturday, has been handed to the police.

The attendance at the
Peterboro' Business College
is larger this year than ever
WHY?
Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.
NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course.
WM. PRINGLE,
Principal.

Accident in Otonabee

Yesterday afternoon Mrs. Thos. Sisson, of Stewart's Settlement, Otonabee, met with a very painful accident. While walking on the ice near her home she suddenly fell, fracturing her leg at the ankle. Dr. Gray, of Peterborough, was sent for, and attended to the broken limb.

Academy of Music

In the list of companies recently incorporated, and announced in the Ontario Gazette, we notice; "Academy of Music, Peterborough, capital, $40,000, to erect and maintain an opera house at Peterborough." The directors report that the prospects of this company are of the brightest, and shares are being rapidly sold.

Church to be Repainted

Announcement was made in St. Paul's church on Sunday evening that the Committee of Management were seriously considering the remodeling of the edifice. It was pointed out in the manager's report to the congregation that it was now nineteen years since anything of this sort had been done, and that the church had become, to say the least, shabby. The outside woodwork was in need of painting, and there was much other work to be done. The committee were forming an estimate as to the probable cost of included improvements. Before anything is undertaken, however, the congregation will have an opportunity of giving expression to their opinions.

The Delineator for April

The April Delineator is an uncommonly interesting magazine, from the standpoint of both fashion and literary features. Almost as good as a trip around the world, educationally, promises to be the pictorial series Around the World in Eighty Pictures, the first installment of which appears in this number. Nordica in Holiday Time is the subject of an enjoyable paper by William Armstrong in the Prima Donna series. Landon Knight's Romance of a Pair of Bluebirds is a story that will appeal strongly to lovers of Nature, and to women Dr. Grace Peckham Murray's atricle on the care of the ears and nose will be of deepest interest. In Beauty for Ashes, Allan Sutherland tells of an interesting experiment that has been tried in several large cities of changing unbeautiful vacant lots into garden spots. The Influence of Frills, by Dolf Wylfarde and White Man, by Alice MacGowan are delightful short stories, finely illustrated, and there is a dramatic chapter of the Evolution of a Club Woman, by Agnes Surbridge. In addition there are entertaining stories and pastimes for little folks by Albert Bigelow Paine, Gabrielle E. Jackson, Lina Beard, and others, and for every phase of the household information of a practical character.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

Thursday will be St. Patrick's Day.

—Otonabee Lodge, No. 13, I.O.O.F., held its regular meeting last evening, and conferred several degrees. Several visiting members were present.

A namesake of one of the prophets imbibed yesterday morning, and about 11 o'clock he was escorted to the police station. He rested easily during the night and will go upstairs this morning.

—A meeting of the Y.W.C.A. was held on Saturday evening, but it was not decided what lot would be purchased for the site of the proposed new building.

—Yesterday afternoon two local toughs engaged in a fistic encounter at the corner of Hunter and George streets, but both disappeared before the arrival of the police.

—The annual meeting of St. John's Woman's Auxiliary will be held this afternoon in the Guild room at 3.30. A large attendance of members is requested.

—Yesterday Mr. Wm. Snowden, of the Snowden House, received a large basketful of fine white fish from Mr. Dickson Jewitt, of Cannington. These were the first catch of the season in Lake Simcoe.

A Fresh Consignment of
DOW'S ALE
now on draught
at the
PALACE RESTAURANT

—An express sleigh belonging to the Canadian Express Company was struck by the engine of the Port Hope express train on Friday evening last and completely demolished.

—A mass meeting for women was held in the Charlotte street church on Sunday afternoon. Mrs. (Dr.) Scott presided, and Miss Macdonald, National Secretary of the Y.W.C.A., who leaves shortly for Japan, delivered an interesting address.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Edith Henderson, of Toronto, is visiting friends in the city.

—Mr. Robert Fair spent Sunday last at the Homestead, in Millbrook.

—Miss Vina Moncrief left yesterday for Beaufort, after spending a few months with Mrs. R. H. Leary.

—Contractor James Bogue, of Peterborough, was in Lindsay on Friday last on business.

—Mr. Hugh O'Leary, K.C., of Lindsay, is in attendance at the sitting of the court today.

—Miss Wilmena Miller, who has been the guest of friends in Keene and in town for the past few weeks, returns to Toronto today to resume her studies.

—Miss G. Leahy, of Douro, who has been visiting relatives in town for a few weeks, returned to her home on Saturday last.

—At a brilliant drawing room given by Their Excellencies Lord and Lady Minto on Saturday, Miss Kerr, of Peterborough, was one of those presented.

—Mrs. T. G. Banton, who has spent three weeks visiting her parents, Mr. and Mrs. Jas. Sutherland, left for her home in Rochester, N.Y., yesterday morning.

—A despatch to the Toronto Sunday World, from Ottawa, says; "Mrs. C. B. McAllister and Miss Roy, of Peterborough, arrived on Thursday, and are staying at the Russell."

—Wm. Christie, of the Raven Lake Cement Co., is in town on business.

—Mr. F. Burnett, of Rice Lake, owner of the steamer Rainbow, was in town yesterday.

—Capt. Chas. Grylls, of Lakefield, is in town attending the Court of Assizes.

—Mr. and Mrs. Dick Simons are the guests of Dick's parents, Mr. and Mrs. Peter Simons, Rubidge street. They arrived home on Saturday evening after a successful tour through the States with the Emma Bunting Company.

—Mrs. John Dixon, of Maple Creek, N.W.T., who has been the guest of her brother-in-law, Mr. Albert E. Dixon, Stewart street, for the past week, left for Toronto yesterday on her return trip home. Mrs. Dixon has been in Ontario since New Year's, the guest of many friends.

—Mr. A. J. Sloan, of Winnipeg, Man., is visiting his brother, Mr. Geo. Sloan, of this city. Mr. Sloan has not been in Peterborough for about twelve years, and has since his departure from here been engaged as a contractor in the Prairie Province. He intends leaving for home this week.

—Today is Mr. Wm. Snowden's 71st birthday, and he will entertain a number of his friends. Mr. Snowden has been in Peterborough for a long time and during his stay here has won an enviable reputation as the keeper of an up to date hostelry. "He's good for another seventy years if the fishing and deer hunting keeps up," remarked a jocular friend.

—At the Snowden House; Geo. S. Matthews, Brantford; F. W. Johnson, Toronto; R. W. Logan, Montreal; Chas. R. Sparling, Toronto, J. Hamilton, Kincardine; Frank Stanley, Toronto; H. Daly, Napanee; J. Stewart, Toronto; F. Burtill, Montreal; A. Milne, Montreal; J. M. MacLeod, Toronto; C. Mitchell, Lakefield; J. Young, Craigvale; W. R. Scott, Toronto.

St. Patrick's Concert

A grand concert will be given in Bradburn's Opera House under auspices of the T. A. S., on Thursday evening, March 17. Harvey Gahan, the famous boy violinist, and Robert Wilson, humorist, supported by the best local talent, will take part.

LOCAL SPORTS

Concluded from page one.

The annual meeting of the Midland Football League will be held on Saturday afternoon next at 2 o'clock in the Y.M.C.A. Hall. Delegates will be present from all the surrounding teams who desire to enter the league, and final arrangements for the season's games will be made.

CURLING.

The following skips are expected to play this evening in the Innis medal series;

Clegg vs. Jeffries.
Blade vs. Rutherford.

THINGS GENERALLY

BY ST JON

A prominent business man appeared at the office of the family physician and communicated to him with great concern that his son, the joy and hope of the family, to all appearances was suffering from diphtheria.

The doctor shrugged his shoulders in a sympathetic way. "Very sorry to hear it. No mother's soul is safe when that disease comes sneaking around."

"But," continued the man, "the dear young lad has confessed that he caught the disease from the housemaid, whom he had kissed."

"Well, what in the world shall one say to that? Young people are very thoughtless," remarked the doctor, discreetly.

"But, don't you see, doctor—how—to be plain—between you and me—I have also kissed the girl (the horrid thing); perhaps, I, too, will be down with the disease."

"Yes, by thunder, that is the next thing to expect——"

"And I kiss my dear wife every morning and evening, so we risk having her——"

"Goodness, gracious!" exclaimed the doctor, bringing his fist down with emphasis, "then I, too, will have it." Tableau.

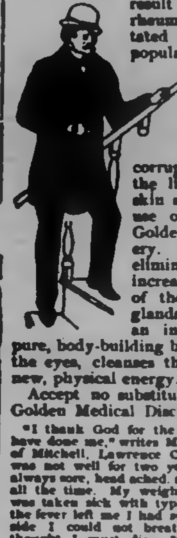
Standard remedy for Gleet, Gonorrhœa and Runnings IN 48 HOURS. Cures Kidney and Bladder Troubles.
MIDY

BAD BLOOD

Reveals itself in many ways. Sometimes the impurities in the blood mark and mar the skin with blotches, pimples, boils or other eruptions. Sometimes the result of bad blood is rheumatism or a debilitated condition which is popularly described as "feeling played out, hardly able to drag myself around." The impurities and poisons which corrupt the blood, clog the liver and cloud the skin are removed by the use of Doctor Pierce's Golden Medical Discovery. It does more than eliminate the poisons; it increases the activity of the blood-making glands so that there is an increased supply of pure, body-building blood. It brightens the eyes, cleanses the skin, and gives new, physical energy.



Accept no substitute for Dr. Pierce's Golden Medical Discovery.

"I thank God for the good your medicines have done me," writes Mr. James M. Sizemore, of Mitchell, Lawrence Co., Ind., Box 301. "I was not well for two years. My throat was always sore, head ached, and back ached nearly all the time. My weight was 155 pounds. I was taken sick with typhoid fever, and when the fever left me I had such a pain in my left side I could not breathe without pain. I thought I must die. My wife went to the drug store and procured a bottle of Dr. Pierce's Golden Medical Discovery and a vial of his 'Pleasant Pellets.' I discontinued the use of my doctor's medicine and began with the 'Golden Medical Discovery' and 'Pellets.' I at once began to feel better: the pain soon left my side and I could breathe with ease. In a week or so I felt so good I could not stay in the room. I began to walk about the streets; I felt better each morning. After a month's use of the medicine I was well. That was over a year ago. Now I weigh 184 pounds and feel better than ever in my life."

Dr. Pierce's Pleasant Pellets cure constipation.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amout of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

LEFT PT. ARTHUR TO UNITE TWO RUSSIAN FLEETS

Makaroff on a Dash Toward Vladivostock?--No. Russian Warships at Port Arthur

Special to The Times.

Tokio, March 15.—It is strongly believed here that the Russian fleet abandoned Port Arthur after the fourth attack was made upon it by the Japanese fleet, and is endeavoring to reach Vladivostock. Confirmation of this movement is not obtainable from any reliable source, but the recent scouting in the vicinity of Port Arthur has failed to reveal the presence of any Russian warships. It seems logical enough that the Russians should attempt a dash for Vladivostock, where it is possible to dock larger ships, effect a junction with their armored cruiser squadron, and secure a base for operations while procuring adequate land defence. The hopelessness of continuing at Port Arthur is manifest, while a dash for Vladivostock might succeed. Contrary to the opinion previously expressed, Vice-Admiral Togo is unwilling to run the risk of dividing his battleships, and continues to operate the six battleships together. If the Russians should make an attempt to reach Vladivostock, it is believed they will try a dash though the Korean straiths rather than enter the Japanese sea through the Sugu straits.

SUMMARY OF LATEST WAR NEWS

News from the Far East is very scarce but a late Russian Official statement shows that the outposts between Anju and the Yalu River, have engaged in a slight skirmish. A marked feature in the campaign, which becomes more noticeable day by day is that the Japanese are most reticent as regards their losses. They have generally made public the number killed and wounded but little or nothing is said concerning the danger done to their vessels. The battleship Fuji had to be docked for injuries reveived in the first engagement of Port Arthur; but nothing is known as to the extent of her injuries.

Several correspondents state that a small Japanese cruiser (protected) lies on a reef near Chemulpo, and that she was probably beached after the fight with the Varing. Now comes a report from Port Arthur, it is true, but too circumstantial to be discredited—of the towing into Sasebo on February 17th of the first-class Japanese cruiser Asama, minus smokestacks, bridge and masts, and with her decks ploughed by projectiles. Th withdrawal of the Fuji and the Asama from the Port Arthur blockade reduces Japan's strength by a sixth. Makaroff's policy is declared to be the sacrifice of the effective Russian ships in Port Arthur in an endeavor to so reduce the number of the Japanese warships that the Baltic fleet when it reaches the East will not be called on to fight a greatly superior enemy. The idea is an admirable one, but the progress made in working it out is not very encouraging. A few more bombardments like that of last Thursday will make Port Arthur untenable and the position of its garrison desperate. It would seem that for two or three weeks yet the centre of the stage will be occupied by Togo and Makar off, and that land operations on an extensive scale are not to be looked for before the beginning of April.

The Tokio correspondent of The Morning Times throws an interesting light upon Japan's financial intentions and says it is estimated that Japan will be able to maintain a war for eighteen months without borrowing abroad. The policy is to retain the gold in Japan and it is believed that it will not be necessary to spend abroad more than one-eighth of the cost of the war, this expenditure being chiefly on coal, cordite and steel. The fact that Port Arthur is completely blockaded permit great saving, becanse Japan will be able to charter vessels at peace rates.

OVER 300 RUSSIANS KILLED AT PT.ARTHUR

Japanese Challenge Vice-Admiral Makaroff to come out and Fight.

Special to The Times.

London, March 16.—A correspondent of the Daily Telegraph at Yin-Kow, says; The Japanese again attacked Port Arthur on March 12, as a challenge for Vice-Admiral Makaroff to come out and fight. During the heavy bombardment, the correspondent says, the Japanese were in a position safe from the guns of the fortress. The Russian casualties amounted to 300 killed and wounded. The correspondent says that this is authentic.

DENIES MAKAROFF BLOCKED HARBOR

Special to The Times.

St. Petersburg, March 15.—The report from New Chwang that four Russian steamers have been sunk the removal of the battleship Retvizan is authoritatively denied here.

INTERESTING INTERVIEW

MR. JOHN L. STEPHENS OF YOKOHAMA TALKS OF THE WAR

His Impressions of Japanese Naval and Military Forces—Relates Many Interesting Stories.

The Times had a most interesting interview yesterday afternoon with Mr. John L. Stephens, a personal friend of Captain Williamson, late master of the Dundee, Scotland, merchant steamer, Arara, and the latter was asked if he had any war news.

"Why," said he, after a glance at the recent files of the Times. "You've got a cheek asking us for war news when you know greatly more about it than we do. What we've got is old, I fear."

"However, by means of a little conversation, it turned out that Mr. Stephens had some interesting incidents to relate. The ship was sold by cable from the Japanese government to the Dundee owners, and when the Arara reached Nagasaki the skipper was informed of the fact and notified that she would be wanted soon. How soon he was quickly apprised on reaching Kobe, when a Japanese officer boarded and gave the captain, officer and crew just three hours to clear out of the vessel. It was the hottest three hours of packing ever put in by the Arara's crew and at least one of the ten commandments was all torn up during the process. Hardly had the last sailor lugged his dunnage down the plank before there was a rush aboard of Japanese transport service men, carpenters and other mechanics, and all hands fell to work like fury to run up bunks above and below decks, evidently for as many passengers as the vessel would carry. Rows of the extempore bunks, tier on tier, could be seen rising like Aladdin's palace in every available vacant space. Hammer and saw made merry work and the men worked as if they were in a rip-sawing and nail-driving contest. By the afternoon the Arara looked like a forty-second edition of the late Noah's ark; her steam was up, her gang planks out, but not a white man saw the

EMBARKATION OF JAPANESE

horse, foot and artillery, at the dead of night. They came trooping from tents and barracks, deployed into column of two abreast and tramped aboard till an hour before dawn, when lines were cast off, and, with masses of black smoke, like the very clouds of war, pouring from her funnel, she panted down the channel for the open sea, destined to —— but that is something that the most astute war correspondent in the Orient cannot answer; only guess.

It was estimated at the time that the Empress of India was at Yokohama that not fewer than eighty thousand troops had been landed from Japan on the shores of the Hermit Kingdom, but at what points no white man could tell. The impression was that most of the troops were landed at Fusan and Masampho, and sent up country by rail to Seoul and the north, probably to join the large detachments landed at Gensan (Broughton Bay), where it is believed by military experts a junction is to be made, either for a descent upon Vladivostock or the Yalu. But it is all pure guess work, said Capt. Williamson.

"It gives one rather an eerie feeling to discover in the morning that the fine, bright young fellow— lieutenant, captain or major or colonel, of this, that or the other regiment of the line, or artillery or engineers or signal corps, with whom one chatted pleasantly at the club the previous evening and with whom one made arrangements to play off that last round of tennis, or golf or billiards, was summoned at the witching hour of night, hurriedly donned his uniform, and, followed by his servant, stole down to the head of company or regiment, drawn up on the barrack square like a gathering of ghosts, gave the muffled words of command and, all together, to the quay and aboard. No band to stir the cockles of the heart with the lilting strains of "The Girl I Left Behind Me!" no warm clasps where the throbbing heart is in the hand itself and the throat is tight and dry in the farewells—it may be for years, it may be forever. No beaming eye of beauty and of love to inspire to high chivalry for la patrie; nothing but the gruff commands coming through the grey, nothing but the dull regularity of the tramp tramp, tramp like the sound of muffled drums playing funeral marches to the grave. "War is hell!" Even such preliminaries as the India's passengers saw at the Japanese ports confirmed the grim truth of General Tecumseh Sherman's laconic dictum."

EVERYBODY READS THE TIMES.

SAYS JAPAN FEARS DEFEAT

CORRESPONDENT ADMITS RUSSIAN VICTORY UNLESS BALKAN WAR STARTS

Turkey is Scared by Bulgaria but Czar Thinks Conflict will Not Come

Kieff, Russia, March 16—Local papers make a feature of an interview with a Japanese correspondent of the Nichi-Nichi, who is visiting the Balkans. He is quoted as saying the Japanese fully recognize that they have no hope of defeating Russia unless her intention is diverted by possible complications in the Balkans. The object of his visit is to ascertain the chances of such trouble breaking out.

St. Petersburg, March 16—Inquiry concerning the outlook in the Balkans develops that the prevailing opinion in government as well as diplomatic circles is against an outbreak of war in the spring, although the danger is not considered passed. A perfect understanding exists between Russia and Austria, and besides the Russian authorities appear to be completely satisfied regarding the attitude of Bulgaria.

What assurance the authorities have concerning Bulgaria are not known, but they do not tally with information from other sources, which represents Bulgaria as mobilising, having plans perfected for an invasion of Turkey and as being confident that she can defeat the Turks single-handed.

Evidently the porte is alarmed at the outlook, as an American representative of an ordnance firm, who came out here to act as broker in the sale of South American warships to Russia, has been requested to go to Constantinople immediately, the sultan desiring to purchase a large supply of guns.

It is a mistake to imagine that Russia is so engrossed with affairs in the Far East as to be unable to give attention to the Balkans. She has carefully refrained from moving troops from the vicinity of the Roumanian frontier and will be prepared if necessary to assume her share in the event of war.

RATS ATE THE SHAMROCKS

Annual Supply to New York Gone When Boat Arrived

New York Sun; St. Patrick's day is near and the annual hustle among the faithful sons of the Ould Sod for real shamrocks has been on for a fortnight. There is never a shortage of shamrocks in Ireland. The trouble has always been to get the Shamrocks here.

In advance of every St. Patrick's Day William Seguine and William Lee the two marine sharps at Quarantine, both of whom are Americanized Irishmen, begin to receive requests to supply their friends with shamrocks. Seguine and Lee know all the officers of the big liners and induce them to bring over the shamrocks. They arranged this year with the purser of the White Star liner Celtic to bring their annual supply. The Celtic's purser made goood his promise and on the return trip he had aboard a good sized box filled with Ireland's emblematic leaves growing in the sod.

The purser stored this box carefully away in the mail room of the big liner, and on Friday, when the ship arrived, Seguine and Lee clambered aboard at Quarantine.

"Did you bring the Shamrocks?" both men asked in chorus.

"Sure," said the purser, "and I'll go and get them for you."

The paper box was found just where it had been placed, but there was a hole in one end. The purser summoned the marine sharps and the box was opened. There was not a shamrock in it. The sod was there, but that was all. The hole in the box showed clearly enough that a rat had devoured the shamrocks.

"It must have been an Irish rat we shipped at Queenstown," said the purser.

The two marine sharps were forlorn. They knew they could explain to all their friends but one. They knew that Billy Carrol, a Park Row Hibernian, wouldn't believe a word about the Irish rat. Before telling Carroll of their loss they concluded to make one more attempt to get hold of some shamrocks. Their chance came yesterday when the Umbria came into port. An officer of the Cunarder had a box of shamrocks, and he parted with them. The marine sharps lost no time in presenting the entire box to Carroll. Then they told him how the first consignment had been destroyed.

"Sure, the rat wasn't Irish at all, at all," said Carroll. "He was wan o'thim Dundearathe He took the shamrocks for watercress as the Dutchman did in the Irishman's saloon."

MAY LOSE OUR CHINESE

The Happy Prediction of an American Official

London, March 16—Mr. Healy, United States Commissioner of Immigration in British Columbia, interviewed by a representative of The Manchester Guardian on the anti-Chinese policy of Canada, said there were many local Chinamen of prominence who predict that now the new law is in force the Chinamen in Canada will eventually disappear almost entirely, as in spite of the meagre policing of the border, they will eventually find their way to the States, and the $500 a head will prevent more coming into Canada.

KEEP FRENCH OUT

Brazil Thinks U. S. Should Enforce Monroe Doctrine

Washington, March 16—Regarding the recent reports from Paris that a syndicate had been organized there and had purchased four steamships for the purpose of carrying a military expedition to the territory between the Oyapoc and Araguary rivers, it is understood that the Brazilian government will resent any such action as the sending of an expedition to what is claimed as Brazilian territory. It was this territory which was awarded to Brazil in December, 1900, by the Swiss government which acted as the arbitrator in the litigation over the territory, and denied the French claim to it. It is the belief of the Brazilian government that any aggression on this territory by France would constitute an infringement of the Monroe doctrine, which not only Brazil but the United States should oppose.

BRITISH SETTLERS FOR THE WEST

Mr. C. F. Kingsmill of Liverpool Speaks on Immigration

ARE COMING IN THOUSANDS

Tide of Settlers Being Diverted From United States to Canada

Montreal, March 16—There are two topics engaging the attention of the people of Great Britain at the present time. One is naturally the war, the other is the tide of emigration to Canada that has set in during the past year or two and which seems to have every likelihood of reaching its full flood tide this coming season. Montreal has had a number of visitors from the Old Country during the past few weeks and those that were inclined to talk (for your average Englishman has rather a dislike to being interviewed), had something to say of these two chief topics of interest, for Canadians although interested in the fortunes of Japan in the present war, are even more interested in the question of immigration. The views of Mr. Charles F. Kingsmill, of Liverpool, who is connected with the shipping interests of that port, on the subject of immigration, are to the point. Mr. Kingsmill in conversation with a reporter at his hotel yesterday, said that there was a perceptible change taking place. For some years past the intending emigrants who came week after week to Liverpool, a very large percentage were bound for the United States. Now the tide was turning and the past year has seen vessels bound for Canada, carrying hundreds of British subjects for a British country. "That is as it should be," added Mr. Kingsmill. "The United States has too long taken the cream of our people. Now that they are going to Canada there is a feeling that they are still helping along the cause of Empire, and England is not losing them as she did when they took up their residence in the United States, and practically lost their individuality in that miscellaneous assortment of tribes and races that goes to make up the population of that country."

Mr. Kingsmill said that when he left Liverpool, over two thousand settlers were booked to leave that port within two weeks from that date. They were all British subjects and all bound for Canada. The bulk of these people were unmarried men in the prime of life, who were many of them supplied with a certain amount of capital sufficient to give them a start in the new land to which they were coming.

Mr. Kingsmill, when asked as to the reasons in his opinion for the influx of settlers into Canada from the British Isles said it was due in a large degree to the general awakening among the masses of the British people that Canada offered exceptional opportunities to the man who was willing to work. He also thought that the tide of emigration from the British Isles was due to the general depression in working circles. The causes of emigration were seldom on the surface, personal and individual reasons tended to induce a man to leave his native country and seek to carve out a fortune in a new country. 'One thing is certain, however, said Mr. Kingsmill in conclusion. "You are going to get the people and we in Liverpool anticipate that many thousands of homeseekers will swing down the Mersey into the open sea during the coming summer."

PASTOR'S WIFE ELOPES

Mrs. Addie Downs Leaves Husband and Children

Winsted, Wash., March 16—Mrs. Addie Downs, wife of Rev. Thos. Downs, former pastor of the Methodist church, Racine, Wis., has eloped with Carl S. Alvord, a blacksmith residing at Winlock, Wash. She met him at a cantata, both taking part in the performance, and a week after they are said to have eloped. She deserted a husband and five children and he deserted a young wife. They were arrested at Portland, Ore., but were released by the police, and from there went to San Francisco. During the residence of Rev. Thomas Downs and wife in Racine they were prominent in church work and also did a great deal of work in charitable institutions.

RUSSIANS ARE VERY EXCITED

Rejoicing in St. Petersburg Over Alleged Victory

COUNTRY MUCH EXCITED

Vast Sums of Money Being Subscribed by the Nobility

St. Petersburg, March 16— Everywhere throughout this city are signs of rejoicing How long this mood will last, however, depends on what news arrives from the front. The public mind is extremely sensitive. It is balanced between hope and despair, so as to be effected by the slightest breath of news from the Far East. The optimism of the people today is due to General Kuropatkin's departure to assume the chief command in the Far East, and also to the reports of Admiral Makaroff's energy at Port Arthur. The Admiral is praised both in government circles and in the street. The Russians feel that a real force has at last appeared on the Russian side and that the Japanese must look to their laurels. Von Plehve, the minister of the interior, is greatly disturbed over the action of the zemstvos (provincial councils) and the nobility all over the Empire. These bodies are organizing charities, independently of the Government, and the minister fears that what is now a charitable movement may in time become political, and obtain a hold on the people dangerous to the autocracy. Nevertheless the sub-Czar, as Von Plehve is now commonly termed, feels helpless in the matter.

In nearly every province the zemstvos and the nobility are subscribing hundreds of thousands of roubles and Von Plehve can discern no way of stopping the movement without dealing the army and the families of the soldiers a calamitous blow and running a great risk of national repudiation.

Meanwhile the nobility and the councils have appointed a committee to effect a central organization which will look after the welfare of the soldiers in the field and their wives and children at home.

TURF.

A meeting of the Turf Club was held yesterday afternoon but no important business was transacted. Another meeting will be called at an early date, when dates for the summer meet will be fixed. At the next meeting it is also expected that a circuit will be formed, including Peterborough, Belleville, Trenton, Napanee, Picton and Kingston.

FRANCE FIXES COAST FORTS

Puts Harbors in State of Readiness in Event of War

Paris, March 16—By order of Minister of War Andre, active work has begun with the view of placing French coast defences in a state of readiness. A hundred coast artillery men have arrived at Marseilles and are perfecting the harbor batteries, a force of naval mechanics is working on the army approaches and the trials of various kinds of heavy ordnance are progressing actively at Marseilles and elsewhere.

These measures are not considered significant except as an indication of the determination of the officials to have the coast defences in a state of preparedness.

FUND FROM AMERICAN NAVY

Japanese Sailors on Yankee Warships Raise Money to Aid Mikado

Pensacola, Fla., March 16—Japanese sailors on the ships of the United States navy yesterday afternoon contributed nearly $1,000 to be expended in the purchase of bonds issued by the Japanese government to provide a war fund. Three stewards on the cruiser Montgomery raised $300.

St. Petersburg, March 16—The employes of the Russian Westinghouse Company have donated 1 per cent. of their wages for war purposes, amounting to $300 monthly. The company has given $5,000 and will duplicate the monthly offerings of its employes. Religious services were held in the factory for the success of the Russian arms, after which Director Smith addressed the employes, warning them not to believe the reports of American hostility to Russia.

CHANGE IN WEIGHT OF BREAD

Local Bakers will in Future Sell 1 1-2 and 3 Pound Loaves—Some Reasons Given

The Peterborough bakers will in future sell 1 1-2 and 3 pound loaves instead of 2 and 4 pound loaves as formerly. Different reasons are given for this change, one being that Toronto bakers have been sending bread to town, the loaves being 1 1-2 and 3 pounds in weight. These sell for 5 and 10 cents respectively, while the Peterborough bakers have been selling their bread at 6 cents for a 2 pound loaf and 12 cents for one of 4 pounds. Then again the price of flour has increased. According to the present town bylaw the loaves must be of 2 and 4 pounds, so that since introducing the above change the bakers have had to label their bread. The Council will be asked to amend the bylaw to read "loaves of 1 1-2 and 3 pounds."

SISTER ST. JOHN DEAD

Died at Lindsay Yesterday Morning--Was Formerly Miss Annie Lynch

Very sad news was that received in town yesterday morning, announcing the death, in Lindsay, of Sister St. John, formerly Miss Annie Lynch. It came as a great shock to the many in Peterborough who knew her, for the illness to which she succumbed, an acute attack of appendicitis, had only been of a few days' duration, and that she was indisposed had not become generally known here. The late Sister St. John was associated with St. Joseph's Convent, Lindsay, and in her death there has been removed one whose life object was that of Christian service. Her's was a beautiful character, and the news of her death was received by friends this morning with profound regret. She was about thirty-nine years of age, and was a daughter of the late John Lynch. The body will arrive from Lindsay by the noon train today, and the funeral will take place tomorrow morning from Mount St. Joseph.

OUR WAR DESPATCHES

War News Recieved Via the New Pacific Cable

All of the war news collected by the great European news agencies from Japanese, Corean and Chinese territory, will, commencing today, be transmitted to London via the Pacific Cable and the United States and will be delivered en route to the newspapers of this continent, including The Times. Hitherto this has been transmitted from the Far East via India, and has been repeated from London to New York. Under these new arrangements first publications of this news will be made in America.

EVERYBODY READS THE TIMES.

LOCAL SPORTS

BUSY TIME AT THE RINK LAST NIGHT

HOCKEY.

Stratford was not anxious to have Peterborough substituted for the Marlboros, and baulked at the suggestion before it got any further.—Telegram.

Secretary-Treasurer R. M. Glover, of the Peterborough Hockey Club writes to The Star today to the effect that the Peterborough Hockey Club would like to arrange a game with the champion Marlboros in Toronto next Saturday night.

The Peterboroughs have decisively beaten both team sent to Peterborough by Marlboros and St. Georges, and are anxious to find out how good they really are on strange ice against the champion team of the Association.

Peterborough asked Strattord for home-and-home games, but the intermediate champions are going out of training right away after a long, hard season, and were unable to grant the request.—Toronto Star.

The Toronto Star writing on the Marlboro-Stratford game Saturday night said, "Peterborough beat the same Marlboro team with one exception by 20—4."

The Bandsmen and the Micrometers played the third game on the Brock street rink last night, and both teams played fairly good hockey. The score was 7 to 6 in favor of the Micrometers, and the personnel of the teams was as follows;

Bandsmen.		Micrometer Sports.
	Goal.	
W. Hodgson		R. Holt
	Point.	
P. Blade		T. Henderson
	Cover-point.	
F. Miller		J. Anglesyo
	Right wing.	
P. Doughty		J. Milligan
	Rover.	
D. Smith		G. Morris
	Centre.	
A. Seward		E. Hilliard
	Left wing.	
H. Gordon		C. Delaney.
	Referee.	
	Gordon Lee.	

The Junior Bandsmen hereby challenge the Micrometer Sports to a game on Saturday evening next. In case of the challenge being accepted the Band will be in attendance at the match.

The last hockey match at the rink last night proved to be the feature of the evening, when Jack Carter's "Terrible Seven," captained by Dave Belland, met their Waterloo at the hands of Jim McCurdy's "Pets." After playing two hours of the fastest kind of hockey the score stood 4 to 3 in favor of McCurdy's "Pets." Neither team had anything to boast about, but undoubtedly the best team won. When the game was over the sound of hurrahs for McCurdy's "Pets" was heard from all sides. Both teams were from the Cordage Works.

The T.A.S. hockey team played at Lindsay last night, the game resulting in a tie, 11—11.

Fenelon Falls, March 14.—A game of hockey was played here to-night between the T.A.S. team, of Peterborough, champions of the Trent Valley League for the last two seasons, and the old reliable team of Fenelon Falls the held the same championship the previous two seasons, and resulted in a Waterloo for the T.A.S. the score being at half-time 9 to 1, and the final score 29 to 2 in favor of Fenelon Falls. The line-up was as follows;

Fenelon Falls—Goal, Gould; point, Corbeau; cover-point, Burgess; forwards, Beteau, Boyce, Ingram, Deyman.

Peterborough—Goal, Derocher; point McCoy; cover-point, Meagher; forwards, Quinne, Parnell, Lynch, Callaghan.

Umpires, Daniels, Jones; timekeepers, Devine, Junkin; referee, Dr. Aldous.—Mail and Empire.

BASEBALL.

The Young Quaker Baseball Club will organize for the coming season on Friday evening, March 18th sharp in the Y.M.C.A. All members are requested to be present.

TUG-OF-WAR.

The Wm. Hamilton tug-of-war team have decided to accept the challenge of the Quaker team on condition that the same rules which governed the other contests, be used, and also that Mr. W. Lewis be the referee.

HOCKEY.

The Canadian General Electric Company's moulders defeated the Lock Works septette last evening, by a score of 4 to 1.

CURLING.

The following games were played at the Charlotte street rink last evening in the Innis Medal series;

Giroux, sk...12	Whiten, sk...7
Brown, sk...18	Thompson, sk...9
Edwards, sk...13	Kerr, sk...8

FOOTBALL.

A meeting of the Y.M.C.A. football team was held in the Association parlor last evening, for the purpose of re-organizing for the coming season. M. A. Noble was appointed as a delegate to the meeting of the Midland League. The meeting was not largely attended, but another will be held on Friday, March 25th, and all interested are asked to be present. Officers will then be elected, and the practice grounds, etc., arranged for.

A BIRTHDAY PARTY

Miss Alberta Gooding Entertains Her Young Friends to a Sleighride and Luncheon

Last evening Miss Alberta Gooding treated about forty of her young friends to a sleigh-ride and afterwards entertained them at luncheon at Long's Palm Parlors. Yesterday was Miss Gooding's birthday, and she certainly must have thoroughly enjoyed the evening, if seeing her many little friends so happy could make her enjoy it. Her aunt, Mrs. J. R. Stratton, was present, and assisted in making the little ones happy.

AT THE COURT OF ASSIZES

One Case Disposed of—Italian will be Sentenced Today

As was stated in yesterday's Times, the Italian Panteleone de' Paola, was found guilty at the Court of Assizes of stabbing his brother, Guiseppe. Sentence will be passed today.

The only case brought up yesterday was as follows;

Edward McPherson, of Bancroft, is the paintiff, and F. W. Wilkins, Dominion Land Surveyor, of Norwood is the defendant in a case in which former claims for wages, and services of a team and wagon hired to defendant, and for transportation expenses in a return trip from Saskatoon to Norwood, the sum of $391, and for damages and breach of a contract entered into in April, 1903, the sum of $300, together with costs of the action. George E. Thrasher, of Stirling, for plaintiff; G. J. Sherry, Norwood, for defendant.

The plaintiff was awarded $79.00 with $50.00 costs, without set-off.

BAND 5; FIREMEN 5

The Musicians and Fire Fighters Played—A Great Game

"Say, you'd orter have seen it," said the small boy as he walked home from the Band and Firemen's contest last night. "Ye bet yer papers ye'd orter," said his companion, and we join in saying "ye'd orter had." It was a brilliant display of fireworks—stars. There'll be more sore-boned firemen in the city today than was ever seen before, and the bandsmen will have to use a few bottles of soothing syrup, or something soothing. Several of the firemen wore their Sunday clothes, and one Crowe had a dress suit on, with an immense table cloth on his bosom to save his watch chain from getting broken. But he very nearly had more than his watch chain shattered, several times. 'Nuff said; the boys did well, and one fellow proudly remarked, "Well, I couldn't stand on my skates last winter, but I can tonight."

The line up was as follows;

Band.		Firemen.
	Goal.	
Cronk		Metheral
	Point.	
Mein		Moore
	Cover point.	
Grange		Evans
	Rover.	
Crowe		Butcher
	Centre.	
Irwin		Mitchell
	Left wing.	
Halpeny		Ringer
	Right wing.	
Wand		Tremaine
	Referee.	
	Harry Rush.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, [illegible] Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

ARE ANIMALS IMMORTAL?

Speculation concerning questions which are in their nature insolvable is sometimes interesting, even though it is not directly probable. Such speculation is the more attractive because anyone may propose a theory with the certainty that, though it may not be accepted, it cannot be disproved.

A contemporary writer has recently published a book on "The Immortality of Animals," in which he maintains the affirmative of the proposition. He founds his belief upon both religious and philosophical bases. That is, he believes that God extends the same care over all animals and that the human animal is not entitled to expect a monopoly of immortality. He points out that most of the arguments of philosophy in favor of the immortality of man apply equally to the permanency of the immortal principle in other living beings. His motive in putting forth the treatise is to promote kindness to animals and prevent cruelty to them. We are morally bound, he maintains, to respect the feelings and the rights of animals as creatures of the same Creator, even as we do those of our fellow men.

This, of course, is the humane view of the matter which all right-thinking people will put into practice, even if they do not accept the immortality theory. With the Buddhists it has always been a religious precept. Belief in reincarnation naturally carries with it the obligation of consideration for animals, since any animal may contain a human soul struggling through its prescribed stages of experience preliminary to nirvana.

Among Christians the obligations of humanity to animals are ethical, rather than religious, but it has always been recognized that the merciful man is merciful to his beast. The question of the immortality of animals never has been seriously considered nor authoritatively passed upon by the Christian church. The negative has been assumed except by those who, like our author, have speculated upon the matter as an ethical proposition.

There is, however, some reason, even from an evidential standpoint, to hold that animals may be immortal if we hold that men are immortal. The investigations of the Society for Psychical Research have resulted in bringing to light hundreds of so-called "ghost stories," and in a very large proportion of these narratives animals as well as men figure. Ghastly horsemen bestride shadowy steeds, spectral horsemen are seen following misty packs of hounds, black cats haunt houses where dark deeds have been done. If we assume that the human "ghosts" are veridical, we can hardly avoid the conclusion that the animal "spooks" are likewise the shades of departed dumb creatures who have spiritual as well as material bodies.

The trouble with the "ghost" theory is that it proves too much. That is, it seems to show that not only animals but inanimate things have souls. Thus we have not only the ghosts of horses but of carriages, the specters of guns as well as of dogs, to say nothing of ghostly clothing and garments of all kinds, since the specter rarely if ever, appears naked. So that if we accept the "ghost" evidence we must conclude that everything in the material world has its eidolon in the land of shadows —an hypothesis maintained by many mystics, but not generally accepted.

At any rate, the argument for the immortality of animals is by no means a weak one. It appeals to sentiment as well as to reason and as its effect is favorable to kind treatment of the brute creation, we may well promulgate it whenever possible.

ENGLAND, RUSSIA AND FRANCE

King Edward, who is really one of the most adroit statesmen in Europe, has given another illustration of his famous diplomatic tact in the personal letter which he wrote recently to the Czar Nicholas and dispatched by the hand of Count Benckendorff, the Russian ambassador in London. This letter however, is more important for what it shows than for what it said.

All King Edward had to say was that he deplored the popular feeling, including the attitude of the press, in England, against Russia; that the Anglo-Japanese treaty had no secret clauses, and that Great Britain would observe the strictest neutrality between Russia and Japan in the present war unless compelled to take part in it by the entrance of a third power. What makes the letter significant is the effect it produced, as it is said to have relieved a great amount of tension in St. Petersburg and to have sweetened the Czar's feelings toward, not only England, but the United States.

This much is clear, therefore, that the czar does not expect the peace to be broken by France. If she had known that France would become his active ally without England having first joined Japan, King Edward's letter would have conveyed to him no assurance of England's continued neutrality. It was only because he knew that France would not move first that he found comfort in the promise that England would not move first. The plain inference is that the Franco-Russian alliance, if it exists at all, is a defensive alliance against England only.

The danger of England and France becoming embroiled in the eastern war irrespective of treaties and alliances is discussed in an article in the North American Review for March on "England and the War," by Sydney Brooks. This writer raises the question whether England would stand by and see Japan utterly crushed, even by Russia alone, and whether France would stand by and see Russia utterly humiliated, even by Japan alone. He thinks the complete triumph of either side would inevitably bring England and France into the field. This is the fear which King Edward's letter seems to have allayed.

In view of these speculations it is interesting to observe the present attitude of the French people toward the Franco-Russian alliance, and La Presse of Paris has attempted to sound the members of the French parliament regarding it by means of a circular letter of inquiry. It reports that of 335 members of the chamber of deputies only sixty-three are not in favor of the alliance, and only eleven of these oppose it, and that the responses of the senators are of the same character.

Such an expression of opinion as this, however, is no proof that the Franco-Russian alliance is anything more than an international sentiment and the answer to Mr. Brooks' pertinent and thoughtful enquiries is that England would probably not permit Japan to be crushed, but that France would not dare to intervene to prevent any humiliation of Russia that Japan will be able to conflict. France will never do anything that will bring England down on her.

THINGS GENERALLY

BY [illegible] JONES

* * *

Jesse Arries, the youth arrested the other day on the charge of assaulting two women, recently, is another instance of a young man becoming degraded through evil companionship. A bright boy in his youth, he associated with bad playmates, and gradually became reckless. When a lad in his teens he stole the sum of seventeen dollars from the Y.M.C.A. buildings here and skipped to Buffalo. On his return, some time after, he was handed over to the police, and was sent to the reformatory at Penetanguishene. Since his return to Peterborough he has led a roving life, but kept within the bounds of the law, up to the present.

* * *

A young Toronto doctor has within the last few days learned a lesson which should be invaluable to him in his future practice. Having accompanied his betrothed to a theatre, while the house was in semi-darkness she suddenly complained of feeling faint. The doctor took something out of his pocket and whispered to her to keep the "tabloid" in her mouth, but not to swallow it. She did as she was told, and soon felt all right again. The tablet, however, showed no signs of dissolving, and in the end, being curious to discover what the tasteless, indissoluble substance that had proved so efficacious, she slipped the undiminished substance into her glove for future inspection. When she got home she took it out of her glove and examined it. It was a bone glove button.

Miss Nellie Balsalous Gives Interesting Interview

Tells How She Was Cured of Kidney Disease After Doctors Failed—Ferrozone Alone Responsible For Her Cure—It Cured Permanently.

Miss Nellie M. Balsalous is well known in her native city of Wilmington, where every doctor of reputation tried to cure her. But they didn't succeed. This proves conclusively that Ferrozone must certainly be an absolute cure for kidney trouble.

"Six months ago I noticed lameness and dragging pains across the small of my back," writes Miss Barsalous, "I felt weary and completely worn out. It wasn't work that made me so tired, nothing but defective kidneys. I took the doctors' treatment, and used dozens of articles I read of for the kidneys. But in spite of this I kept getting worse. Then I used Ferrozone. It was three weeks before I was perfectly satisfied it was helping me, but after that I improved steadily and got well. I know of no better remedy than Ferrozone only and saved me from Bright's Disease and saved me from Bright's Disease."

Next to consumption, kidney disease is the most fatal. Many a life has been lost simply because the unfortunate victim of deranged kidneys wasn't aware of his perilous condition in time.

Here is a simple test. Put some urine in a glass and let it stand for twenty-four hours. If it shows germs floating about, looks milky or cloudy, if it contains any sediment, your kidneys are diseased. Don't risk your life with doubtful remedies, use Ferrozone, which doctors admit is the quickest and most certain cure. Ferrozone contains in scientific combination the most valuable agents known for the kidneys. This explains its marvelous cures and universal success. Ferrozone is guaranteed and sold at 50c per box, or six boxes for $2.50, by all druggists. By mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

Department of Railways and Canals, Canada.

WELLAND CANAL.

Notice to Contractors.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Electrical Apparatus," will be received at this office up to 16 o'clock, on Monday, the 28th March, 1904, for the furnishing and erection of Arc, Lamps, Regulators, Switchboards, and other apparatus, appliances and materials required for the Welland Canal.

Plans and specifications can be seen on and after Monday, the 14th March, at the office of the Superintendent Engineer of the Welland Canal, St. Catharines, Ont., at the office of Roderic J. Parke, Esq., Consulting Electrical Engineer, 52-53 Janes Building, Toronto, and at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa. Forms of tender can be obtained at the places named.

The Department does not bind itself to accept the lowest or any tender.

By order,
L. K. JONES,
Secretary.

Department of Railways and Canals, Ottawa, 12th March, 1904.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 310 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

THE

Heintzman & Co. Piano

possesses that elegance which art alone gives. This instrument is one of the most beautiful Pianos in existence at the present time. It is the result of half a century's study and research and is a fitting illustration of the remarkable advancement of musical science and mechanical skill. The action is perfect and the tone quality is pure and clear, having the resonance and power which enables the player to produce the finest harmony. As an accompaniment to the voice it is unsurpassed. Famous singers who have used it on their tours praise it without stint.

WHY RUSSIA CANNOT OVERWHELM JAPANESE TROOPS IN COREA

Estimate of the Carrying Capacity of the Trans-Siberian Railroad--What is Needed in the Way of Supply Trains

Special to The Times.

London March 15—The Japanese fleet having cleared the sea for the transport of the Japanese army, and that army having landed an immense force in Corea, the problem of Japan's success on land depends on the answer to the questions;—Can Russia move her army overland to the Far East, and can she keep it supplied when it has been concentrated on the Far Eastern frontier?

The Russian force now in the Far East is known fairly accurately. It mustered just before the war was declared 150,000 men and 266 guns, but it has to accomplish the following tasks;—

1. To guard the railway for the whole distance inside the Chinese frontier, 1,200 miles.

2. To garrison the fortresses of Port Arthur and Vladivostock, and the works on the Liaotong Peninsula, which must be kept strongly manned in view of the activity of the Japanese fleet.

3. To provide the field army now being massed upon the Yalu. Reinforcements have been sent to the extent of approximately 50,000 men. That would give Russia available field force of under 120,000

TEN TRAINS A DAY.

Unless this army can be further and heavily reinforced, it has little chance of success against the Japanese, whose field army alone numbers 262,000 men, so that the Japanese could without difficulty place forces equal to the Russian army on the Yalu on either side of that army, and attack it simultaneously from Corea and Newchwang.

Everything then depends on the reinforcements which can be sent from Russia in Europe. According to Russian statements, troops can be forwarded over the Siberian railway at the rate of 4,000 men per day or 120,000 per month, the journey being accomplished in about a fortnight.

This, however, is an optimistic calculation, because it takes no account of the supplies and stores which must be forwarded day after day, to keep the army already in the Far East in fighting trim.

The movement of a British division requires thirty-eight trains of twenty-five carriages, or, taking an average of all arms, 300 men with guns, stores, and horses, can be moved in each train. If we allow 400 men for each Russian train—as the Russian army takes the field with le as baggage and encumbrances— the movement of 4,000 men would require ten trains a day.

THE SIBERIAN RAILWAY.

There is some dispute as to the capacity of the Siberian railway, but the usual estimate of fourteen trains a day might be near the truth in the summer, and when there are no hindrances to traffic. If, then 4,000 men were daily proceeding east, that would leave only four trains for the work of carrying coal for the ships to the further end of the line, keeping the locomotives supplied, and maintaining the stores and supplies of a force which was slowly rising day by day from 150,000 to 250,000 men.

For this four trains would be utterly inadequate. It is doubtful if more than one or two troop trains daily, if so many, could be intercalated between the supply and coal trains going east. Much depends, of course, on the amount of supplies collected by the Russians on the spot before the war, but in view of the discovery made at Port Arthur a month before hostilities began that the property quantities of food, forage and provisions were not forthcoming, it is not probable that these supplies will last for long.

So far it has been assumed that the trains were moving in summer under the best conditions, and that there is no ice, or broken bridges, no interruptions of any kind to traffic. There are, however, very formidable obstructions to be faced by the Russians, so formidable that the movement of troops seems to be almost out of the question, and the problem to be faced by the Russian General Staff is the far graver one—how are the troops already in the Far East to be kept supplied with food and ammunition.

LAKE BAIKAL.

The great obstacle to the rapid movement of trains is Lake Baikal. As is well known, the lake freezes to the depth of three feet. When the frosts begin a passage is ploughed through the ice by a powerful ice-breaker, on which the train is bodily embarked. But after a time the ice-breaker fails to cut through the ice, and there is no means of moving trains across the ice.

Once across the lake Manchuria is speedily entered. Here there will be danger at every bridge and culvert from Chinese bandits and Japanese emissaries. There have already been reports that mines have been found under bridges, and that the line has been in places destroyed. These reports are intrinsically probable, though of what is happening in the interior, we shall not be permitted to hear anything from Russian sources, and so these tales can rest on nothing but guess work. But arrangements are known to have been made for breaking the bridges.

Allowing for Lake Baikal, but not for the breaking of bridges, the calculations of the Japanese staff are that from four to six trains a day can be moved in each direction. When the ice begins to melt on Baikal, in the early spring, the number of trains each way is expected to fall to two. What interruption to traffic may be caused by the breaking of bridges, it is impossible to say. But in the zone in which it is likely to occur, Manchuria, the line is well laid, and can move fourteen trains a day, so that arrears caused by interruption of traffic, ought to be quickly overtaken.

It would thus appear that the serious obstacles in Russia's way are (1) the distance, which is immense; (2) the interruption at Lake Baikal. Temporary destruction of culverts and bridges in Manchuria may add considerably to the delay caused by these stupendous impediments.

Enough has been said here to show that it is preposterous to suppose that Russia will be able to move half a million or one million men to the Far East, or to overwhelm Japan "by her irresistible mass."

THE FIRST LAND FIGHT NOW QUITE IMMINENT

A Force of 10,000 Japanese Nearing New-Chang --A Fierce Skirmish Between Scouts

Special to The Times.

London, Monday, March 14, 4 a.m.—There is no real information of the land movements of the Japanese from any source, but as the Seoul correspondent of the Times points out, the practicable landing places are hardly yet free of ice. The sudden return of Winter has increased the difficulties. The Japanese have no intention of marching their main army any further than necessary along the execrable Corean roads. The troops already landed are sufficient to secure a footing in Corea and seize Ping-Yang.

ALL GONE TO THE FRONT.

Special to The Times.

London, Monday, March 14—A despatch to the Times fro. Wei-Hai-Wei describes a visit to Chemulpo. On the previous visit of the correspondent the anchorage there was crowded with transports, but now there are barely a dozen vessels to be seen, of which eight are warships. Few soldiers are visible, but there are pyramids of supplies. Practically all the troops have left Seoul, except the permanent garrison of 6,000 men. The observation force in touch with the Russians near Anju. Twenty Russians attacked a Japanese post of three men, killing one of them. It is believed no other fighting has occurred.

It is estimated that 1,500 Russians with a few guns, and a number of Cossacks, occupy the country north of Anju.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

EGBERT CHAMBERLAIN, - - - - - - NEW YORK
Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-3c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

RUSSIANS SINK FOUR OF THEIR STEAMERS

Special to The Times.

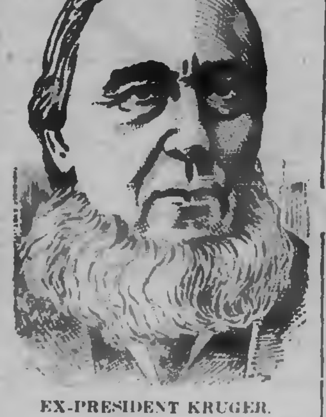
London, March 15.—A correspondent of the Daily Mail at New Chwang, says that after the removal of the battleship Retvizan, four Russian steamers, the Harbin, the Hailar, the Ninguta, and the Sungari, were anchored at the mouth of the entrance to Port Arthur in proper positions, and sunk, leaving only a small space available. Vice Admiral Makaroff having previously ordered the whole fleet to remain outside with steam up, economy in coal being necessary.

KRUGER'S HEALTH IS GOOD

ALARMING RUMORS TO THE CONTRARY EFFECT

The Old Man is Anxious That Britain Should Become Involved in War

Mentone, France, March 14— Contrary to the alarming reports circulated in regard to the health of Mr. Kruger, former persident of the Transvaal, Dr. Huysmans, his physician, says that not for some years has the health of Mr. Kruger been as good as it is at present.



EX-PRESIDENT KRUGER.

Paris, March 14—The Mentone correspondent of the Presse says he saw Mr. Kruger taking his usual daily walk yesterday, and adds that he appeared to be in excellent health.

Mr. Kruger, in conversation with The Times' correspondent, stated that he looked for the emancipation of his people at an early date, when Britain became involved in war. It was then the Boers' time to strike.

FAR EAST NOT LIKE BOER WAR

Great Britain at All Times Able to Keep Troops Supplied

RUSSIA NOT ABLE TO DO SO

Her Immense Resources Will Avail to Keep War Going

Special to The Times.

London, March 15—It is most natural that Englishmen who have been long resident in Russia should recognize the immense military power of that country, as shown by its vast armies, its costly establishments, the devotion to military development of a State equal in area and population to all the rest of Europe together, says the military correspondent of the London Telegraph. It is certainly not surprising that they should treat it as absurd that a comparatively small nation in the Far East, with a population not a tenth of that which the Tsar commands absolutely, should for a moment be supposed capable of contending with The Colossus of the North. Any suggestion that the successes of Japan are other than such as the Boers gained over us at the beginning of the South African war seems to them to belong to the region of dreams. Every criticism that we may apply to the facts of the situation they take to be based on the same gross ignorance which was shown as the condition of the British Empire by Russian newspapers when the Boer war began.

First, then, as to the comparison between the Boer war and the British Empire and the war in the Far East and the Russian. To take first the material differences which make for a catastrophe in the present war, and did not threaten it in that. Behind the British Army throughout that campaign there lay 6,000 miles of ocean. Thanks to the supremacy of our fleet over those 6,000 miles there flowed in one long wide and continuous stream, not only the whole of the required resources of the British Empire, but all that money could purchase of what was needed of the resources of Europe, America and Asia. Whatever else the report on the war has brought out it has shown conclusively that no army in the field was ever more perfectly supplied with food of all kinds, with stores of all kinds, and with ammunition and equipment. The analogous circumstance in regard to the Russian army in Manchuria is that it depends for these things, not on the free commerce of the sea, from which it has been utterly cut off, but on a railway so limited in its capacities that it is at least doubtful whether it will be able to deliver at its eastern end troops sufficient to compensate the waste of an army very much strained, very short of all things, and exposed to harassing attacks, not only from the enemy, but from those uncertain assailants whom it has provoked by its insolence and cruelty.

ARMING THE CONVICTS.

That railway in normal times carries to Siberia the greater part of the food of the population and of the numerous convicts, especially of those working in the mines. So hopeless has it already become to provide food even for these, that the Government, in order not to be guilty of actually starving them to death, and perhaps to avoid a general revolt, enforced by the starvation of guardians and prisoners alike, has resorted to the desperate expedient of putting arms into the hands of men who have many of them, been banished, because they were supposed to be dangerous to authority at home. Whatever may be the consequences of that act, however, it may affect the character of the army in the field, it is at least a proof of the straits to which the Government is already reduced, even to provide food for the civil population. As hitherto the army in the field must have been living chiefly on the produce stored from last year, and as scarcely any fresh supply can be obtained till after the next harvest, and all other supply depends on the overburdened railway, it is extremely difficult to see how, as the army increases, it can be fed at all. Napoleon's catastrophe was not due to Russian victories at all. On the contrary, he almost invariably even to the last, defeated them whenever they ventured to attack him. It was starvation and cold that ruined that army; it is starvation and an incomparably more severe cold that threatens a catastrophe for this one.

THE JAPANESE ARMY.

The Japanese, on the other hand, have every facility, and a most perfect organization for the feeding and supply of their army. They are in a climate which, compared to the climate of Siberia, is mild. The defects of the Boers, as a fighting force, were their want of discipline, their want of any manoeuvring capacity and of any willingness to incur losses in attack, as a rule. In almost the single instance alone of the one days' attack on Ladysmith, when they hopelessly failed, did they on any scale attempt it. The Japanese are admirably disciplined, they can manoeuver as well as any European army, and they are ready to make any sacrifices that may be necessary to success. The comparison with the situation of the Boers holds only in this, that at the beginning of the war the Boers very greatly outnumbered us, that they were—what the Japanese are not—very well mounted and very good riders. They shoot very well, so do the Japanese. Army for army, I do not think that there can be a doubt that, with anything like equal numbers, the Japanese is superior to the Russian; but when one speaks of a great catastrophe, that does not depend upon the success in battle of the Japanese over the gathered forces of Russia, but upon the almost impossibility of feeding large numbers by means of the railway when she has at last delivered them at any point beyond the railway.

Constructing Sentences.

Here is a sentence of thirty-one words which some ingenious person has constructed of the six letters found in the word "maiden:" "Ida, a maiden, a mean man named Ned Dean and Media, a mad dame, made me mend a fie and dime and mind a mine in a Cam den in Maine."

Australian Military Forces.

The Melbourne correspondent of The Chronicle writes regarding the unification of the Australian military forces that what General Hutton has obtained the Government's assent to is practically this: The complete organisation of (1) a mobile field force capable of being sent anywhere in Australia at short notice, and (2) a garrison force designed to defend the vulnerable spots in each State. Both these forces are composed of volunteers or militia acting under the instructions of some 1,500 professional soldiers who form the nucleus of artillery and garrisons required for fixed defences, the technical direction of forts and mines and a military tuition staff. The Australian field force will consist on a peace footing of 12,911 men and sixty guns, capable of expansion in time of war to 26,500 men and eighty-four guns. The garrison force will be composed of 11,896 men and twenty-six guns, exclusive of the rifle clubs, which now total over 30,000 men. Taking the two forces and the rifle clubs together it will be possible for Australia to put in the field or at her forts in time of war at least 68,000 trained men, made up, approximately, as follows:—

Field force	26,500
Garrison force	11,900
Rifle clubs	30,000
	68,400

With a physically fit manhood population of 700,000 to draw upon, the 68,400 trained men would become the backbone of an army of half a million men should invasion actually occur.

For the purposes of broad generalization the Federal army now stands divided into eighteen regiments of Australian Light Horse, thirteen batteries of Australian artillery, three field companies of Australian Engineers, and twelve regiments (three brigades) of Australian Infantry. Each arm is given an excess of officers in proportion to the peace establishment of privates. Peace cadres, with their full complement of trained officers and non-commissioned officers can therefore on mobilisation in time of national emergency be expanded to war requirements without any danger of crisis through lack of efficient leaders.

ARE YOU A PRISONER?

THOUSANDS of men are prisoners of disease as securely as though they were confined behind the bars. Many have forged their own chains by the vices of early youth, exposure to contagious disease, or the excesses of manhood. They feel they are not the men they ought to be or used to be. The vim, vigor, and vitality of manhood are lacking. Are you nervous and despondent? tired in the morning? have you to force yourself through the day's work? have you little ambition and energy? are you irritable and excitable? eyes sunken, depressed and haggard looking? memory poor and brain fagged? have you weak back with dreams and losses at night? deposit in urine? weak sexually?—you have

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

MARKET BLOCK, · PETERBOROUGH

FOREST MINING CO.
Storm King Group of Mines
TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.65 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $13.50. This being a general sample taken from the dump. The other two assays are $42.65 and $70.05 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it should cut the vein and meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore..
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

H. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 1,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 800 feet; 525 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 28th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 325-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000. 80,000 Shares at $5.00 each, full paid and non assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM O. CURVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hinsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 527 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

RUSSIAN LOSSES VERY SEVERE

In the Recent Port Arthur Attack

DESTROY SIGNAL STATION

Togo's Report Says Japs' Bombardment Was Effective

Tokio, March 14. — Vice-Admiral Togo's report of the fourth attack on Port Arthur by the Japanese fleet, that of March 10, which reached Tokio on Saturday, says—

"Our squadron, as pre-arranged, attacked the enemy at Port Arthur on March 10. Our two flotillas attacked the mouth of the harbor at Port Arthur at 1 o'clock in the morning; finding no enemy waited until dawn; one flotilla engaged in sinking special mines in the harbor entrance. Notwithstanding the enemy's fire, our flotilla succeeded in sinking the mines. The other flotilla met the enemy's torpedo flotilla, consisting of six boats, in Liaotishan channel, south of Port Arthur, at 4.30 o'clock. A hot engagement occurred at close range for 30 minutes. The enemy then took to flight. Our fire greatly damaged the Russian ships, one of which was badly crippled by a shot through the boilers, and another was observed to be on fire.

CLOSE RANGE FIGHTING.

"So close were the two flotillas to each other that our destroyers, the Asashiwo, Kasumi and Akatsuki, nearly touched the enemy's ships and our crews could even hear the cries of the men on board them. We sustained some damage and loss. The Akatsuki had a steam pipe broken, and four stokers were killed thereby. Our loss was seven killed and eight wounded. Among the latter is Chief Engineer Minamisawa of the Kasuma.

DESTROYER SUNK.

"Our other flotilla, while leaving the harbor entrance, observed two Russian torpedo boats coming from seaward, and immediately engaged them, the battle lasting one hour. After causing them severe damage, one of them effected its escape, but our destroyer, the Susanami, captured the other boat, which proved to be the Steregushtchi. The land batteries continued to pour a heavy fire on our flotilla, the tow line soon parted, and the Susanami found it necessary to take the crew from the Russian boat and abandon the Stereguschtchi, which finally sank at 8 o'clock.

ENEMY RETIRED.

"The enemy's cruisers, the Novik and the Bayan, steamed out of the entrance of the harbor toward us, but, observing the approach of our cruiser, retired to the harbor.

"Our flotilla suffered some damage, but not heavy. The Sasanami and Akatsuki had two sailors killed and Sub-Lieutenant Shima of the Akatsuka and three sailors were wounded.

BOMBARDMENT EFFECTIVE.

"Our main and cruiser squadrons arrived off Port Arthur at 8 o'clock, and the cruisers immediately sailed toward the harbor entrance to protect the torpedo flotilla. The main squadron advanced near Liaotishan and opened an indirect cannonade against the inner harbor from 1 to 1.30 o'clock. According to the observations made by one of the cruisers facing the entrance, the bombardment was remarkably effective. During our cannonade the enemy's land batteries fired, but none of our ships suffered any damage. Another cruiser squadron went to Talienwan and bombarded the enemy's batteries at Shumeanto, damaging the buildings thereon.

"The cruisers Takasago and Shiaya reconnoitered the west coast of the Port Arthur Peninsula, but did not find the enemy.

ANOTHER RUSSIAN BOAT SANK.

"The Russian torpedo boat destroyer damaged in the third attack on Port Arthur was found to be the Vnushitelni, which had been coming vivaible above the water. visible above the water.

"Our squadron stopped fighting at 2 o'clock and returned to the rendezvous."

THREE AGAINST SIX.

London, March 14—Captain Shokiro Asia, commanding the flotilla of torpedo boat destroyers which engaged the Russian destroyers, is the hero of the attack on Port Arthur. He had only three destroyers, but attacked the six Russian destroyers, ordering his craft to close in with the enemy. He steamed so close to the enemy's destroyers that they almost touched, and a most desperate conflict ensued, from which the Russians retired badly disabled. Engineer Minamisawa of the destroyer Kasumi received a slight wound. Minamisawa participated in the first torpedo attack on Port Arthur, also in the attempt to bottle up the harbor by sinking commercial steamers. He was commended both times for his gallantry.

The Japanese flotilla which sunk the mines at the mouth of the harbor later engaged two Russian destroyers. This flotilla was commanded by D. Tsuchiya.

TO DESTROY SIGNAL STATION.

Vice-Admiral Togo's object in sending cruisers to Talienwan Bay was to encompass the destruction of a signal station and mine depot at Sanshantao. The object was achieved and the buildings were demolished.

Rear-Admirals Dewa and Uriu participated in the operations under Vice Admiral Togo, the details of whose operations became known in Japan only today. The news created intense enthusiasm. Vice-Admiral Togo's report came last night, but it was withheld until shown to the Emperor.

Vice-Admiral Togo is permanently numbered among the heroes of the empire.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

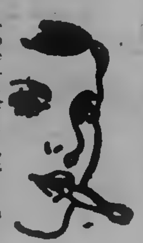
WANTED—GOOD AGENTS IN EVERY CITY,

CATARRH

Don't Drug the Stomach — Breathe Nature's Remedy, Catarrhozone — Both Pleasant and Easy to Use. A Guarantee of Cure goes with it.



Catarrhozone always cures because it reaches the source of the disease quickly and thoroughly. Its healing vapor penetrates the minutest air cells of the nasal passages, throat and lungs. It attacks the cause of the disease direct, and doesn't work in a round about way through the stomach.

The antiseptics in Catarrhozone kill the germs that cause catarrh. It clears the nostrils, cures headache and foul breath. It prevents droppings in the throat, allays inflammation, heals sore spots and running at the nose.

So certain is Catarrhozone to remove and cure that doctors, ministers and public speakers keep it as their standby for coughs, colds, catarrh and throat trouble. Because it lasts so long it is cheap, and as it is sure to cure even the poorest can afford to buy it.

Mrs. J. A. Morris, of Perth, Ont., writes, "I cannot withhold my testimony for Catarrhozone. It cured my daughter of chronic catarrh and I therefore heartily recommend it to all sufferers. No house should be without Catarrhozone."

Why not use Catarrhozone? It cures colds in a few hours, and no case of catarrh can withstand it. Catarrhozone cures by the inhalation of medicated air which goes to all parts of the lungs, throat and breathing organs. A pleasant, certain, quick cure follows the use of Catarrhozone, which is guaranteed under all conditions to cure catarrh in any part of the system.

Two months' treatment, hard rubber inhaler and extra liquid costs only one dollar; sample size 25c. Sold by all druggists or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A. Order Catarrhozone now.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Roll Call This Evening

The annual roll call of the Murray street Baptist church will be held this evening at eight o'clock. A large attendance of the members is earnestly requested.

Fire and Light Committee

A meeting of the Fire and Light committee was held last evening, and all the members were present. The improvements in the fire system were spoken of, and it was suggested that more hose be purchased.

St. John's Guild

At the meeting of St. John's Guild, to be held on Monday evening, March 28th, an interesting debate will be held, on the subject, "Resolved, that Japan was completely justified in breaking off all diplomatic relations with Russia and going to war." Mr W. H. Cluxton will have charge of the affirmative, and Mr. H. Littledale will lead the negative. Messrs. J. Bell, H. Blackwell, A. and G. Main will also speak.

An Interesting Lecture

Brigadier Oliphant Pickering, of Toronto, will lecture on the "Life and Work of Consul Mrs. Booth-Tucker," in the S. A. Barracks on Thursday evening, March 17th at 8 o'clock. The late Mrs. Booth-Tucker was a daughter of General Booth and met her death in a railway wreck on October last. The lecture will be illustrated by moving pictures by means of Lubin's powerful cinematograph and will depict the life of this remarkable gifted woman from childhood to her death, and representing also the funeral procession and interment in Woodlawn cemetery. This service has attracted large crowds wherever it has been given, and requests to repeat the lecture have been received. The Rev. J. A. Wilson will take the chair. The Band will render some choice selections, and an evening of intellectual and spiritual enjoyment is promised.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.

WM. PRINGLE.
Principal

New Offices of Dickson Co.

The new offices of the Dickson Company, which are being fitted up in the Oriental block, are attracting considerable attention. The new quarters were formerly used for a store-house, and a new safety vault is being built and many other changes made. The company's former quarters have been taken over by the Hydraulic Power Company.

A Narrow Escape

Several men employed on the L. B. & P. railway cutting near Mr Fremont Crandell's house in the east ward, Lindsay, had a very narrow escape Monday morning from serious injury. At that point a great deal of filling in work is being done from a trestle, and dump cars are being used to convey the earth. About 10 o'clock as eight loaded cars and a number of empties were on the trestle, it gave way, precipitating the cars and several men over the embankment. One man was injured, but not seriously.

Exciting Runaway

An exciting runaway occurred yesterday in the neighborhood of the Cordage Works. Mr. Andrew Grant, accompanied by Rev. J. A. Wilson, B.A., of St Paul's church, were driving home from a funeral, when the horse suddenly became frightened at a passing train and dashed wildly away. The cutter was upset, the occupants thrown out, and the frightened animal soon was loose from the cutter. He dashed through fences, over verandahs, through back yards, and over ditches, till he reached the banks of the Little Lake. There he jumped over an eight-foot embankment and landed on the ice below. The poor brute was badly cut up but no bones were broken. Mr. Grant was cut about the face, but is not seriously injured.

Muriel Foster

Elgar's "Dream of Gerontius" made two people famous, namely, the composer and the artiste Muriel Foster who took the part of the Angel at its creation in Birmingham, and who sings in concert in Peterborough on April 14th. The Birmingham Post has the following;—"To Miss Muriel Foster undoubted praise must be given. The music assigned to the Angel covers the range of the contralto and mezzo-soprano voices, and Miss Foster's beautiful organ was equal to the demands made upon it. The Angel is one of the most beautiful creations of the poet. There is a blending of the human and the celestial in the character; and the composer has, with the intuition of genius, clothed the ideal figure in a musical garb of heavenly beauty. If for nothing but "The Angel's Farewell," the oratorio and her singing of the part would be imperishable. Miss Foster, we verily think, surpassed her Worcester and Sheffield achievements last night." The coming to our city of this great singer on April 14th, will offer an evening of rare musical excellence. Miss Foster's tour is under the management of Mr. C. A. E. Harriss, remembered in Peterborough through his successful organization and conduction of the cycle of musical festivals last year.

THE PLOT THICKENS.

Police Feel Confident Jesse Arries is the Right Man

Jesse Arries, the young scamp who is behind the bars in the stone house on the hill, will appear before His Worship on Saturday morning. The police say little on the subject, but they are still confident he is the right man. It is rumored that a witness will be called, who will swear he saw Jesse on the G.T.R. tracks shortly prior to the assault of the young lady. Great excitement prevails throughout the city, and many who have never seen the young prisoner are anxiously awaiting his appearance on Saturday morning.

DARING BURGLARY

Thief Entered Crown Hotel Yesterday Morning

Early yesterday morning the Crown Hotel, on the corner of Hunter and Water streets, was entered by a burglar, and a few cigars taken. A storm sash had been removed from a rear window of the bar, and a pane of glass taken out of the inner sash. Through this the burglar crawled and in the morning when the clerk visited the bar he found the till drawer pulled out. No money had been left in the till and all the daring intruder got for his pains was a few cigars. The burglar escaped through a back door. The matter has been reported to the police, but as yet there is no clue to the robbers' identity.

DEATH OF MRS. RUTHERFORD

Died Suddenly of Heart Failure on Monday Evening

On Monday afternoon death visited the home of Mr. Jas. R. Rutherford, of 69 Harvey street, and claimed his beloved wife, Della May Henderson, as its victim. Deceased has been ill for about one month, and died of heart failure about 4 o'clock in the afternoon. She was the only daughter of Mr. and Mrs. Robert Henderson, of 69 Harvey street, with whom she and her husband have lived since their marriage about three years ago. Deceased leaves one child, a little boy of two years. The late Mrs. Rutherford was a staunch member of St. Andrew's Presbyterian church.

The funeral will take place this afternoon at three o'clock to the Little Lake cemetery. Rev. J. G. Potter will conduct the services.

AN UNNATURAL FATHER, THIS!

Abandoned His Ten Year Old Son on the G. T. R. Train, Monday Night

On Monday evening a Peterborough citizen, residing on Sherbrooke street, accompanied by his young son, a bright lad of ten, stood upon the station platform, evidently waiting for a train. Soon the G.T.R. train from Toronto to Port Hope steamed along, and the father and son entered the second-class coach. In a minute or so the kind(?) father, telling the lad to remain in the seat till his return, left the coach. The train pulled out and the man disappeared.

The train authorities, on hearing the boy's story, communicated with the officials of the Children's Shelter, and they are now looking after the boy's welfare. The mother and two other children are residing in Norwich.

EVERYBODY READS THE TIMES

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Thos. Thos Hyam, of Peterborough, spent Sunday in town.—Port Hope Guide.

—Mr. and Mrs. C. G. Graham have returned to town, and are residing in the Grand Central block.

—Rev. Father John O'Brien will preach in St. Mary's church, Lindsay tomorrow night.

—M . S. Windsor, one of Apsley's progressive business men, was in town yesterday.

—M . Chas. Frost, of Huntsville, is visiting his brother, Mr. R. J. Frost, of this city.

—M Mundy, of the Oshawa Reformer, was in town yesterday on a visit to his sister, Mrs. Gumpricht.

—Mr. Wilson, of the Port Hope Guide was in town on business yesterday and gave The Times a fraternal visit

—Mr. Moore, of Bobcaygeon, was in town yesterday on business, and dropped in and paid his respects to The Times.

—M . A P. McLean, of Peterborough, was in town yesterday on business for the Geo. Matthews Packing Co.—Lindsay Post.

—The Times had a pleasant call yesterday from Councillor I. W. Lang, of Apsley, who was in town on business.

—Through an unexpected call to Toronto, Mrs. (Hon.) J. R. Stratton will be unable to receive on Thursday.

—Mr. A. D. Fletcher, and daughter, Miss Muriel, left for Goodlands, Man. on Monday, after spending a very pleasant three months with Mr. Fletcher's parents and many friends in Bensfort and Dummer.

—Mrs. (Rev.) A. R. Campbell and Mrs. (Rev.) J. G. Lewis, of Mark street, started for Greensborough, Ala., yesterday morning, where they will remain for a short time visiting friends.

—Rev. E. Roberts and wife, of Lindsay, who yesterday celebrated their golden wedding, was presented on Sunday evening with a purse of gold by the members of the Cambridge street Methodist church.

—Mr. A. Haskill left yesterday for Hamilton, to attend the meeting of the Supreme Court of the Woodmen of the World. Mr. Haskill will make a special endeavor to have the next meeting of the Supreme Court held in Peterborough.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—It will be "St. Patrick's day in the morning," to-morrow morning.

—The 57th Band was present at the rink last night and played several selections. About 700 people were present.

—Some of the war news coming from the scene of fighting makes us think that the only reliable correspondent is that Chinese veteran, Li-ing-tung.

—The Choir committee of George street choir are requested to meet at 7.30 tomorrow evening to complete arrangements for the Muriel Foster concert, on the 14th April.

—The Billeting committee, which has charge of arrangements for the Bay of Quinte Conference, met last evening in Mr. Aaron Cox's office, and made arrangements for the reception of delegates.

The Insurance Press of New York gives a list of important cities and towns in the United States and Canada which have not efficient fire alarm systems. The name of Peterborough appears in this list.

A Fresh Consignment of DOW'S ALE now on draught at the PALACE HOTEL

—A maiden fair, with sun-kissed hair, came tripping down the street, the air was keen, her age was "steen," and, readers, she was sweet. The sidewalk was sleet, and she went off her feet, with a jolt that shook her curls, and the words she used must be excused, for she's one of our best girls.

Funeral of Late Mrs. Stewart

The remains of the late Mrs. Alex. Stewart were conveyed to their last resting place yesterday afternoon, and a large number of friends of deceased attended. Revs. J. G. Potter, B.A., and Dr. Torrance, conducted the services, and the pall-bearers were Messrs. Robt. Innes, W. G. Ferguson, Robt. Robertson, J. Garrow, J. Fowler, J. Patterson.

Girls' Guild Concert

The Girls' Guild entertainment in Ashburnham hall last night was a decided success. Rev. M . Holah gave an interesting address on his travels throughout Great Britain last year. The speaker showed some very fine views, depicting scenes in London and England, and also a few scenes in Scotland and Ireland. A large number was present, and all thoroughly enjoyed themselves.

ST. PATRICK'S CONCERT

Grand Concert in Bradburn's Opera House, under auspices of the T.A.S. To-morrow Night Harvey Gahan, the Famous Boy Violinist, and Robt. Wilson Humorist, supported by the best Local Talent will take part Reserve seat plan now open at H. Le Brun's, the Clothier, and at the T.A.S. rooms after six o'clock to-night.

$500 Reward For Women Who Cannot Be Cured.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"I used four bottles of your 'Favorite Prescription' and one of 'Golden Medical Discovery,'" writes Mrs. Elmer D. Shearer, of Mounthope, Lancaster Co., Pa., "and can say that I am cured of that dreaded disease, uterine trouble. Am in better health than ever before. Everyone who knows me is surprised to see me look so well. In June I was so poor in health that at times I could not walk. To-day I am *cured*. I tell everybody that Dr. Pierce's medicines cured me."

FREE. Dr Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay customs and mailing *only*. Send 50 one-cent stamps for the cloth-bound volume. Address World's Dispensary Medical Association, Proprietors, Buffalo, N. Y.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1 200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

Russians Bitter Against England--Japan and Her "Political Savages" to Blame for the War

Have Ensnared Japan Into a Bloody Conflict

THE JEWS WERE NOT RESPONSIBLE.

Sowing Race Hatred at Such Critical Time is Absurd.

St. Petersburg, March 16.—The reports of the abandonment of Port Arthur continue to arouse the bitterest resentment, the papers denouncing the story as a stock-jobbing scheme. One paper remarks "Let other countries be fed on such tales, but while Russian blood is flowing, the authorities should not allow the people to be disturbed by such falsehoods. The official telegrams are believed and trusted by everyone."

JEWS NOT RESPONSIBLE.

The Russ printed a long leading article controverting a series of articles in the Novoe Vreyma claiming that the war was brought on by the machinations of Jews in revenge for the Kishineff occurrences, declaring that the Novor Vreyma's contention is absurd, and scoring the latter for sowing race hatred at such a critical time.

THE POLITICAL SAVAGES.

M Komanroff, the leader of the Pan-Slavists, in the Svet, replied to the statements recently made by M. Kurino (the former Japanese Minister at St. Petersburg), declaring that Japan is solely to blame for the war, "the political savages of Japan having ensnared their country in this wild adventure."

The Novosti prints an article by an expert to prove the feasibility of the Baltic fleet making the northern passage by way of the Behring straits, to join the Pacific squadron in the spring.

TEAR MEN TO ATOMS

Doctor Describes Effects of Japanese Explosives on Wounded

Seoul, March 17—I have had an interview with Dr. Wada, of the hospital at Chemulpo, where there are twenty-four men who were wounded on the Russian cruiser Variag, from the effects of the new Japanese high explosive shells. The fuse acts on contact with the water, clothing, or, in fact, anything. The bursted fragments range in size from a few centimeters in most cases to a pin's head. The exploding shell tears men to atoms within a small but undefined radius, outside of which it inflicts wounds which are generally slight.

On the bridge of the Variag, the captain and four men were struck by a bursting shell and a petty officer disappeared completely. Only an arm of Count Nirod was found. Sailors' flesh was torn from their leg bones. Captain Rudineff was only slightly wounded.

One sailor had 120 wounds from fragments of one shell. The concussion of these shells is benumbing and nerve-shaking, causing strong men to weep.

Dr. Wada recommends washing the bodies of the men and disinfecting their clothing before a battle to prevent pieces of cloth from causing the wounds to supparate.

Marquis Ito is expected to arrive in Seoul Friday.

HOW THE JAPANESE KNEW

Had Spies to Watch the Building of a Russian Battle ship

Washington, March 16—A story is being told which sheds an interesting light on the marvelous foresight and precaution that characterized the preparations of the Japanese for the present war. Some years ago a Japanese agent came to Philadelphia with a letter of introduction to a prominent Philadelphian who had traveled in Japan. This Philadelphian tells the story.

The letter was written by a Japanese official who knew the Philadelphian, and it stated that if he would help the bearer in what he desired the favor would be greatly appreciated. The favor was for the Philadelphian to simply introduce the agent to a first-class firm of detectives. This was done and the agent described as a responsible person. He had plenty of money, and a bargain was made with the firm, the latter to receive a large sum of money.

The detectives were required to dress in the clothes of laborers and secure work in Cramp's ship yard, and then to gather full information about the Russian battleship, Variag, then in early course of construction. This they did, and the Japanese government was supplied with every detail in the construction and armament of the Variag. The officials at Cramps do not yet know exactly how the Japs obtained it.

Easily Found in the Dark

He—I think I ought to take a hot foot bath. Where is the mustard?

She—Out in the pantry.

He—Pshaw! It's dark out there and I haven't got a match.

She—You don't need a match to locate it. It's right alongside of the Limburger cheese.

A Snap

THROUGH THE BATTLE SMOKE

Public opinion in Canada, as in all other parts of the British Empire, is strongly pro-Japanese, and it is to be hoped Japan will recognize the need—if she would retain that sympythy—of an immediate reply to the amazing charge of General Zilinski, the Russian commander at the Yalu, that the Japanese who fled before some of his troopers near Kazan left behind them poisoned swords. These weapons are said to be similar to swords used by the Boxers four years ago in Manchuria, the slightest wound from which proved fatal. The story seems utterly incredible. The sword is almost as obsolete in modern war as the battering ram. Men nowadays very rarely kill each other in hand-to-hand fighting. The tale nevertheless should be denied with authority at once. Great Britain can have no alliance with a nation that uses poisoned weapons.

After all, it seems that the main Japanese advance into Manchuria is to be made from Corea. The Times' correspondent, who throughout has given accurate information as to conditions in Corea, sends a wireless message to Weihaiwei that he is at sea en route to Chinumpo, and the military developments foreshadowed in former telegrams should be taking place soon. In plain English this means "on to the Yalu," where Russia bars the way. Another sign of big events to come is the order that all war correspondents with the Japanese troops in Northern Corea must return to Seoul. The ice is fast disappearing in Corea Bay and Japanese light-draught war vessels will soon be able to enter the Yalu and bombard the Russian defense. They will not do this without risk, as it is reported that the Russians have sunk many mines in the vicinity of Wiju.

It is recognized that if the Port Arthur fleet of the Russians has succeeded in getting out of the port and manages to evade the Japanese a new and serious situation will be created. Should they have left, it is believed that Admiral Togo is aware of it and is keeping in touch with them to prepare for action, which it is hoped will be decisive. That Admiral Makaroff should make an attempt to get out is not regarded as improbable, as in the evnet of Port Arthur fleet reaching Vladivsotock the largest vessels could dock, and it would have a base possessing sufficient defences. Such a forlorn hope might conceivably succeed, while the keeping of the fleet at Port Arthur is viewed as hopless, involving its certain loss.

GAVE CONSTABLE THE SLIP

Boyd the Foot Runner Got Away While Officer Waited

Chatham, Ont., March 15—William Boyd, the well known foot-runner, escaped from the grasp of the law here today. This morning George Winslow, claiming to be a provincial detective, arrived in this city with a warrant for Boyd's arrest on a charge of securing $70 from a victim at Dunville Fair last fall. Winslow was warned that the man he wanted was an elusive customer. With the aid of the city police Boyd was placed under arrest. He asked permission of the provincial constable to go home and break the news to his wife. Arriving there he further requested permission to go out to the barn and lock his hen coop. Winslow again acceded and while he waited down below Boyd went up in the hayloft where the coops were supposed to be. He slid down a chute used for feeding the horses and slipped away. Detective Winslow has not seen his man since.

RUSSIAN FORCES WEAK

Port Arthur Dalny Poorly Equipped to Fight Japanese

Port Dalny, March 15—While traveling from the north I saw oceans of snow stretching off in every direction, sugesting the terrible hardships endured during the military concentration now going on. Below Mukden the snow had almost entirely disappeared and the plains were being cultivated by the Chinese. I passed through many miserable, dirty Chinese villages and open stretches of country calculated to make superb before it was fully born and to have been deserted by its parents. It has a desertered appearance. The leading officers who have been stationed at Port Dalny have gone northward, and the inhabitants are seeking by every available means to get away. Much murmuring and protesting are heard. The prevailing feeling is that Russia should have had more soldiers at Port Arthur, and other points on the Leao-Tong peninsula. The actual force there is not over 20,000 men. The people feel that this not only does not afford them sufficient protection, but discloses to the orientals the inferiority of Russia's military preparations.

SCOFFS AT JAP ATTACKS

Russian Envoy Expects Makaroff to Beat the Enemy

Paris, March 15—The Russian naval attache, commenting on the Port Arthur bombardment of March 10, points out the similarity of the four Japanese attacks — destroyers by night and bombardments by day.

"These attacks are audacious, but always ineffective," he said. "The bombardments are always of the same fashion, at about the same hour, of about the same duration and in full daylight. Their strategy lacks variety. This probably is due to the comparative youthfulness of the Japanese naval organization.

"It is noticeable that Admiral Makaroff's report says that he hoisted his flag on the Novik, which had been represented as out of commission from injuries, and it is also notable that he says our ships are ready to resume the struggle. With Admiral Makaroff commanding we expect sharp, aggressive action."

The Japanese legation understands that Vice Admiral Togo, commander in chief of the Japanese squadron, directed the attack. It is said in this connection that during the bombardment of Vladivostock the Japanese fleet was temporarily divided, both sections remained under the command of Admiral Togo, with Vice Admiral Kamimura as second in command.

$150 for Peterborough

The Augmentation Committee of the Presbyterian Church continued in session in Dr. Maclaren's office in the Confederation Life Building, Toronto yesterday. The committee is going over the recommendations carefully from the various presbyteries, and at yesterday morning's session settled upon the following grants to the following presbyteries: Quebec, $1017.50; Montreal, $160; Glengarry, $125; Ottawa, $1349; Lanark and Renfrew, $935; Brockville, $926; Kingston, [illegible], Peterborough, $550, and Toronto, $970.

THE UNITED STATES TO FIGHT GERMAN EMPIRE

Russians Say a Great War is Bound to Take Place in the Near Future

THE CZAR WILL THEN BE ON SIDE OF KAISER

A Profitable Market in Russia Being Held Out as an Inducement—"More American Meddling"

Special to The Times.

St. Petersburg, March 17—The attitude of the United States public toward the combatant powers in the Far East and the sympathy of the American people and government for the Japanese cause provoke almost daily comment in the Russian press.

The Novoe Vremya sought to show a few days ago that a Russian victory in the present struggle would more advantageously affect the United States, and for that matter, British interest, than Japanese success. Manchuria and Corea in Russian hands, would, it was explained, simply mean that the Great Russian empire had at last attained the goal of 100 years of persistent effort and secured its extreme frontier for many long years to come. Russian energies would be peacefully diverted to the task of setting internal affairs in order, and there would be little desire or possibility of Russian industrial enterprise shutting out American or European trade from the profitable market of unmolested China or Corea. Says American Correspondents Lie.

The pan-Slavistic organ Svyet indulges in another line of expostulation. "The American press," it observes, "continues its attacks on Russia, and its correspondents do not cease to send deliberately lying telegrams from the Far East. But on the other hand, the American government begins to display in some degree a more conciliatory tendency. It may be that this arises from the fact that in Washington they begin to realize that the American press has gone too far. It may be also that the tactless nature of the Japanese operations has disillusioned public opinion in the United States.

"On the other hand, the truthfulness of Russian accounts from the theater of military operations, the cool tenacity of the Russian people, and the firm resolve to carry the fight to a finish, have given Americans a respect for Russia. But as in America material interests are always put in the forefront, so in the present question the real or apparent modification of the American attitude is governed by material reasons. These are not one, but many, from a political point of view. The fear that the hostile nature of American and British behavior will force Russia to throw herself into the arms of Germany. United States have good reason to

"It is known that military circles in the United States are convinced that their next war will be with Germany. They recall the Venezuela blockade. If the German fleet had been sufficiently strong at that time war would have broken out between Germany and the United States. Germany drew back, but she has not renounced her world policy nor her cherished designs on the weak South American republics.

"The truth concerning a furtively whispered treaty between Germany and Russia may be simply stated—it be absolutely untrue. But, on the other hand, there will be nothing to wonder at, if Americans come to think of it, if for her friendly services in the present circumstances, Germany should also bargain for services in the event of her war with the United States.

"Bismarck in directing hostility against Russia and organizing a coalition against France, established a Franco-Russian policy, and America may do a similar thing if she imitates Bismarck's policy."

"More American Meddling."

The circulation of an untrue report to the effect that the Washington cabinet had decided to support the protest of the commander of the United States gunboat Helena, now at New-Chwang, against the action of the Russian authorities in sinking Chinese junks in the channel of the Liao river, and that Washington would notify Russia that the neutrality of New-Chwang must be respected, has created something of a flurry.

The Novoe Vremya makes this the subject of an editorial article entitled "More American Meddling," in which it is contended that as New-Chwang is within Manchuria, and is only six miles distant from the railroad to Port Arthur, Russia has a prefect right to take defensive measures there and that unless the United States are seeking a cause of quarrel it would not insist upon supporting the protest of the commander. Fortunately a denial of this story reached here last night in time to head off what might have proved a fresh cause of irritation.

CONTINUE BEET SUGAR BOUNTY

Marine City Mich. Factory May be Removed to Peterborough

Beet sugar bounties were the subject of some deliberation at the caucus of the Liberal members of the Legislature on Tuesday, and the decision was come to that the bounty of one-half cent a pound is to be continued for two years more, until the industry is on its feet. The situation is this,—There are four beet sugar factories in the province, at Wallaceburg, Berlin, Wiarton and Dresden. The Dresden factory is to be removed to Janesville, Wis., owing to the difficulty of securing a sufficient quantity of beets, the factory being located within eight miles of the Wallaceburg industry. The factory cost in the neighborhood of of $700,000, and the proprietor will lose about $300,- on the venture. There is, however, the probability that a factory at Marine City, Mich., will be removed to Peterborough, where conditions are favorable for the cultivation of beets. The government gave a bounty not to exceed $75,000, to be divided among the factories on the basis of one-half cent a pound of sugar produced. Last year the factories earned about $71,000, manufacturing about 14,000,000 pounds of sugar. This year the bounty was to be one-quarter cent a pound, but the manufacturers represented that owing to certain conditions, such as the preferential duties, the difference in the price of sugar as between Ontario and Michigan, and the favorable prices obtained by the farmers, some of whom realized as much as $50 an acre on their production, they were not yet in a position to stand without the full bounty. There was a strong feeling in favor of the continuance of the half-cent bounty, and a bill will be introduced during the session, granting the aid asked for.

—"Hay is worth $15 a ton in Bobcaygeon," remarked a visitor yesterday.

TROUBLE OVER A HAT

How Some Feathered Headgear Caused Trouble on Brock St. Last Evening

Handsome picture hats are always known to fame as being one of the principal possessions of the fair sex, but it is not very often that they lead to blows and a general scrimmage. But that is exactly what happened last evening, when two young ladies met on Brock street, near Aylmer street. One of them in the near past borrowed a valuable hat from the other, and conveniently forgot to return it. These two, the one wearing the hat, and the other minus the headgear, met on Brock street last evening. The one who should have worn the hat went after the one who was wearing the hat, and a lively scrimmage resulted. Finally, the owner succeeded in pulling the thing from the other's head, and this lady promptly feigned sickness, whereupon she was picked up by a sympathetic citizen. He succeeded in getting her away from the scene of battle amid the cheers of onlookers. It is said that the parties interested met later on in the evening on George street north, and another slight skirmish took place.

NEW DRILL HALL

Col. Buchan, D.O.C., in City Yesterday re New Drill Hall

Col. Buchan, the officer commanding the Third Military District, was in town yesterday, for the purpose of considering the selection of a site for the new drill hall. Yesterday afternoon there was a meeting of a committee of the Council, at which Col. Buchan was present, when the town's aspect of the case received attention, and, it is understood, a proposal made involving some assistance from the town in connection with the site. As regards the latter, there are a number spoken of, but nothing definite as yet has been decided. Among those regarded with approval as meeting necessary requirements, are Central Park, the Separate school grounds, or that plot immediately in front of the present drill shed on the south side of Murray street. There are interests to be considered in the former two which will require negotiations with the public bodies governing.

The following order has been handed out from local headquarters;

Drummers and buglers will meet at the drill shed at eight o'clock on Monyday evening.

By order,
D. WALKER,
Capt., Adjt.

PRESENTATION BY GRAND JURY

Congratulates Judge Teetzel - Grand Jury Congratulates Him on His Appointment

When the High Court of Justice opened yesterday morning the Grand Jury made the following presentation;

To the Hon. Mr. Justice Teetzel;

May it please Your Lordship,—The Grand Jurors, on this, the occasion of your first official visit to Peterborough venture to extend their congratulations and to express the wish that you may have before you a long and successful career upon the bench.

We have visited the County Gaol, The Nicholls Hospital, St. Joseph's Hospital, The House of Providence, The Protestant Home and the Children's Shelter, and find everything neat, clean, in good order and carefully managed.

The Grand Jurors regret to report that in the Nicholls Hospital they found cases of scarlet fever, and in St. Joseph's Hospital they found cases of diphtheria contrary to the wishes of the authorities of both these institutions. The necessity for the erection of proper quarters for the treatment of infectious cases is urgent.

The authorities of both our hospitals point out that there is no Maternity Ward in either hospital and we are of opinion this this defect should be brought to the attention of the general public.

There are several people in the County Gaol who are insane. One of these unfortunates has been there seven years. The Jurors think this case should be brought to the attention of the authorities.

The need of a county poor house has been mentioned by all the Grand Juries of recent years, and we add our recommendation to theirs that such a building should be provided.

Following the example of previous Grand Juries we take the liberty of pointing out that a large amount of public money has been expended in the development of the Trent Waterway, which will eventually connect Georgian Bay with Lake Ontario, and will in the opinion of your Grand Jurors form a great national highway for grain between the Northwest and the Seaboard.

The Grand Jurors believe that this work will be of great importance not only to this district but to the whole of Canada and in their opinion it should be completed by the construction of the remaining locks at an early date.

All of which your Grand Jurors humbly present.

J. H. McCLELLAN,

16th March, 1904.

In replying His Lordship thanked the Grand Jury members for their expression of congratulation, and spoke favorably on their different recommendations. The Jury were also thanked for the excellent manner in which they had performed their duties.

One case was dismissed yesterday, that of Hopkins vs. Perdue, a case in which $2,000 damages for assault was claimed. H. O'Leary, Lindsay, for plaintiff; Dunible & Johnston for defendant.

The plaintiff was awarded $500 damages.

Panteleone de Paolo, the Italian who stabbed his brother a few weeks ago, was given one year from yesterday in the Central Prison.

The jurors in the Hopkins vs. Perdue case were as follows; Robert Garbutt, Jas. Goodwin, Johnston Greer, Chas. Grells, Jas. Haggart, Hy. McDonald, W. W. Jones, Jno Gillespie, Jno Hore, W. A. Davidson, Fred Fife, Roland S. Garbutt.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

RUSSIANS ARE ANXIOUS TO SETTLE WITH JAPS

According to Recent Advices They Are Now Ready to Give Togo a Warm Fight Outside the Harbour

Warships Have Been Ordered to Keep Steam Up and Admiral Stark's Error Will Not Be Repeated

London, March 17—Interesting developments are liable to occur in the vicinity of Port Arthur at any moment now. Admiral Makaroff, according to recent advices, has assumed the offensive. He has caused four steamers, the Harbin, Hailar, Ninguta and Sungari, to be anchored in chosen positions at the entrance of the harbor, and then sunk, leaving a small channel available, and ordered the whole fleet to remain outside, with steam up, economy of coal being necessary. Such action is interpreted as indicating the intention to give battle to the Japanese, inasmuch as remaining at anchor outside inactively would imply a repetition of Admiral Stark's error and invite fresh disasters. The semi-blocking of the entrance is assumed to have been for the purpose of preventing the Japanese torpedo boat destroyers from entering, as they did at Wei-Hai-Wei in the war with China. That Rear Admiral Makaroff intends to force the fighting is, according to other despatches, the general conviction of the Russians at Yin Kow.

Since the appointment of Gen. Kuropatkin to the military command in the Far East and the recent councils of war at Mukden, it has become evident that the Russian plan of campaign has undergone a complete change, especially as the Japanese have not followed up their naval successes by active land operations.

This news which is prominently displayed by the London Daily Mail, and which the correspondent says is "Russian information," is if true, news of the first importance, confirming the idea that Vice-Admiral Makaroff will make a desperate attempt to bring together Russia's scattered naval forces or endeavor to inflict damage upon the Japanese navy. This story must, however, be view cautiously, the only approach to confirmation being in a despatch from a correspondent of the Daily Telegraph at Yin-Kow, which merely says; "Vice-Admiral Makaroff has issued orders to the effect that the saving of coal is unnecessary, but that the big gun ammunition in the forts must not be wasted. Evidently this ammunition is running short."

The Daily Telegraph's Tokio correspondent sends an unconfirmed rumor to the effect that Japanese marines have landed and occupied Dalny. It may be remarked that the British newspapers all regard Vice-Admiral Togo's report that he has laid mines at Port Arthur as a mere bluff, and they say that such a feat would be impossible under fire.

The Daily Mail thinks that if Vice-Admiral Makaroff closed the channel it was in order to prevent the ingress of Japanese torpedo boat destroyers as was done at Wei-Hai-Wei during the Chino-Japanese war.

It is a subject of unceasing remark and conjecture that nothing has been heard of the Vladivostock squadron, and it is beginning to be believed that it is really inside the harbor of Vladivostock.

RUSSIANS HAVE 30,000 MEN IN PORT ARTHUR

And Are Provisioned for Twelve Months--The Japanese Losses

Special to The Times.

Paris, March 16.—The Temps correspondent at St. Petersburg asserts that a Russian army corps is descending from Vladivostock towards Corea. He adds that Port Arthur has a garrison of 30,000 men, and is provisioned for a year. The Russian Minister of Marine, the Temps correspondent further asserts, claims that Japan's losses, since the opening of the war, are four cruisers and five torpedo boat destroyers and the machinery of a 12,000 ton battleship seriously injured. The correspondent concludes his despatches with asserting that the concentrating of the Russian troops at Mukden and Harbin is considered as terminating the danger from the Japanese landing in the northern part of the Bay of Corea.

LOCAL SPORTS

HOCKEY.

The firemen have been challenged by the wine clerks, and a game will likely be played on Saturday evening.

—Crowley, of the T.A.S. team, is considered one of the best defence players in the Trent Valley League this season.—Lindsay Post.

LACROSSE.

F. A. Clarke, of Peterborough, has been nominated fo. the Council of the C.L.A. for 1904.

A recent communication states that four or five teams are ready to enter a junior city lacrosse league. It says teams will enter from the C.G.E., Cordage Co., Cereal Works, and T.A.S. III.

A meeting was held last night in the T.A.S. rooms, when the Shamrock Lacrosse Club was organized. The following is a list of the officers;

President—J. F. McCarthy.
Secretary-Treasurer—H. Henry.
Manager—R. Doris.
Executive Committee— President Secretary-Treasurer and Chaugcey Knapp.

A meeting will be held on April 1st to finish business. All those desiring to join the club are requested to give their names to the executive before that date.

FOOTBALL.

The Statesman, Bowmanville, said in this week's issue;—"The annual meeting of the Midland Football League will be held in Peterborough on Saturday, March 19th, and from present indications the season of 1904 will be even more successful than that of last year. Hon J. R. Stratton has given a handsome silver cup emblematic of the League championship, which will be competed for yearly. It is expected that a western group will be formed this year, including teams from as far west as Bowmanville and Pontypool.

The secretary of the Havelock Football Club has written to the acting secretary of the Midland Football League, stating that the club will not enter a team in the League this year.

CURLING.

Lindsay curlers visited Toronto on Tuesday and bowled over Queen City in the afternoon by 40 shots. In the evening they again won by 34.

The following games were played in the Innis Medal series last evening;

Giroux, sk...14 Frost, sk...9

Connal won from Waddell, and T. Rutherford won from Thompson in the Kendry Cup game.

The Effect on Business

The exceptional winter has had an unfavorable effect upon business throughout the country, lessening the sale and movement of merchandise, and at the same time restricting the circulation of currency. On this account payments have not been as well met as usual, but this was a contingency looked for and provided against, and the causes that led to this being but temporary, the effects will not be permanent. The saving deposits of the people are a very good test of their prosperity, hence it is satisfactory that last year the deposits in Government and other savings banks and loan building societies amounted to $163,081,864, an increase over 1902 of $12,547,207. The total deposits in the chartered banks amounted to $430,670,400, an increase over 1902 of $125,520,152. The Peterborough merchants have met their payments promptly and their financial standing has not been seriously impaired.

Mr. John Bertram Writes

Mr. T. Q. Quartermaine has received the following letter from the chairman of the Transportation Committee;

T. Q. Quartermaine, Esq., Secretary of Board of Trade, Peterborough:

Dear Sir,—Replying to your favor of the 14th, there is no definite time settled for the continuance of the sitting at Peterborough of the Transportation Commission, which meets on the 24th inst., at 1.30 p.m. They expect to take all evidence offered and has only asked that it be condensed and no extraneous matter placed before them.

Yours very truly,
JOHN BERTRAM,
Chairman.

44 Victoria street,
Toronto, March 15th, 1904.

Services at St. John's

Rev. W. R. Tandy, M.A., of Havelock, had charge of the Lenten services at St. John's church last evening, and spoke on the subject, "Applied Churchmanship." The reverend gentleman interpreted this as bearing witness in life of the principles of the church. He cited different countries and institutions, and spoke of a distinctive message of the church to this age and country.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, [illegible] Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 17, 1904

THE VALUE OF WAR NEWS

The only war news we are getting now is exactly like the "claims" given out by party leaders on either side on the eve of an election or political convention. How much would the public know about such an event, if these claims were its only source of information? In point of fact, it does know more, because reporters and correspondents are permitted to cover the whole field of the coming contest, interview the rank and file of contestants, observe conditions for themselves and make up a judgment impartial except of the personal equation of each. Nothing of the kind is permitted in the war news field. The claims of the leaders on one side or the other stand alone for the current news.

That is to say, the world does not get a shred of information, except what each government desires it should get. In other words, only such information gets out as each government wishes the other to believe to be true. Now the very first business of a nation in war, like a party in a campaign, is to deceive the other as completely as possible in relation to its strength, movements, plans and aims. When only such news as that invented for this purpose gets out, how much can the general public be supposed to know about the war?

The news of operations on land is virtually sent by the two governments. This is plain enough in the case of most of the Russian dispatches, which are official reports from commanders. The rest of the Russian news is of the same nature as nearly all the Japanese news. That is to say, it passes through a rigid censorship. The Japanese do not deal so much in official reports, and most of the news from that side purports to come from correspondents.

But, as near as can be learned, no correspondents have been permitted to leave the islands to join the invading army. They are dependent on such information as they can get at a distance among a population, down to the last child, in loyal sympathy with the government censorship. In most cases they get only what the government wants Russia to believe. If by chance they pick up anything else, it is stopped by the censor. Since the Japanese have occupied Corea, conditions are substantially the same there as in the islands. Under these circumstances, while current war news may be read, like other fiction, with intense and absorbing interest, judicious readers will not build upon it any definite conclusion as to actual events.

COREA AND THIBET

The publication of the British blue book on Thibet discovers a striking parallel between Russia's attitude there and in North China; also between Japan's attitude toward Corea and England's attitude toward Thibet. This blue book contains the correspondence between Great Britain and Russia in relation to Thibet, which extended over most of last year.

In spite of the smoothness of the conventional language of diplomacy, this correspondence makes it perfectly clear that the British expedition to Thibet was undertaken to defeat a Russian plot for establishing a protectorate over that country. As the first British protest against the expedition to Lhasa was made in February, 1903, long before the relations between Japan and Russia approached a critical stage the idea that Great Britain took advantage of Russia's pre-occupation to steal a march is erroneous.

The step was taken without any regard to the events in the north, to anticipate and defeat Russian aggression upon Thibet precisely similar to the Russian aggression upon Corea. Russia was trying secretly to corrupt and control the government of Thibet, as she had already corrupted and controlled the government of Corea. The matter had gone so far that the British government received information that agreements for a Russian protectorate were nearly concluded. Not until matters reached this stage was the expedition of Captain Younghusband started on its way.

Thibet bears a political relation to British India like that of Corea to Japan. It is not necessary as an outlet for increasing population, though it is believed to have considerable undeveloped capabilities of trade. But its occupation by a hostile power would be as menacing to the British rule in India as the occupation of Corea by Russia would be menacing to Japan. Neither one nor the other is to be tolerated. Thibet, like Corea, must be occupied or kept independent and under friendly observation, if British rule in India is to be secure. Their common danger from Russia is one among the many explanations of the close sympathy between Japan and Great Britain.

The Awful Distress of Irritable Nerves

Can be Overcome by Enriching and Nourishing the Blood, Thereby Rebuilding the Nerve Cells.

Any failure of the nervous system to do its work properly inevitably causes other troubles. Weakened nerve force is almost sure to bring on gloom and depression. Life loses its attractiveness, worry and care quickly furrow the brow of the sufferer who keeps up a brave heart as long as possible, and then completely breaks down.

Nervous wrecks are very sad, pitiful, indeed, when a certain cure like Ferrozone is within easy reach. The success of this great nerve restorer has been demonstrated in many cases where other treatment completely failed, so sufferers can with unbounded confidence rely on a lasting recovery if Ferrozone is used.

Hosts of well known people have found health through Ferrozone. Among these might be mentioned Mrs. E. D. Emmerson, of Centreville, who says; "I am glad to think that there is at least one honest remedy for nervous people. No one can imagine what I suffered with my nerves, and I sometimes wonder at the number of useless prescriptions and medicines that I took. But Ferrozone acted differently from all the rest. It built up my system and gradually the irritability left my nerves and I got well. Ferrozone cured me by removing the cause of my trouble and by giving me enough additional strength to overthrow the attack of nervousness. I can recommend Ferrozone strongly."

No expectations are too high to be fulfilled if Ferrozone is used. Many others have been cured of troubles worse than yours. Try Ferrozone. It completely rebuilds the nervous system and establishes a healthy condition throughout the entire body.

Don't let any greedy dealer make you think there is anything so good as Ferrozone. It alone can cure permanently. Insist on having nothing but Ferrozone. Price 50c per box or six boxes for $2.50, at all druggists or by mail, from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

THINGS GENERALLY

BY SI JONES

Probably the most remarkable feature of the attacks upon Port Arthur is the comparative immunity of the Japanese fleet from casualties. The bombardment of Thursday last was necessarily a hazardous enterprise. The Japanese battleships had to go within five miles of the shore guns, which have a range of double that distance. But the ships being small and constantly in motion, were very difficult to hit. Six battleships, having in all twenty-four 12-inch guns, participated in the engagement. Each of the twenty-four guns discharging five projectiles, there were 120 shots aimed at the fortress. The force of the 12-inch projectile is enormous. It weighs 1,046 pounds, is discharged with 375 pounds of smokeless powder, and exerts a muzzle energy of 77,896 foot tons. In other words, the same impact is caused as would ensue if two 70-ton locomotives, going at the rate of 100 miles an hour, collided with each other. Even this does not give one an adequate idea of the terrific force of the 12-inch projectile, which will pass through thirty-seven inches of tempered steel as though it were cardboard. In Thursday's bombardment the Japanese battleships discharged more than sixty tons of these projectiles at Port Arthur. To effect this without experiencing any damage from the shore guns is a magnificent experience. The Japanese have shown that, skilful as they are with the torpedo boats, they are not less accomplished in maintaining a long range bombardment.

* * *

The season for football and other outdoor sports is at hand and judging from the preparations being made, there should be an exciting time in Peterborough during the coming summer. The various city and county teams are sending representatives to this city on Saturday next to a meeting of the Midland Football League, and many baseball teams are being organized. With lawn tennis, cricket, bowling and lacrosse, we should witness some interesting contests this year.

* * *

The curling season is now about over, and the local enthusiasts will regret that Scotland's great game cannot be continued in the "good old summer time." Even the oldest of our citizens have shown great skill with the "stanes," and some are so much in love with the game that they play without any thought of their "terrible rheumatics." The old veteran curler, Mr. Wm. Croft, defeated Mr. Harry LeBrun's rink on Monday evening and now he is again looking for trouble. Mr. Croft makes some fine shots and can "hit im on the bussom" every time. "Crack an egg on that," now.

Telegraphy Still Lives.

Every six months or so an inventor appears with a device that he is sure is going to put an end to the business of the telegraph operator and his old Morse sounder. Prof Fleming, an expert associated with the Marconi Company, was lecturing before an audience at the Royal Institution in London. He illustrated his lecture with a message flashed directly from the Marconi station in Cornwall, through all intervening obstacles, to his table. He had taken pains to assure his audience that no one could possibly receive this message except with the instruments before it, which were the only set "in tune" with the sending instruments.

In the middle of the message as it came the word "rats" was interpolated. The audience was amused. Prof. Fleming was indignant. Rigid inquiry having proved that the senders in Cornwall were guiltless of the flippancy, Prof. Fleming wrote a wrathful letter to The Times, terming the interpolation "scientific hooliganism," and calling upon the perpetrators to reveal their identity.

In the next issue of The Times Mr. Nevil Maskelyne, a person whose business it is to amuse the public with scientific curiosities, confessed that he was the "hooligan." He also declared, as a fact of interest to the Marconi Company's shareholders, that the message had been practised for several hours, that fifty horse-power had been expended in getting it through, and that he had intercepted it and added to it with ordinary "untuned" instruments stationed in the neighborhood.

Would Not "Undress Ship."

The spirit of French officialism is illustrated by an incident told in the recently published life of Sir Henry Acland, says The Tablet. The latter, during a yachting trip to the coast of Brittany in 1882, happened to be in port on the occasion of the blessing of the harbor and shipping by the priests. With natural good feeling, he dressed his yacht with all her bunting, with bouquets on bowsprit and counter, and a golden bunch of broom at her mast-head, so as to do honor to the ceremony by her gala turn-out. But this expression of sympathy with "clericalism" was not to the taste of the French authorities, and an official came on board with strict orders that the decorations should be removed. The curt order met with an absolute refusal, and the official withdrew, to return a quarter of an hour later with a still more peremptory demand for the hauling down of the obnoxious bunting. "In great indignation Acland threatened to telegraph to Lord Lyons if another word was said on the subject, and the official withdrew to show himself no more. It appeared to be merely a display of spite on the part of the local authorities, furious that any honor should be shown by strangers towards an ecclesiastical ceremony, and was a remarkable specimen of the unlovely bitterness of French sectarian strife." It was apparently a gratuitous piece of bullying on the part of the fonctionnaire, for it can scarcely be illegal for an Englishman to dress his own yacht with his own flags even in a French port.

First Farmer—Did they hev fire-escapes at the hotel where ye slept, Zeke? Second Farmer—No, but it was the most eckernomical tavern I ever seen. First Farmer—In what way, Zeke? Second Farmer—Why, they had a rope hanging in every room, so that you could commit suicide without wastin' the gas.—Philadelphia "Evening Telegraph."

Department of Railways and Canals, Canada.

WELLAND CANAL.

Notice to Contractors.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Electrical Apparatus," will be received at this office up to 16 o'clock, on Monday, the 28th March, 1904, for the furnishing and erection of Arc Lamps, Regulators, Switchboards, and other apparatus, appliances and materials required for the Welland Canal.

Plans and specifications can be seen on and after Monday, the 14th March, at the office of the Superintendent Engineer of the Welland Canal, St. Catharines, Ont., at the office of Roderic J. Parke, Esq., Consulting Electrical Engineer, 52-53 Janes Building, Toronto, and at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa. Forms of tender can be obtained at the places named.

The Department does not bind itself to accept the lowest or any tender.

By order,
L. K. JONES,
Secretary.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 320 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

OVER 300 RUSSIANS KILLED AT PT. ARTHUR

Japanese Challenge Vice-Admiral Makaroff to come out and Fight.

Special to The Times.

London, March 16.—A correspondent of the Daily Telegraph at Yin-Kow, says; The Japanese again attacked Port Arthur on March 12, as a challenge for Vice-Admiral Makaroff to come out and fight. During the heavy bombardment, the correspondent says, the Japanese were in a position safe from the guns of the fortress. The Russian casualties amounted to 300 killed and wounded. The correspondent says that this is authentic.

DENIES MAKAROFF BLOCKED HARBOR

Special to The Times.

St. Petersburg, March 15.—The report from New Chwang that four Russian steamers have been sunk the removal of the battleship Retvizan is authoritatively denied here.

SAYS JAPAN FEARS DEFEAT

CORRESPONDENT ADMITS RUSSIAN VICTORY UNLESS BALKAN WAR STARTS

Turkey is Scared by Bulgaria but Czar Thinks Conflict will Not Come

Kieff, Russia, March 16—Local papers make a feature of an interview with a Japanese correspondent of the Nichi-Nichi, who is visiting the Balkans. He is quoted as saying the Japanese fully recognize that they have no hope of defeating Russia unless her intention is diverted by possible complications in the Balkans. The object of his visit is to ascertain the chances of such trouble breaking out.

St. Petersburg, March 16 —Inquiry concerning the outlook in the Balkans develops that the prevailing opinion in government as well as diplomatic circles is against an outbreak of war in the spring, although the danger is not considered passed. A perfect understanding exists between Russia and Austria, and besides the Russian authorities appear to be completely What assurance the authorities have concerning Bulgaria are not known, but they do not tally with information from other sources, which represents Bulgaria as mobilizing, having plans perfected for an invasion of Turkey and as being confident that she can defeat the Turks single-handed.

Evidently the porte is alarmed at the outlook, as an American representative of an ordnance firm, who came out here to act as broker in the sale of South American warships to Russia, has been requested to go to Constantinople immediately, the sultan desiring to purchase a large supply of guns.

It is a mistake to imagine that Russia is so engrossed with affairs in the Far East as to be unable to give attention to the Balkans. She has carefully refrained from moving troops from the vicinity of the Roumanian frontier and will be prepared if necessary to assume her share in the event of war.

PASTOR'S WIFE ELOPES

Mrs Addie Downs Leaves Husband and Children

Winsted, Wash, March 16—Mrs. Addie Downs, wife of Rev. Thos. Downs, former pastor of the Methodist church, Racine, Wis., has eloped with Carl S. Alvord, a blacksmith residing at Winlock, Wash. She met him at a centata, both taking part in the performance, and a week after they are said to have eloped. She deserted a husband and five children and he deserted a young wife. They were arrested at Portland, Ore., but were released by the police, and from there went to San Francisco. During the residence of Rev. Thomas Downs and wife in Racine they were prominent in church work and also did a great deal of work in charitable institutions.

INTERESTING INTERVIEW

MR. JOHN L. STEPHENS OF YOKOHAMA TALKS OF THE WAR

His Impressions of Japan's Naval and Military Forces—Relates Many Interesting Stories.

The Times had a most interesting interview yesterday afternoon with Mr. John L. Stephens, a personal friend of Captain Williamson, late master of the Dundee, Scotland, merchant steamer, Arara, and the latter was asked if he had any war news.

"Why," said he, after a glance at the recent files of the Times, "You've got a cheek asking us for war news when you know greatly more about it than we do. What we've got is old, I fear."

"However, by means of a little conversation, it turned out that Mr. Stephens had some interesting incidents to relate. The ship was sold by cable from the Japanese government to the Dundee owners, and when the Arara reached Nagasaki the skipper was informed of the fact and notified that she would be wanted soon. How soon he was quickly apprised on reaching Kobe, when a Japanese officer boarded and gave the captain, officer and crew just three hours to clear out of the vessel. It was the hottest three hours of packing ever put in by the Arara's crew and at least one of the ten commandments was all torn up during the process. Hardly had the last sailor lugged his dunnage down the plank before there was a rush aboard of Japanese transport service men, carpenters and other mechanics, and all hands fell to work like fury to run up bunks above and below decks, evidently for as many passengers as the vessel would carry. Rows of the extempore bunks, tier on tier, could be seen rising like Aladdin's palace in every available vacant space. Hammer and saw made merry work and the men worked as if they were in a rip-sawing and nail-driving contest. By the afternoon the Arara looked like a forty-second edition of the late Noah's ark; her steam was up, her gang planks out, but not a white man saw the

EMBARKATION OF JAPANESE

horse, foot and artillery, at the dead of night. They came trooping from tents and barracks, deployed into column of two abreast and tramped aboard till an hour before dawn, when lines were cast off, and, with masses of black smoke, like the very clouds of war, pouring from her funnel, she panted down the channel for the open sea, destined to —— but that is something that the most astute war correspondent in the Orient cannot answer; only guess.

It was estimated at the time that the Empress of India was at Yokohama that not fewer than eighty thousand troops had been landed from Japan on the shores of the Hermit Kingdom, but at what points no white man could tell. The impression was that most of the troops were landed at Fusan and Masampho, and sent up country by rail to Seoul and the north, probably to join the large detachments landed at Gensan (Broughton Bay), where it is believed by military experts a junction is to be made, either for a descent upon Vladivostock or the Yalu. But it is all pure guess work, said Capt. Williamson.

"It gives one rather an eerie feeling to discover in the morning that the fine, bright young fellow— lieutenant, captain or major or colonel, of this, that or the other regiment of the line, or artillery or engineers or signal corps, with whom one chatted pleasantly at the club the previous evening and with whom one made arrangements to play off that last round of tennis, or golf or billiards, was summoned at the witching hour of night, hurriedly donned his uniform, and, followed by his servant, stole down to the head of company or regiment, drawn up on the barrack square like a gathering of ghosts, gave the muffled words of command, and, all together, to the quay and aboard. No band to stir the cockles of the heart with the lilting strains of "The Girl I Left Behind Me!" no warm clasps where the throbbing heart is in the hand itself and the throat is tight and dry in the farewells—it may be for years, it may be forever. No beaming eye of beauty and of love to inspire to high chivalry for la patrie; nothing but the gruff commands coming through the grey, nothing but the dull regularity of the tramp, tramp, tramp, like the sound of muffled drums playing funeral marches to the grave. "War is hell!" Even such preliminaries as the India's passengers saw at the Japanese ports confirmed the grim truth of General Tecumseh Sherman's laconic dictum."

KEEP FRENCH OUT

Brazil Thinks U. S. Should Enforce Monroe Doctrine

Washington, March 16—Regarding the recent reports from Paris that a syndicate had been organized there and had purchased four steamships for the purpose of carrying a military expedition to the territory between the Oyapoc and Araguary rivers, it is understood that the Brazilian government will resent any such action as the sending of an expedition to what is claimed as Brazilian territory. It was this territory which was awarded to Brazil in December, 1900, by the Swiss government, which acted as the arbitrator in the litigation over the territory, and denied the French claim to it. It is the belief of the Brazilian government that any aggression on this territory by France would constitute an infringement of the Monroe doctrine, which not only Brazil but the United States should oppose.

EVERYBODY READS THE TIMES

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it would encounter a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879 and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down oo feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 8x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 800 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $1,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $185,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air pump into the 300-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

LEFT PT. ARTHUR TO UNITE TWO RUSSIAN FLEETS

Makaroff on a Dash Toward Vladivostock?--No Russian Warships at Port Arthur

Special to The Times.

Tokio, March 15.—It is strongly believed here that the Russian fleet abandoned Port Arthur after the fourth attack was made upon it by the Japanese fleet, and is endeavoring to reach Vladivostock. Confirmation of this movement is not obtainable from any reliable source, but the recent scouting in the vicinity of Port Arthur has failed to reveal the presence of any Russian warships. It seems logical enough that the Russians should attempt a dash for Vladivostock, where it is possible to dock larger ships, effect a junction with their armored cruiser squadron, and secure a base for operations while procuring adequate land defence. The hopelessness of continuing at Port Arthur is manifest, while a dash for Vladivostock might succeed. Contrary to the opinion previously expressed, Vice-Admiral Togo is unwilling to run the risk of dividing his battleships, and continues to operate the six battleships together. If the Russians should make an attempt to reach Vladivostock, it is believed they will try a dash though the Korean straiths rather than enter the Japanese sea through the Sugu straits.

BRITISH SETTLERS FOR THE WEST

Mr. C. F. Kingsmill of Liverpool Speaks on Immigration

ARE COMING IN THOUSANDS

Tide of Settlers Being Diverted From United States to Canada

Montreal, March 16—There are two topics engaging the attention of the people of Great Britain at the present time. One is naturally the war, the other is the tide of emigration to Canada that has set in during the past year or two and which seems to have every likelihood of reaching its full flood tide this coming season. Montreal has had a number of visitors from the Old country during the past few weeks and those that were inclined to talk (for your average Englishman has rather a distaste to being interviewed), had something to say of these two chief topics of interest, for Canadians although interested in the fortunes of Japan in the present war, are even more interested in the question of immigration. The views of Mr. Charles F. Kingsmill, of Liverpool, who is connected with the shipping interests of that port, on the subject of immigration, are to the point. Mr. Kingsmill in conversation with a reporter at his hotel yesterday, said that there was a perceptible change taking place. For some years past the intending emigrants who came, week after week to Liverpool, a very large percentage were bound for the United States. Now the tide was turning and the past year has seen vessels bound for Canada, carrying hundreds of British subjects for a British country. "That is as it should be," added Mr. Kingsmill. "The United States has too long taken the cream of our people. Now that they are going to Canada there is a feeling that they are still helping along the cause of Empire, and England is not losing them as she did when they took up their residence in the United States, and practically lost their individuality in that miscellaneous assortment of tribes and races that goes to make up the population of that country."

Mr. Kingsmill said that when he left Liverpool, over two thousand settlers were booked to leave that port within two weeks from that date. They were all British subjects and all bound for Canada. The bulk of these people were unmarried men in the prime of life, who were many of them supplied with a certain amount of capital, sufficient to give them a start in the new land to which they were coming.

Mr. Kingsmill, when asked as to the reasons in his opinion for the influx of settlers into Canada from the British Isles said it was due in a large degree to the general awakening among the masses of the British people that Canada offered exceptional opportunities to the man who was willing to work. He also thought that the tide of emigration from the British Isles was due to the general depression in working circles. The causes of emigration were seldom on the surface, personal and individual reasons tended to induce a man to leave his native country and seek to carve out a fortune in a new country. 'One thing is certain, however, said Mr. Kingsmill in conclusion. "You are going to get the people and we in Liverpool anticipate that many thousands of homeseekers will swing down the Mersey into the open sea during the coming summer."

RATS ATE THE SHAMROCKS

Annual Supply to New York Gone When Boat Arrived

New York Sun; St. Patrick's day is near and the annual hustle among the faithful sons of the Ould Sod for real shamrocks has been on for a fortnight. There is never a shortage of shamrocks in Ireland. The trouble has always been to get the Shamrocks here.

In advance of every St. Patrick's Day William Seguine and William Lee the two marine sharps at Quarantine, both of whom are Americanised Irishmen, begin to receive requests to supply their friends with shamrocks. Seguine and Lee know all the officers of the big liners and induce them to bring over the shamrocks. They arranged this year with the purser of the White Star liner Celtic to bring their annual supply. The Celtic's purser made good his promise and on the return trip he had aboard a good sized box filled with Ireland's emblematic leaves growing in the sod.

The purser stored this box carefully away in the mail room of the big liner, and on Friday, when the ship arrived, Seguine and Lee clambered aboard at Quarantine.

"Did you bring the Shamrocks?" both men asked in chorus.

"Sure," said the purser, "and I'll go and get them for you."

The paper box was found just where it had been placed, but there was a hole in one end. The purser summoned the marine sharps and the box was opened. There was not a shamrock in it. The sod was there, but that was all. The hole in the box showed clearly enough that a rat had devoured the shamrocks.

"It must have been an Irish rat we shipped at Queenstown," said the purser.

The two marine sharps were forlorn. They knew they could explain to all their friends but one. They knew that Billy Carrol, a Park Row Hibernian, wouldn't believe a word about the Irish rat. Before telling Carroll of their loss they concluded to make one more attempt to get hold of some shamrocks. Their chance came yesterday when the Umbria came into port. An officer of the Cunarder had a box of shamrocks, and he parted with them. The marine sharps lost no time in presenting the entire box to Carroll. Then they told him how the first consignment had been destroyed.

"Sure, the rat wasn't Irish at all, at all," said Carroll. "He was wan o'thim Bundesrathe He took 'the shamrocks for watercress as the Dootchman did in the Irishman's saloon."

RUSSIANS ARE VERY EXCITED

Rejoicing in St. Petersburg Over Alleged Victory

COUNTRY MUCH EXCITED

Vast Sums of Money Being Subscribed by the Nobility

St. Petersburg, March 16— Everywhere throughout this city are signs of rejoicing. How long this mood will last, however, depends on what news arrives from the front. The public mind is extremely sensitive. It is balanced between hope and despair, so as to be effected by the slightest breath of news from the Far East. The optimism of the people today is due to General Kuropatkin's departure to assume the chief command in the Far East, and also to the reports of Admiral Makaroff's energy at Port Arthur. The Admiral is praised both in government circles and in the street. The Russians feel that a real force has at last appeared on the Russian side and that the Japanese must look to their laurels. Von Plehve, the minister of the interior, is greatly disturbed over the action of the zemstvos (provincial councils) and the nobility all over the Empire. These bodies are organizing charities, independently of the Government, and the minister fears that what is now a charitable movement may in time become political, and obtain a hold on the people dangerous to the autocracy. Nevertheless the sub-Czar, as Von Plevhe is now commonly termed, feels helpless in the matter.

In nearly every province the zematvos and the nobility are subscribing hundreds of thousands of roubles and Von Plehve can discern no way of stopping the movement without dealing the army and the families of the soldiers a calamitous blow and running a great risk of national repudiation.

Meanwhile the nobility and the councils have appointed a committee to effect a central organisation which will look after the welfare of the soldiers in the field and their wives and children at home.

MAY LOSE OUR CHINESE

The Happy Prediction of an American Official

London, March 16—Mr. Healy, United States Commissioner of Immigration in British Columbia, interviewed by a representative of The Manchester Guardian on the anti-Chinese policy of Canada, said there were many local Chinamen of prominence who predict that now the new law is in force the Chinamen in Canada will eventually disappear almost entirely, as in spite of the meagre policing of the border, they will eventually find their way to the States, and the $500 a head will prevent more coming into Canada.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co

GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, - - - - - - Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material,

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

PROSPECTUS

THE COLORADO AND CONNECTICUT
GOLD MINING COMPANY
(Incorporated under the laws of South Dakota.)
Main Office: MERIDEN, CONNECTICUT.

Capital $400,000. 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM C. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES.

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hinsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 527 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6.40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000) About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J. Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.
or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been shown for a great many years and a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St.; San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

LAND SKIRMISH IN KOREA

THE JAPANESE WERE BADLY SCATTERED

Story as Told by the Russians—Jap Cruiser Reported Damaged

St. Petersburg, March 14.—General Zilinski telegraphs as follows, under yesterday's date;

"On march 7 our patrol discovered four of the enemy's posts on the Chongchengang River, and a troop of cavalry acting as scouts near Patetchen, north-west of Anju.

"A Japanese cavalry patrol fell into an ambuscade prepared by our patrol and were dispersed, losing one killed. The Japanese left behind them a quantity of gun-cotton and some swords and blankets.

"The population of Manchuria is quiet.

"On the night of March 11 the enemy's ships explored Helena Bay and the shore opposite Strutchine with searchlights.

"According to information which has been verified, the Japanese have not made any attacks north of Gensan.

JAPANESE CRUISER DAMAGED.

Port Arthur, March 14.—Two Russian passengers of the steamer Algun, captured by the Japanese off the coast of Corea Feb. 7th and taken to Sasebo, have returned here. The passengers state that while at Sasebo Feb. 11th, while on board the Toso Maru, to which they had been transferred, they saw the Japanese cruiser Asama being towed into that port. The Asama was without smokestacks, masts or bridge, and her decks had been ploughed up by projectiles.

WAS TOGO BLUFFING?

London, March 15.—The correspondent of the Daily Telegraph at Yinkow says; "Vice-Admiral Makaroff has issued orders to the effect that the saving of coal is unnecessary, but that the big gun ammunition in the forts must not be wasted. Evidently this ammunition is running short."

The Daily Telegraph's Tokio correspondent sends an unconfirmed rumor to the effect that Japanese marines have landed and occupied Dalny.

It may be remarked that the British newspapers all regard Vice-Admiral Togo's report that he has laid mines at Port Arthur as a mere bluff, and they say that such a feat would be impossible under fire.

The London Daily Mail thinks that if Vice-Admiral Makaroff closed the channel it was in order to prevent the ingress of Japanese torpedo-boat destroyers, as the Chinese did at Wei-Hai-Wei during the Chino-Japanese war.

It is a subject of unceasing remark and conjecture that nothing has been heard of the Vladivostock squadron and it is beginning to be believed that it is really inside the harbor of Vladivostock.

The Standard's Tokio correspondent says that, according to a despatch from Gensan, the Russians are believed to be withdrawing from the north-east frontier of Korea and concentrating at Vladivostock.

GALLANTRY REWARDED.

Tokio, March 14.—Engineer Minamisawa, the heroic officer of the torpedo-boat destroyer Kasumi, has been honored for his gallantry in the last action of Port Arthur. He has been given the Order of the Kyte, the Order of the Rising Sun, and promoted from engineer to chief engineer. The Order of the Kyte is the Japanese equivalent to the British Victoria Cross. Chief Engineer Minamisawa is the first to whom the Kyte has been awarded for heroism in war. It is improbable that he will survive his wounds.

PORT ARTHUR BADLY DAMAGED

New York, March 14.—The Herald has the following from Tokio—

A council was held at military headquarters this afternoon and was attended by Field Marshal Yamagata, Count Katsura, Marquis Oyama and Baron Yama Moto, General Terauchi, Baron Kodama, Baron Komura, Count Maouye and Marquis Ito.

A report has been received that serious damage was inflicted on the defence of Port Arthur during the attack on March 10th. A number of guns were observed to be dismounted, and the garrison was driven out of the works by the Japanese bombardment, while the European quarter of the town was in flames.

Four Russian torpedo boat destroyers inside the harbour were out of action, having been deserted by their crews.

London, March 15.—The Times has the following from Seoul, via Wei-Hai-Wei;—The civil influence which Japan has brought to bear upon Korea is not less remarkable than the military precision for which it paved the way. From Chemulpo to Seoul every controlling influence is Japanese, railway, police and telegraphing. Japan must have been laying the foundation of the present occupation for many months, and it only remained for her Minister at Seoul to produce, as with a magic wand, sufficient backing from an armed force to defeat the more clumsy machinations of the Russian representative, M. Pavloff.

The Korean Emperor is said even now, since the signing of the protocol, to have been detected in secret communication with M. Pavloff. Any such proceeding might provide the Japanese with a welcome pretext for strengthening their hold over the country. For the present, however, their attitude is not one of overbearing coercion. On the contrary, everything is being done to conciliate the Koreans. Forcible coercion would be the last expedient, and, in my opinion, will never be necessary. Hitherto there has been no maltreatment of the inhabitants by the army of occupation.

A plot was reported to be on foot in Seoul, when the Japanese troops went north, for denuding the capital of its garrison, but I doubt whether with the tangible proof of Japan's power in the Russian warships sunk in Chemulpo harbor, this story is worthy of credence. But, really, court plotting is practically chronic at Seoul.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 9000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $380,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE
BRET HARTE GOLD MINING COMPANY
IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SOLE AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

Catarrh Leads to Consumption

The Experience of a Lady in Sydney Who was Cured of Consumption by Inhaling Catarrhozone — This Case Should Warn Others.

"The beginning of my trouble was a cold. just a simple cold," writes Mrs. R. V. Thorburn, of Sydney. "I neglected this cold and then I got catarrh. When it became troublesome I took some medicine but it didn't help me. I began to cough a great deal and then consulted a doctor. I was horrified to find I must have had tubercular irritation in my lungs for a year or more. A friend strongly urged me to use Catarrhozone. I conferred with my doctor and he said that lots of fresh air and the frequent use of Catarrhozone would be the proper treatment. I used to cough for at least half an hour in the morning but after using Catarrhozone a few days my cough was much easier. The irritation gradually left my throat and I commenced to get better. I kept up the Catarrhozone treatment and inhaled the medicated air five minutes every hour. I believe this was the means of staying my disease, for I got quite well again in a few months. I have since advised other sufferers from catarrh and lung trouble to use Catarrhozone, and in each case good results were obtained. I attribute my recovery entirely to Catarrhozone, which I can honestly recommend in the strongest way."

The foregoing experience should convince everybody of the evil of allowing colds to develop. To neglect catarrh is even worse. Carry a Catarrhozone inhaler in your pocket and use it occasionally. It prevents colds, permanently cures every type of catarrh, and is known to be the only remedy that actually kills the germs of consumption.

Catarrhozone is used by all intelligent physicians and is endorsed by thousands of doctors, because it can be relied upon to absolutely cure catarrh, bronchitis, throat and lung trouble. Catarrhozone is simplest, surest and best remedy. Two months treatment guaranteed to cure. Price $1.00, trial size 25c., at druggists or N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont. Refuse a substitute for Catarrhozone and insist on getting it when you ask for Catarrhozone.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Refrigerator For Sale

A refrigerator, in good order, for sale at a bargain. Just the thing for a private family.

Awarded Fifth Prize

In a competition open to all Canada for the best dressed window advertising Dr. Chase's medicines, the prizes have been awarded. Fifth on the list is the window of Mr. Nugent, town, which was dressed by Mr. A. A. Fowler. Great credit is due to Mr. Fowler for his success.

At Bethany Tabernacle

Mrs. McDuffie, who has just returned from Africa, will tell the story of her missionary labors in the Soundan, in Bethany Tabernacle, this evening. The service promises to be a most interesting and helpful one. Everybody is cordially invited, and all interested in Missions are particularly urged to be present.

Boy's Story Untrue

We are pleased to state that the story published in yesterday morning's Times, regarding the alleged desertion of a ten-year-old boy by his father, is purely a fabrication. The lad is an incorrigible boy, with whom his father has had much trouble, but he is at home again, and if he does not behave, his father will have him sent to a reformatory. The mother and rest of the children are at their home on Sherbrooke street, and not at Norwich, as was reported yesterday.

MARRIED

QUANTRILL—GILMER.—At Starkville, on March 2nd, by Rev. J. G. Lewis, Peterborough, Mr. James W. Quantrill, Kendall, and Miss Eliza Armina, daughter of Mr. Wm. Gilmer, Starkville.

—"Good marnin' " Today is St. Patrick's Day.

The attendance at the
Peterboro' Business College
is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of these graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.

WM. PRINGLE,
Principal

World's Fair St. Louis Mo. April 30 to Dec. 1

Can you realize what a Fifty Million Dollar Exhibition is? Over 500 distinct buildings, 15 of them "Giants" filled with exhibits. What an education for your son and daughter, and no doubt last opportunity for many years for witnessing such a sight. Rates from Peterborough, $21.50 for 15 day ticket; $28.70 for 30 day ticket; $34.40 for season ticket. Grand Trunk is the route and will allow stop-over at Detroit and Chicago, and Canadian points. Information at the City Ticket Office.

Mr. D. J. De Vine Injured

Mr. D. J. Devine was the victim of a very painful and probably serious accident at Lindsay on Tuesday. He accompanied the T.A.S. hockey team to Fenelon Falls and from there they drove to Lindsay. As Mr. Devine was leaving the bus to enter the Simpson House, he picked up two grips, and was stepping from the icy road to the sidewalk when he missed his footing and fell, with the result that a small bone at the base of the spine was fractured. Dr. Collison was summoned, and Mr. Devine given every attention. His many friends join in wishing that his recovery may be speedy.

Anniversary Festival

The anniversary festival of the Park street Baptist church will be held this evening. The children will be given a supper at six and later a concert will be given. There will be songs, choruses, duets and solos vocal and instrumental, by the children. Interesting ceremony of presenting the trustees with a handsome sum, the school's share towards the purchase of a lot for the new church. Great interest prevails amongst the children and parents, and the church will fill a long time before 8 o'clock, so come early to secure standing room. There will be a silver collection at the door for all who are not from the Sunday school. Program begins at eight.

Prentice Boys Meet

On Friday, March 11th, Jubilee Lodge, No. 7, 'Prentice Boys, held a reorganization meeting in the Forester's Hall, George street. The following officers were installed;

F. Reynolds	W.M.
G. Macdonald	D.M.
G. Baker	R.C
J. Robertson	F.S.

W. Libbie	1st Com.
C. Leslie	2nd Com.
Geo. Pogue	3rd Com.
J. Harper	4th Com.
H. Hooke	5th Com.

THINGS GENERALLY

BY AL JONES

An American newspaper says,—"What is needed at every educational institution is a chair of good manners. Either establish that or arrange when the students go away from home in a body that they travel in stock cars, and eat and sleep in stock yards at their destination.

"A basketball team from a Topeka college went to Emporia last week and stopped at Mit Wilhite's hotel. They emptied out all the sugar at the tables and put salt in the bowls, and the other guests, not knowing it, spoiled their coffee. They stole the numbers off their room doors, and made such a racket all night no one in the hotel could sleep.

"One student appropriated Wilhite's calendar, and the hotel man sent an officer over to Topeka to arrest the young man for theft. It cost him just $40 for the lesson.

"In Topeka last night, when seven colleges were represented in an oratorical contest, there were fights and rushes at the Auditorium, curtains were pulled down and window lights kicked out. The police refused to stand for it, and showed their colors. The result is that a number of young 'gentlemen' went home with bruises, scratches, sore heads and black eyes.

"Either establish a chair of good manners or keep the boys at home. Parents cannot afford to have the teachings they have given their children thrown away by the corrupt influences met at college." This state of affairs, we may inform our Yankee friends, does not exist in Canada.

• • •

Everyone who has a strain of Irish blood is his veins will wear a bit of green ribbon or a shamrock leaf today and thousands of Irishmen will parade in honor of their titular saint. Yet, in spite of all this preparation for the welcome of the great day, the extent of the knowledge of most people in regard to good St. Patrick includes the fact that he is the patron saint of Ireland, and, according to popular tradition, drove the snakes out of that country—and there it stops. How he became the patron saint, and why the shamrock is so closely connected with him, but few seem to know. And yet a true Irishman will tell you that if it were not for the great saint Ireland would probably never have had the shamrock as its emblem.

History has not revealed whether St. Patrick came from France, Scotland or Ireland, the three countries to which are attributed his birth, but the fact remains that, wherever he was born, he devoted his life to the welfare of the people of Ireland, and they, and those of their blood in this country, are the only people who celebrate his day, and who have any memorials of him, the most noted being the church that bears his name in Dun-Patrick.

Men have come into the world, attained distinction, and their memories have been commemorated for some centuries, but none of them has left a more lasting impression than the "Apostle of Ireland," the memory of whose good works is renewed every 17th of March.

• • •

The curling season is now about over, and the local enthusiasts will regret that Scotland's great game cannot be continued in the "good old summer time." Even the oldest of our citizens have shown great skill with the "stanes," and some are so much in love with the game that they play without any thought of their "terrible rheumatics." The old veteran curler, Mr. Wm. Croft, defeated Mr. Harry LeBrun's rink on Monday evening and now he is again looking for trouble. Mr. Croft makes some fine shots and can "hit 'im on the bosom" every time. "Crack an egg on that," now.

—Mr. John Butcher received a consignment of Irish shamrock from Cork, Ireland, yesterday morning.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Spring, gentle sp——. Police!

—There was no Legion service at St. Luke's church last evening.

—Grumble if you feel like it, but remember that July and August are coming.

—About 35 of the members of the Peterborough S.O.E. went to Lindsay on Tuesday evening, to assist in conferring the White Rose degree in that town.

—The funeral of the late Sister St. John, daughter of Mrs. John Lynch, of this city, will take place this morning from Mount St. Joseph to the Roman Catholic cemetery.

—The man who abandoned his ten-year-old boy at the G.T.R. station the other evening, goes by the name of Schweier, and is employed as a mechanic at the Canadian General Electric Works.

—If this last cold snap were winter's dying kick, we wouldn't mind much, but experience has taught us to suspect that there may be another kick coming.

—Mr. Wm. Snowden was presented with a pair of curling stones yesterday by a number of friends. Mr. Snowden was 71 years of age and his friends took this opportunity of showing their esteem.

—Mr. R. H. Leary, our enterprising liveryman, returned on Tuesday evening from Colborne, where he purchased from Mr. Jas. Thomas, the well-known horse breeder, a fine team of hackneys, for which he paid $450.

—Mr. John Gooley, of Chandos, is in town on the petty jury. He says it is almost impossible to get around in his vicinity. "If spring don't soon come feed will be very scarce in our parts," remarked John.

—The handsome, elegantly equipped store of Messrs. Richard Hall & Sons, presents a busy appearance these days, owing to the preparations for the grand spring opening next week. A large consignment of beautiful carpets and rugs has been received and many other attractions are being added.

—Mrs. McDuffie, who has just returned from Africa, will tell the story of her Missionary labors in the Soudan, at Bethany Tabernacle tonight. The service promises to be a most interesting and helpful one. Everybody is cordially invited, and all interested in Foreign Missions are urged to be present.

—Last evening, about 9 o'clock, a disreputable looking character was noticed standing in the shade of a tree on Murray street. For over an hour he stood there, and several ladies in passing were greatly frightened. As his actions were of a suspicious nature, the people of the neighborhood have strong suspicions that he is a second "Jack the Hugger," and a second visit to this street will result in a change in his health.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. D. Armstrong is in Toronto for a day or two.

—Mr. and Mrs. S. Stinson have been visiting friends in Lindsay.

—Mr. Ab. Davis, of Cavendish, visited Peterborough yesterday on business.

—Mr. G. H. Giroux, of Peterborough, was in town on Tuesday—Lindsay Post.

—Miss Emmerson is visiting friends in Peterborough. — Bowmanville Statesman.

—Mr. Lee Ketcheson was in Peterborough yesterday on business.—Belleville Intelligencer.

—Mr. John Turner and Mr. Wm Conway, of Bridgenorth, are in the city on business.

—Mr. A. Frost, of Montreal, is visiting his brother, Mr. R. J. Frost, of this city.

—Mr. J. J. Lang, of Peterborough paid our town a visit on Tuesday.—Lindsay Post.

—Mr. and Mrs S. Stinson, of Peterborough, visited friends in town Tuesday.—Lindsay Post.

—Mr. Geo. K. Martin, inspector of the London Life Insurance Co., went up to Lindsay last night on a business trip.

—Mr. W. R. Bamford, of the freight department of the C.P.R., Toronto, was in town yesterday on business.

—The many friends of Mr. R. N. Jolliffe will regret to learn that he is suffering from an attack of la grippe. We trust his recovery will be speedy.

—Mr. John Hart, of the staff of Dundas & Flavelle, Lindsay, was in town yesterday, having recently returned from his semi-annual trip to England in the interests of his firm.

—Mr. J. J. Doughty, of Peterborough, was in town Tuesday in the interests of the Peterborough Cold Storage and Provision Co. He reports the sale of stock in this new enterprise as being very gratifying to the directors.—Lindsay Post.

—Mr. S. J. Sharp, Toronto, Western Passenger Agent C.P.R. Company's Atlantic Steamship Lines, was in Peterborough on a business trip yesterday. Mr. Sharp says the outlook for trade this season was never better.

SANTAL-MIDY
Standard remedy for Gleet, Gonorrhoea and Runnings IN 48 HOURS. Cures Kidney and Bladder Troubles.

When a woman gives up it is because she has gone to the utmost limit of strength and endurance. It is a marvel how women will stagger on under the daily household burdens when the whole body is racked with pain.

For the nervous, run-down condition which so many women experience, as a result of overstrain in household cares, there is no medicine can equal Dr. Pierce's Golden Medical Discovery. It strengthens the weak stomach by curing diseases of the organs of digestion and nutrition. It purifies the blood of poisons which cause rheumatism and other painful diseases. It nourishes the nerves, and builds up the body with sound, healthy flesh.

There is no alcohol in "Golden Medical Discovery" and it is entirely free from opium, cocaine and all other narcotics.

Accept no substitute for the "Discovery." There is nothing "just as good" for weakness, nervousness and debility.

"I want the whole world to know what Dr. Pierce's medicines have done for me," writes Mrs. Helen Hardgrove, of Bangs, Knox Co., O. "I had many of the ills of woman's life. My lungs and throat troubled me besides, and I had rheumatism. About a year ago I had to give up work I was so bad. I had heard so much about your medicine I thought I would try it. I took four bottles of your 'Golden Medical Discovery' and 'Pellets,' and by the time I had taken half of the first bottle I began to gain, and kept on getting better. And now I have no more of my old ailments and am entirely cured of rheumatism. I feel like a new woman."

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

Russian Warships May Provoke a Protest from Great Britain--May Cause Serious Complications

Warships Search British Merchant Vessels

GOVERNMENT CONSIDERING THE MATTER

As to What Steps will be Taken to Prevent Such Operations.

Special to The Times.

London, March 17. — Answering a question in the House of Commons today regarding the movements of the Russian armored cruiser, Dmitri Donskoi in the Mediterranean, her searching merchant vessels, etc. after repairing at Suez, and as to what steps His Majesty's Government proposed to take to stop these operations, Premier Balfour, while admiting the great importance of the thing, said he must have time to inquire into the facts before he would be able to give a complete answer.

JAPANESE ROYALTY IN TOWN

INTERESTING INTERVIEW WITH MR. T. SAKAI YESTERDAY

Japanese Prince, Travelling Under Assumed Name—Hurrying Home to Enlist

Few of our citizens know that yesterday a Japanese Prince passed through Peterborough. Prince Nashimoto, of Japan, has been traveling incognito through the States and Canada and has signed himself as Mr. T. Sakai. Yesterday afternoon the Times received a despatch, stating that Mr. Sakai would pass through Peterborough, on his way to Toronto, from whence he intends leaving for the coast, to sail to Japan and take part in the present war.

A representative of The Times had an interview with the disguised Prince yesterday, and he proved most interesting. His command of the English language is excellent, and he expressed himself most enthusiastically in speaking of the present Russo-Japanese war.

The Prince is a captain in the infantry of the imperial guards and for the last year has been studying the French language in Paris. Accompanying Prince Nashimoto was Major Yamaue of the general staff, and Captain Inouye of the infantry, who has also been studying in Paris.

"What is your opinion concerning the outcome of the present trouble?" was asked.

"There can, in my estimation, be but one opinion, and that is that we shall win. Everything is in our favor and the bear will soon be looking for his winter quarters. Our army is not anxious to push things for a while yet. But when they do commence in earnest, you may expect to hear of the total defeat of the Russians.

"Yes, I am going home to enlist, and I shall have charge of a company of men. But I must away," he concluded, as he waved his hand from the car platform, as the train pulled out.

The Prince is a tall, stately young fellow, of more than ordinary intelligence, and speaks much after the manner of the French, using his hands freely, when expressing himself.

TRANSVAAL GOLD OUTPUT

A Large Increase Likely to Take Place This Year

London, March 18—Advices from Johannesburg state that the output of gold for last year comes slightly over $60,000,000, the highest since 1899, and excepting two years —1898 and 1899—the greatest on record. Still, with a good supply of labor, the production would have been much greater than last year.

Since the beginning in 1884, the Transvaal has produced about $540,-000,000 gold, not bad for twenty years. In 1884, only some $50,000 was got out. The million sterling was not reached until 1889, when output was $7,455,000. There was a rapid increase then until 1893, since which the figures have been as follows;—

1893	$28,245,000
1894	39,645,000
1895	42,880,000
1896	42,990,000
1897	57,880,000
1898	80,220,000
1899	78,910,000
1900	7,288,440
1901	5,072,430
1902	36,349,440
1903 (about)	60,000,000

In the years 1900 and 1901 the war almost stopped mining. With Chinese labor it is expected the output for 1904 may reach $90,000,000 to $100,-000,000.

Lecture To-night

Brigadier Pickering, of Toronto, who lectured last evening in the Salvation Army barracks on the life of the late Mrs. Booth-Tucker, has consented to give an account of the "Salvation Army in the Boer War," this evening. 3,000 feet of moving pictures will be shown along with numerous other views.

WEATHER NOTES

Sleet and rain.

ANOTHER RUSSIAN VESSEL BLOWN UP

Special to The Times.

Chefoo, March 17.—While entering Port Arthur yesterday, the 16th inst, the Russian torpedo boat destroyer Skorri struck upon an unplaced mine and was blown up. Four of the crew were saved.

Viceroy Alexieff wires a report confirming the Associated Press account of the damage done to Port Arthur during the bombardment of the 10th. He says the stoyry of a fire there is "a base fabrication."

Special to The Times.

London, March 17.—Despite the Russian assertions that all is well at Port Arthur, reports come from various sources which would sho that the town has suffered serverely by the bombardments. The Tokio correspondent of The Petit Parisien, of Paris, (a pro-Russian journal), telegraphs that, according to all reports, the result of the last bombardment of Port Arthur were more serious that at first supposed. Port Arthur has apparently been deserted by a large part of the population. Then a despatch from Yin-Kow, the port of New-Chwang, says; "The last bombardment of Port Arthur rendered ever part of the fortress of Port Arthur unsafe. Residents assert that fragments of Japanese shells fell everywhere, and that some railway coaches and buildings were destroyed, though most of the damage on shore was unimportant."

AMERICA'S FIRST THEATRE HORROR

Burning of Richmond Playhouse in 1811 When 200 Lives were Lost

STRUGGLE FOR ESCAPE

Conditions Were in Many Respecta Similar to Chicago's Tragedy

The following graphic description of the first great theatre disaster in this country has been sent The Times for publication and is taken from a volume of addresses to children and youth, as the title page has it, by the Rev. Robert Bray, an English clergyman, who visited America from 1810, to early in the spring of 1812, when he left for India. He made the burning of the Richmond theatre the occasion for a strong tirade against the evils of the theatre, and besought his hearers to "shun the theatre; avoid the haunts of Satan, the destroyer of your souls. Seek for real pleasure. Do not pursue the phantom of imaginary happiness." The clergy all through the country took up the cry, and for years the destruction of the theatre was proclaimed from many pulpits as the direct act of God, intended as an example to those who persisted in the sin of theatre going.

The fire took place on the night of the 26th of December, 1811. The theatre, which was built entirely of wood, and otherwise badly constructed, stood upon the brow of Shockhoe Hill and upon the very spot whichh is now the site of what is called the Monument church. On this night, particularly, a new play and pantomine had been gotten up, and a large and brilliant crowd of gentlemen and ladies of the very flower of the population, embracing the newly elected governor of the commonwealth and many citizens of wealth and fashion, were assembled at an early hour to enjoy the entertainments of the evening. It was truly a brilliant display; for some time all went on gaily and happily enough. The play was over—the first act of the pantomine had passed by—the second and last act had now begun—and all eyes were intently fixed upon the actor, who had come forward on the stage towards the lights and was moving to the music of the orchestra, when suddenly a bustling noise was heard from behind the scenes, towards the rear of the building. This, it seems, was occasioned by the fact that a servant, who had been ordered to hoist up a chandelier, in doing so had got the rope entangled, and jerking to clear it, had swung it against one of the painted scenes, which instantly caught fire, and sent up a sheet of flame to the roof. This was not plastered, but consisting only of rafters covered with light pine boards and shingles, very dry, it kindled at once; and the actors with their assistants, were trying to tear down the scenes, to put out the fire. This movement, however, was not immediately seen by the spectators, being hidden from their view by the imposing scene; and they were still watching the progress of the piece, when they saw a shower of sparks and burning matter fall upon the actor before them. At this some were startled, while others apparently thought that it might by only a part of the show. A moment afterwards someone exclaimed, 'There is no danger,' and only forced the sense of it more strongly upon their fears; when one of the performers rushed forward to the front of the stage and cried, 'The house is on fire,'—pointing at the same time to the ceiling, where the fire was now seen running like lightning along the roof. Instantly, all was horror and dismay. The cry of 'Fire!!' 'Fire!' rang through the building, mingled with the shrieks of women and children in frantic consternation. Husbands looked for wives—mothers for their children—while some, almost frenzied by the sense of danger thought only of themselves.

The Rush to Escape.

"There was, of course, a general rush of all at once to escape out of the house as fast as possible by the nearest way. Those in the pit easily got to the outer door, which was not far off. Those in the galleries also, or most of them, flying down the stairs, soon passed to the street. But the spectators in the box were not so fortunate. Some few of them, indeed, had leaped to the pit, and got out with the rest from that part, and a few others had been helped onto the stage, and hurried off the back way; while a small number still bravely kept their seats, only to meet the fate which they hoped to avoid; but the great mass of them, crowding tumultuously into the narrow lobbies in the wildest disorder, stopped each others progress towards the door, while the suffocating smoke, which soon filled the house extinguished the lights and stifled its victims; and the flames, which now flashed in lurid sheets, as they ran along the light wooden work of the boxes, caught the clothes of the fugitives in the rear, and wrapped them at once in palls of fire and death. Happy now were those who had reached the windows, where a stream of fresh air from without revived their failing senses and enabled them to hurry on for their lives, or escape perhaps to the ground. For by this time many of those who had got out from the pits and galleries were seen gathered in crowds below, stretching out their arms and calling on those within to leap into them for safety. Some did so from the first, and some even from the second story; and a number escaped in this way, while a few were either killed or shockingly mangled by the fall. Those, in the meantime, who had succeeded so far as to clear the lobbies, found themselves again stopped and straightened in the narrow angular stairs that ran from the boxes into the common entry, or pent up in the small passage at the bottom, where the only door which opened inwards had been shut by the rushing crowd, and could not be forced back for some time, even by the help of hands from without. Here, then, were some crushed to death by others, who, even less happy, escaped at last over their dead bodies, through the door now opened, but horribly scorched or burnt, only to die in the arms of their shuddering friends.

The House a Blaze of Light.

"By this time (although only six or seven minutes had passed) the whole house was in a light blaze, that brightened the windows of the houses far and near with its dismal light; the bells were tolling with almost appalling sound; and hundreds of citizens, roused from their beds, and alarmed for the safety of their relatives and friends, were rushing to the scene, but too late to save or find them. The rest may be imagined, but cannot and perhaps ought not to be described. There was no sleep in Richmond that night; but the voice of weeping was heard from many dwellings.

"The day after this awful occurence the common council of the city convened, and passed a resolution prohibiting all public amusements within the limits for four months ensuing; and a meeting of citizens was held in the capitol, at which it was resolved that the remains of the dead should be collected and buried together on the spot where they had expired; and that a monument should be raised over them to record the remembrance of their fate. And it was also determined that a day should be set apart for fasting, humiliation and prayer, in commemoration of an event, in which all who had any sense of piety could not but see and acknowledge that the hand of God had been most strikingly and affectingly displayed."

—It is probable that the Literary Guild Committee will be able to secure the services of the Rev. Mr Kilgour of Peterborough, a lecturer of considerable prominence, to lecture on *Monday evening*, March 28. If the committee secure his services it will be fortunate for he is a very popular speaker.—Hastings Star.

THE POPULATION FROM IRELAND

Mr. J. P. O'Brien Would Prefer to See Them Stay at Home

THEY CANNOT BE SPARED

Problem of Emigration Has Become Most Serious to Irish Statesmen

Montreal, March 18 — Canadian immigration is all very well in its way, but Ireland is beginning to awake to the fact that the constant drain upon its population by emigration is one of the many problems to be faced, and faced immediately. Canada and the United States are taking the best of our rising generation. What will be the outcome?

In the rotunda of the Place Viger Hotel yesterday, Mr. J. P. O'Brien, of Belfast, chatted with a press representative of the problems of his native land.

"There is a pronounced effort being made by the public men of Ireland to improve conditions to such an extent that emigration will be lessened. These efforts are already bearing fruit and the returns lately issued will, I think, show a gratifying decrease in the number of people who have left Ireland to make a home in other countries. We want our young men to stay with us; 'build up Canada,' is a good cry in its way, but the average Irishman would rather see Canada built up by some other class of settler than the Irish."

Mr. O'Brien seemed to be much amused when the recent coup of Mr. Redmond, in the House of Commons, was referred to. "It shows what the Irish can do when they like," he said laughingly. "The most unfortunate part of the affair was that the vote for Irish education was reduced by one hundred pounds and unfortunately the cause of Irish education needs that hundred badly. Mr. Redmond's joke was costly—but it was quite refreshing."

Mr. O'Brien is an ardent home ruler. He was of the opinion that in the event of the present government being defeated—and he seemed to think that was the inevitable fate of the Balfour administration when the appeal to the country was made—the Irish people would force the question of home rule to the front again. "Home rule is very much alive," added Mr. O'Brien. "The Liberal party is practically pledged to it, and it is bound to force its way to the front once again."

Speaking of the personality of Mr. Wyndham, the Irish Secretary, Mr. O'Brien said he had gained more than any of his recent predecessors the confidence of the Irish people.

Mr. O'Brien went west last night. This is his first visit to Canada

ESCAPE OF RUSSIANS

A Story of How They Leave Their Country

DASH FOR THE FRONTIER

Men Between 14 and 45 Not Allowed to Leave the Country

New York, March 18 —Of the 2,065 steerage passengers landed at Ellis Island, yesterday, 1,800 are Russians, many of them being refugees who fled to escape possible army service against Japan. An imperial edict several weeks ago suspended the issuing of passports to any male between the ages of 14 and 45, the prescribed period for army service, the result being a large exodus from all villages within reach of the frontier. Every possible ruse is being used to get across the frontier and escape to this country.

THRILLING STORY OF FLIGHT.

Several of the refugees gave interesting accounts of their departure from Russia. Alexis Kaplan, a drosky driver, with five companions, fled from the village of Vilna.

"On a Monday morning some three weeks ago," said Kaplan, "the news went around that the Czar had ordered all who were amenable to military duty to report to the proper authorities in their district to be listed for the draft. As soon as I heard of this I made up my mind to escape to this country. I have a wife and two children at home. If I was drafted into the army and went to the war they would surely starve. If I could get here I knew I could get work and earn money to send for their support until I can send for them to join me.

"With five of my friends, these men here, I left that night. I had saved a little money. Each of my friends had some, and we decided to stick together and buy or fight our way across the border. We reached the frontier just before daylight, and there found a military post. I went forward while my friends hid at a safe distance. When the soldier challenged me I found he was an old friend from my native village. I had a bottle of vodka, which I shared with him while we talked matters over. He finally agreed, for 12 roubles apiece, which we paid him, to turn his back while we made a dash across the line.

MAKE DASH FOR RIVER

"The border here is marked by a river about eighty feet wide and not very deep. After the officer in command of the post had made his rounds, the sentry gave us the signal and turned his back while we made a dash for the river. We plunged into the water, expecting to have to swim, but found that we could wade all the way across, although in the middle the water was up to our armpits. We made our way across country until we struck a railroad, and followed this until we reached a small station, where we took a train to Hamburg.

"While we were waiting to cross the frontier another party of 100 was waiting a mile farther up the river to get across. We met them again on the ship at Hamburg, and they are all here today on Ellis Island. It cost them 50 roubles ($26) apiece to get across. The steamship runner who sold them their tickets, took their money and made the deal for them with the sentries. These runners and agents are men who go around selling passage tickets on commission."

CHRISTIANS DETAINED.

Peter Stiboff, a young farm laborer and one of a large party of refugees, said;

"There were nearly eighty in our party when we reached the frontier. Sixty-five of us were Jews and the rest Christians. We were in the hands of an agent, who had provided us our passage tickets and guaranteed to get us out of the country without passports because of the war orders. The agent charged us 100 roubles for the whole job. He claimed that he must pay the sentries at the frontier 25 roubles for each of us to get across the border.

"When we reached the frontier we waited a couple of hours while he arranged matters with the soldiers. Then he lined us all up before the sentry, telling us to keep as quiet as possible until we were given the word, and then to run as fast as we could for Prussia. The soldier walked down the line and counted us. He made all the Christians fall out of the line, and the agent took them away. The soldier said he would not let any Christians escape, no matter what they paid. After they went away and he had counted us again, the soldier turned away, shouting, 'Now run,' and we did run, never stopping until we were well across the border. There are hundreds at every frontier post waiting for a chance to get away and come here to escape military duty.

RUSSIANS HAVE SUCCEEDED IN PUZZLING THE JAPS.

Tokio is Unadvised Regarding the Naval Plans and Movements of the Russians

Special to The Times.

Tokio, March 17.—Tokio is unadvised regarding the naval plans and movements of the Russians, and is in doubt whether the remnant of their fleet is still at Port Arthur or enroute to Vladivostock. Yesterday a telegram reached the the Navy Department saying that seven Russian ships had been reported as passing Port Lazareff. The report was not circumstantial. It did not give the character of the ships or the direction in which they were sailing. It is anticipated that the Japanese, by their activity, will speedily determine the whereabouts and intentions of the Russians.

ANNUAL MEETING OF W.A.

Yearly Report Shows Progress — Officers Elected

The 12th annual meeting of All Saints' Woman's Auxiliary was held in the school room on Tuesday, March 15th, when the reports of the last year's business were presented, and showed that the Auxiliary had done most efficient service to the church. Among the improvements undertaken by the ladies was that of having electric lighting installed in the church its lights having been placed in the sacred edifice. The school room has also been painted and kalsomined by the efforts of the Auxiliary, and in addition a large amount of work has been accomplished in the homes. Missionary enterprise has formed an important branch of the Auxiliary's work, and the ladies may well feel justified at the success of their efforts in this direction. Clothing has been provided and sent to missions in the newer parts of Canada the receipt of which has done much to make the lot of the unfortunates living in the more sparsely settled and often poorer parts of the country, easier.

A number of entertainments and teas have been held during the year, each of which has been highly successful.

The election of officers resulted as follows;

President—Miss Chamberlain.
1st Vice-President—Mrs. Hooper.
2nd Vice-President—Mrs. Londey.
Secretary—Mrs. Latimer.
Treasurer—Mrs. Gilbert.
P.M.C. Convenor—Mrs. Buller.
Dorcas Secretaries—Mrs. Cooney Mrs. Blois.
President of Junior W. A.—Mrs Blois.
Organist—Miss Bullen.

A GOOD OLD FOOTBALLER

A History of the Career of Mr. John M. Elliott

In its column of "Sporting Yarns" the Montreal Star has the following; "John M. Elliott, brother of the celebrated 'Chaucer,' has had a rugby experience of a quarter of a century, and it is doubtful if any one else in Canada has been as long at the strenuous gridiron game. He began the game in 1878 and last played in 1902. Mr. Elliott remembers well his first experience on the rugby field. He played full back for Queen's University when the game was first introduced into Kingston by A. Buntin, of Montreal, and Alexander Gordon, and Fred and Jackson Booth, of Ottawa. It was then the English game that was played. Mr. Elliott states that on the team with him were John L. Renton, of Kingston, and Capt. Duff, now in India. The Royal Military College team were then the opponents of Queen's and used to win everything, for some notable athletes were at the R.M.C. in those days. It was not until late in the eighties that Queen's were able to defeat the military men.

"After a lapse of some years, Mr. Elliott again appeared with Queen's, stepping out at a moment's notice, and without any practice for a long while, to play on the wing in the final match in Toronto against Ottawa College in 1884. The latter were able to defeat Queen's crippled team in that match only 8 to 7.

"When the Senior Kingston Granites were organized in 1898, 'Grandpa' Elliott again put on a uniform, and played with the team till 1902. He was one of the Kingston fifteen who broke the hearts of the Ottawa Rough Riders in 1899, by defeating them in Toronto 8 to 0 for the Ontario championship. Though up in the middle of the ladder of age, Mr. Elliott is not yet too old to step on the gridiron again and measure himself with any wing player in Ontario or Quebec."

Mr. Elliott is well and favorably known in Peterborough, and his brother, "Chaucer" has refereed many of this winter's hockey contests.

A SEEDLESS APPLE

Colorado Man Succeeds in His Wonderful Ideal

New York, March 18—A despatch to The Sun from Glenwood Springs, Colo., says;

"After experimenting for seven years John F. Spencer, an old fruit grower, of Grand Junction, Colorado, has succeeded in perfecting a seedless apple.

"The apple looks live a navel orange. Its inside is entirely solid, and there is a depression in the navel end very similar to that of seedless oranges.

"The tree on which the seedless fruit is grown is unusual in that it has no blossoms. Spencer will not reveal the secret of his budding and grafting."

EVERYBODY READS THE TIMES.

AN INTERESTING EVENING

At S. A. Barracks — Brigadier Pickering on Life of Consul Booth-Tucker

The Salvation Army barracks was crowded to the doors last evening, when Brigadier Pickering spoke on the life of Consul Booth-Tucker, that world-famed Salvationist who was killed in a railway wreck in the States last year. The meeting opened with the hymn, "I am a soldier of the Cross." Brigadier Turner, of Montreal, then introduced Rev. J. A. Wilson, B.A., of St. Paul's church, who began thusly; "It is a pleasure to stand upon this platform, for we feel that the Salvation Army is working with us, not against us." The splendid gathering here this evening shows what an interest is taken in the work."

Brigadier Pickering spoke at length on the exemplary life of the late Mrs. Booth-Tucker, and presented many beautiful pictures depictive of her life and travels. At the conclusion of his address he presented a series of moving pictures of the funeral procession, and when the pictures were being shown, the band played the Dead March.

A SUCCESSFUL CONCERT.

GIVEN UNDER THE AUSPICES OF THE T.A.S IN THE OPERA HOUSE LAST NIGHT

Entertainment Attended by a Large Crowd —Good Programme Rendered

Bradburn's opera house was crowded to the doors last evening at the T.A.S. concert, and all present thoroughly enjoyed the excellent program presented. The different performers were well received, and their selections were appropriate and no better concert could have been heard in any of the largest cities. The opening selection by the boys of the Separate school was grand, and reflected great credit on those who had the boys in training. Their marching was perfect and they received a well-merited encore. Miss Mae Clancy posses a magnificent voice, and her beautiful selections were much appreciated. Mr. Wilson was a favorite, with his comic selections, and his many original humorous stories were as good as has ever been heard in Peterborough. He was, of course, recalled each time he appeared. Mr. Mackie sang several times, and his wonderful voice touched the hearts of his audience, who loudly applauded him each time. The boy violinist, Harvey Gabans, played several fine selections. His command of the violin was wonderful and he responded to several encores. Miss Lewis and Mr. Mackie sang the beautiful duet, "Face to Face," and were recalled. Several little girls, Convent pupils, sang "The Little Minstrels," and they did remarkably well. Little Miss Nellie Callaghan was perhaps the most appreciated performer of the evening. Her beautiful solo, "Will My Soul Pass Thru Old Ireland," showed the child's remarkable vocal talent, and encore was just as well received. At the conclusion of her first solo, the pretty little Miss was presented with a beautiful bouquet of flowers. The entertainment closed with God Save The King. Miss M. McCabe was a most acceptable accompanist throughout the evening. The following was the program;

Opening chorus...... .... "Hibernia's Champion Saint, all Hail!"
Separate School Boys.
Vocal solo...... ...."Happy Days"
Miss Mae Clancy.
Humorous selection...... ...."Birds"
Mr. Wilson.
Vocal solo ... "Good Bye Sweet Day"
Mr. Mackie.
Violin solo...... .... Selected
Harvey Gabans.
Duet...... ...."Face to Face"
Miss Lewis and Mr. Mackie.
Humorous selection...... ....
Mr. Wilson.
Chorus... ... ..."The Little Minstrels"
Convent Pupils.
Violin solo...... .... Selected
Harvey Gabans.
Quartette...... ....
... ..."The Last Rose of Summer"
Misses M. and L. Clancy,
Messrs. Mackie and Legg.
Vocal solo...... ...."Will My Soul Pass Thru Old Ireland"
Miss Nellie Hallihan.
Humorous selection ... "Flanigan Did"
Mr. Wilson.
God Save The King.

A Touching Letter

A Peterborough alderman has received this letter from a constituent; "Deer Mr. Alderman,—Sum time ago I writ you asking if their was anything the council could do to make a fightin wife behave herself. I ain't heard from you and things is no better. Will you please let me know how I can get one of them big pisen snakes from Africky. I have always voted for you and this is mity little to ask of you, specially when a mans wife is always a pickin' on him."

THROUGH THE BATTLE SMOKE

There is much interest manifested in the report that the Russian main advance is crossing the Yalu, but this is not yet confirmed, and, according to The Daily Chronicle's Pingyang correspondent, all the Russian troops have left North Korea, 20,000 of them be concentrated at Kuliencheng north of the Yalu River, in Manchuria. A correspondent of The Times at Tokio says that the Russians are occupying an area having a forty-mile base from Wiju to Changtong, and extending south to the Pakchon River.

It is believed in New Chwang that the Japanese will soon attempt a landing in that neighborhood. Movements of Russian troops seem to indicate an expectation of such a move Most of the non-combatants are leaving the city. Norwegian sailors who have arrived at Shanghai from Port Arthur tell of the Japanese bombardment while they were in the harbor. They say the Japanese fire was very accurate, and tell of a large number of persons killed by exploding shells. These sailors repeat the story that the undamaged ships of Admiral Makaroff's fleet have left the harbor, and will try to join the Vladivostock squadron. However, it is believed that they were misled by one of the sorties carried out by the Russians

Unless the Japanese Navy Department is deliberately mystifying the world, their is still work for Japan's ships to do. The Department makes public a statement that seven Russians ships are reported to have passed Port Lazareff on Wednesday, the report failing to say anything as to the direction or character of the ships. Port Lazareff is near Wonsan, on the eastern coast of Corea, and is 350 miles from Vladivostock. Assuming that seven Russian ships actually passed Port Lazaraff, and that the story is not a premature April fool joke, they must belong either to the Vladivostock squadron, which might muster seven if accompanied by destroyers, or the Port Arthur squadron, rumors of the escape of which are still in circulation. That these ships should put in near Wonsan in the hope of finding Japanese transports landing men, is not unlikely, for the smashing of heavily laden transports might cost Japan thousands of lives without serious risk to the attacking squadron.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. I would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $3 per year, strictly in advance.

PETERBOROUGH, MARCH 18, 1904

ARE THE ODDS AGAINST JAPAN?

If it took the British empire, with 300,000 people, three years to subdue the 300,000 Boers in South Africa, how long will it take the Russian empire, with only 140,000,000 people to subdue the 40,000,000 Japanese? The answer is—378 years.

If 40,000 British soldiers were killed in three years in the Boer war, how many Russian soldiers would be killed in 378 years' war with the Japanese?

The answer is—5,040,000 men.

If the cost of the Boer war to Great Britain was $1,115,000,000, how much would a 378 years' war cost Russia?

The answer is—$140,490,000,000.

The above figures, which any boy or girl in a high school can easily verify, are not to be taken as prophetic. The Russo-Japanese war will probably be a forgotten horror in the twenty-third century.

But the Boer war, with its great expense and loss of life, with its long delays and setbacks, clearly proved that it is no easy task for a large nation to subdue a small one.

The Russians are said to be three to one. This is not a correct statement. It must be remembered that Japan is a united nation, while Russia is composed of thirty or more different nationalities. Every Japanese is ready to fight for his country, but there are many Russian communities that would sooner fight against Russia than for her.

For instance there are 6,000,000 Jews in Russia. Is it likely they they will be willing to die to save the Czar? Are they not to be counted as an element of weakness and not an element of strength in the Russian empire?

There are 3,000,000 Finns in the Russian empire. Within the last two years their political liberties have been restricted, and the whole of Finland is alive with the spirit of revolt. Is it likely that the Finns will be enthusiastically patriotic during this war?

There are 12,000 Poles in Russia. It is probable that they will be about as loyal to Russia as the Boers are to Great Britain. The Pole may be compelled to carry arms, but no one can expect him to fight with vim and enthusiasm under the Russian flag.

Then there is Tolstoi. He alone counts for several millions. He does not believe in war. He will not fight, even in self-defense. No one can tell how widely his doctrines of non-resistance have spread among the Russian peasantry.

Out of every hundred Russians therefore, there are about twenty who cannot be relied upon. It may even be said that some of the twenty sympathize with Japan. In the remote Siberian villages, where the Russian exiles—500,000 of them—are confined, it is not likely that there will be any parades in honor of Alexieff.

It is true that Russia is of enormous size. But in the present war this vast bulk is a hindrance instead of an advantage. Many a war has proved the worthlessness of mere bulk or mere numbers. The history of the defeat of the Spanish Armada would be interesting reading just now to the Japanese.

One-eighth of the Russian empire consists of thick forests. One-quarter of it is like the northern part of Canada—fit only for the reindeer and polar bears. In fact, if the Russian empire were whittled down to what is fit to live in, it would not be much larger than any other European country.

Therefore the present contest is not so unequal as many people think. The probability is that after several hundred thousand soldiers have been slaughtered, a compromise will be arranged. There can be no doubt that the price of peace will be one that will "stagger humanity."

A petition was presented to Parliament in Ottawa on Wednesday in favor of the Campbellford, Lake Ontario & Western Railway Company, for a charter for a line from the main line of the Canadian Pacific between Blairton and Ivanhoe, through the counties of Hastings, Peterborough and Northumberland, to Cobourg, thence through Northumberland, Durham, Ontario, and York to a point on the Canadian Pacific between Locust Hill and Leaside Junction.

Does Tobacco Affect the Health?

In a Thousand Ways its Excessive Use is Injurious to the System. Causes Heart and Nerve Troubles.

That tobacco exerts a very decided influence upon the body is unquestionable. Thoughtful physicians prohibit smoking in convalescence just as they do in the formative years of youth, when the system is so susceptible to the action of narcotics.

In functional heart trouble the tobacco habit is often looked for as a cause, and many a smoker wakes up at night feeling all the terrors caused by a fluttering, palpitating heart.

If there is something wrong with your heart that makes you wake up with a start, you ought to take Ferrozone regularly, because it is the best heart medicine made. All the muscles and nerves about the heart are strengthened and given new force by Ferrozone, which is noted for its prompt cures of heart disease.

As a rule weak heart and weak nerves go together, so it is important that Ferrozone should be used until the nervous system is completely restored. From every part of America comes convincing evidence that Ferrozone possesses merit far beyond the ordinary. Its cures are lasting, like that of a well known merchant in St. Johns, Mr. Philip T. Drayton, who writes: "I can give good advice to everyone suffering from heart weakness. I was in a very low condition a few months ago, and was unable to work. Without any apparent cause I would jump and start. I could not sleep more than an hour without being awakened by pain and palpitation of the heart. I used different preparations, but found Ferrozone the best. It improved my general health, strengthened my heart and nerves, and enabled me to go to work again. Nothing else has ever helped my heart like Ferrozone, which has cured me perfectly. I would advise others troubled with either nerve or heart trouble to use Ferrozone also."

No one ever used Ferrozone without lasting benefits. It builds up weak people, nourishes the starved nerves, and tones up the muscles of the heart. Ferrozone is prepared in tablet form, and is simple and convenient to take; it is sure to help you.

Do not allow an unscrupulous dealer to recommend anything in place of Ferrozone, which will be mailed to to any address, price 50c per box or six boxes for $2.50, by N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

DISTRICT NEWS

FROM OUR OWN CORRESPONDENTS

KEENE.

—Miss Lila Bell, of Peterborough, is the guest of her cousin, Miss Lillian Bell.

—Mr. W. Grieves and N. McIntosh of Coldsprings, spent a few days with friends here this week.

—Mrs. W. Main and Master Gordon, of Peterborough, visited the former's mother, Mrs. Campbell, during the week.

—Mr. Melville Miller left on Friday last for Calgary. Before leaving the Hockey Club gave an oyster supper in his honor, at McFarlane's restaurant, when a very enjoyable time was spent. Speeches were given by Messrs. McIntyre, Dixon, Mr. Miller and other members of the club.

—Misses Mabel and Pearl McCann spent a few days with friends in Peterborough this week.

—Mr. J. M. Drummond, Township Clerk, met with a painful accident on Friday last. While unloading a large block of ice, he slipped, and the block fell on his chest and hand, causing some painful bruises.

—Mr. Wm. Weir, cheesemaker, treated the patrons of Long factory to an oyster supper and dance on Tuesday evening.

—It is not known who will be Mr. Wallace's successor as principal of the Public School.

—Messrs. McCamus and Bryce have about finished the alterations to the interior of the town hall.

—The ball given by the Improvement Society on Thursday evening, March 17th, was a decided success. The balance, after paying expenses, will go towards paying for the improvements to the hall.

Mostly Men.

The writer, a Manitoban, and an Anglo-Indian bound for Penang were seated in the smoking-parlor of a Canadian Pacific Pullman car. The Manitoban was a cheery optimist; the Anglo-Indian a pessimist with a liver, who said he believed Canada's future lay with the United States. This my Manitoban resented, and when the Anglo-Indian ended a remark with a pious hope that Manitoba might some day be a desirable country, in spite of her severe winter, my Manitoban did not try to conceal his contempt.

"Huh!" he ejaculated. "I tell you, it's pretty prosperous right now, sir, winters and all, and don't you forget it. A fur coat's a lot cheaper than malarial fever anyway." (The Malay peninsula had been described.)

"Oh, yes! it's prosperous enough I dare say," replied the Anglo-Indian disdainfully; "but really when you talk of the Canadian North-West supplying the British wheat market . . ." and he shook his head pityingly.

"See here," said my Manitoban, "how much wheat did Great Britain import in 1902, anyway?"

The Anglo-Indian shook his head again. "Really," he began, "I'm not able to state offhand——"

"Well, I am," interrupted the other. "Great Britain imported in 1902 one hundred and fifty-one million bushels of wheat. In 1902 Manitoba's crop of all grains was one hundred million bushels, and the total wheat crop was fifty-three million bushels."

"And how much of that fifty-three million bushels found its way to England?" asked the Anglo-Indian sarcastically.

"That's all right," nodded the Manitoban; "little enough, maybe. But I'm coming to that. During the year ending June 30, 1902, the whole Dominion exported to Great Britain twenty-five and one-quarter million bushels of wheat and three-quarters of a million barrels of flour out of a total export of twenty-six million bushels and one million barrels. Now, sir, that fifty-three million bushels was raised on two million acres of land. By 1910 Manitoba may have six million acres of land under wheat cultivation—the land is there all right—and similar conditions to 1902 would mean a crop of one hundred and fifty-nine million bushels, or the total consumption of wheat in Great Britain for last year. And take notice, please, I am not saying a word about the millions of acres of rich soil in the North-West Territories awaiting colonization."

"Why is there so much unoccupied land in Manitoba?" I asked, watching the Anglo-Indian ponder on the figures quoted as I spoke. "Are they 'free' lands?"

"No, sir," replied the Manitoban; "you bet most all the free land that's any good has been taken up in Manitoba. The railways, the land companies, syndicates, private individuals, own thousands of acres of land in Manitoba, and they are selling them every day, cheap, too."

"What do you call cheap?" asked the Anglo-Indian.

"Ten dollars to twenty dollars, £2 to £4 per acre," replied the other. "Why, land which is not nearly so productive in Ontario sells from $40 to $80 per acre. The West is still supposed to be 'wild,' I guess," and he laughed merrily. "Last year the official average of wheat per acre in Manitoba was given at 26 bushels. Take an average price of 50 cents per bushel, and you have a gross return of $13 per acre. Farming by figures is easy—and delusive—so let's cut this return in half (and that provides for every contingency except annihilation) and you have a gross return of $7.50 per acre, which leaves a profit, after expenses, sufficient to warrant the price of good lands going to $50 per acre within a year or two."

"And what is the reverse side of this picture?" asked the Anglo-Indian, interested in spite of himself.

"Oh, that's there all right," laughed the Manitoban. "We've had bad crops, frozen crops, dry seasons. We get a six months' winter, which is gen—u—ine winter, all right. In the early days we had to team our wheat twenty-five to fifty miles to market, and that was no picnic when the thermometer was at 40 degrees below zero. Then the mosquitoes in summer, they worry a tenderfoot some, and . . . oh, dang it! that's about all, I reckon. But still," and he waved his hand out towards the darkness, "I tell you, sirs, it's a fine country, whether it's yellow with ripening wheat or white under the bright winter stars. Its men are mostly men—those who count are—and its women know how to make a farmhouse on the prairie a pretty good place for a fellow to get home to. It's a clean, healthy life, gentlemen, and a man keeps young on the prairie a long time after he has passed the 50-mark.

"We're a long way from the center of things up here, I guess, and maybe we are a bit rough, but that doesn't count. I've often watched the twilight steal along so gently it's like a dream, and the Northern Lights shoot across the sky like a mist of flame. And it's good to smell the spring rains when they start the old earth into greenness, and to hear the houk! houk! of the geese overhead, saying they are pleased to get home to the Northland again. You bet, gentlemen, it's a good country to live in and work in, and I guess it's all right to sleep in when the work is well done. Here's my station, and I'll bid you good-night, and I hope I haven't tired you with my talk."

And the Manitoban stepped off the car as we pulled up at a station.

The moving train had resumed its steady thud! thud! thud! before the Anglo-Indian spoke.

"The Canadian Government mayn't know of him," he said, "but that man is the best sort of emigration agent they have got." He rose and yawned. "I think I'll turn in," he said. "Good-night."

But I sat and smoked for a while, thinking of the Manitoban and the life he had sketched. And the train rushed steadily forward through the night, and I thought of the unseen and as yet untilled prairie stretching to the horizon on either hand, and tried to imagine its broad acres peopled with "men who were mostly men."—H. T. Munn in "Outlook."

The Prodigal.

I bought my laughter with the coin of grief,
I paid for happiness as kings might do,
Yet, though I beggared go beyond relief,
Oh heart, the glad, mad spendthrift hours we knew!

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuoble. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 350 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

RUSSIANS ARE ANXIOUS TO SETTLE WITH JAPS

According to Recent Advices They Are Now Ready to Give Togo a Warm Fight Outside the Harbour

Warships Have Been Ordered to Keep Steam Up and Admiral Stark's Error Will Not Be Repeated

London, March 17—Interesting developments are liable to occur in the vicinity of Port Arthur at any moment now. Admiral Makaroff, according to recent advices, has assumed the offensive. He has caused four steamers, the Haroin, Hailar, Ninguta and Sungari, to be anchored in chosen positions at the entrance of the harbor, and then sunk, leaving a small channel available, and ordered the whole fleet to remain outside, with steam up, economy of coal being necessary. Such action is interpreted as indicating the intention to give battle to the Japanese, inasmuch as remaining at anchor outside inactively would imply a repetition of Admiral Stark's error and invite fresh disasters. The semi-blocking of the entrance is assumed to have been for the purpose of preventing the Japanese torpedo boat destroyers from entering, as they did at Wei-Hai-Wei in the war with China. That Rear Admiral Makaroff intends to force the fighting is, according to other despatches, the general conviction of the Russians at Yin Kow.

Since the appointment of Gen. Kuropatkin to the military command in the Far East and the recent councils of war at Mukden, it has become evident that the Russian plan of campaign has undergone a complete change, especially as the Japanese have not followed up their naval successes by active land operations.

This news which is prominently displayed by the London Daily Mail, and which the correspondent says is Russian information, is if true, news of the first importance, confirming the idea that Vice-Admiral Makaroff will make a desperate attempt to bring together Russia's scattered naval forces or endeavor to inflict damage upon the Japanese navy. This story must, however, be view cautiously, the only approach to confirmation being in a despatch from a correspondent of the Daily Telegraph at Yin-Kow, which merely says; "Vice-Admiral Makaroff has issued orders to the effect that the saving of coal is unnecessary, but that the big gun ammunition in the forts must not be wasted. Evidently this ammunition is running short."

The Daily Telegraph's Tokio correspondent sends an unconfirmed rumor to the effect that Japanese marines have landed and occupied Dalny. It may be remarked that the British newspapers all regard Vice-Admiral Togo's report that he has laid mines at Port Arthur as a mere bluff, and they say that such a feat would be impossible under fire.

The Daily Mail thinks that if Vice-Admiral Makaroff closed the channel it was in order to prevent the ingress of Japanese torpedo boat destroyers as was done at Wei-Hai-Wei during the Chino-Japanese war.

It is a subject of unceasing remark and conjecture that nothing has been heard of the Vladivostock squadron, and it is beginning to be believed that it is really inside the harbor of Vladivostock.

RUSSIAN FORCES WEAK

Port Arthur Dalny Poorly Equipped to Fight Japanese

Port Dalny, March 15—While traveling from the north I saw oceans of snow stretching off in every direction, suggesting the terrible hardships endured during the military concentration now going on. Below Mukden the snow had almost entirely disappeared and the plains were being cultivated by the Chinese. I passed through many miserable, dirty Chinese villages and open stretches of country calculated to make superb before it was fully born and to have been deserted by its parents. It has a deserted appearance. The leading officers who have been stationed at Port Dalny have gone northward, and the inhabitants are seeking by every available means to get away. Much murmuring and protesting are heard. The prevailing feeling is that Russia should have had more soldiers at Port Arthur, and other points on the Leao-Tong peninsula. The actual force there is not over 20,000 men. The people feel that this not only does not afford them sufficient protection, but discloses to the orientals the inferiority of Russia's military preparations.

SCOFFS AT JAP ATTACKS'

Russian Envoy Expects Makaroff to Rout the Enemy

Paris, March 15—The Russian naval attache, commenting on the Port Arthur bombardment of March 10, points out the similarity of the four Japanese attacks — destroyers by night and bombardments by day.

"These attacks are audacious, but always ineffective," he said. "The bombardments are always of the same fashion, at about the same hour, of about the same duration and in full daylight. Their strategy lacks variety. This probably is due to the comparative youthfulness of the Japanese naval organization.

"It is noticeable that Admiral Makaroff's report says that he hoisted his flag on the Novik, which had been represented as out of commission from injuries, and it is also notable that he says our ships are ready to resume the struggle. With Admiral Makaroff commanding we expect sharp, aggressive action."

The Japanese legation understands that Vice Admiral Togo, commander in chief of the Japanese squadron, directed the attack. It is said in this connection that during the bombardment of Vladivostock the Japanese fleet was temporarily divided, both sections remained under the command of Admiral Togo, with Vice Admiral Kamimura as second in command.

The King's Approval.

The King has approved the issue of **letters** creating the Seychelles (hitherto **a dependency** of Mauritius) a separate **colony**. The formal ceremony of publication has been postponed until November 7, when Sir C. Bruce, Governor of Mauritius, arrives. Mr. E. B. Sweet-Escott, the present Administrator of the group, will be the first Governor of the new colony. The Seychelles are among the hundred or more islands scattered over the Indian Ocean, which have hitherto been dependencies of Mauritius. They are between the parallels of S. lat. 4 deg. and 5 deg., 934 miles from Mauritius, 600 from Madagascar, and 970 from Zanzibar. Their total area is 50,120 acres and the population is nearly 20,000, the largest and most populous island being Mahe, which is about seventeen miles long and four to seven miles broad. Mahe was originally captured from the French in 1794, and on the capture of Mauritius in 1810 the whole group was formally taken possession of. The finances of the Seychelles were separated from those of the Mauritius in 1872 and in 1888 they were given a separate Administrator and Council, while in 1897 the Administrator was given the full powers of a Governor.

Mr. Balfour's Gallantry.

London Answers is responsible for the following:—Mr Balfour has a gallant way of paying pretty compliments to ladies. Driving through Kingston one day, he passed a huge red motor car that stood before an imposing mansion of grey stone. A young girl in a white gown sat in the car, and as the Premier glided by she bowed to him, and smiled. But the Premier did not appear to see her.

The young girl looked embarrassed, vexed. She bit her lip. She thought a moment. Then she took hold of the wheel of her machine, pressed with her small foot the bulb that made the horn toot gruffly, and swiftly she shot after Mr. Balfour.

Soon the great car overtook the carriage, and halted. The young girl, an old friend of Mr Balfour's, extended her hand, and, as he took it, she said reproachfully:

"You passed me a while ago without looking at me."

With a gallant smile and inclination of the head, the Premier answered:

"If I had looked at you I couldn't have passed you."

Praise for the Germans.

A special correspondent of The Times, who is making a tour of German commercial and industrial centres, and is writing a series of letters thereon, says in one of them:—The Germans appear to have grasped the fact that work is better done in a good than in a bad light, and great care is taken to secure it. Ventilation is also well managed. But the most striking feature of German factories is their clean, orderly, and well-kept condition. These qualities seem to be universal, and they extend to the dirtiest and most untidy departments. Outside the rooms German factories are well provided with sanitary washing and dressing accommodation. Baths are common, particularly shower baths with hot and cold water; and in summer they are much used. German employers certainly do a great deal more for their people than ours, or rather I should say that the practice of providing comforts and conveniences for them is commoner in Germany.

A Shorter and Faster Route.

On the coast of North Pembrokeshire the Great Western Railway Company are quietly carrying out a scheme with the intention of creating a shorter and faster route to Ireland. The scheme includes the construction of a breakwater 2,000 feet long. The material is obtained from the Clegwen rock, which shelters Fishguard Bay from the west, and the removal of this rock is necessary for the carrying out of the superintendent engineer's plans. As the result of one monster blast alone over 100,000 tons of rock were displaced. To receive the charge of 14,310 pounds of Chilworth gunpowder a T-shaped tunnel was bored into the base of the rock by means of drills worked by compressed air. The report of the explosion was comparatively feeble, but the upheaval of such an immense quantity of rock provided a magnificent spectacle, which was witnessed by hundreds of people.

Australian Military Forces.

The Melbourne correspondent of The Chronicle writes regarding the unification of the Australian military forces that what General Hutton has obtained the Government's assent to is practically this: The complete organization of (1) a mobile field force capable of being sent anywhere in Australia at short notice, and (2) a garrison force designed to defend the vulnerable spots in each State. Both these forces are composed of volunteers or militia acting under the instructions of some the professional soldiers who form the nucleus of artillery and garrisons required for fixed defences, the technical direction of forts and mines and a military tuition staff. The Australian field force will consist on a peace footing of 13,317 men and sixty guns, capable of expansion in time of war to 24,[illegible] men and eighty-four guns. The garrison force will be composed of 11,[illegible] men and twenty-six guns, exclusive of the rifle clubs, which now total over 30,000 men. Taking the two forces and the rifle clubs together it will be possible for Australia to put in the field or at her forts in time of war at least 68,000 trained men, made up, approximately, as follows:—

Field force	26,500
Garrison force	11,900
Rifle clubs	30,000
	68,400

With a physically fit manhood population of 700,000 to draw upon, the 68,400 trained men would become the backbone of an army of half a million men should invasion actually occur.

For the purposes of broad generalization the Federal army now stands divided into eighteen regiments of Australian Light Horse, thirteen batteries of Australian artillery, three field companies of Australian Engineers, and twelve regiments (three brigades) of Australian Infantry. Each arm is given an excess of officers in proportion to the peace establishment of privates. Peace cadres, with their full complement of trained officers and non-commissioned officers can therefore on mobilization in time of national emergency be expanded to war requirements without any danger of crisis through lack of efficient leaders.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.00 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $42.00 and $70.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitble Gold Mining Co.

R. C. LANE, President. P. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, *Flowery* and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Hale winze and the tunnel) of 2,[illegible] feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed and is in possession of the properties, and is now operating them. The sum of $1,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes, in this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires in a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 25-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE UNITED STATES TO FIGHT GERMAN EMPIRE

Russians Say a Great War is Bound to Take Place in the Near Future

THE CZAR WILL THEN BE ON SIDE OF KAISER

A Profitable Market in Russia Being Held Out as an Inducement—"More American Meddling"

Special to The Times.

St. Petersburg, March 17—The attitude of the United States public toward the combatant powers in the Far East and the sympathy of the American people and government for the Japanese cause provoke almost daily comment in the Russian press.

The Novoe Vremya sought to show a few days ago that a Russian victory in the present struggle would more advantageously affect the United States, and for that matter, British interest, than Japanese success. Manchuria and Corea in Russian hands, would, it was explained, simply mean that the Great Russian empire had at last attained the goal of 200 years of persistent effort and secured its extreme frontier for many long years to come. Russian energies would be peacefully diverted to the task of setting internal affairs in order, and there would be little desire or possibility of Russian industrial enterprise shutting out American or European trade from the profitable market of unmolested China or Corea.

Says American Correspondents Lie.

The pan-Slavistic organ Svyet indulges in another line of expostulation. "The American press," it observes, "continues its attacks on Russia, and its correspondents do not cease to send deliberately lying telegrams from the Far East. But on the other hand, the American government begins to display in some degree a more conciliatory tendency. It may be that this arises from the fact that in Washington they begin to realize that the American press has gone too far. It may be also that the tactless nature of the Japanese operations has disillusioned public opinion in the United States.

"On the other hand, the truthfulness of Russian accounts from the theater of military operations, the cool tenacity of the Russian people, and the firm resolve to carry the fight to a finish, have given Americans a respect for Russia. But as in America material interests are always put in the forefront, so in the present question the real or apparent modification of the American attitude is governed by material reasons. These are not one, but many, from a political point of view. The fear that the hostile nature of American and British behavior will force Russia to throw herself into the arms of Germany.

"It is known that military circles in the United States are convinced that their next war will be with Germany. They recall the Venezuela blockade. If the German fleet had been sufficiently strong at that time war would have broken out between Germany and the United States. Germany drew back, but she has not renounced her world policy nor her cherished designs on the weak South American republics.

"The truth concerning a furtively whispered treaty between Germany and Russia may be simply stated—it be absolutely untrue. But, on the other hand, there will be nothing to wonder at, if Americans come to think of it, if for her friendly services in the present circumstances, Germany should also bargain for services in the event of her war with the United States.

"Bismarck in directing hostility against Russia and organizing a coalition against France, established a Franco-Russian policy, and America may do a similar thing if she imitates Bismarck's policy."

"More American Meddling."

The circulation of an untrue report to the effect that the Washington cabinet had decided to support the protest of the commander of the United States gunboat Helena, now at New-Chwang, against the action of the Russian authorities in sinking Chinese junks in the channel of the Liao river, and that Washington would notify Russia that the neutrality of New-Chwang must be respected, has created something of a flurry.

The Novoe Vremya makes this the subject of an editorial article entitled "More American Meddling," in which it is contended that as New-Chwang is within Manchuria, and is only six miles distant from the railroad to Port Arthur, Russia has a perfect right to take defensive measures there and that unless the United States are seeking a cause of quarrel it would not insist upon supporting the protest of the commander. Fortunately a denial of this story reached here last night in time to head off what might have proved a fresh cause of irritation.

RUSSIANS HAVE 30,000 MEN IN PORT ARTHUR

And Are Provisioned for Twelve Months--The Japanese Losses

Special to The Times.

Paris, March 16.—The Temps correspondent at St. Petersburg asserts that a Russian army corps is descending from Vladivostock towards Corea. He adds that Port Arthur has a garrison of 30,000 men, and is provisioned for a year. The Russian Minister of Marine, the Temps correspondent further asserts, claims that Japan's losses, since the opening of the war, are four cruisers and five torpedo boat destroyers and the machinery of a 12,000 ton battleship seriously injured. The correspondent concludes his despatches with asserting that the concentrating of the Russian troops at Mukden and Harbin is considered as terminating the danger from the Japanese landing in the northern part of the Bay of Corea.

TEAR MEN TO ATOMS

Doctor Describes Effects of Japanese Explosives on Wounded

Seoul, March 17—I have had an interview with Dr. Wada, of the hospital at Chemulpo, where there are twenty-four men who were wounded on the Russian cruiser Variag, from the effects of the new Japanese high explosive shells. The fuse acts on contact with the water, clothing, or, in fact, anything. The bursted fragments range in size from a few centimeters in most cases to a pin's head. The exploding shell tears men to atoms within a small but undefined radius, outside of which it inflicts wounds which are generally slight.

On the bridge of the Variag, the captain and four men were struck by a bursting shell and a petty officer disappeared completely. Only an arm of Count Nirod was found. Sailors' flesh was torn from their leg bones. Captain Rudineff was only slightly wounded.

One sailor had 120 wounds from fragments of one shell. The concussion of these shells is benumbing and nerve-shaking, causing strong men to weep.

Dr. Wada recommends washing the bodies of the men and disinfecting their clothing before a battle to prevent pieces of cloth from causing the wounds to suppurate.

Marquis Ito is expected to arrive in Seoul Friday.

HOW THE JAPANESE KNEW

Had Spies to Watch the Building of a Russian Battleship

Washington, March 16—A story is being told which sheds an interesting light on the marvelous foresight and precaution that characterized the preparations of the Japanese for the present war. Some years ago a Japanese agent came to Philadelphia with a letter of introduction to a prominent Philadelphian who had traveled in Japan. This Philadelphian tells the story.

The letter was written by a Japanese official who knew the Philadelphian, and it stated that if he would help the bearer in what he desired the favor would be greatly appreciated. The favor was for the Philadelphian to simply introduce the agent to a first-class firm of detectives. This was done and the agent described as a responsible person. He had plenty of money, and a bargain was made with the firm, the latter to receive a large sum of money.

The detectives were required to dress in the clothes of laborers and secure work in Cramp's ship yard, and then to gather full information about the Russian battleship, Variag, then in early course of construction. This they did, and the Japanese government was supplied with every detail in the construction and armament of the Variag. The officials at Cramps do not yet know exactly how the Japs obtained it.

GAVE CONSTABLE THE SLIP

Boyd the Foot Runner Got Away While Officer Waited

Chatham, Ont., March 15—William Boyd, the well known foot-runner, escaped from the grasp of the law here today. This morning George Winslow, claiming to be a provincial detective, arrived in this city with a warrant for Boyd's arrest on a charge of securing $70 from a victim at Dunville Fair last fall. Winslow was warned that the man he wanted was an elusive customer. With the aid of the city police Boyd was placed under arrest. He asked permission of the provincial constable to go home and break the news to his wife. Arriving there he further requested permission to go out to the barn and lock his hen coop. Winslow again acceded and while he waited down below Boyd went up in the hayloft where the coops were supposed to be. He slid down a chute used for feeding the horses and slipped away. Detective Winslow has not seen his man since

PROSPECTUS
OF THE
U. S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - - Treasurer

Trustees

J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. [illegible]
MEN AND WOMEN.
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous.
Sold by Druggists, [illegible]

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000. 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B F BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM C. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 527 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000) About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine inthe near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS IN STMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for [illegible] per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price ha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

Anecdotal.

At a circuit dinner in Ireland a barrister was relating some shooting stories, and wound up by stating that he had once shot thirty-one hares before breakfast. "I don't doubt it, sir," remarked Lord Norbury, "but you must have been firing at a wig."

A Maine country doctor tells this story on himself:—He responded one night to a note left at his door by a farmer asking him to go as soon as possible to see his little boy, who was ill with a very bad cold. The doctor gave one look at the child and asked severely: "Don't you know that your boy is coming down with the measles?" "Yes," replied the wife. "I knowed it." "Then what in the world did you mean by saying he had a bad cold?" asked the doctor. The woman hesitated a moment; then, looking at her husband, she said, hesitatingly: "Neither me or him knowed how to spell measles."

A Nottinghamshire clergyman, in baptizing a baby, paused in the midst of the service to inquire the name of the infant, to which the mother, with a profound courtesy, replied, "Shady, sir, if you please." "Shady!" replied the minister. "Then it's a boy, and you mean Shadrach, eh?" "No, please your reverence, it's a girl." "And pray," asked the inquisitive pastor, "how happened you to call the child by such a strange name?" "Why, sir," responded the woman, "if you must know, our name is Bower, and my husband said as how he should like her to be called Shady, because Shady Bower sounds so pretty!"

An amusing story is told of President Loubet's humble brother-in-law, whom an enterprising interviewer called upon directly after the French President's election. "How did you take the news?" asked the interviewer. "Oh, fairly well; without any rejoicings, of course. Now, here am I, for example, an ironmonger; in what way do you suppose it will benefit me that my brother-in-law is President of the republic? Why, this very morning I received three letters from people begging me to get them Government tobacco shops. That is the only advantage that the election will bestow upon me. People fancy that I have influence, and I shall therefore be worried."

Andrew Carnegie tells a story of a Yankee in Scotland that illustrates well the imperturbability of the Scottish temperament. The Yankee, a bicycler, came to the shore of a lonely lake, and saw in a boat a man examining the depths of the water with a water telescope. The man conducted this examination languidly. He would pause every little while to light his pipe and to converse on the weather or some such indifferent subject with a friend who sat upon the bank, now reading a newspaper and now tossing pebbles idly into the stream. The Yankee got off his bicycle to rest, and in an interval of silence he said to the man seated on the bank: "What is your friend looking for? Oysters?" "No. My brother-in-law," was the reply.

Charlemagne Tower, the United States Ambassador to Russia, was talking at Atlantic City about the Russian moujik: "This naive fellow," he said, "is something like a boy and something like an Irishman. He is, as a rule, very simple, very kind. A typical moujik entered one day a railroad station. He approached the agent and asked when a certain train would leave for a certain place. The agent told him distinctly, and, seeming satisfied, he departed. But a moment later he was back again, and again he asked the agent the same question. 'Why,' the agent exclaimed, 'I told you that only a minute ago!' 'You did, truly,' the moujik answered, 'but it isn't myself that wants to know this time. It's my mate outside!'"

Senator Edmund W. Pettus of Alabama is eighty-two years old. A man called at his law office in Selma one day and wanted to read him a thirty-page abstract of a will. Senator Pettus said: "I am too old to listen to all that. Tell me in a few words the abstract's contents." "I prefer to read it to you," the man insisted. "Ah," said Mr. Pettus, "you have the author's vanity. You are like Barthe, the comedian. Barthe called on a dying man one day with a new comedy. He unrolled it. He said: —'Let me read this to you. You will laugh.' 'But consider,' said the other, 'I am a dying man.' Barthe, ignoring that objection, smiled and cleared his throat to begin. 'Consider,' the victim resumed, 'I have only an hour to live.' 'But to read my comedy will occupy only a half hour,' said Barthe."

At the Portsmouth luncheon to the United States squadron, United States Consul Swalm of Southampton, who was stationed at Montevideo during the war with Spain, told the following story:— "They were expecting the 'Oregon' during the Spanish-American war, and they also expected that she would be short of coal. He could not buy so much as a pound of fuel, but one evening a Scotsman came to his door and said: 'You want coal?' The Consul replied that he never wanted a drink as badly as he wanted coal at that moment. The Scotsman had no power to sell, but he pointed out that he had eight hundred tons on board, and said he pitied the American captain who could not put his ship alongside, take out the bags of coal and then 'cut the painter.' It so happened that the 'Oregon' did not call, but such an act of friendship which defied law and order touched his heart."

David Belasco was born in San Francisco and educated at Lincoln College. He said recently: "I remember a chum of my boyhood who was a great traveler. He used to entertain me during recitations with tales of his adventures by land and sea. 'Never go by boat,' he said one day 'from New York to San Francisco. They crowd those boats dreadfully. There's no comfort aboard them at all. This will give you some idea, David,' he went on, 'of the way the boats are crowded. In course of my last trip a mild mannered man approached the captain, and, in my hearing, said: "Skipper, can't you rig me up a berth somewhere or other? I have no place to sleep." We had already been two days out, and, therefore, the skipper said in a surly way to the man, "Sleep where you did last night and the night before." "I can't do it, captain," the other answered. "You can't do it? Well, why can't you?" "Because I've been sleeping atop of a seasick man, and he's got well now, and won't stand it any longer."'"

Mrs. Fines-Nue—I can congratulate myself that all my daughters have married well. Mrs. Lorgnette—H'm! All my daughters have married well twice.

First Farmer—Did they hev fire-escapes at the hotel where ye slept, Zeke? Second Farmer—No, but it was the most eckernomical tavern I ever seen. First Farmer—In what way, Zeke? Second Farmer—Why, they had a rope hanging in every room, so that you could commit suicide without wastin' the gas.—Philadelphia "Evening Telegraph."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $300,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS.
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY,

The Catarrhozone Dry Air Treatment

THE ONLY RATIONAL, SURE CURE FOR CATARRH AND DISEASES OF THE NOSE, THROAT AND LUNGS.

The only natural cure for catarrh is the dry air treatment which effects startling cures without resorting to drugs, dangerous snuff and cocaine mixtures.

Catarrhozone kills the catarrh germs, soothes and heals the sore mucous membrane, clears the air passages of the nose and throat, cures chronic catarrh that has resisted all other treatments.

The reason why Catarrhozone cures is because it really gets at the cause of the disease. No matter how remote or long standing your catarrh may be you can place perfect faith in Ferrozone. It is Nature's Cure composed of the most healing balsamic antiseptics known to medical science. Read the following:

MR. L. MURPHY, well known in West Medford, Mass., writes: "Catarrhozone cured my catarrh, after a score of doctors failed. I used to hawk and spit, my nose was continually stuffed up, and often I was sick at my stomach. Catarrhozone has removed every trace of catarrh from my system."

MISS EMMA PETERS, Highland Grove, N.S., writes: "I am more than pleased with the results from Catarrhozone. It cured me of the worst kind of nose and throat catarrh. Other friends using Catarrhozone are greatly pleased with it and agree that it is the only sure remedy for catarrh they ever used."

Mr. LAWRENCE KENNEDY, of West New Annam, says: "For three years I suffered from catarrh and throat trouble. I tried many remedies but they were of no avail. I got no relief till I tried Catarrhozone. Too much cannot be said of so valuable a medicine. I shall always recommend Catarrhozone to anyone troubled with catarrh; it is a positive cure."

MR. W. W. BEACH, of Chapman, Ont., who suffered for years from systematic catarrh says: "Catarrhozone is the best remedy I have ever used for catarrh and I have used a lot of them. Catarrhozone was exactly suited to my case."

No intelligent person can doubt the merit of Catarrhozone which receives more praise from Medical Journals, doctors and the public than any other remedy; it is certain to cure every type of catarrh, lung and throat trouble. Two months' treatment, $1.00; sample size 25c. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S. and Kingston, Ont. Refuse a substitute for Catarrhozone.

Refrigerator for Sale

A refrigerator, in good order, for sale at a bargain. Just the thing for a private family.

Funeral of Late Sister St. John

The funeral of the late Sister St. John was held yesterday, from Mount St. Joseph. The service was conducted by Bishop O'Connor, assisted by Rev. Dr. O'Brien. Many Lindsay friends were present.

Estimates for Peterborough

In the estimates just brought down by the Finance Minister, the following appropriations for public works in, and around Peterborough, were made:—Armouries, $10,000; dredging the Otonabee River at Peterborough, $6,000; Trent Canal construction, $100,000.

Will Visit Schools

The following ministers will be responsible for the school visitation this afternoon: Central school, Revs. Brace, Davidson, Jolliffe and Holah; George street school, Revs Lewis and Potter.

A Quiet Wedding

A very quiet, but pretty, wedding was celebrated at the Methodist parsonage, Water street, on Wednesday, March 16th, when Mr. Robt. Jones, of Marmora, was united in marriage to Miss Becca Paris, daughter of Mr. Jas. Paris, Toronto. Rev. J. C. Wilson, B.A., performed the ceremony.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. A trained school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.

WM. PRINGLE,
Principal

April 5th

Prof. Clarke, of Trinity College, Toronto, has kindly consented to give his famous lecture "People I Have Met," on the evening of April 5th, in the Y.M.C.A. Hall. A short musical programmme is being arranged and a most enjoyable evening is expected.

In Honor of Col. Buchan

On Wednesday evening the officers of the 57th Regiment held an informal dinner in honor of Col. Buchan, C.M.G., A.D.C., which was largely attended. Besides the officers, there were present Mayor Roger, Lt.-Col. H. C. Rogers, Lt.-Col. E. B. Edwards, and Messrs. T. A. S. Hay, W. H. Hill, J. H. McClellan. Patriotic speeches were delivered, the chief subject being the "Volunteer Service." The Colonel spoke briefly of the new armouries, which the Government intend erecting here, and remarked that their size would depend on the site offered by the city.

Court of Assizes

The principal case heard yesterday was that of William H. Haslem, Victoria Adelaide Haslem, Alfred H. Haslem, Florence May Haslem, Walter O. Haslem, Maud Louise Haslem, Margaret Haslem, administratrix of the estate of Wm. Haslem, late of Lindsay; brewer, deceased, are plaintiffs, and the Equity Fire Insurance Company are the defendants in an action brought to recover $2,000, the amount of an insurance policy on property on which plaintiff held a mortgage from the owner, J. F. Connell. The defendants claimed that damage to property referred to had been appraised at $1,012, which amount they were willing to pay. D. O'Connell for plaintiff, and Irwin and Jones, Toronto, for defendants.

Girls Must Roll Hair

Hon. Mr. Dryden has introduced a bill to amend the factories act. Among the provisions are that young girls and women shall during working hours wear their hair rolled or plaited and securely fastened up, so as to avoid contact with working machines, etc. The hours of working shall not be earlier than 7 a.m. or later than 7 p.m. Section fifteen is repealed, and there are substituted provisions with regard to proper lavatories and pure drinking water. Section sixteen is repealed, and for it are substituted provisions that the employer shall keep the factory in a clean and sanitary condition, that the temperature shall not be less than 60 Fahrenheit or more than 75, and that there shall be no overcrowding, the standard being 300 cubic feet of space for each employee. There are also provisions for the better protection of hoistways, hatchways, etc.

CONCERT AT ST. ANDREW'S

A Very Successful Concert Held Last Night—A Good Programe

The schoolroom of St. Andrew's church was well filled last night, when the annual concert under the auspices of the Daughters of Erin took place. This affair has been so successful in past years that it is now eagerly looked for by the public in general. This year no effort had been spared to make this the best yet, and the public who attended heard the best concert yet given under their auspices.

Rev. Mr. Potter occupied the chair and introduced the several strangers who took part in the entertainment. After the opening instrumental duet, the following program was rendered:

Solo.
"Rose of My Life".................Mr. Young
Reading.
"Biddy's Troubles".............Miss O'Neill
Solo.......................................Miss King
Reading
"The Bridge of Sighs"......Miss O'Neill
Solo.
"Rosy Darling".........Miss F. Miller
Violin solo.........Miss Ruby Jolliffe
Reading.
"At the Ball Game"......Miss O'Neill
Solo.
"There's a Land"..........Mr. Young
Solo.
"Sing Me to Sleep"..........Miss Mille.
Reading.
"Peter Patrick..........Miss O'Neill
Solo.
"The Arab's Ride"..........Mr. Young

Mr. Young is the newly appointed choir leader at St. Andrew's, and the way he rendered his selections last night, he has already made a host of friends and ensured his future success.

Miss O'Neill is not a stranger in Peterborough, having been here a short time ago, and has a large number of admiring friends in the city, and last night she even excelled her past reputation. Her selections were mostly of an Irish nature, in keeping with the occasion, and were rendered in perfect style.

Miss F. Miller, the well-known soloist, sang in her usual perfect manner, and her rendition of "Sing Me to Sleep" was one of the features of the evening.

Miss King's solo and Miss Ruby Jolliffe's violin solo were very much appreciated and were heartily encored. Miss Jolliffe shows remarkable talent as a violinist, and her selection was delightfully rendered.

On the whole the Daughters of Erin are to be congratulated on furnishing such an entertainment, and may we have the pleasure of looking forward to many more.

FEAST OF ST. PATRICK

Celebrated at St. Peter's Cathedral Yesterday Morning

The Feast of St. Patrick was duly observed at St. Peter's cathedral yesterday morning, when Mass was sung at 7 o'clock, and High Mass at 9 o'clock. The High Mass was celebrated by Rev. Father McColl, while Father Francis O'Sullivan, of Lindsay, preached the sermon.

The speaker began by expressing his pleasure of having the opportunity of addressing the Irish Catholics of the Parish of Peterborough, and at seeing so many venerable Irish men and women present who had laid the foundations of the parish. The speaker took for granted that the congregation was conversant with the life of St. Patrick, and dwelt rather on the effects of his mission to Ireland, and pointing out its beneficial results. In conclusion, he exhorted his hearers to imitate the example of the great National Saint, whose feast they were celebrating.

EVERYBODY READS THE TIMES

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Two weeks from today will be Good Friday.

—Kingston has thrown out the vertical writing fad. Next!

—Cheer up, the flowers will be blooming in fifty days.

—Albert Barkley fell on the ice yesterday and broke his leg.

—Those people who have been "spending the winter," etc., don't seem to be very good spenders.

—The Charlotte street choir practiced last evening, and great preparations are being made for the Easter music.

—To-morrow evening will be "Irish Night" at the Y.M.C.A., and an interesting programme is being prepared.

—Lives of Mormon saints remind us that when we have passed away Smiths will be on deck behind us multiplying every day.

—Mr. Overend, of the C.P.R. Hotel, has disposed of his business and the new proprietor is expected to take possession in a couple of weeks.

—Several complaints have been made of fast driving on Water street, and the police are on the look-out for the next offender.

—Our p.d. says: "It doesn't look as though spring would spring this spring like it sprung last spring when it sprang."

—Rev. Patrick Danehy, a cousin of Miss Hanlon, of this city, died recently in Minnesota. Deceased was well-known in Peterborough, having visited the city many times.

—Quite a number of local gentlemen interested were in Port Hope yesterday attending a meeting of the shareholders of the Peterborough Brewing and Malting Company.

—St. Paul's Catholic Church, erected in Toronto seventy-seven years ago, ing fact that Rev. Father Conway, so well known here, added a chapel to this historic edifice.

Messrs. T. Cavanagh and Jacobs recently shipped a carload of first class horses, weighing from 1,500 to 1,800 pounds each, to the English market, and are now purchasing a second carload.

—Gough Bros., the popular George street merchants, who have been conducting a "Good-by" sale for the past few weeks, will go out of business here on Saturday, March 19th.

—Only one case was heard at yester morning's police court, that of a man charged with keeping a vicious dog. He was ordered to kill the dog, and to pay costs to the amount of $3.35.

—Jesse Arries will appear before His Worship, Magistrate Dumble, tomorrow morning. It is expected that a large number—not friends—will be present, as many have not yet got a glimpse of the notorious Jesse.

—About forty farmers attended the meeting last Wednesday, to place their orders for salt, and listen to a lecture on cold storage. Messrs. Carton and Middleton, of Peterborough, were present, and each gave an address on the advantages of cold storage to the farmers. All present were strongly in favor of the inauguration of such a system.—Hastings Star.

—Two bakers, Mr. N. Lush and Mr. John Mann, have decided to, in future, make their bread of the same size as that shipped here from Toronto, labelling each loaf, while the other bakers—Messrs. Hawley, Bates, Stock, Gardner, Grady and Williams and Mrs. T. Lush, will continue to make the 2 and 4 pound loaves, pending the application now before the Council to pass a bylaw making the standard 1 1-2 and 3 pounds.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Rev. E. R. James, of Hastings, was in town yesterday.

—Mr. P. English, of Peterborough, is visiting in Caughnawaga.

—Miss Pearl O'Neil, who took part in St. Andrew's concert last night, is the guest of Mrs. Hugh Waddell.

—Mr. J. Gahan and son, Harvey, of Toronto, are the guests of Mr. W. S. Merrill, Homewood avenue.

—Messrs. Edward and George Howson are going to Keene this morning, when their parents will celebrate their 68th wedding anniversary.

—Mr. T. F. Matthews was nominated vice-president of the Old Country Wanderers at Wednesday night's meeting.

—Mrs. McAllister returned on Wednesday evening from Montreal and Ottawa, where she has been spending the past few weeks, the guest of friends, and will receive tomorrow afternoon and evening.

—On Wednesday afternoon, March 16th, Mr. Ernest Evans and Miss Janet Elmbirst, both of Otonabee, were united in marriage at the residence of the officiating minister, Rev. Jonathan Bastow. After a few days in Toronto, Mr. and Mrs. Evans will return to their home in Otonabee.

—Among those who were presented to Their Excellencies Lord and Lady Minto, at Ottawa, on the occasion of the recent brilliant "drawing room" was Miss McGill, of Peterborough, of whom the Ottawa Journal says: "Miss McGill, of Peterborough, wore an exquisite gown of real Brussels lace over pale yellow, embroidered in seed pearls and opalescent sequins; diamonds and pearls; bouquet of pink and white hyacinths."

Lindsay Post: Mr. James Ludgate, head of the Big Bend Lumber Company, whose mills and limits are at Arrowhead, B.C., is spending a few days in town, and last evening attended a meeting of the Ontario directors of the company, including Messrs. J. D. and Wm. Flavelle, George Jordan and Mr. R. R. Hall, of Peterborough. Mr. Ludgate presented a very gratifying report of the company's affairs, and stated that the rush of new settlers into the West would create a demand for every foot of lumber they could turn out at very remunerative prices.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

SANTAL-MIDY

Standard remedy for Gleet, Gonorrhoea and Runnings IN 48 HOURS. Cures Kidney and Bladder Troubles.

How to Help Your Girls.

The anxious mother of the family oftentimes carries the whole burden of responsibility so far as the home medication of common ailments of the girls or boys are concerned. The cost of the doctor's visits are very often too great for consideration. At such times the mother is invited to write to Dr. R. V. Pierce, of Buffalo, N. Y., for medical advise, which is given free. Correspondence is held strictly confidential.

$500 REWARD FOR WOMEN WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

Take Dr. Pierce's Pleasant Pellets instead of any other laxative.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. *Every one in Ouray knows of these mines and they know we are successful mining men*

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a *life time.*

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only *but at a depth of from 600 to 1 200 feet.* Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton *mill, recently* equipped with the most *improved* labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only *forty* stockholders now and want *only* a *few* more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

LATEST NAVAL BATTLE AT PORT ARTHUR

An Interesting Account of the Great Fight Now Made Public

THE MOVEMENTS OF THE JAPANESE NAVY

Land Operations Are Progessing Slowly—A B.g Battle is Now Quite Imminent

London, March 19—Despatches from the Far East contain some interesting details in reference to the preliminary moves made in the war by the Japanese forces, and a detailed account of the attack on Port Arthur on Thursday last. The latter report which is based on talks with sailors present at the fight indicates that the Japanese guns did great havoc

Tokio is still unadvised regarding the naval plans and movements of the Russians, and is in doubt whether the remnant of their fleet is still at Port Arthur or is en route to Vladivostock.

There is nothing very definite in regard to recent land movements.

Late reports from Corea received at Tokio state that the Russians are occupying an area having a forty mile base from Wiju to Chang Tong and extending south to PaLchou River.

There is much interest manifested in London in the report that the Russian main advance is crossing the Yalu, but this is not yet confirmed, and, according to the Daily Chronicle's Ping Yang correspondent, all the Russian troops have left North Corea twenty thousand of them being concentrated at Kulien-Cheng, north of the Yalu River, in Manchuria.

A St. Petersburg correspondent asserts that a Russian army corps is descending from Vladivostock toward Corea. He adds that Port Arthur has a garrison of 30,000 men, and is provisioned for a year.

The correspondent concludes his despatch with asserting that the concentration of Russian troops at Mukden and Harbin is considered as terminating the danger from a Japanese landing in the northern part of the Bay of Corea.

The St. Petersburg correspondent of the London Telegraph reports that extreme optimism prevails in Government circles, where the only difference of opinion concerns the extent to which Japan has crushed Port Arthur. That place is regarded as not being at all likely to be captured, and Vladivostock is held to be impregnable. The Siberian Railway is working excellently. It will transport 8,000 troops daily from the spring onward. The Japanese will be driven back step by step through Corea and will be pursued to their own islands. Peace terms will be declared in Tokio. When General Kuropatkin was bidding farewell to the Czar, His Majesty commanded him not to return until he had unfurled the Russian flag over the Mikado's palace.

Paris, March 19— The Tokio correspondent of the Matin of Paris, sends the following information concerning the Japanese military situation up to March 10, which he says comes from a sure source: "The first army of 70,000 troops, under General Kuroki, occupies Northern Corea. The brigade landed at Gensan forms part of a second army of similar strength. The mobilization of the latter has been completed, and the troops will sail shortly to an unknown destination. The mobilization of the third army began on March 7."

A GRAPHIC STORY OF THERECENTBOMBARDMENT

London, March 19—The Shanghai correspondent of the Express sends the following account of the attack on Port Arthur last Thursday, which is the first and fullest detailed inside story of the damage done by the Japanese bombardment to arrive here.

"Three Norwegian steamers, the Brand, Argo and Seirstad, arrived here today direct from Port Arthur, which place they left on Sunday night. Their captains were taken before the port admiral previous to their departure and forced to swear that they would not reveal what had taken place. Conversation with members of the crews, however, drew out the following authentic particulars;—The vessels were chartered by the Russian Admiralty as coal transports. During the last bombardment the Argo lay alongside the Retvizan in the harbor. A shell from a Japanese warship fell on the deck of the Retvizan and exploded, killing nineteen officers and men. The crews of the merchant ships in the harbor deserted and fled towards the promontory during the bombardment. The greatest damage was done to the new town, in which the shells caused such havoc that practically all the shops and business buildings on the main street were demolished. Scarcely a residence was left untouched. The Japanese fire was marvellously accurate. The inhabitants were terror-stricken. Many attempted to construct rude bomb-proof shelters. A shell fell among a crowd of curious sightseers, who were gazing at the attacking fleet and killed twenty-five of them. Three Government clerks were killed while hurrying from the port admiral's office. The most elevated fort at the entrance of the harbor was the most seriously damaged.

"There was one tremendous explosion, which civilians attribute to the blowing up of a magazine, but whether the surmise is correct or not is unknown, as the Russian authorities forbade any enquiries being answered. A two-funnelled cruiser that was anchored a cable's length from the Retvizan, probably the Diana, was struck at the water line, and set on fire Eighty persons on board perished.

A PROGRESSIVE CONCERN

Midway Consolidated Gold Mining Company's Annual Meeting

In another column of this morning's issue of The Times appears the prospectus of the Midway Consolidated Gold Mining Company, and a full report of their annual meeting. This progressive company is daily growing in popularity and the few shares left are being rapidly sold.

The Company owns 24 claims of 20 acres each, situated about 7 miles northwest of Sumpter, in Baker County, Oregon, all of which property is free from encumbrance. About 1,800 feet of exploratory and assessment work has been done outside of the main shaft, which is sunk to a depth of 180 feet. The ore averages $6 per ton, and in view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

Up to date some 275,000 shares of the treasury stock has been sold, for which approximately $45,000 has been received, and invested in the Midway proposition. Of this sum $15,000 has been invested in machinery and all of the remainder has gone into the properties. None of this amount has been paid in salary to the officers, as no officer of the Company receives any salary.

SUICIDE AT HALIBURTON

G.T.R. Station Agent Barton Drank Blue Vitriol

C. H. Barton, the G.T.R. agent at Haliburton, committed suicide by drinking a solution of battery mixture, about the first of March. Worry over the loss or theft of a sum of the Company's money is the supposed cause of his rash act.

Barton, we understand, succeeded Mr. F. H. Strike, the former agent, about three months ago. He came from Thornhill, on the Toronto-Allandale branch and was married, but his wife did not accompany him on his removal to the village, it being arranged that she should first complete certain business arrangements. Soon after his arrival, it is said, Barton began to drink more than was good for him—urged thereto, it is likely, by a feeling of loneliness to which he was unaccustomed. It is reported also that his melancholy state of mind was increased by the theft of a sum of money from the station cash drawer while temporarily absent one evening. On Feb. 23, his wife arrived unexpectedly, and Barton appeared greatly pleased, but next evening the unfortunate man was found in the office in a state of extreme agony, he having drank a quantity of battery mixture. He lingered in great pain until March 2nd, being unconscious at times.

THEY CELEBRATED THE 17TH

Peterborough Couple Disagreed on Thursday Night

About 12 o'clock on Thursday riot reigned supreme at a house on Louis street. It was St. Patrick's day and the man and wife lat cut loose. Fact is they had both imbibed rather too freely, and late in the evening the question of "who owned the house" came up. Both claimed it, and of course this led to a slight argument. The argument soon became most interesting, and both arose from their respective seats in the family circle. Water pitchers, cream jugs, cups and hardware were going at a premium, —in the direction of the devoted husband. But she had sworn to "love, honor and obey," and he swore she must keep her oath. With clenched first he approached her and she hurriedly approached the sidewalk, when about twenty-five citizens approached the two. Upper windows were raised, front doors were opened, to gaze upon the scene of battle. To attempt a description of the conflict were not wise. It was not an ordinary "scrap" as the woman got the worst of it. According to a late report the trouble has been settled.

WEATHER NOTES

Fair and about the same temperature as yesterday.

THROUGH THE BATTLE SMOKE

In the impending land battle Russia will have an important advantage over Japan in the matter of cavalry. The Japanese army has ordinarily less than 10,000 mounted men, while the Russian army has at least 117,000 horsemen. There is a great scarcity of horses in Japan. It is said that there are more than 20,000,000 horses in Russia. The country in which the Japanese and Russian forces are approaching each other for a death grapple is rough, the distances are great and the natives are almost without horses.

The Russian Cossacks must play a tremendous part in the land fighting. They are the only hereditary soldiery in Russia. Every soldier in Japan carries with him the heroic traditions of the samurai. They are his inspiration on the march or in battle, teaching him patience, frugality, courage and scorn for death—above all, loyalty to the demi-god emperor. The Cossacks, alone of the Russian fighting men, are the descendants of a warrior caste. There are 60,000 of them under the colors to-day.

The first headquarters of the Manchurian army, after Gen. Kourpatkin's arrival, will be the Liao Yang, the General having selected that point instead of Mukden from which to direct the operations. Liao Yang is ten miles west of the railroad, being connected with the main road by a special line, which will be completed by the time General Kourpatkin arrives, and has many advantages over Mukden. According to information received by the Russians at Shanghi, the opposition party in Japan is protesting against the imposition of new taxation on the population which already is suffering under excessive taxes. Lack of money is also said to be the cause of the delay in the transportation of Japanese troops.

There is disquieting news from the Chinese border. Between the Liao River and the Great Wall Chinese scouts are moving freely, and a collision with the Russian forces is apparently only a question of time. The Russian view seems to be that war with China is almost inevitable, and it is no doubt a knowledge of this rather than fear of evil results from a Japanese descent that is emptying Neuchwang of its foreign residents. Russia is undoubtedly preparing to defend the port against all comers.

1,500 RUSSIAN CAVALRY MAKE AN ADVANCE

Between Wiju and Ping Yang--Two Hundred of Them Fire on the Japanese but Japs Did Not Return the Fire

Special to The Times.

London, March 18.—There is no confirmation of the Shanghai report that a battle has been taken place between 300 Russians and 200 Japanese n a Ping-Yang, Korea, but an official despatch from Seoul to Tokio says that 1,500 Russian cavalry made a dash between Wiju and Ping-Yang. Two hundred of them came as fa as the Seisenko River and fired at Japanese troops on the other side. The fire was not returned.

The correspondent of the Daily Mail at Chefoo, who has just visited Chinampo, Korea, says; "On the way to Chemulpo we passed a constant succession of Japanese transports. Three thousand Japanese landed at Chemulpo at the end of last week." The correspondent adds that the Russians are retreating across the Yalu River before the advance of the Japanese outposts, and that their force in the district numbers 20,000.

HAVE CREATED GOOD IMPRESSION

The British Empire League Speeches well Received

AWAIT NATIONAL ACTION

Cannda will Likely be Put on Official Record in Matter

London, March 19—The speeches of Mr. Tarte and Sir Mackenzie Bowell and Sir Wm. Mulock at the British Empire League meeting, are commented upon with the greatest satisfaction as together affording clear evidence of Canada's national desire for imperial reciprocity. Such statements from both sides of Canadian politics, together with the Dominion statistician's evidence as to the benefits of the Canadian preference to the British manufacturers, which the Duke of Argyll has just published, are putting the Colonial aspects of the preference in an entirely new and favorable light before the British people. The hope is still expressed that the Canadian Parliament will make Canada's national attitude quite clear by such a non-party resolution as Sir Mackenzie Bowell proposed at the British Empire League meeting.

TOO LARGE TO BE USEFUL

Diamond Had to be Broken Before it Could be Marketed

Capetown, March 19—In jewelers' circles great interest has been awakened by the announcement that cutting operations have been commenced on the great Jagersfontein Excelsior, the largest and finest diamond in the world. The stone was held for ten years before its owner could make satisfactory arrangements for its cutting, which has now been undertaken by a firm in Amsterdam, Holland. It was transported from London to Amsterdam under special police protection and a carpeted room, with a specially made safe, has been provided for its care during the process of cutting and polishing. The responsibility of handling and guarding so precious a stone may be gathered from the fact that its value may be almost anything. When discovered it was estimated to be worth $1,000,000 but in its finished state it will command a fabulous price.

The story of the discovery of this wonderful gem is of no little interest. It was found on June 30, 1893 at Jagersfontein, in the Orange Free State, South Africa. The stone was picked up by a native while he was loading a truck and, although a white overseer was standing near him, he managed to secrete it and keep it on his person for some time. In this case, however, it did not appear that he proposed stealing the gem, but only wished to deliver it personally to the manager. This he did and as a bonus he received $750 a horse, saddle and bridle. The diamond weighed in the rough exactly 971 3-4 carats, or about 7 ounces avoirdupois. It is of a beautiful bluish-white color and shaped like the broken-off end of an icicle. The diamondiferous monster measures 3 inches in length, 1 1-2 inches in greatest and 1 1-3 inches in least breadth. The Excelsior has now been broken in sixteen pieces, the largest three of which are 158, 147 and 130 carats, respectively. These individual gems, in themselves of extraordinary size, will be, when fully cut and polished, among the finest in the world and the value of the original stone will thus be multiplied.

JAPAN WANTED WAR

The Mikado's Country Presented United Front to Enemy

Tokio, March 19—The meeting of the two principal parties in the newly elected House of Commons has just adjourned. The Constitutionalists passed a resolution expressing their resolve to support the Government through the present situation. The Progressives issued a manifesto the substance of which is that the Government has failed to take advantage of its opportunities in home and foreign politics and has threatened the prospects of Constitutional Government, but hostilities having begun and the nation confronted with an unprecedent crisis, they will support the Ministry for the purpose of obtaining a final victory. Mr. Ebara, of Tokio, a convert to Christianity, is the most popular candidate for the position of president of the House of Commons.

C. D. WARREN AND T. J. DRUMMOND

To be President and Vice-President of Clergue Industries

CONFIDENCE IN THE FUTURE

Success of Works Assused With Intelligent Management and Sufficient Capital

Montreal, March 19—According to the programme now promulgated, Mr. Charles D. Warren, of Toronto, president of the Traders Bank, will be the new president of the Clergue industries at Sault Ste. Marie, and Mr. Thomas J. Drummond, of the firm of Drummond, McCall and Company, of this city, will be the vice-president.

The appointment of the above named officers, together with the Board of Directors, is, of course, subject to the passing of the bill now pending in the Ontario Legislature, and which it is expected will come before the House for final consideration this week. At the present time the affairs of the Lake Superior Company, for such it will be called, are in the hands of the Canadian Improvement Company, which corporation has underwritten the proposition. The whole deal is now practically closed between the Canadian Improvement Company and the reorganization committee, all subject, of course, to the passage of the bill.

The choice of the president and vice-president is looked upon as a most fortunate one. Mr. Warren and Mr. Drummond will work together, the former supplying the needed experience in matters pertaining to finance, while Mr. Drummond, with his keen insight into propositions of this character, combined with his practical experience in the working of the iron and steel industries in Canada will give the Lake Superior Company the benefit of his experience.

The object of those interested has been to place the very best men available at the head of this enterprise, which has so far cost a good many millions of money, and which as yet has not been put to practical test. After going over the matter thoroughly it was concluded that better could not be done than choose the two Canadian gentlemen mentioned.

Mr. T. J. Drummond, who has been closely associated with the Sault Ste. Marie works ever since their inception, has the utmost confidence in the enterprise, always having contended that with sufficient working capital and careful intelligent management it was only a matter of time when the success of the works was assured.

Mr. Drummond states that while he will be obliged to devote a goodly share of his time to the extensive enterprises in which his firm is interested, he will none the less give the Lake Superior Company all the required attention.

PLANT IS TOO GOOD.

The fact that two Canadians have been chosen to office in the company, and if possible bring it out of its present deplorable position, is a matter which is looked upon with considerable interest. Mr. Warren, in an interview, states that if the plant at Sault Ste. Marie has a defect it is that it is too good, and that a cheaper one would have done as well.

Mr. Drummond, in speaking of the financial assistance which is expected from Ontario, said that the security which the government would obtain for the $2,000,000 loan was of the best. The company would hypothecate to the Government from $7,000,000 to $8,000,000 of bonds issued against the Algoma Central Railway, its transportation and terminals. In return the company would undertake to complete the line and connect it with the Canadian Pacific Railway. He had not the least doubt the location of the line was very valuable. As to the main industries themselves the promoters were satisfied that they were in such a shape as would, without a doubt, ensure their successful working when once got into shape. One of the principal objects was to get the rail mill running without delay. This meant the inception of a new and large industry, which the country had not yet got, and which would tend to settle that whole district of country. The railway, in his judgment, would form one of the chief assets of the company.

Mr. Cornelius Shields will be the general manager.

A BIG BATTLE AT PORT ARTHUR

What Will Happen When the Assault is Made

LAND AND SEA BATTLE

Preparations Said to be Almost Completed for the Attack

London, March 19—In discussing the possibility of a combined land and sea attack on Port Arthur, the military expert of the London Telegraph outlines the method which will probably be adopted as follows;

But, supposing the day and hour fixed, how will the attack develop itself? What will almost certainly happen will be as follows; For some miles along the shore soon after dusk a line of boats will have pressed in as close to the shore as they can get without being visible, or at all early visible, from the land. They will be few in number, for the only object with which they are sent is to mark the places for the coming boats which will carry the troops for the landing. It will take some time to get them fixed in their places, because of the difficulty of dressing them in the darkness. A little after the time when they are fixed, each pair sufficiently far apart to allow of the boats carrying a brigade of soldiers being dressed between them, there will be heard to open thirty miles away the loudest and most sustained bombardment that has yet taken place at Port Arthur. The fleet has closed in once more to the harbor, and is attracting the attention of the whole garrison to that side of the fortress. The torpedo boats and destroyers will once more go in, and very possibly the flashlights from the fortress will be allowed to disclose the presence of some transports, or what looks like them, though they are, in fact, only worthless boats filled with dummies instead of soldiers. They at least look as if they threatened to land under the batteries at the head of the harbor, should any infantry be drawn elsewhere. When this din and excitement, of which the distant sounds will reach to Kinchau and Talien-wan, has lasted for some hours and shows no sign of abatement, the ships running risks they have never done before in order to engage the town and harbor forts as fully as possible, the second stage of the operations will begin thirty miles or more away.

The long line of boats near the shore will show lights astern, carefully concealed from the shore. The men in the islands ten miles off have been resting all day, and have some time since embarked in the specially prepared boats. Every boat has a number, and shows in illuminating paint the particular company, battalion and brigade to which it belongs, each particular battalion has its starting point so assigned to it that a compass vearing gives it the direction of the two boats inshore towards which it is to steer. When the long line of signal boats is reached the boats transporting the men form on them in orderly succession. Time is given to correct mistakes, and when every boat is so in its place that battalions find themselves with their companies in their regular positions as they ought to be in moving from the shore, it being now a little before dawn, and the first glimmerings of light begin to appear, the boats close on the shore in a long line. The point of the attack has, throughout a great part of its length, been so chosen that the steepness of the shore bank towards which the boats are rowing, makes it difficult for the enemy to fire upon the boats without coming well forward to the edge of the crest, where he is completely exposed to the tremendous fire of numerous gunboats, which open upon the crest as soon as the first shot is fired from the shore. Nevertheless the losses in the boats, and immediately after landing, are pretty certain to be very heavy, and for some time those who have made good their landing in the first instance can do little more than lie quiet under the crest of the hill awaiting reinforcements. But more boats are coming, and those that have discharged their passengers are hurrying back to the islands to pick up more.

Some have managed to get into an indentation of the shore from which they can partly take in flank the shore defenders opposing the direct advance. As the numbers on shore increase and extend round the flank of the opposing force, a previously selected point is secured, where where guns can be run ashore, and before long the army's land artillery joins the fire of the gunboats and acts at closer range. Then when the fight has fairly begun the sound of a similar contest is heard from the opposite side of the peninsula. Under similar conditions the Japanese have landed from Society Bay and Port Adams to co-operate with the landing from the Elliott Islands. Assuming that the Russians oppose both attacks in force, the fight must be long and bloody, and one can only judge of the probable issue from what we know of the preparations on both sides. So judged, my own conviction is that, though not without serious losses, the Japanese will effect their landing. If they do, the next step will be to establish themselves from shore to shore of the peninsula, and whilst gunpits and batteries and parapets are erected, the next few days will be needed to complete the disembarkation from the ships and islands of seige-guns and field artillery. After that the seige of Port Arthur will begin; however, it is carried on, whether by "regular seige" as it is called, by blockade, to starve out the garrison, or by bold assault. The decision between these will be a delicate question of nice judgment for the Japanese general. No one who is not, as he is, within touch both of the feelings of his own army, and that of the enemy, and aware of the condition of the fortress, can guess on which he will determine or on which he ought to determine.

"Hard Times" Evening

On Thursday evening a very pleasant time was spent at the residence of Dr. Morrow, Dalhousie street, when Miss Morrow entertained about forty of her girl friends. Each of the guests was dressed to represent hard times, and some terrible looking costumes were noticed. The abundance of gaudy ribbons did not much suggest hard times, and the many relics of silk dresses suggested "better days." The chairs in the reception room had all been removed and the young ladies sat on newspapers on the floor. No curtains were on the windows, and the room in general was arranged to suggest that the times were hard.

SOUTH AMERICA REPUBLICS

THEY WILL UNITE AGAINST THE UNITED STATES

A Belief Exists that United States Intends to Gobble South America

New Orleans, March 91—According to mail advices just received here an alliance has been formed by Brazil, Ecuador, Argentine, Chile and Bolivia, to guard against absorption by the United States.

The belief, it is declared, prevails throughout Brazil and Argentina that in the event of a revolution in either republic President Roosevelt will intervene and recognize the revolutionists, thus paving the way for the annexation.

Last year, when Peru was believed to be considering the advisability during the recent revolution of asking President Roosevelt to establish a protectorate over that country, the other republics were frightened, fearing that with Peru as a stepping stone to the formation of the proposed annexation of Peru, the United States might absorb the whole of South America.

DEATH OF MRS. CHAS. KELLY

Former Peterborough Resident Passes Away in Trent Creek

The Catholic Register says;

"Mrs. Charles Kelly, the mother of our beloved pastor, died at Ogdensburg, N.Y., on Friday morning, Feb. 19th, having received the holy sacraments and consolations of Mother church.

"During her illness she was often visited by the zealous priests of the cathedral and the kind nuns, and her son, Father Kelly. The funeral cortege left the family residence, 134 Jay street, at 9.30 a.m. Monday morning Feb. 22nd. and proceeded to St. Mary's cathedral, where the remains were received by Rev. Father Jas. E. Cole.

"At 10 o'clock solemn High Mass of Requiem was sung by Rev. A. F. Kelly, son of the deceased, assisted by Very Rev J. H. Conroy, V.G., as deacon and Rev. Thomas Plunkett as sub-deacon. Rev. Father Fogarty was master of ceremonies His Lordship Bishop Gabriels occupied his throne, assisted by Rev. C. Burrick and Rev. Jas. E. Cole, and the absolution of the body was performed by His Lordship Bishop Gabriels, assisted by the officers of the mass. After the service the body was again placed in the hearse and the procession proceeded to the Cathedral cemetery, where the body was laid in the mortuary vault. Mrs. Kelly had been a well-known and respected parishioner of St. Mary's parish. Had Mrs. Kelly lived until next birthday, March 16th, she would have reached her 74th year.

"Besides her husband, she leaves to mourn her loss one daughter and three sons, Rev. A. F. Kelly, P.P., Trout Creek; Alderman John J. Kelly, Michael P. Kelly, and Miss Mary C. Kelly, who reside at Ogdensburg. One brother and sister survive her, Martin Kelly, of Prescott, and Mrs. Patrick Heavy, Buffalo, N.Y."

Rev A. F. Kelly, P.P., formerly of St. Peter's, was a son of deceased.

LOCAL - SPORTS.

BASEBALL.

A meeting of the Shamrock baseball team was held in the T.A.S. rooms last night. The following officers were elected;

Hon. President—Mr. Joseph Mahar.
President—Mr. J. Simmons, jr.
Vice President—W. Meagher.
Secretary-Treasurer—Geo. Lynch.
Manager—W. Grady.
Executive Committee — Secretary, Manager, Captain, and Fred Derocher.

It was unanimously decided to play under T.A.S. colors. The Shamrocks were runners-up in the Intermediate League last year, winning 11 out of 14 games played. The T.A.S. will apply for admission in the City League.

FOOTBALL.

This afternoon, at 1.30 o'clock, the annual meeting of the Midland Football League will be held in the Y.M.C.A., when the work of the League for the coming season will be planned, officers will be elected, and reports of last year presented.

CURLING.

Only one game in the Innis Medal series was played last evening, and the result was as follows;

Smith, sk...11 Bogue, sk...10

THE CRUELTY CONTINUES

WAR HAS MADE NO DIFFERENCE IN RUSSIAN METHODS

Large Number of Men and Women Being Deported to Siberia

St. Petersburg, March 19—Russian pre-occupation in the Far East has not in any way given a surcease of cruelty. A Times' correspondent is in possession of a list of fifty-seven men and women who are about to be deported to the coldest part of Northeastern Siberia, the Yakutsk province. The fate of all these unfortunates has been decided arbitrarily by the Ministry of the Interior and appeals for trial by a lawful court, in accordance with the fundamental law of Russia have been in vain. Such trial is legally guaranteed in cases of proposed deportation to Yakutsk, because of the exceptional severity of the sentence. A few months in these polar solitudes is regarded as worse than a year's hard labor in less forbidding regions.

Among the fifty-seven are persons from all provinces and nationalities in Russia, Great Russians, little Russians, Poles, Jews and Gregorians. All social classes, including the nobility, are represented. Their terms of deportation vary from three to six years—in the majority of cases the sentence is five years.

In a free country the offences alleged against most of these people are such as would not be brought even before a police court. The charge against those sentenced for six years is taking part in a riotous strike that resulted in bloodshed, although no proof exists that any of the prisoners wished or caused bloodshed.

Bureaucratic high-handedness is reported on every side. What is known, together with what is suspected, gives rise to the wildest rumors both at home and in the Far East.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 19, 1904

A LONG WAR

When The Hague peace tribunal was established as a permanent international court it was specifically provided that neutral nations might properly tender their good offices as mediators in disputes between belligerents.

It was under this provision of accepted international comity that King Edward of England offered to act as mediator in the present war, and cause the matters at issue to be referred to The Hague Court.

Although the Czar's reply to King Edward's note has not yet reached the latter monarch, it is stated by a well-informed German newspaper that the import of the reply is known and that it discusses war policies without any reference to a possible settlement by The Hague tribunal through the mediation of neutrals.

Possibly this may be but a shrewd guess, but it is a logical one. All of the prestige in the present war is with Japan, both in the naval and military arms of her service. Russian warships have fallen as easily under Japanese attack as did the Spanish navy under the assaults of American vessels. Reports of land engagements almost invariably contain incidents of Russian retreat.

For Russia to submit to mediation at this time would be to make what may be but a temporary loss of prestige a permanent fact. The boasted strength of the Russian navy would only excite ridicule and the terrible Russian army would strike no terror to possible adversaries.

Only by overwhelming proof of her superiority in war can Russia hope to maintain high rank among the great powers, and even then the great odds at which her adversary fought necessarily will lessen her prestige.

If Russia is to retain her spheres of influence, hold in subjection the variety of antagonistic races that constitute a large part of her population and continue to overawe the Chinese and cognate Asiatic peoples, she must carry the war to the bitter end and achieve an incontestable victory.

To do this will require much time. The field of operation is 5,000 miles from her capital, and the entire region possesses almost an arctic climate. Months will be required for her remaining available warships to reach the scene of naval operations in the Japan and Yellow seas. It will be far into summer before enough troops can be transported, provisioned and equipped to make an aggressive land campaign.

Even then there is no assurance and little if any prospect of early or important victories. The Japanese have already demonstrated their formidableness upon the land as well as the water. Nearly all of the conditions governing this war are similar to the Boer-British conflict in South Africa, which would indicate that it must be fought along the same lines, and that Russia's ultimate victory, if she is to be victorious, must be gained by the "wearing down" process, increasing her own forces as the numbers of her foes are diminished. In which event the Russo-Japanese war will be a long one.

A GOOD OPPORTUNITY

The Great Divide Mining, Milling, Tunnel and Power Company, operating in one of the richest sections of Gilpin County, Colorado, offers what appears to be an excellent opportunity for realizing a handsome profit from a first class mining enterprise. The Company owns a tract of 70 acres, which includes five lode claims and three miles of good placer ground that has never been worked to bed rock; tests have shown results of from $5 to $10 per day to the man, and when equipped for operation by a hydraulic plant, there is a practical certainty of large returns from this source alone, while the lode claims have all been proved to carry good values. The property is patented and a small block of stock is now offered at the low price of 15 cents per share for the purpose of equipping the power plant for operating the placers. The Company in addition to its lode and placer claims owns the water right for three miles along two streams and has an ample water supply at all seasons of the year. Full particulars will be given upon writing to the Co-operative Inv. & Exp Co., Denver, Colo.

EDITORIAL COMMENT

Lord Strathcona, the Canadian high commissioner in London, has, according to James Lumsden, in his work, "Westward," a fortune estimated at no less than $125,000,000, says the London Mail. Lord Mount-Stephen, who commenced life as a pioneer in western Canada, is worth $75,000,000 and Mr. Ross, of Montreal, is the possessor of a like amount. Mr. Reid, known in Canada as "Czar Reid" is accredited with a fortune of $50,000,000.

Plagued With Poor Digestion

Don't Suffer any Longer—Follow the Advice of Others and Use Ferrozone It Cures Permanently, Indigestion and Dyspepsia.

INDIGESTION CURED BY FERROZONE

Mr. Louis Meehan, familiar to every one in his native city of Peterboro, writes: "About three years ago I had la grippe, which left me in a run down condition. My stomach got out of order, and I suffered considerably from indigestion and dyspepsia. I was only able to eat a few things. I had to give up treating with doctors because they didn't help me. On the advice of a friend, I used Ferrozone, which not only cured my dyspepsia and biliousness, but built up my strength. I can recommend Ferrozone as an ideal remedy for the digestion'."

Mr. Ernest V. Jordan, of Trenton, writes: "I had a severe attack of stomach trouble and indigestion which completely upset me. I was advised to try Ferrozone and did so. Since using Ferrozone I have not had any further trouble, and can recommend it as a positive cure."

We guarantee that Ferrozone will cure any case of chronic indigestion or dyspepsia. It has made more lasting cures than any other remedy, and can be used with perfect confidence. Don't waste money on cheap, inferior articles; get the best at once and be cured quickly. Ferrozone has no equal; it does its work thoroughly. Don't be imposed upon by anything represented "just as good" as Ferrozone. It alone can cure thoroughly. Price 50c per box or six boxes for $2.50, at all reliable druggists. By mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

TRENT VALLEY CANAL

Beaverton Writes Concerning Opponents of the Great Improvement

A correspondent of the Beaverton Express writes as follows:

One of the most amazing things in our national administration, Mr. Editor, is the strange and inexplicable contempt which appears to prevail throughout the country for one of its oldest and really most promising public works. The Trent Canal has been before the public as a source of annual expenditure for a generation. It is still uncompleted. Tons upon tons of literature have been issued and deputations innumerable have gone to the government to urge its completion, the canal however remains in the same unusable condition as in the past.

The utility of the work, the increasing value of the intercommunication which it would provide even were it not the great western outlet its advocates believe it would prove are plainly evident and forceful and yet it requires a gentleman like Mr. Culverwell of Peterborough to lecture in Toronto before that august, and, I may assume, well-informed body, the Canadian Institute, to point out its advantages and value to the country. I have no doubt, Sir, Mr. Culverwell was struck by the icy indifference he met, for in Toronto is found the great obstacle to this important work. Had he spoken on the Georgian Bay ship canal he would have found a most sympathetic, I might say, enthusiastic, audience, for that project looks to the special advantage of Toronto.

The Trent Canal on the other hand proposes to build up industrial rivals along its way, something which Toronto hoggishness has never been known to encourage. Mr. Culverwell made it plain, however, that the great work so long under way is not the "ditch" the politicians and journalists of the city and others ignorant of the work are in the habit of describing it, but one of the most important undertakings on the North American continent which Canada in her best interests should hasten to complete. Five million dollars would finish the work from the Georgian Bay to Lake Ontario a sum so trifling in this day of millions that it stands a striking example of the short-sightedness which has dribbled out a few thousand a year, much of which has been wasted owing to its insufficiency to complete and make useful any of the work.

If the Dominion Government would bend its energies to the rapid completion and opening of this waterway it would have accomplished something more tangible to the people of the Dominion than in the bewildering railway and steamship proposition it has offered us, and for which there does not appear to be any trouble to obtain hundreds of millions if need be.

TRENT CANAL LIFT-LOCK

Ottawa, March 17.—The opening of the new hydraulic lift lock on the Trent Valley Canal, near Peterborough, will probably take place in May next. It is proposed to have the attendance of as many members as possible, and, in order to bring this about, the date selected for the opening may be May 12th. On that date Parliament will not sit, it being Ascension Day.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

Heintzman & Co.

Piano

possesses that elegance which art alone gives. This instrument is one of the most beautiful Pianos in existence at the present time. It is the result of half a century's study and research and is a fitting illustration of the remarkable advancement of musical science and mechanical skill. The action is perfect and the tone quality is pure and clear, having the resonance and power which enables the player to produce the finest harmony. As an accompaniment to the voice it is unsurpassed. Famous singers who have used it on their tours praise it without stint.

RUSSIANS HAVE SUCCEEDED IN PUZZLING THE JAPS.

Tokio is Unadvised Regarding the Naval Plans and Movements of the Russians

Special to The Times.

Tokio, March 17.—Tokio is unadvised regarding the naval plans and movements of the Russians, and is in doubt whether the remnant of their fleet is still at Port Arthur or enroute to Vladivostock. Yesterday a telegram reached the the Navy Department saying that seven Russian ships had been reported as passing Fort Lazareff. The report was not circumstantial. It did not give the character of the ships or the direction in which they were sailing. It is anticipated that the Japanese, by their activity, will speedily determine the whereabouts and intentions of the Russians.

AMERICA'S FIRST THEATRE HORROR

Burning of Richmond Playhouse in 1811 When 200 Lives were Lost

STRUGGLE FOR ESCAPE

Conditions Were in Many Respects Similar to Chicago's Tragedy

The following graphic description of the first great theatre disaster in this country has been sent The Times for publication and is taken from a volume of addresses to children and youth, as the title page has it, by the Rev. Robert May, an English clergyman, who visited America from 1810, to early in the spring of 1812, when he left for India. He made the burning of the Richmond theatre the occasion for a strong tirade against the evils of the theatre, and besought his hearers to "shun the theatre; avoid the haunts of Satan, the destroyer of your souls. Seek for real pleasure. Do not pursue the phantom of imaginary happiness." The clergy all through the country took up the cry, and for years the destruction of the theatre was proclaimed from many pulpits as the direct act of God, intended as an example to those who persisted in the sin of theatre going.

The fire took place on the night of the 26th of December, 1811. The theatre, which was built entirely of wood, and otherwise badly constructed, stood upon the brow of Shockhoe Hill, and upon the very spot which is now the site of what is called the Monument church. On this night, particularly, a new play and pantomime had been gotten up, and a large and brilliant crowd of gentlemen and ladies of the very flower of the population, embracing the newly elected governor of the commonwealth and many citizens of wealth and fashion, were assembled at an early hour to enjoy the entertainments of the evening. It was truly a brilliant company, for some time all went on gaily and happily enough. The play was over—the first act of the pantomime had passed by—the second and last act had now begun—and all eyes were intently fixed upon the actor, who had come forward on the stage towards the lights and was moving to the music of the orchestra, when suddenly a bustling noise was heard from behind the scenes, towards the rear of the building. This, it seems, was occasioned by the fact that a servant, who had been ordered to hoist up a chandelier, in doing so had got the rope entangled, and jerking to clear it, had swung it against one of the painted scenes, which instantly caught fire, and sent up a sheet of flame to the roof. This was not plastered, but consisting only of rafters covered with light pine boards and shingles, very dry, it kindled at once; and the actors with their assistants, were trying to tear down the scenes, to put out the fire. This movement, however, was not immediately seen by the spectators, being hidden from their view by the intervening scene, and they were still watching the progress of the piece, when they saw a shower of sparks and burning matter fall upon the actor before them. At this some were startled, while others apparently thought that it might by only a part of the show. A moment afterwards someone exclaimed, 'There is no danger,' and only forced the sense of it more strongly upon their fears; when one of the performers rushed forward to the front of the stage and cried, 'The house is on fire,'—pointing at the same time to the ceiling, where the fire was now seen running like lightning along the roof. Instantly, all was horror and dismay. The cry of 'Fire!' 'Fire!' rang through the building, mingled with the shrieks of women and children in frantic consternation. Husbands looked for wives—mothers for their chidren—while some, almost frenzied by the sense of danger thought only of themselves.

The Rush to Escape.

"There was, of course, a general rush of all at once to escape out of the house as fast as possible by the nearest way. Those in the pit easily got to the outer door, which was not far off. Those in the galleries also, or most of them, flying down the stairs, soon passed to the street. But the spectators in the box were not so fortunate. Some few of them, indeed, had leaped to the pit, and got out with the rest from that part, and a few others had been helped onto the stage, and hurried off the back way; while a small number still bravely kept their seats, only to meet the fate which they hoped to avoid; but the great mass of them, crowding tumultuously into the narrow lobbies in the wildest disorder, stopped each others' progress towards the door, while the suffocating smoke, which soon filled the house extinguished the lights and stifled its victims; and the flames, which now flashed in lurid sheets, as they ran along the light wooden work of the boxes, caught the clothes of the fugitives in the rear, and wrapped them at once in palls of fire and death. Happy now were those who had reached the windows, where a stream of fresh air from without revived their failing senses and enabled them to hurry on for their lives, or escape perhaps to the ground. For by this time many of those who had got out from the pits and galleries were seen gathered in crowds below, stretching out their arms and calling on those within to leap into them for safety. Some did so from the first, and some even from the second story; and a number escaped in this way, while a few were either killed or shockingly mangled by the fall. Those, in the meantime, who had succeeded so far as to clear the lobbies, found themselves again stopped and straightened in the narrow angular stairs that ran from the boxes into the common entry, or pent up in the small passage at the bottom, where the only door which opened inwards had been shut by the rushing crowd, and could not be forced back for some time, even by the help of hands from without. Here, then, were some crushed to death by others, who, even less happy, escaped at last over their dead bodies, through the door now opened, but horribly scorched or burnt, only to die in the arms of their shuddering friends.

The House a Blaze of Light.

"By this time (although only six or seven minutes had passed) the whole house was in a light blaze, that brightened the windows of the houses far and near with its dismal light; the bells were tolling with almost appalling sound; and hundreds of citizens, roused from their beds, and alarmed for the safety of their relatives and friends, were rushing to the scene, but too late to save or find them. The rest may be imagined, but cannot and perhaps ought not to be described. There was no sleep in Richmond that night; but the voice of weeping was heard from many dwellings.

"The day after this awful occurence the common council of the city convened, and passed a resolution prohibiting all public amusements within the limits for four months ensuing; and a meeting of citizens was held in the capitol, at which it was resolved that the remains of the dead should be collected and buried together on the spot where they had expired; and that a monument shoul be raised over them to record the remembrance of their fate. And it was also determined that a day should be set apart for fasting, humiliation and prayer, in commemoration of an event, in which all who had any sense of piety could not but see and acknowledge that the hand of God had been most strikingly and affectingly displayed."

A GOOD OLD FOOTBALLER

A History of the Career of Mr. John M Elliott

In its column of "Sporting Yarns" the Montreal Star has the following;

"John M. Elliott, brother of the celebrated 'Chaucer,' has had a rugby experience of a quarter of a century, and it is doubtful if any one else in Canada has been as long at the strenuous gridiron game. He began the game in 1876 and last played in 1902. Mr. Elliott remembers well his first experience on the rugby field. He played fullback for Queen's University when the game was first introduced into Kingston by A. Buntin, of Montreal, and Alexander Gordon, and Fred and Jackson Booth, of Ottawa. It was then the English game that was played. Mr. Elliott states that on the team with him were John L. Renton, of Kingston, and Capt. Duff, now in India. The Royal Military College team were then the opponents of Queen's and used to win everything, for some notable athletes were at the R.M.C. in those days It was not until late in the eighties that Queen's were able to defeat the military men.

"After a lapse of some years, Mr. Elliott again appeared with Queen's stepping out at a moment's notice, and without any practice for a long while, to play on the wing in the final match in Toronto against Ottawa College in 1894. The latter were able to defeat Queen's crippled team in that match only 8 to 7.

"When the Senior Kingston Granites were organized in 1898, 'Grandpa' Elliott again put on a uniform. and played with the team till 1902. He was one of the Kingston fifteen who broke the hearts of the Ottawa Rough Riders in 1899, by defeating them in Toronto 8 to 0 for the Ontario championship. Though up in the middle of the ladder of age, Mr. Elliott is not yet too old to step on he gridiron again and measure himself with any wing player in Ontario or Quebec."

Mr. Elliott is well and favorably known in Peterborough, and his brother, "Chaucer" has refereed at many of this winter's hockey contests.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:
J. R. CHAPTON, - - - - President
E. P. CHAPTON, - - - - Vice-President
A. J. SANBORN, - - - - Secretary
ALEX J. CHAPTON, - - - - Treasurer

Trustees
J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business:
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-02.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1902.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1902.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz, 7-22-02

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1902.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

THE
STONY PASS MINING CO.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amout of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

ESCAPE OF RUSSIANS

A Story of How They Leave Their Country

DASH FOR THE FRONTIER

Men Between 14 and 45 Not Allowed to Leave the Country

New York, March 18.—Of the 2,665 steerage passengers landed at Ellis Island, yesterday, 1,560 are Russians, many of them being refugees who fled to escape possible army service against Japan. An imperial edict several weeks ago suspended the issuing of passports to any male between the ages of 14 and 45, the prescribed period for army service, the result being a large exodus from all villages within reach of the frontier. Every possible ruse is being used to get across the frontier and escape to this country.

THRILLING STORY OF FLIGHT.

Several of the refugees gave interesting accounts of their departure from Russia. Alexis Kaplan, a drosky driver, with five companions, fled from the village of Vilna.

"On a Monday morning some three weeks ago," said Kaplan, "the news went around that the Czar had ordered all who were amenable to military duty to report to the proper authorities in their district to be listed for the draft. As soon as I heard of this I made up my mind to escape to this country. I have a wife and two children at home. If I was drafted into the army and sent to the war they would surely starve. If I could get here I knew I could get work and earn money to send for their support until I can send for them to join me.

"With five of my friends, these men here, I left that night. I had saved a little money. Each of my friends had some, and we decided to stick together and buy or fight our way across the border. We reached the frontier just before daylight, and there found a military post. I went forward while my friends hid at a safe distance. When the soldier challenged me I found he was an old friend from my native village. I had a bottle of vodka, which shared with him while we talked matters over. He finally agreed, for 12 roubles apiece, which we paid him, to turn his back while we made a dash across the line.

MAKE DASH FOR RIVER

"The border here is marked by a river about eighty feet wide and not very deep. After the officer in command of the post had made his rounds, the sentry gave us the signal and turned his back while we made a dash for the river. We plunged into the water, expecting to hav to swim, but found that we could wade all the way across, although in the middle the water was up to our armpits. We made our way across country until we struck a railroad, and followed this until we reached a small station, where we took a train to Hamburg

"While we were waiting to cross the frontier another party of 100 was waiting a mile farther up the river to get across. We met them again on the ship at Hamburg, and they are all here today on Ellis Island. It cost them 50 roubles ($26) apiece to get across. The steamship runner who sold them their tickets, took their money and made the deal for them with the sentries. These runners and agents are men who go around selling passage tickets on commission."

CHRISTIANS DETAINED.

Peter Staboff, a young farm laborer and one of a large party of refugees, said;

"There were nearly eighty in our party when we reached the frontier. Sixty-five of us were Jews and the rest Christians. We were in the hands of an agent, who had provided us our passage tickets and guaranteed to get us out of the country without passports because of the wa orders. The agent charged us 100 roubles for the whole job. He claimed that he must pay the sentries at the frontier 25 roubles for each of us to get across the border.

"When we reached the frontier we waited a couple of hours while he arranged matters with the soldiers. Then he lined us all up before the sentry, telling us to keep as quiet as possible until we were given the word and then to run as fast as we could for Prussia. The soldier walked down the line and counted us. He made all the Christians fall out of the line, and the agent took them away. The soldier said he would not let any Christians escape, no matter what they paid. After they went away and he had counted us again, the soldier turned away, shouting, 'Now run,' and we did run, never stopping until we were well across the border. There are hundreds at every frontier post waiting for a chance to get away and come here to escape military duty.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can see my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peakes' Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.63 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.63 and $79.46 respectively, thus being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore..

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitble Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 8x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 635 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS.

APPEARANCE

Is such an important feature on the table. It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo, bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

HIGH CLASS INVESTMENT

A ZACUALPA RUBBER PLANTATION COMPANY Incorporated Under the Laws of the State of California.

La Zaluaipa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

THINGS GENERALLY

BY SI JONES

Si Jones.

The war spirit in Japan is not, as one might suppose, a virtue handed down from sire to son, with severe teaching. It is from the gentle, submissive mother—who from his cradle reverences her son as her lord—that the pugnacity of islanders is derived. So Jules Bois writes. In every household the mother makes a cult of the historic worthies and heroes of the race. She goes through a daily ceremony in the presence of her children, from which they learn the names and deeds of the great in their country's chivalry; she extols the glories of war, and impresses upon them the shame that it would be to live if the slayer of their father lived. The wife has great authority in the household, and all her seeming subjection is largely a matter of manners. She shares the counsels of her husband, and she influences his career to a greater extent than do the wives of the western land.

TRANSVAAL GOLD OUTPUT

A Large Increase Likely to Take Place This Year

London, March 18—Advices from Johannesburg state that the output of gold for last year comes slightly over $80,000,000, the highest since 1899, and excepting two years —1899 and 1898—the greatest on record. Still, with a good supply of labor, the production would have been much greater than last year.

Since the beginning in 1884, the Transvaal has produced about $540,000,000 gold, not bad for twenty years. In 1884, only some $50,000 was got out. The million sterling was not reached until 1889, when output was $7,455,000. There was a rapid increase then until 1893, since which the figures have been as follows;—

1893	$28,245,000
1894	39,045,000
1895	42,890,000
1896	42,990,000
1897	57,390,000
1898	80,290,000
1899	78,910,000
1900	7,288,440
1901	5,073,430
1902	36,349,140
1903 (about)	60,000,000

In the years 1900 and 1901 the war almost stopped mining. With Chinese labor it is expected the output for 1904 may reach $80,000,000 to $100,000,000.

A WARNING VOICE

A London Paper Sees Danger in United States Trade Offers

London, March 17.—"It would be well for the British people to come out of their egotistical trance as soon as may be and promptly recognize on what thin ice the Empire is skating." "These words," says the St. James' Gazette, "are the words of a Canadian contemporary of strongly loyalist sentiments on the subject of the attempts of the United States to institute a reciprocal tariff with Canada, and they express a fact which calls for the closest attention. Canada has expressed a wish for reciprocity with ourselves. What must follow if we in blindness and stupidity neglect the obvious offer? Certainly we can never blame the Canadians if their loyal and honorable overtures are rejected and they accepted the alternate proposal of the States. These are considerations of the utmost and most vital moment. It will be fatal if the people of this country fail to give them due thought."

TROUPS FOR SOUTH AFRICA

Ger[illegible] the Hereros Strong and to Subdue

Berlin, March 18—In the Reichstag yesterday before the order of the day was taken up, Dr. Stuebel, director of the colonial office, announced the receipt of a cable message from Colonel Leutwein, governor of German southwest Africa, saying that 800 cavalry with two mounted batteries were indispensable for subduing the Hereros, of whom 5,000 were under arms and still occupying strong positions on both ends of the railroad. A bill providing these reinforcements will be introduced in the house as soon as it can be prepared.

The Lokal Anzieger says Emperor William has ordered reinforcements to the number of 1,000 men, with 1,200 horses, to be sent to southwest Africa. The troops will sail as soon as possible, as the war ministry has been making preparations since the first expedition sailed for this eventuality of further troops being needed there.

It pays to advertise in The Morning Times

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 900 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SOAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

Fine Weather Gives Relief from Catarrh

But Never Cures it Because the Germs are Still Alive Though Inactive. First Kill the Germs Then You'll be Really Cured.

Catarrh germs are carried into the throat and lungs by the air we breathe. In the same way the remedy must be applied. To be effectual the cure must be breathed, for otherwise it can't get where the germs really are.

Mix your germ-killing medicine with air, breathe it right into all the little air cells where the catarrh really is, then you'll get cured quickly. This is exactly the way Catarrhozone acts. You inhale its medicated vapor to the very source of the disease. It destroys the cause of the inflammation, kills all the microbes that develop when the lining membranes become diseased. Besides this Catarrhozone is a wonderful healer. Every sore spot is rebuilt with new healthy tissue. All the poisonous secretions that have been putrifying the system are driven out. No trace of catarrh remains after Catarrhozone has been used.

Why don't you use Catarrhozone? Its the simplest thing in the world to use, and so sure to cure permanently that you really can't afford to be without it.

MISS E. M. PETERS is known by every resident in the pretty town of Highland Grove. She was cured by Catarrhozone of systematic catarrh and says; "For three years before I commenced using Catarrhozone I was continually bothered by a congested condition of my nose and throat. I was sneezing and coughing all the time and really never felt well. I perservered with Catarrhozone and was rewarded by being entirely cured. My recovery prompted others in this locality to use Catarrhozone, and many of them have had remarkable cures from using it."

MISS LOUISE MURPHY a well known society belle residing at 22 Monument St., Medford, writes; "Kindly forward me three outfits of Catarrhozone which I have found most valuable for catarrhal affections of the nose and throat. Catarrhozone cured me of weak lungs and really saved me from consumption. I am recommending Catarrhozone above all other treatments, knowing what great curative powers it possesses. I know others who have also benefited by Catarrhozone."

Catarrhozone is perfectly harmless and may be used with perfect safety by the most delicate infant. Instead of deadening the stomach with drugs, it sends the healing vapor along with the air you breathe into every air cell and passage of the nose, throat, lungs and bronchial tubes. Catarrhozone can't fail, it's sure to cure. If not satisfied you can have your money back for the asking. Two months' treatment, hard rubber inhaler and extra bottle of inhalent costs $1.00, sample size 25c. By mail to any address if price is forwarded to N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont., Can.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Y.M.C.A.

Mrs. C. A. Sherwood and Mr. J. W. Kelly had charge of the Sunday school lesson at the meeting of the Union held last evening in the Y.M. C.A. Mr. J. L. Garvin gave a short talk on the Psychology of Discipline.

Obituary

The death occurred on Thursday at the homestead in Otonabee of Mrs. M. Reid, aged 70 years and ten months. She had been in poor health for over a year. Mrs. Reid was born in England. The funeral will be held today at 2 p.m. to Fife's cemetery.

Market Tolls Sold

Yesterday morning the tolls for the Peterborough market for 1904 were sold by auction to Mr. Lee, the purchaser of last year. The price received was $1,600, $20 less than last year. There were two bidders, the purchaser and Mr. McIlmoyle. The sale was made by Mr. John Haggart, auctioneer.

MARRIED

CHAMBERS—SEENS.—At the residence of the bride's parents, Bailieboro, on Wednesday, March 16, 1904, by the Rev. Mr. James MacIntosh, of Centerville, James H. Chambers, son of Mr. and Mrs. James Chambers, of Pontypool, to Margaret J. Seens, daughter of Mr. and Mrs. Alexander Seens, of Bailieboro.

The attendance at the
Peterboro' Business College
is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence courses.

WM. PRINGLE, C.
Principal

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—The finest display of Easter cards to be seen in the city, at the Times Bookstore.

—A meeting of the Non-Coms. will be held on Tuesday night, at the mess room in the drill shed.

—The Court of Assizes has concluded its sessions, a number of cases being left over until May.

—Peterborough maple sugar makers are looking for a good season on account of the deep frost.

—Rice Lake is frozen over to a depth of thirty inches. This is a record and is an evidence of the severity of the present winter.

—Don't miss the opportunity of getting an 85 cent set of Ping Pong for 48 cents, today. Only a few more left at the Times Book store.

—A fine assortment of Easter novelties have just arrived at the Times Bookstore. Drop in and see them.

—The Lindsay Bobcaygeon & Pontypool Railway will be in operation to Toronto by August 1. The line is all graded, and the rails will be laid probably by the middle of May.

—Just as we are beginning to rejoice in the prospects of spring, lovely spring, the horrors of house-cleaning are cast athwart our path. And its too cold to camp in the stable.

—William Wilson had been on a three days' drunk and wound up by appearing before His Worship yesterday morning. Judgment was reserved till this morning.

A regular meeting of Court Peterborough, No. 29, C.O.F., was held in their hall last evening. A large number of members was present, and representatives were appointed to attend the next High Court meeting.

—His Worship, Mayor Sootheran, and Messrs. J. D. Flavelle, F. C. Taylor and Robt. Kennedy were appointed a deputation to represent Lindsay's interests at the meeting of the Royal Transportation Commission to be held in Peterborough next Thursday, March 24th. The delegates will be allowed freedom of action in the matter of the outlet of the Trent Canal, and will support either the Trenton or the Port Hope route, as seems most desirable after hearing the evidence to be submitted to the Commissioners.

—At a recent meeting of the Port Hope High School Board, Miss Weir tendered her resignation as teacher in the High School, having accepted a position as Modern Language Specialist of Peterborough Collegiate Institute, and asked that she be allowed to leave at the end of the present month. It was moved by Mr. Craick, seconded by Mr. Hemwood, that the request of Miss Weir for permission to resign her position as teacher of Modern Languages in Port Hope High School, be granted.—Port Hope Times.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss May Needham, of Millbrook, visited friends in town on the 17th.

—Mrs. W. J. Thompson is visiting friends in Toronto for a few days.

—Mr. Dickson Jewitt, of Cannington, is in the city, the guest of Mr. Wm. Snowden.

—Mr. C. Young, of Peterborough, in the village this week.—Lakefield News.

—Mr. S. T. McMedd was out from Peterborough over Sunday.—Millbrook Reporter.

—Mrs. A. B. Spellman, of the Spellman House, Hastings, was in town yesterday.

—Mrs. J. Harris McClellan, Gilmour street, will receive the first three Tuesdays in April.

—Mr. J. Brooks, proprietor of the Palace Hotel, is visiting in Port Hope and Oshawa.

—Miss Cox, of Peterborough, is visiting friends in Lakefield, the guest of Mrs. E. A. Tanner.

—Miss Paisley, of Cressman's Millinery Department, returned from a five days' purchasing trip to New York last night.

—Miss Margaret Eastwood, of Buckhorn, has returned from visiting Mr. and Mrs. J. A. Brown, of Port Hope.

—Miss Susan Justus, of Bobcaygeon, who has been visiting her sister near Ottawa, is the guest of Mrs. J. W. Fowler, Concession street.

—Mr. E. B. Andros, of the Bank of Toronto, was in Peterborough on Friday of last week.—Port Hope Times.

—The choir of the Presbyterian church has secured as teacher Mrs G. B. Miller, leader of the Murray st. Baptist church choir, Peterborough.—Lakefield News.

—Miss Nellie Murphy, and Mr. P. Murphy, and Misses Nellie Connolly and M. Twohey, of Lindsay, are the guests of Mrs. T. J. Begley, Aylmer street.

—Mr. Frith Jeffers, a former principal of Peterborough Collegiate Institute, now the proprietor of the Belleville Business College, was in town yesterday.

—Mr. and Mrs. R. J. Kidd entertained the teachers and officers and orchestra members of the Charlotte street Sunday school, of which Mr. Kidd is superintendent.

—Capt. Vanalstine accompanies the delegation to Peterborough to give expert evidence before the Royal Commission.—Trenton Courier.

—Mrs. G. B. Miller, leader of Murray street Baptist church choir, has been engaged as teacher by the choir of the Presbyterian church, Lakefield.

—Mrs. W. J. Hopwood was called suddenly to Toronto yesterday morning by the death of her uncle, Adolphe Peterson, which occurred on Thursday.

—Mr. Thos. Arnott and Miss Arnott who have been visiting their aunt, Mrs. Geo. Arnott, and others, for some weeks, left a few days ago for their home at Peterborough.—Mount Zion correspondent to Trenton Courier.

—Mr. Walter Bailey, of Peterborough, was in town last week on a visit to his mother, Mrs. Wm. Bailey, Ridge street. We understand Walter intends soon to become a resident of Vermillion, Ohio. His brother Mr. W. E. Bailey, has been living in that town for a number of years and is engaged in the hardware business.—Norwood Register.

INSTRUCTIVE LECTURE

Delivered by Brigadier Pickering Last Night

"The Salvation Army in the Boer War," was the subject of a very interesting and instructive lecture delivered by Brigadier Pickering, of Toronto, last evening in the Salvation Army barracks, and a large audience was present, and all seemed to be heartily pleased with the Brigadier's discourse. Numerous views were shown, descriptive of recent disasters such as the eruption of Mount Pelee, etc., while the moving pictures were a living reality.

DIPHTHERIA ON STEWART ST.

Five Children of Mr. L. Riley Removed to St. Joseph's Hospital

A day or so ago the Dan Spencer ambulance conveyed to St. Joseph's hospital five children of Mr. L. Riley, Stewart street, who were ill from diphtheria, and required immediate attention. The children ranged in age from three to seventeen years of age. The disease has fortunately not had opportunity to become violent, and it is hoped that the children will, under proper treatment, soon recover. It is not often that the ambulance is called upon to remove the greater part of a family, and this case was something of an exception. Enquiry of the authorities reveals that there is not a great deal of sickness among children in town at the present time, and that cases of diphtheria are scarce.

MR. ALEX. ELLIOTT PRESIDENT

Elected To That Office by Shareholders of Port Hope Brewing and Malting Co.

Port Hope, March 19.—The plant, buildings, etc., of the Port Hope Brewing and Malting Company were handed over to a newly formed company on Thursday. The capital stock of this new company is $150,000, and they will at once build extensions to the present plant for the manufacture of lager beer. The great majority of the new shareholders are hotel proprietors and owners, who will consume the product.

At the meeting of the shareholders of the new company, held in the brewery parlors on Thursday, the following officers were elected; President, Alex. Elliott, Peterborough; vice-president, Mr. Field, Toronto; secretary-treasurer, R. W. Smart, Port Hope; brewer, J. N. Bown, Port Hope; commercial agent, J. J. Roberts, Port Hope; executive directorate, Alex. Elliott, Peterborough; Mr. Field, Toronto; R. J. Munro, Peterborough; G. L. Schaffer, Colborne; Mr. Bleaker, Trenton.

ANNUAL SCHOOL FESTIVAL

$165 was Donated by the Sunday School for Purchase of New Lot

At the Park street school annual festival, held on Thursday evening, the secretary read the following report;—

On reviewing the work for another year, we feel that we have abundant reason to thank God for His great goodness to us. It has indeed been a time of encouragement and progress. The work has gone steadily on and a deeper interest is being manifested than ever before. There are enrolled in the class book, 18 teachers and officers, with an average attendance of 115. We have noticed with pleasing interest the work of the teachers and the attendance of the scholars. The school is divided into three departments—primary, intermediate and Bible class. We have 23 enrolled in the Bible class alone but since our pastor has taken it, it is sure to increase in numbers. We have added thirty new books to our library, making 95 altogether. Nineteen scholars joined the church during the year exclusive of the Bible class. We rejoice in what has been accomplished, and are hopeful for the coming year, praying it may be one of more zealous work, more earnest prayer for blessing on every part of the work undertaken in His name.

W. J. TRANTER,
Secretary.

The treasurer's report was as follows;

RECEIPTS.	
Ordinary collections	$106.97
Balance from anniversary	4.39
Balance from excursion	3.23
Total	$114.59
EXPENDITURES.	
Library books	$ 10.73
Prov. and local S. S. Assoc.	3.60
S. S. supplies	20.07
Christmas cards	1.75
Library cards	1.50
Manitoba and N. W. Missions	5.85
Home missions	8.68
Foreign missions	7.00
Grand Ligne	9.63
To church treasurer	31.48
Church offering	5.30
Stamps and sundries	81
Balance on hand	6.94

The total sum given to missions was $31.36.

A very interesting ceremony then took place. The pastor called to the platform the trustees and Miss Mahan, superintendent, who read the following address;—

To the trustees of the Park street Baptist church, Peterborough;

As superintendent of the Sunday school, I wish to say that the teachers and officers are watching with deep interest the growth of the church and the increasing of the congregation, and the unmistakable demand for a larger building. As the church grew out of the Sunday school we naturally rejoice in its prosperity. The children and teachers were determined to do their best and in their name I have great pleasure in presenting to the trustees the sum of $165.53 as our share towards purchasing the lot, assuring them that they can reckon on the Sunday school to stand by them until the new church is build.

M. MAHAN,
Superintendent.

HURRY UP!

Everywhere one hears that expression "hurry up!" It is a genuine Americanism expressive of the "rush" in which we live. Nothing is swift enough for us. We race against steam and lightning and find them slow. We grudge the time given to eating, and rush through meals as though life depended upon our haste.

Life does depend on our haste, but not in that sense. Look at the obituary columns of the papers and see how many prominent men are carried away by "stomach trouble," "acute indigestion" and other related diseases. Their lives have in general been sacrificed to the haste and rush of business which overlooked the fact that food can only nourish the body when digested and assimilated and that the digestive and assimilative processes *can't be hurried*.

Dr. Pierce's Golden Medical Discovery, cures diseases of the stomach and the associated organs of digestion and nutrition. The source of all physical strength is food, properly digested and perfectly assimilated. By enabling the perfect digestion and assimilation of food "Golden Medical Discovery" increases and enriches the blood supply and sends new strength to every organ of the body.

"I was at one time as I thought almost at death's door," writes Mr. J. S. Bell, of Leando, Van Buren Co., Iowa. "I was confined to my bed and part of the time to my bed. I had taken quantities of medicines, but they only seemed to feed the disease; but I must say that 'Golden Medical Discovery' has cured me, and to-day I am stouter than I have been for twenty years. I am now forty-three years old."

FREE. Dr. Pierce's Medical Adviser sent *free* to you on receipt of stamps to pay expense of customs and mailing only. Send 21 one-cent stamps for cloth-bound book, or 31 stamps for paper-covered to Dr. R. V. Pierce, Buffalo, N. Y.

CHEMICAL ANALYSIS

Reveals That "Pe-ru-na is Calculated to Tone up the System, Restore the Functions and Procure Health."

SO SAYS PROF. L. J. MILLER, CHEMIST.

PROF. L. J. MILLER.

Prof. L. J. Miller, late Professor of Chemistry and Botany of the High School of Ypsilanti, Mich., writes from 3327 N. Clark Street, Chicago, Ill., as follows:

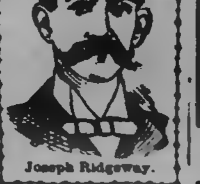
"As several of my friends have spoken to me of the favorable results obtained through the use of Peruna, especially in cases of catarrh, I examined it most thoroughly to learn its contents.

"I found it composed of extracts of herbs and barks of most valuable medicinal qualities combined with other ingredients, delicately balanced, calculated to tone up the system, restore the functions and procure health.

"I consider Peruna one of the most skillfully and scientifically prepared medicines, which the public can use with safety and success."—PROF. L. J. MILLER.

"Builds up the System."

Hon. Joseph H. Ridgeway, Secretary of the American Anti-Treat Society, writes the following letter from the Grand Central Hotel, St. Paul, Minn.:



Joseph Ridgeway.

"It is with great pleasure that I endorse Peruna as an honest medicine, competent to do all it claims. I have used it several times and know of nothing that cures so completely, and at the same time builds up the system.

"I have recommended it to a number of my friends and always feel that I do them a service for I know how satisfactory the results invariably are. I only wish every family had a bottle—it would save much sickness and doctor bills."—Joseph H. Ridgeway.

"Feel Better Than for Five Years."

Mr. James B. Taylor, Roberts, Ind., writes:

"I am at the present time entirely well. I can eat anything I ever could. I took five bottles of Peruna, and feel better now than I have for five years. I have doctored with other doctors off and on for fifteen years, so I can recommend your medicine very highly for stomach troubles. I take great pleasure in thanking you for your free advice and Peruna."—James B. Taylor.

"I Enjoy my Meals as I Used to."

Mr. J. W. Pritchard, Wolf Lake, Ind., writes:

"I am pleased to say that I have been cured of catarrh of the stomach by Peruna. I could hardly eat anything that agreed with me. Before I would get half through my meal my stomach would fill with gas causing me much distress and unpleasant feelings for an hour or two after each meal. But, thanks to your Peruna, I am now completely cured, and can eat anything I want to without any of the distressing symptoms. I can now enjoy my meals as I used to do, and it is all due to Dr. Hartman and his wonderful medicine, Peruna.

"It has been one year since I was cured, and I am all O. K. yet, so I know I am cured."—J. W. Pritchard.

Dyspepsia is a very common phase of summer catarrh. A remedy that will cure catarrh of one location will cure it anywhere. Peruna cures catarrh wherever located. That it is a prompt and permanent cure for catarrh of the stomach the above letters testify.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

CHINA BUYING ARMS AN OMINOUS OUTLOOK

Australian Company Has Received an Immense Order for Weapons

THE DANGER GREATER THAN THE BOXFR RISING

The London and Washington Authorities Regret Laxity of the Signatory Powers

Washington, March 21—B. H. Warner, Jr., consul at Leipsic, Germany, writes to the state department that an Austrian company has just received an order for so large a number of small arms for the Chinese government that it will take the company several years to fill the order, even with additional forces of men to whom it has given employment.

This is only one of the many reports that have come to the state department within the past six months that both in Germany and Austria the armamakers have been busy supplying the Chinese modern arms and ammunition.

Violates the Treaty of Pekin.

The fact has attracted attention here because it was provided in the treaty of Pekin which closed the "boxer" troubles that for a term of years the importation of arms into China should be stopped absolutely. The purpose was to reduce the capacity of the Chinese peasantry for mischief through lawless uprisings against foreigners, and as the danger is now believed to be no less than it was at the end of the "boxer" troubles the officials here view with regret this laxity in the enforcement of the treaty provision by the signatory powers.

Twenty-Five Million Reformers.

Chan Mun Shang, a prominent Chinese merchant of San Francisco, called on the president today. He is the head of the Chinese reform movement in this country. He says that 25,000,000 Chinamen are already enrolled in the movement and that the list is increasing rapidly.

Tokio, March 21—The war expense from the commencement of hostilities to the end of March are estimated at 156,000,000 yen ($78,000,000). Of the sum 106,000,000 yen is charged to the army and 48,000,000 yen to the navy. Only 50,000,000 yen has actually been disbursed, including the payment for the cruisers Nisshin and Kasuga, purchased abroad. The government plans to meet the expenditure to the end of March with 100,000,000 yen from exchequer bonds just sold, 25,000,000 yen from the special funds and 21,000,000 yen to be raised by a temporary loan.

The expenditure on account of the war from April next to December, inclusive, is estimated at 380,000,000 yen besides a special war reserve of 40,000,000 yen. The government plans to meet these expenditures by the issuance of 280,000,000 yen in exchequer bonds, 68,000,000 yen in war taxes, 7,000,000 yen balance on ordinary annual receipts and 25,000,000 yen from special fund.

COMMITTED FOR TRIAL

JESSE ARRIES APPEARS BEFORE MAGISTRATE DUMBLE

On Saturday Morning on the Charge of Purse Snatching—Will be Tried by Jury

The police court was crowded to the doors on Saturday morning, when the notorious Jesse Arries was called to answer the charge of highway robbery. The prisoner looked somewhat uneasy and his general demeanor was decidedly nervous. He is a young chap about twenty, but rather criminal in appearance. The evidence introduced by the defence was intended to prove an alibi, but was to say the least, very weak. Witnesses testified to the prisoner's whereabouts on the evening of the last assault, but nothing conclusive was shown. The case will go before the Court of Assizes in May next.

HOCKEY.

The J. Sutcliffe & Sons hockey team defeated the Richard Hall & Son septette on Thursday evening, by a score of 3 to 1.

MILITIA PAY INCREASED

G.O.C. TO GET $6000 A YEAR, PRIVATES 75 CENTS A DAY

Buglers Under 18 Years of Age to Get 40 Cents a Day

Ottawa, March 21—Sir Frederick Borden has given notice of a resolution in connection with the bill to amend the Militia Act. The general officer commanding the militia is to receive $6000 per annum, the adjutant-general $3200 and the quartermaster-general $3200.

The daily pay and allowances of the permanent force are to be at the rate prescribed by the governor-in-council. The pay of privates shall not exceed 75 cents a day, and of buglers under 18 years of age 40 cents a day.

Officers, warrant officers and non-commissioned officers of the active militia other than the permanent force will be entitled to pay at the rates prescribed by the governor-in-Council.

An allowance of one dollar a day, or such other rate as may be prescribed, will be paid to each officer and man for every horse actually and necessarily used by him when on active service during a period of annual drill and training or when otherwise on duty.

SEEK TO KILL ALL BLACKS

GERMAN TROOPS WANT REVENGE FOR BUTCHERY OF WHITES

Soldiers Find Women Cut in Pieces and Nailed to Their Houses

Berlin, March 21—Letters from German Southwest Africa give details of the ghastly treatment of German settlers, 113 of whom were killed outright or tortured to death in the district of Okahand alone, by the black Herreros tribesmen now in revolt. Women violated and dismembered and with pieces of their bodies nailed to the doors of houses, and boys mutilated and left to die slowly were frequent spectacles. The German expeditionary columns on coming in sight of a farmer's house would see the heads of its former occupants fastened to the roof.

These sights appear to have excited the rage of the soldiers. The letters express longings for revenge and a determination, one writer says, "to kill everything black."

That causes some papers to urge government to telegraph instructions to Colonel Leutwein, the governor of German Southwest Africa, that he order the soldiers to restrain themselves and conduct the war in a civilized manner. Colonel Leutwein himself comes in for criticism, as it is alleged that he left insufficient numbers of troops in the exposed districts and was misled by the temper of the natives, having frequently had at his own table chiefs who are now in rebellion and who are wearing decorations and swords of honor bestowed on them by the governor in behalf of the emperor.

The Tageblatt intimates that Colonel Leutwein will be recalled.

FOOTBALL.

A meeting of the Midland League was held in the Y.M.C.A. Hall on Saturday afternoon, but few delegates were present. The officers were elected for the ensuing year, with the exception of the executive which will be appointed at the next meeting, on April 9th. The following officers were elected:—

Hon. Pres.—Hon. J R. Stratton
President—Dr. Morgan.
Vice-President—Mr. Arthur Noble.
Sec.-Treas.—Mr. M. J. Hutchinson

It was decided that each team should pay the sum of $3.00, as the membership fee of last year was much to small to meet all expenses.

TWO TORY CANDIDATES

DR. VROOMAN MAY CONTEST VICTORIA WITH COL. HUGHES

Prominent Conservatives Sign Petition and Liberals are Said to be in the Game

Lindsay Watchman-Warder: During the past week there has been an interesting development in the political situation in this riding. For some time there have been rumors that the Liberals, despairing of getting a candidate to face Col. Hughes, would form an alliance with disgruntled Conservatives and support Dr. Vrooman as an independent Conservative. It looks now as though that is the strategy by which it is hoped to defeat the nominee of the Conservative convention.

At all events during the past few days a petition has been circulated in town asking Dr. Vrooman to run, and pledging him hearty support in case he does. The document is being used to find out the strength of the mutiny against the choice of the Conservative convention. Prominent on it are the names of Dougal Sinclair, J. D. Flavelle, James Boxall and J. H. Soutberan. An employe of Mr. Sinclair has been taking it around at night. Several names have been secured. It has apparently not yet been sent out into the country.

That the Conservatives who are behind this movement are in secret league with the Liberals is almost incredible, and yet that they are is made very certain by the fact that some of them have discussed the matter with the Liberal leaders and from the way in which they have at times expressed themselves. "I would rather see the Liberals win the riding that support Col. Hughes," was Mr. Boxall's remark, and he may be regarded as voicing the sentiments of those with him.

Here is further interesting evidence:—On Tuesday evening the editor of the Watchman-Warder sent the following telegram to Dr Vrooman at Ottawa;

Prominent Liberal here positively declared you have promised to consider favorably running for the Commons in this riding, in case no Liberal is put into the field. Please say whether it is true, at my expense

To that telegram Dr. Vrooman answered as follows;

I can't be held responsible for what people may say.

From such an answer a very logical inference is that the doctor cannot say the report is untrue. We have made this explanation, not to unduly influence any person against signing the petition, but to let the Conservative party know the sort of combination it is up against.

THROUGH THE BATTLE SMOKE

There is no news of battle this morning on either land or sea. Yesterday was devoted to the contradiction of most of the rumors set afloat on the previous day. The story of the blowing up of the toropedo destroyer Skorri by a mine at Port Arthur is still "unconfirmed." There is, however, quite a mining boom on in that harbor and the adjacent waters, and Russia has officially notified the powers that all vessels passing inshore within five miles or seeking to enter Port Arthur must stop and pick up pilots at a distance of five miles from Port Arthur, thus avoiding the danger of destruction from the mines. The ingenious Makaroff has evidentiy taken advantage of the temporary absence of the indefatigable Togo to strew that portion of the sea from which the bombardments of the city are conducted with contact mines. That they are contact and not position mines, to be exploded by an electric spark, is evident from the notification to the powers. Vessels can safely pass over position mines, and do so in fortified harbors, but the contact mine is an Ishmael of its kind, and destroys whatever first touches it. It remains to be seen whether further bombardments will involve the destruction of any Japanese ship by the Russian mines.

From Corea there is no news. The two nations still face each other sixty miles south of the Yalu, and Russia is credited with bringing more men over into Corea. The 20,000 men Russia has in the region might well be sacrificed if by fighting it out they could delay the Japanese advance long enough to permit the formation of General Kuropatkin's army in Northern Manchuria.

Having failed to secure the neutralization of Neuchwang, the Russians have finally made up their mind to fight for its possession. The step was inevitable. It is at the mouth of the Liao River that Japan can best begin her land campaign for the reduction of Port Arthur. She can by cutting the Manchurian railwey there isolate the great fortress and starve it out. Russian tenacity is as well known in Tokio as among the nations of Europe, and the Japanese strategists understand that Port Arthur will keep the flag flying as long as ammunition and food are available.

CANADA WANTS WELSH TRADE

Good Opening for Our Products in Wales

HER TEEMING POPULATION

Large Emigration to Canada Promised—A Welsh Visitor Here

Montreal, March 21—"The development of trade between Canada and the Welsh ports is receiving the attention of the commercial bodies of Wales—particularly in South Wales, where the bulk of the population is to be found. There are so many things made or grown in Canada that we can use, and the trade that is now in its infancy can be extended greatly."

These were the words of Mr. Thos. H. Davies, of Cardiff, to a Times representative at his hotel today. Mr. Davies is on a tour through Canada, the reason of his trip being the glowing account given of the Dominion and her progress by the Cardiff representatives at the Congress of Chambers of Commerce of the Empire, held in this city last August. Mr. Davies desires to see for himself, and what he has already seen of Canada, causes him to admit that the report of the delegates was not overdrawn.

"South Wales, with her teeming population, is an excellent market for Canadian produce and goods," continued Mr. Davies. "When you come to consider that within a radius of 25 miles of Cardiff, the leading city of Wales—a port that ranks next to Liverpool and London in point of size and tonnage—there are considerably over a million mouths to be fed and bodies to be clothed, you will get some idea of the crowded condition of the country. Canadian produce finds a ready market; in fact, the only complaint is that we cannot get enough. Canadian apples and fruits find a market almost as soon as they are offered for sale, and the same remark applies to the other products that occasionally find a way to the Welsh markets. The population of South Wales is essentially a mining population; the coal valleys of the Rhonnda and other districts are studded with flourishing towns and communities, and as the miners make splendid wages, they spend their money freely. Cardiff is regarded as an excellent market for all classes of merchandise."

Mr. Davies then spoke of the movement towards Canada that has taken place, especially in the agricultural districts of Middle and North Wales. He did not think that the emigration that was now starting in would harm the country. "We are all British, you know," he added, "and the prosperity of Welshmen in Canada is just as good for the Empire as similar prosperity in Wales."

STOPPED A BRITISH SHIP

Alexandria, Egypt, March 21— The British steamer Elswick Tower, from Barry, March 1, which arrived here today, reports being stopped by a Russian warship which was cruising fifteen miles outside of Alexandria.

HUBBARD DIED OF STARVATION

Party Could Not Find Sufficient Game for Food

STRENGTH PLAYED OUT

Companions Went and Secured Food but He Died Before Their Return

Quebec, March 21—A courier who left New River on the Labrador on the first of March, has reached the coast and brings a few details of the Hubbard expedition.

It appears that after making a cache of their whole stock of provisions on the North-West River the party pushed forward in the expectation that they would find sufficient game for subsistence. They, however, had very poor success, and a few days' experience showed the plan was altogether a mistake and they were compelled to retrace their steps, weakened and exhausted for want of food. When within a few hours' journey of their cache, Hubbard's strength failed him altogether, and his companions left him to try and procure food. They reached the depot and returned at once with provisions but though only gone a few hours, they were too late as they found their unfortunate companion had died in their absence. The survivors then made the best of their way to the settlements which they succeeded in reaching, as already reported, and they have since been taking the rest and treatment which they needed to recover from the exposure and frost bites from which they had suffered. It is understood that Mr. Wallace will bring the body of his unfortunate companion out to the coast, but it is a long and difficult journey, and it will be some time before he is likely to be heard from again.

How to Keep Well.

To the Editor of the Times.

Peterborough March 19—Nearly all of the people of Peterborough might escape the grippe, pneumonia and fever if they would take half as much care of themselves as they do of their pocketbooks. In the morning wash the nostrils with tar soap and hot water and anoint them two or three times daily with camphorated vaseline. Clean the teeth after each meal and at night with some antiseptic; salt answers the purpose well. Carry an ounce vial of listerine or thermoline in your pocket and and moisten the mouth with a few drops occasionally in damp weather.; Keep your mouth shut while on the streets in bad weather.

If there is difficulty in breathing through the nose use an inhaler or snuff salt water from the hand. A teaspoonful to the quart is sufficient strength. The water should be filtered or boiled and if heated to ninety degrees so much the better. Wear a chest protector from October to April

A well known professor has taught many people that it is extremely hazardous to take frequent baths during the cold season. Under no circumstance should a person take a bath at this time of the year and then go upon the street. It would be better to change all underclothing seven times a week.

ADVERTISE IN THE TIMES.

JAPAN'S CONSUL TALKS OF CANADA

Is Moving from Montreal to Ottawa to Live

CLOSER TOUCH WITH PUBRIC

Anxious to Promote Good Feeling Between the Two Countries

Montreal, March 21—The Japanese Chief Consulate is to be moved from Montreal to Ottawa.

This has just been announced to Hon. T. G. Nosse, by a cable from the Japanese Government, and he will leave for Ottawa in a month's time. The order has come as a surprise to Mr. Nosse, who has been negotiating for the rent of a house, under the impression that he was to remain in Montreal. The official statement made at the Japanese Consulate here is that "The Japanese Government, recognizing increased importance of her political and commercial relations with Canada, and finding it more advantageous to keep closer relations with the Dominion Government has decided to move their representative to Ottawa, from Montreal, and a cablegram reached Hon. T. G. Nosse this morning giving him necessary instructions therein."

This step taken by the Japanese Government is apparently in response to the friendly attitude taken by the Canadian Government by sending their exhibits to the Osaka Exhibition, and the mission of the Minister of Agriculture, and lastly, the appointment of Mr. Alex Maclean, as a permanent agent, to be stationed at Yokohama, Japan.

While regretting, Hon. T. G. Nosse says, to leave so many of his friends, made within the past two years of his stay in Montreal, he feels that there is a bright prospect before him of making a large number of friends among those who meet together in Ottawa, from all parts of the Dominion, especially the members of both the Senate and the House of Commons.

Hon. Mr. Nosse expressed to The Times his gratification, and that of the country he represents, in the interest taken by Canada in the present war. During the past few weeks, Mr. Nosse has received invitations to speak on the war, or failing that upon Japan as a country; from the Empire Club of Canada; the Canadian Club, of Toronto, and the Canadian Association of Insurance. Mr. Nosse felt that he was not in a position to speak frankly upon such a question, and has, therefore, declined the invitations.

Being asked if there was much excitement in Japan over the war with Russia, Mr. Nosse replied that he had that morning received a letter from Madame Nosse, written from Tokio, in which she stated her intention of returning to this country within a few weeks, saying that although the regular Japanese vessels on the Pacific have been withdrawn, to serve as transports, there are other boats being used for passenger boats. As far as excitement was concerned, she said, there was none. The streets are quiet, and not a soldier is to be seen. There are no flags and no excited crowds marching in procession through the streets. Except for the "extra" boys there is nothing to remind the public of Tokio that anything of unusual import is taking place.

"The 'extra boys' are very interesting," said Mr. Nosse. "Whenever there is any special occasion for it the papers issue small extras, just a little sheet containing the news These newsboys wear red caps, and attract attention to their wares by ringing a sort of bell as they go through the streets, shouting the Japanese equivalent for 'extra.' Apparently the people of Japan do nto feel that there is any call at present for great confusion and excitement in connection with the war with Russia."

Japanese Landing on Chinese Territory.

Russians Tell of 17,000 Troops to Beat of the Japanese--Fear a Landing West of the Liao

St. Petersburg, March 19.—The Government's private information is not completely reassuring as regards China's sincerity in observing a neutral attitude. Secret advices indicate that at least a powerful party in the Chinese Government is abetting the Japanese. Although at first reluctant to credit these reports, the Russian authorities continue to receive evidence that Japanese contemplate landing on Chinese neutral territory, west of the Liao River, and 17,000 men are being held especially to await developments in that direction.

Moreover, the Czar's naval experts, who have been studying carefully the puzzle as to where Vice-Admiral Togo's fleet is coaling and provisioning, between its appearances off Port Arthur, who are becoming more and more convinced that it is using as a base some quiet spot on the Chinese coast. After each disappearance not a word is heard of the fleet's whereabouts until it reappears. A calculation of time and distances shows it is quite impossible for the fleet to steam to Nagasaki or Hiroshima, take on board coal and ammunition and come back.

THE RUSSIANS GROWING MORE CONFIDENT

As Their Numbers Increase Drop Idea of Falling Back Before Japs

London March 19.—The military correspondent of the Times says the hour for decisive action by the Japanese land forces is at hand, and his expectation is that the forward move towards the Yalu River will be made when the concentration in that quarter of Corea is complete. With reference to the force the Japanese will have to confront, he says;

While retaining the general intention of retreating into the interior if assailed by overwhelming forces, the Russians are growing more confident as their numbers rise and evidently propose to make the Japanese advance to Mukden a costly business. They seem to have entrenched a strong position near Liao-yang, their right flank protected by the river and the streams of the Liao delta, while their left is covered by the Yalu force, which can fall back, if outnumbered, upon the Motienling position, which is exceedingly strong.

If there are 50,000 Russians with in this area, and all under the hand of General Linevitch, we can sympathize with his desire to try conclusions. It can easily be credited that if anything like these numbers are available it will cost the Japanese army dear to turn the enemy out. Nothing, however, is more unlikely than a costly frontal attack upon the entrenchments by the Japanese force.

WILL IMITATE BOBS.

No nation in the world has absorbed the lessons of the Boer war more completely than Japan, and none has followed all its phases with closer attention. We should rather expect to see marches and manoeuvres play a larger share than mere brutal shock of masses upon ground chosen by the enemy.

In such manoeuvers the Japanese army in Korea may play a prominent part. Still, on the other flank is a Chinese army of respectable strength, which must cause considerable anxiety to the Russians, since there is nothing to show that China will not throw off the mask once she can do so with comparative safety.

No one can say what 50,000 Russians may not accomplish on the battlefield if inteligently led, and no one should entertain any illusions concerning the severity of the ordeal concerning the severity of the ordeal confronting Japan. But if, as we are told, the Russians think they, like the Boers, can evacuate positions and fall back at their pleasure, from point to point, then it is possible that the procedure may not be so simple as it sounds. It has yet to be proved that the Russian army is superior in mobility to the Japanese, and it may be that the latter will not be easily shaken off.

From St. Petersburg comes the report of an interesting conversation with Gen. Dragomiroff, the noted tactician and the hero of the Russo-Turkish war. The officer spoke with much less assurance than some of the other Russian officers as to the outcome of the war with Japan. With reference to the Japanese army, he pointed out its weakness in respect to cavalry. He thinks the numerical superiority of the Russian cavalry will give constant trouble to the Japanese.

As regards the Russian army, the General has misgivings concerning operations on the Yalu River. "Let our troops," he said, "not forget that cette canaille de Yalu is surrounded by high mountains, and when the thaw begins the river becomes very wide and produces inundations. Them be careful. It is all very well to cross the Yalu, but in that case they must be able to come back again. They have insufficient provisions and ammunition to avoid being cut off by the enemy in case of being compelled to retreat. There must be a solid bridge constructed on the Yalu capable of withstanding floods. To judge of all one must be on the spot so do not attribute to me the airs of strategist in the chamber. There is no precise news on which to form a serious opinion."

NO JAPS IN MANCHURIA.

London March 19.—The correspondent of the Times at Neuchwang says; Rumors that the Japanese have established themselves in southern Manchuria are unworthy of credence. There are no Japanese north of the Yalu River, and none of their scouts have been seen there since the beginning of March. On the other hand, the Russians are reported to have crossed the Yalu River to the south, leaving a small force to guard the river. Mounted messengers pass both ways daily.

The Russians are hesitating whether to defend Neuchwang, but since the protection of the French flag is not procurable they are slowly reinforcing the garrison and making entrenchments.

ON THE CHENG-CHENG.

St. Petrsburg, March 19.—Under yesterday's date, Viceroy Alexieff cables from Mukden as follows; "Gen. Mishtchenko reports that Pingyang is occupied by Japanese infantry, with some guns, and that Korean carts are carrying their supplies. The enemy's cavalry is not visible in large bodies and only isolated horsemen are seen. Their horses are poor.

"Our patrols discovered the presence of the enemy's infantry on the banks of the Cheng-Cheng River, five versts (about three and one-third miles) from here. The enemy opened fire and killed one of our horses."

PRESENTATION AT MILLBROOK

Mr. and Mrs. Caldwell Presented with Easy Chair

The Millbrook and Omemee Mirror contains the following;—

On Wednesday evening, March 2nd, upwards of one hundred people of the neighborhood gathered at the home of Mr. and Mrs. Caldwell to spend a social time before their removal to Peterborough.

Mr. and Mrs. Caldwell, Mr. and Mrs. T. G. McConnell and Mr. and Mrs. R. McNichol were called upon to take the floor, when the following address was read;—

To Mr. and Mrs. T. M. Caldwell, Mr. and Mrs. T. G. McConnell, and Mr. and Mrs. R. McNichol.

Dear Friends,—We, the members of Bethel church, neighbors, friends, and well wishers of the community, have met together here tonight for the purpose of expressing the regret we feel at having you depart from among us. For many years we have had the pleasure of meeting with you in relation to the work of the church, the business affairs of the neighborhood, and in social intercourse, and we have always found you kind and considerate, willing to lend a hand in every good work. Worthy citizens in every sense of the term. It has been with a feeling of deep regret and loss on our part, that we have looked forward to the approaching time, when you would take your departure to other fields of labor.

But what we look upon as a loss to us will be a gain to those with whom you associate in the future.

We hope and pray also that the change to yourselves may be marked with success in every way. We now desire to express our appreciation of your general worth by asking you to accept from us a small token in remembrance of the many pleasant and happy days we have spent together. Hoping that you will ever remember us with kindness in the years to come.

We pray that an all wise Providence will watch over us, guide, direct, and bless you abundantly in all you undertake in this life, and when you are done with the things of time, you may spend an eternity at the right hand of our Father, in Heaven.

We remain,

YOUR SINCERE FRIENDS.

After the address, Mr. and Mrs. Caldwell were presented with a handsome oak hall rack, and Mr. and Mrs. McConnell and Mr. and Mrs. McNichol were presented with a beautiful oak rocking chair each.

The departing couples made a very suitable reply to the address, after which our Pastor, Rev. T. Brown made a few remarks.

The gathering then went in for an evening's amusement, and a sociable time was experienced.

ITALIAN SHOOTS FIREMAN

Murderer Gave Himself Up to Police—A Furious Mob

Port Arthur, March 19—An Italian named Donato is in jail here, on the charge of murdering J. Meechan, C. P.R. fireman, of Fort William. According to John Beyers, carpenter, who was employed in the shop, a number of young men went to Donato's fruit and confectionery store on Water street. They were intoxicated acted disorderly and attempted to get at the money till. Mrs. Donato, who was in charge of the store at the time ordered the men out. They left, but two of them, Meechan, who was killed, and H Laney, went back a few minutes later. They became noisy, and, it is said, used some filthy language to Mrs Donato, who screamed, and Donato, who was at the rear of the building, rushed in. He requested the men to get out, and told them that he would not have such language used in his house.

Struck the Italian.

Meechan then struck Donato in the face with his fist, and Laney ran over to assist him companion and kicked Donato a number of times in the stomach. The Italian was getting badly beaten, when three other Italians who were in the store, rushed to his assistance. They forced the men out of the store and braced themselves against the door. Meechan and Laney made desperate efforts to get in, breaking one of the windows. Donato then, acting under excitement, ran and got a revolver and fired, one shot going wild, and the second striking Meechan in the breast. It is supposed that Meechan had his arm up, endeavoring to protect himself, as the bullet went through the fleshy part of the forearm. After being shot, Meechan walked to Busquet's corner, about 50 yards distant, when he toppled over into a ditch and died in a few seconds.

Gave Himself Up.

Donato, when he perceived the enormity of the crime he had committed, ran up to the police station and met Chief of Police Nichols just as he was coming out of the station, and said, "I am the man you are after; I did the shooting'.' He was taken into the station and he produced the revolver and handed it over to Nichols. It was a 32 calibre, and two shots had been fired from it. Laney, some time during the fracas, received a stab in the abdomen, inflicted, it is thought, by one of the Italians with a knife. He was taken to Dr. McCrady's office, where his wound was attended to. He is not injured seriously.

Mob Was Furious.

Shortly after the shooting, hundreds of infuriated people crowded around the store, and for some time it looked bad for the prisoner, and it was thought the mob would endeavor to raid the police station and lynch Donato. As soon as possible he was conveyed to jail. Meechan's body was taken to the morgue.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 29, 1904

THE BALKAN PENINSULA

Recent disturbances in the Balkan peninsula, which threaten to reopen the eastern question in its most virulent form, make it necessary for the rest of the world to review the geography and history of that region, as they are perhaps more complicated and baffling than those of any other part of the civilized world.

The news from the seat of these troubles will be unintelligible unless the reader distinguishes between Turkey proper and the states along the northern frontier and unless he has unraveled the confused geographical nomenclature of Turkey proper. The states along the northern frontier which were once a part of Turkey and the present status of which was fixed by the congress of Berlin in 1878, sustain several different relations to Turkey. Roumania, Servia and Montenegro are independent. Bulgaria is autonomous but tributary principality. Of Bosnia and Herzegovnia the suzerainty is in Turkey, while the administration is vested in Austria.

In regard to the geography of Turkey proper the greatest confusion exists, as three different geographical divisions are used. Turkey in Europe extends from Constantinople to the Adriatic sea and is divided into seven provinces, called vilayets, which are the largest political divisions recognized by the Turkish government. Several popular divisions are larger. "Eastern Turkey" contains the vilayets of Constantinople and Adrianople; "Old Servia" is coterminous with the vilayet of Korsova, and "Albania" contains the vilayets of Scutari and Janina and a part of the vilayet of Monastir. Then, to increase the confusion, the old Roman provinces of the peninsula are frequently referred to, such as Epirus, Illyricum, Macedonia, Thrace and Moesia. It would be tedious to explain what vilayets they coincide with, except that it is well to know they by "Macedonia" is now meant the vilayet of Salonica and all of the vilayet of Monastir not included in Albania.

In the news that comes from the Balkan region the names of the vilayets, or legal political divisions of Turkey proper, are scarcely ever mentioned, and the troubles are generally located in Albania and Macedonia, while the instigation is said to proceed from the outside state of Bulgaria. These geographical terms are employed not only in the news despatches but in the diplomatic notes of the powers.

The interest the great powers have in this part of the world is due to the necessity of preserving the balance of power, which is almost the same in this case as restricting the extension of the Russian empire to the southward. The incessant trouble between Turkey and its vilayets, on the one hand, and the Balkan states to the north of her, on the other, grows out of the extraordinary jumble of races in that region, involving also religious diversities.

In the first place, there are in some parts of the peninsula, and especially in Albania and Illyricum, the descendants of the ancient Roman inhabitants of those countries. Then came the irruption of the Slavs at the same time that the Goths and Vandals overran the western empire. Next came the irruption of the Bulgars and finally the Turk arrived. These races in most cases have not mixed at all and keep up incessant dissension and warfare, which is embittered by the conflict of Mohammedanism with the Roman Catholic and the eastern churches. The Balkan peninsula therefore is a predestined and incurable hell on earth.

Pale Weak Women Take New Hope

There is a remedy for all your troubles Thousands have been Cured. Why not get back your Strength and Vigor by Using the Food-Tonic Ferrozone?

Ever since the world began woman has borne more than her share of suffering. Secret troubles undermine her strength, yet she seldom complains. But because she has suffered in the past is no reason why she should be forever dragged down misery and sleeplessness.

There is no girl or woman who can lift that awful burden and remove the ills from which women suffer. The name of this remedy is Ferrozone which to-day is a household word throughout the length and breadth of the American continent. New hope has been brought into the life of many a downcast woman, a new era of health has dawned for thousands who have tried and proved the merit of Ferrozone.

There is no girl of woman who can afford to miss the benefit that is sure to come from the regular use of this grand remedy. It acts directly on all the organs and insures functional activity upon which health so largely depends. Your days of weakness and headache, your hours of nervousness and despondency will all depart. Life will hold for you many new joys as it does for everyone that uses Ferrozone regularly.

Your whole body will feel the quickening influence of Ferrozone. The blood will be purified and enriched. You will no longer suffer from suppression and interference with the menstrual functions. Ferrozone cures all such ailments and prevent their return.

Mrs. Mary E. Cowan, of Hillsboro, writes, "If half the ailing women in this world would only use Ferrozone regularly they would save a great deal of sickness. Before using Ferrozone I was fatigued and tired out with the least exertion. I spent half my time in bed and was forever bothered with some trouble or other. After using a few boxes of Ferrozone I became more robust, my strength and the irregularities I formerly had have disappeared. Ferrozone is a grand medicine for women."

This is the experience of thousands You really ought to use Ferrozone,—it will do you so much good. Don't listen to the druggist who urges something just as good. No substitute compares with Ferrozone, which does all that is claimed of it. Price 50c. per box or six boxes for $2.50, at druggists or by mail from The Ferrozone Company, Kingston, Ont.

THE NORTH-WEST COUNTRY

EX-CHIEF JUSTICE OF THE TERRITORIES IN MONTREAL

The Population Coming in Rapidly—German Emigration

Montreal, March 21—Hon. Thomas McGuire, ex-chief justice of the North west territories is in the city. The ex-chief justice, who has settled down in Prince Albert, says the population is coming in so rapidly that within a few years they will have fifty thousand people within a radius of fifty miles. Speaking of the Hudson Bay route the judge remarked that formerly the starting point in the public mind was Winnipeg, but now the great wheat growing and cattle raising districts of the West come into play, consequently a direct line from Alberta to the Bay would pass through Prince Albert, which is now considered the starting point. The Canadian Northern, he adds, has already completed a preliminary survey from Prince Albert to Canada's inland sea, a distance of 600 miles. The judge states that although no official report has yet been given out, it is an open secret that the Mackenzie and Mann engineers have found a comparatively easy route, few, if really any, engineering difficulties presenting themselves. The height of land was reached a little over a hundred and fifty miles north of Prince Albert, and beyond that point the work had been discovered to present few difficulties.

When the Hon. Mr. McGuire was asked what he thought of the German Government's circular warning people from coming to the Canadian Northwest, he said:—

"The most effective answer to that will be given by the German settlers themselves who will write home to their relatives and friends. These are the best possible agents we can have."

There are three banks in Prince Albert, the Imperial, the Bank of Ottawa, and the Canadian Bank of Commerce, and as the French population is considerable there is a report that the Bank of Hochelaga will establish a branch in the near future.

Judge McGuire said that, although the settlers from old France began work under considerable difficulties, they are now doing well as are the other groups of foreigners settled in the district.

NOTICE.

Take notice that the Municipal Council of the Corporation of the Town of Peterborough intends, after one month after the last publication of this notice, to undertake the construction of granolithic sidewalks on the followiong streets and parts of streets in the Town of Peterborough, as local improvements, under section 678 of the Consolidated Municipal Act, 1903, and the other provisions of the said Act and the By-laws of the said town relating to local improvements and applicable thereto:

Aylmer St., east side, Charlotte to Lake Sts.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 320 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 9-30-02.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. CLARKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1902.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1902.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz, 9-30-02

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1902.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

BATTLE AT PORT ARTHUR

An Interesting Account of the Great Fight

London, March 19—Despatches from the Far East contain some interesting details in reference to the preliminary moves made in the war by the Japanese forces, and a detailed account of the attack on Port Arthur on Thursday last. The latter report which is based on talks with sailors present at the fight indicates that the Japanese guns did great havoc

Tokio is still unadvised regarding the naval plans and movements of the Russians, and is in doubt whether the remnant of their fleet is still at Port Arthur or is en route to Vladivostock.

There is nothing very definite in regard to recent land movements.

Late reports from Corea received at Tokio state that the Russians are occupying an area having a forty mile base from Wiju to Chong Tong and extending south to Pakchou River.

There is much interest manifested in London in the report that the Russian main advance is crossing the Yalu, but this is not yet confirmed, and, according to the Daily Chronicle's Ping Yang correspondent, all the Russian troops have left North Corea twenty thousand of them being concentrated at Kulen-Cheng, north of the Yalu River, in Manchuria.

A St. Petersburg correspondent asserts that a Russian army corps is descending from Vladivostock toward been completed, and the troops will Corea. He adds that Port Arthur has a garrison of 30,000 men and is provisioned for a year.

The correspondent concludes his despatch with asserting that the concentration of Russian troops at Mukden and Harbin is considered as eliminating the danger from a Japanese [illegible] in the northern part of the Bay of Corea.

The St. Petersburg correspondent of the London Telegraph reports that extreme optimism prevails in Government circles, where the only difference of opinion concerns the extent to which Japan has crushed Port Arthur. That place is regarded as no being at all likely to be captured and Vladivostock is held to be impregnable. The Siberian Railway is working excellently. It will transport 8,000 troops daily from the spring onward. The Japanese will be driven back step by step through Corea and will be pursued to their own islands. Peace terms will be declared in Tokio. When General Kuropatkin was bidding farewell to the Czar, His Majesty commanded him not to return until he had unfurled the Russian flag over the Mikado's palace.

Paris, March 19—The Tokio correspondent of the Matin of Paris, sends the following information concerning the Japanese military situation up to March 10, which he says comes from a sure source; "The first army of 70,000 troops, under General Kuroki, occupies Northern Corea. The brigade landed at Gensan forms part of a second army of similar strength. The mobilization of the latter has sail shortly to an unknown destination. The mobilization of the third army began on March 7."

C. D. WARREN AND T. J. DRUMMOND

To be President and Vice-President of Clergue Industries

CONFIDENCE IN THE FUTURE

Success of Works Assured With Intelligent Management and Sufficient Capital

Montreal March 19—According to the programme now promulgated, Mr. Charles D Warren, of Toronto, president of the Traders Bank, will be the new president of the Clergue industries at Sault Ste. Marie, and Mr. Thomas J. Drummond of the firm of Drummond, McCall and Company, of this city, will be the vice-president.

The appointment of the above named officers, together with the Board of Directors, is, of course, subject to the passing of the bill now pending in the Ontario Legislature, and which it is expected will come before the House for final consideration this week. At the present time the affairs of the Lake Superior Company, for such it will be called, are in the hands of the Canadian Improvement Company, which corporation has underwritten the proposition. The whole deal is now practically closed between the Canadian Improvement Company and the reorganization committee, all subject, of course, to the passage of the bill.

The choice of the president and vice-president is looked upon as a most fortunate one. Mr. Warren and Mr. Drummond will work together, the former supplying the needed experience in matters pertaining to finance, while Mr. Drummond, with his keen insight into propositions of this character, combined with his practical experience in the working of the iron and steel industries in Canada will give the Lake Superior Company the benefit of his experience.

The object of those interested has been to place the very best men available at the head of this enterprise, which has so far cost a good many millions of money, and which as yet has not been put to practical test. After going over the matter thoroughly it was concluded that better could not be done than choose the two Canadian gentlemen mentioned.

Mr. T. J. Drummond, who has been closely associated with the Sault Ste. Marie works ever since their inception, has the utmost confidence in the enterprise, always having contended that with sufficient working capital and careful intelligent management it was only a matter of time when the success of the works was assured.

Mr. Drummond states that while he will be obliged to devote a goodly share of his time to the extensive enterprises in which his firm is interested, he will none the less give the Lake Superior Company all the required attention.

PLANT IS TOO GOOD.

The fact that two Canadians have been chosen to office the company, and if possible bring it out of its present deplorable position, is a matter which is looked upon with considerable interest. Mr. Warren in an interview, states that if the plant at Sault Ste. Marie has a defect it is that it is too good, and that a cheaper one would have done as well.

Mr. Drummond, in speaking of the financial assistance which is expected, from Ontario, said that the security which the government would obtain for the $2,000,000 loan was of the best. The company would hypothecate to the Government from $7,000,000 to $8,000,000 of bonds issued against the Algoma Central Railway, its transportation and terminals. In return the company would undertake to complete the line and connect it with the Canadian Pacific Railway. He had not the least doubt the location of the line was very valuable. As to the main industries themselves the promoters were satisfied that they were in such a shape as would, without a doubt, ensure their successful working when once got into shape. One of the principal objects was to get the rail mill running without delay. This meant the inception of a new and large industry, which the country had not yet got, and which would tend to settle that whole district of country. The railway, in his judgment, would form one of the chief assets of the company.

Mr. Cornelius Shields will be the general manager.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 11 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peakes' Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done great work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.90 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing crop on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, these, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $82.68 and $19.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitble Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunnels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Hale winze and the tunnel) of 3,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $195,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

A BIG BATTLE AT PORT ARTHUR

What Will Happen When the Assault is Made

LAND AND SEA BATTLE

Preparations Said to be Almost Completed for the Attack

London, March 19—In discussing the possibility of a combined land and sea attack on Port Arthur, the military expert of the London Telegraph outlines the method which will probably be adopted as follows;

But, supposing the day and hour fixed, how will the attack develop itself? What will almost certainly happen will be as follows; For some miles along the shore soon after dusk a line of boats will have pressed in as close to the shore as they can get without being visible, or at all clearly visible, from the land. They will be few in number, for the only object with which they are sent is to mark the places for the coming boats which will carry the troops for the landing. It will take some time to get them fixed in their places, because of the difficulty of dressing them in the darkness. A little after the time when they are fixed, each pair sufficiently far apart to allow of the boats carrying a brigade of soldiers being dressed between them, there will be heard to open thirty miles away the loudest and most sustained bombardment that has yet taken place at Port Arthur. The fleet has closed in once more to the harbor, and is attracting the attention of the whole garrison to that side of the fortress. The torpedo boats and destroyers will once more go in, and very possibly the flashlights from the fortress will be allowed to disclose the presence of some transports, or what looks like them, though they are, in fact, only worthless boats filled with dummies instead of soldiers. They at least look as if they threatened to land under the batteries at the head of the harbor, should any infantry be drawn elsewhere. When this din and excitement, of which the distant sounds will reach to Kinchau and Talien-wan, has lasted for some hours and shows no sign of abatement, the ships running risks they have never done before in order to engage the town and harbor forts as fully as possible, the second stage of the operations will begin thirty miles or more away.

The long line of boats near the shore will show lights astern, carefully concealed from the shore. The men in the islands ten miles off have been resting all day, and have some time since embarked in the specially prepared boats. Every boat has a number, and shows in illuminating paint the particular company, battalion and brigade to which it belongs, each particular battalion has its starting point so assigned to it that a compass bearing gives it the direction of the two boats inshore towards which it is to steer. When the long line of signal boats is reached the boats transporting the men form on them in orderly succession. Time is given to correct mistakes, and when every boat is so in its place that battalions find themselves with their companies in their regular positions as they ought to be in moving from the shore, it being now a little before dawn, and the first glimmerings of light begin to appear, the boats close on the shore in a long line. The point of the attack has, throughout a great part of its length, been so chosen that the steepness of the shore bank towards which the boats are rowing, makes it difficult for the enemy to fire upon the boats without coming well forward to the edge of the crest, where he is completely exposed to the tremendous fire of numerous gunboats, which open upon the crest as soon as the first shot is fired from the shore. Nevertheless the losses in the boats, and immediately after landing, are pretty certain to be very heavy, and for some time those who have made good their landing in the first instance can do little more than lie quiet under the crest of the hill awaiting reinforcements. But more boats are coming, and those that have discharged their passengers are hurrying back to the islands to pick up more.

Some have managed to get into an indentation of the shore from which they can partly take in flank the shore defenders opposing the direct advance. As the numbers on shore increase and extend round the flank of the opposing force, a previously selected point is secured, where where guns can be run ashore, and before long the army's land artillery joins the fire of the gunboats and acts at closer range. Then when the fight has fairly begun the sound of a similar contest is heard from the opposite side of the peninsula. Under similar conditions the Japanese have landed from Society Bay and Port Adams to co-operate with the landing from the Elliott Islands. Assuming that the Russians oppose both attacks in force, the fight must be long and bloody, and one can only judge of the probable issue from what we know of the preparations on both sides. So judged, my own conviction is that, though not without serious losses, the Japanese will effect their landing. If they do, the next step will be to establish themselves from shore to shore of the peninsula, and whilst gunpits and batteries and parapets are erected, the next few days will be needed to complete the disembarkation from the ships and islands of seige-guns and field artillery. After that the seige of Port Arthur will begin: however, it is carried on, whether by "regular seige" as it is called, by blockade, to starve out the garrison, or by bold assault. The decision between these will be a delicate question of nice judgment for the Japanese general. No one who is not, as he is, within touch both of the feelings of his own army, and that of the enemy, and aware of the condition of the fortress, can guess on which he will determine or on which he ought to determine.

EVERYBODY READS THE TIMES.

LOST FLEET LOCATED.

IT HAS LATELY REPORTED AT PORT ARTHUR

Russians Retreated Across Yalu—Splendid Endurance of Japanese

London, March 18.—The Daily Telegraph's Tokio correspondent, cabling March 17, asserts that the Russian fleet has returned to Port Arthur. If that is correct, the correspondent adds, it is evident that Rear Admiral Baron Von Stackelburg's report that the Russian cruisers which left Vladivostock returned to that port without an attempt having been made to unite the fleets, or if an attempt was made it was unsuccessful.

The Chifu correspondent of the Paris edition of the New York Herald cabling under yesterday's date, asserts that a portion of the Russian fleet made several cruises within a radius of fifty miles of Port Arthur without finding any trace of the enemy.

London papers also have vague rumours of alleged movements of the Yalu River.

RUSSIANS RETIRING,

The correspondent of the London Daily Mail at Chifu, who has just visited Chinampo, Korea, says;—"On the way to Chemulpo we passed a constant succession of Japanese transports. Three thousand Japanese landed at Chemulpo at the end of last week."

The corespondent adds that the Russians are retreating across the Yalu River before the advance of the Japanese outposts, and that their force in this district numbers 20,000.

Under date of March 17, the Chifu correspondent of the Standard reports that provision trains are arriving hourly at Port Arthur, the railway being intact.

According to a despatch from Antwerp to the Daily Telegraph, Russia has acquired twenty large Antwerp transport steamers, and has insured each of them for $250,000.

COULDN'T STAY AWAY.

Washington, March 18.—A cablegram received at the Japanese Legation tonight from the Japanese Consul at Shanghai, says that the captain of a Norweigan vessel, which has arrived here from Port Arthur, reports that the Russian fleet left Port Arthur on the morning of March 12, but returned the same evening.

CONFIDENCE IN LINEVITCH.

Liaoyang, Manchuria, March 17.—Gen. Kuropatkin has telegraphed to General Linevitch, who is here, temporarily commanding the Manchurian army, as follows; "I salute you in the midst of the troops whom you command. May God assist you to overcome the most arduous portion of your task. I shall be happy to find you at the head of the troops the Emperor has graciously entrusted to me. I trust you will not leave them so long as the principal danger threatens, for the troops have full confidence in you."

The weather is changeable. Snow squalls and severe frosts prevail.

SITUATION IN KOREA.

London, March 18.—A Times correspondent writes;—The military situation appears to be as follows; After the first landing the small expeditionary force landed near Haiju pressed on and seized Pingyang, and was followed there by the troops landed at Chemulpo, which force was sufficient to secure a strategic front against the possible advance of the Russians south from the Yalu River.

HARDSHIPS OF WARFARE.

These troops had terrible weather to contend with, rain, frost and blizzards, but the infantry marched 25 miles a day, each man carrying nearly 100 pounds. However, they did well, bivouacking in the Korean villages; but it was a most severe test. Covered by this force, a larger force is now disembarking within easier distance of the objective, while it is reported that preparations for disembarkation are also being made at the only practicable port on the east coast of Corea, though this report lacks confirmation. Although the ice in Pingyang Inlet is broken, much of it is drifting about. The weather is intensely cold, but such of the Japanese troops as are now being immediately pushed forward are bivouacking with their animals, in the open and sleeping in turns in the Korean houses, which, with fires under the floors, are warm, though dirty. Everything requisitioned is being paid for, but at present the army is independent of the resources of the country. The men carry two days' cooked rations, and three days' rice rations.

REPORTED CONFLICT.

The latest information from the front points to a further retirement of the Russians. The Japanese are now holding Anju and the line of the Chang-cheng River. The outposts are still in touch and while there is no trustworthy information of their coming into contact, a sanguinary affair is reported to have occurred north of Anju.

SEPARATED ONLY BY RIVER.

London, March 18.—The correspondent of The Times at Tokio says;—The Russina and Japanese scouts in Korea are now separated only by the Cheng-cheng River, just north of Anju. The foreign correspondents have been ordered to prepare to leave Japan for the front by the 20th or 23rd, but their destination is unknown. The two principal political parties decided yesterday to vote the Government's programme of war supplies.

CONTRABAND ARTICLES.

St. Petersburg, March 18.—As the result of a conference between the Ministers of Marine and Foreign Affairs the following additional articles have been declared contraband of war; "Provisions of all kind destined for the Japanese army, including grain, fish, fish products, beans, bean oil, part of machines for the manufacture of weapons and ammunition."

The Emperor today received Gen. Sakaharoff, Acting Minister of War and chief of general staff, with whom he discussed the reported concentration of Japanese troops at Pingyang. The Emperor will inspect more of the warships tomorrow.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00
Officers:
J. R. CHAPTON, - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - Treasurer
Trustees
J. R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.
Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-3c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires. Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 65-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position to not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

HIGHCLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal

THINGS GENERALLY

BY SI JONES.

There is a feeling abroad in the land that our school children undergo a process of cram. and some of our educationists and legislators are bringing it to the notice of the people at large. High and Public Schools are sinning alike in this matter, and it is high time that the pulpit and the press, aye, and the people should condemn the idiotic practice of home studies. Parents and guardians should see to it that this nefarious mode of teaching the tender mind is more "honored in the breach than in the observance." There is no good or justifiable reason for home studies, save and except what the pupil chooses to study — there should be no compulsion. This, it is true, will throw cold water upon the forcing process now in vogue. We ask our readers to give this burning question their serious consideration.

NO PROTESTS ENTERED

Attitude of Colonies is Favorable for Preference

London, March 18.—Colonial Secretary Lyttelton, answering Sir Gilbert Parker in the House of Commons last night, said the Colonial Office had not received in recent years any resolution against preferential tariffs from any colonial Board of Trade, Chamber of Commerce, Manufacturers' Association, or Legislative Assembly.

EAST DORSET DEFEAT.

The Standard says the East Dorset defeat was due to the preferential leanings of the Unionist candidate. When it was realized that the district was against the idea the Tariff Reform League closed its local office, but the disclaimer was too late.

The Morning Post attributes the Liberal victory in the East Dorset bye-election in a great measure to the Government's opposition to preference, thus splitting the party. It says that if retaliation is approved a preference would naturally follow.

GOOD IMPRESSION

British Empire League Speeches Well Received.

London, March 19—The speeches of Mr. Tarte and Sir Mackenzie Bowell and Sir Wm. Mulock at the British Empire League meeting, are commented upon with the greatest satisfaction as together affording clear evidence of Canada's national desire for imperial reciprocity. Such statements from both sides of Canadian politics, together with the Dominion statistician's evidence as to the benefits of the Canadian preference to the British manufacturers, which the Duke of Argyll has just published, are putting the Colonial aspects of the preference in an entirely new and favorable light before the British people. The hope is still expressed that the Canadian Parliament will make Canada's national attitude quite clear by such a non-party resolution as Sir Mackenzie Bowell proposed at the British Empire League meeting.

IRELAND'S OPPORTUNITY

London, March 18.—John Redmond was the chief speaker at the St. Patrick's Day banquet held at the Hotel Cecil and attended by the prominent Irishmen in London. "Ireland a Nation," was his toast, and he declared the opportunity had come at last for Ireland to be the deciding factor in the making or unmaking of the British Government. A hostile majority of 150 had been compelled to give them the Land Purchase Act, and that majority was now melting away. The coming general elections would witness the defeat of the Unionist party. The Irish voters depended upon the power and unity in Great Britain should put home rule before everything, as the future

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

Consumption Can Be Cured

A Powerful and Effective Destroyer of Disease Germs Discovered Which Cures Consumption.

The ravages of consumption which for years have terrorized the modern world will no longer continue to cut off our population by thousands. Science has at last produced a remedy which not only can be readily applied to the lungs, but also kills every trace of bacilli in the throat, bronchial tubes, and air passages of all the breathing organs.

The name of this marvellous antiseptic about which the doctors are talking so much is Catarrhozone, the ozonated air cure. The vapor is more soothing than the air of pine woods, and its healing properties are without limit.

Through a skilfully devised inhaler the sufferer is enabled to breathe this fragrant medicated vapor into the most minute air cells of the lungs. It is so destructive to microbic life that the tubercular germs are rapidly killed and prevented from ever returning. Congestion and inflammation are relieved, coughing stops, all disagreeable symptoms are quickly cured by Catarrhozone.

So simple is Catarrhozone that anyone can use it. So certain to cure lung and throat troubles that it is prescribed by not less than twenty thousand doctors in United States and Canada. One well known authority who has made a life long study of consumption, has the following to say; "Catarrhozone is certainly a true specific for white plague. I find that its healing vapor readily spreads all through all the breathing organs passing over probably not less than one thousand square feet of mucous surface at a single inhalation. It is a perfect germicide and destroys tubercular germs with wonderful certainty. Catarrhozone is entitled to rank among the great medical discoveries of the age."

No matter how often you have been disappointed with other remedies you must not be discouraged. In Catarrhozone you will find new hope. What it has done before it can do again. Your case is not worse than others it has cured. Therefore if properly used you can also be cured by Catarrhozone. Two months treatment $1.00. At druggists or by mail from N. C. Polson & Co., Hartford, Conn. U.S.A., or Kingston, Ont. Refuse any substitute for Catarrhozone—only the genuine can cure.

Three months' old collie pup, light colored. Reward on returning to 219 Hunter street.

Y.W.C.A.

The regular Gospel service was held in the Association rooms yesterday afternoon Miss Roberts leading the service. This afternoon at 3 o'clock a meeting of the collectors will be held to make arrangements for the house to house visitation.

"The Holy Grail."

This evening George street League will hold its regular Literary meeting when Mr. Jeffries, of the Collegiate Institute staff, will take up the study of the poem, "The Holy Grail," from Tennyson's "Idylls of the King." A most enjoyable and instructive evening is expected, and a cordial invitation is extended to all to be present. A short musical programme will also be given.

Peterborough Man's Experience

He was a prosperous young farmer on the outskirts of the city of Peterborough but he was lonesome. He came to the city to seek a housekeeper only a few weeks ago, and called on a young maiden lady who had been recommended to him. She was unwilling to engage with him at first and asked him to call again. A few days after the anxious John visited her again. She again asked him to "call again." He called again, and that day they were married. We cannot but admire the tact shown by the young lady in delaying making the bargain with the young bachelor.

—The Never Learn Club will hold a dance soon after Easter.

The attendance at the
Peterboro Business College
is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 3/4 of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.
WM. PRINGLE,
Principal.

Moving Pictures

The London, Eng., Bioscope Company, and Howard Clifton, musical expert and ventriloquist of the world, will give two entertainments at the Opera House on Friday night, and Saturday afternoon at 2.30, on March 25 and 26, under the auspices of the Fire Department. "7,000 feet of films—late subjects, Japanese destroyers' attack upon the Russian fleet, Uncle Tom's Cabin, great Chicago Theatre fire, and 50 other new subjects. Tickets, 25c Saturday matinee, 10 and 20 cents. To be had of the members of Fire Co.

W. A. Elects Officers

The following officers have been elected by the Woman's Auxiliary of St. John's church, for the ensuing year;—

Hon. President—Mrs. Vernon.
President—Mrs. R. H. Nesbitt.
1st Vice-President—Mrs. Bennett.
2nd Vice-President—Mrs. Dutton.
3rd Vice-President—Mrs. J. Bell.
Secretary—Miss Errett.
Treasurer—Mrs. P. Campbell.
Dorcas Committee—Mrs. Best.
P.M.C. Treasurer—Miss M. E. Peck, Mrs. Comstock and Misses English and Hall.
Superintendent of Mission Band—Miss Dolly Comstock.

At the Easter Vestry meeting more complete reports will be presented.

Irish Night

Saturday evening was "Irish Night" at the Y.M.C.A., and about seventy-five young men were present. The different artists were well received, and all thoroughly enjoyed themselves. The following interesting programme was rendered;—

Song	Mr. Gerrard
Reading	Mr. Anderson
Solo	Mr. Dormer
Reading	Mr. Campbell
Solo	Mr. Jas. Brown
Reading	Mr. J. C. Brown
Solo	Mr. Dormer

Col. J. W. Miller and Mr. Kerr delivered brief addresses, the former taking for his subject "Irishmen in War," and the latter, "Irishmen in Politics."

Rev. Father McColl Speaks

Rev. W. J. McColl, in speaking of contagious diseases, says;—

"Considerable discussion has, of late arisen regarding the erection of an isolation hospital for the town. Before taking such a step our civic fathers should examine the matter thoroughly. Will such an hospital prove more effective in the isolation of contagious diseases than our present hospitals? Its cost will certainly be much greater. An isolation hospital with its furnishings and equipment will cost at least from $20,000 to $30,000. The interest on this sum will amount annually to about $1,000. Add to this the cost of maintenance, which will range from $6,000 to $10,000 yearly, and you will have some idea of the burden that will thereby be imposed upon the town.

"If one-quarter of this yearly expenditure were devoted to the improving of the present arrangement, and one-quarter more to the bettering of the sanitary conditions of the town it would soon be impossible for a germ of a contagious disease to find a habitable spot in our community."

Executive Health Officers

The Legislative Assembly of Ontario has just issued the report of the 18th annual meeting of the Association of Executive Health Officers, held in Peterborough, on Sept. 9th and 10th, 1903. The report comprises a volume of 130 pages, and on the fly leaf is a photoengraving of the Health Officers at the Lift Lock, from the photo taken by Mr. R. M. Roy. The different addresses and papers given at the meeting are reported fully, and the report contains a large amount of very valuable information on the subject of health, and how to guard the public from disease.

The officers of the Association elected at the meeting are;—

President—J. W. Lane, M.D., Mallorytown.
Vice-President—J. W. Bowlby, K.C., Brantford.
Secretary-Treasurer—C. A. Hodgetts, M.D., Toronto
Members of Executive Council—P. H. Bryce, M.D., Toronto; W. Chipman, C.E., Toronto; J. M. Shaw, M.D., Keene; R. P. Boucher, M.D., Peterborough; W. S. Richards, Esq., Chatham.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Yesterday afternoon the Salvation army Band played, "Hail Smiling Morn," and in the evening, "Out in the Life-boat Speeding."

—Owing to the scarcity of boarding houses in town the young women who previously occupied quarters in the Y.W.C.A. boarding house are experiencing considerable difficulty in obtaining apartments.

—In Saturday's issue mention was made of an unusual celebration on Louis street, on the evening of St. Patrick's Day. A late despatch states that it was the "man and his son" who were the combatants. The wife was absent at the commencement of the fray, and arrived while the battle was in progress.

DEATHS.

HALPIN.—At late residence, corner of Lake and George streets, Cornelius Halpin, aged 35 years, on Sunday morning at 12.30 o'clock.

BROWN.—On Sunday morning at 7 o'clock, Mr. Edward Brown, aged 49 years, at his late residence, Stewart street.

Refrigerator For Sale

A refrigerator, in good order, for sale at a bargain. Just the thing for a private family.

A SAD DEATH

Mr. Edward Brown Passes Away Suddenly on Sunday Morning

One of the saddest deaths in the history of Peterborough, was that of Mr. Edward Brown, which occurred on Sunday morning about seven o'clock. Deceased was in the best of health previous to Saturday evening, when about four o'clock he suddenly took a hemmorage of the lungs, and passed away early next morning.

Mr. Brown was about 49 years of age, and for the past twenty-five years had been a resident of Peterborough, where he has conducted a grocery business on George street. He was born in Port Hope, and married Miss Lucy Thornton of Providence, Rhode Island, about ten years ago. He was a most respected citizen, and had many sincere friends in this city. He was also a member of Lodge No. 155, A.F. and A.M., which society will have charge of the funeral services. Deceased was a member of St. John's church, and in politics was a staunch Conservative.

The funeral will take place from deceased's late place of residence, Stewart street, tomorrow afternoon at 2.30 o'clock.

DEATH OF MR. HALPIN

South Ward Citizen Passes Away Yesterday Morning

Sad we are to have to chronicle the death of Mr. Cornelius Halpin, who passed away at his home, corner of Lake and George streets, on Sunday morning at 12.30 o'clock. Deceased was about 35 years of age and was well known in the city. He was stricken with pneumonia on Tuesday last, and gradually became worse until yesterday morning when death claimed him as a victim. The late Mr. Halpin was unmarried, but leaves a number of relatives in this county, among whom are Michael, a brother, of George street, Thomas, also a brother, of this city, and Mrs. Wm. J. Devlin, a sister, residing in Peterborough. Miss B. Halpin, of Toronto, is a sister of deceased, and Mr. Patrick Halpin, also of Toronto, is a brother.

The funeral will take place tomorrow morning at nine o'clock, from deceased's late place of residence.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. Ackerman and Miss Ackerman are visiting in St. Catharines.

—Rev. J. C. Davidson conducted services at Belleville yesterday morning and evening.

—Mr. Jos. Bell conducted the services at the Anglican church, Campbellford, yesterday.

—Mr. G. T. Stevens, of Peterborough was in town yesterday on business.—Lindsay Post.

—Messrs. A. and H. Dawson, of Port Arthur, are visiting friends in town.

—Rev. W. B. Heeney, of Belleville, visited our city yesterday, and conducted services at St. John's church.

—Miss Ethel Rice was visiting her sister, Mrs. Shaw, in Peterborough, this week.—Millbrook Mirror.

—Miss Fanny C. Brandon, Fenelon Falls, is the guest of her cousin, Miss Mattie Robertson, Water street.

—On Friday evening the directors of the Y.M.C.A. were entertained by Mr. and Mrs. G. H. Williamson at their home on London street.

—Miss Violet B. Smith, contralto soloist of St. Andrew's church, arrived from Toronto on Saturday, and is the guest of Mrs. H. Waddell.

—Miss Eileen Fair, daughter of Robt. Fair, of Peterborough, is visiting her grandfather, Mr. W. Fair.—Millbrook Mirror.

—Mr. Peter Flood, of Ennismore, was again returned by a large majority as president of the Total Abstinence Society of that place.

—The 68th wedding anniversary of Mr. and Mrs. Wm. Howson, of Otonabee, had to be postponed on Friday last, owing to the illness of Mr. Howson.

—Mrs. C. G. Graham will receive for the first time since her marriage, on Tuesday, March 22nd, from three till six, and from eight till nine-thirty o'clock, Grand Central Block.

—The numerous friends of Mrs. James Kendry will be glad to learn that she is satisfactorily recovering from her recent illness, and that she will soon be able to leave St. Joseph's Hospital, where she has been under treatment the past fortnight.

—Miss Wright assisted by Miss Ross have charge of Messrs. Richard Hall & Sons' millinery department this season, which has been lately remodelled and is now one of the most modern millinery show rooms in Canada.

CLYDESDALE.

—This has been one of the hardest winters we have had in a number of years; there is nearly five feet of snow and the roads are in such a shape that it is impossible to travel on them.

—The stage came through from Coe Hill as far as Chandos on Wednesday. It has not been in Apsley for nearly a month on account of the roads.

—Miss Nelly and Cleary Scott have returned home from town, where they were visiting Mrs. Dennis Hobbins.

—Mr. John Menogue had the misfortune of getting stuck in the snow on Monday last, and as it was raining he had a hard time getting out, but he got out all right with a good wetting.

—Miss Laura Hawks has been spending the winter at town.

—Mr. Dennis O'Brien was the guest of Mr. Simon Mahoney on Sunday evening.

—Mr. Dennis Mahoney has returned home after spending the winter at the shanty.

—Mr. Edward Gooley, the popular foreman for the Rathbun Co., has returned home from Coe Hill, where he had a gang of men shovelling snow.

—Several of our young girls have been visiting Mr. Michael Cleary lately. Michael says he likes to see them come, as they pass away the time these long winter evenings.

—Mr. Michael O'Brien has recovered from his severe attack of la grippe.

—Mr. and Mrs. John Menogue were the guests of James Scott on Sunday evening.

—Rev. Father Phelan, of Young's Point, was in Chandos on Sunday.

—Mr. James Scott is working at Coe Hill at present, for the Rathbun Company.

ADVERTISE IN THE TIMES.

A woman worn-out, who never has to lift a hand for herself, who does not know the meaning of the word "worry"! How can it be possible? That it is possible is proved by the experience of many a woman who, because of sleeplessness, nervousness, backache and other womanly ills, becomes an utter physical wreck.

Dr. Pierce's Favorite Prescription gives new life and new strength to weak, worn-out, run-down women. It establishes regularity, dries unhealthy drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"I suffered for five years with inflammation which caused violent pain and often torture so bad at times that I could not be about to attend to my daily duties," writes Mrs. Julius C. Bell, of Bathroad, Kingston, Ont. "Life was simply misery to me and I did not know which way to turn for relief. Had tried doctors but found they did not help me. My druggist advised me to try Dr. Pierce's Favorite Prescription—eulogizing it in glowing terms. I decided to give it a trial and brought a bottle home. I am happy to say that after the use of the first bottle I felt so much improved I decided to take another and after that a third bottle. I have good reasons to be pleased, for I am to-day a well woman, work is easy and the world looks bright. I have perfect health, thanks to your medicine."

Sick women are invited to consult Dr. Pierce by letter, *free*. Address Dr. R. V. Pierce, Buffalo, N. Y.

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

Placer Mining brings quickest profits
Placer Mining insures large dividends.
A small block of charter member stock is now offered at FIFTEEN CENTS PER SHARE for the purpose of equipping the placers with a Hydraulic plant for their operation. CASH OR MONTHLY INSTALMENTS.
A clean, legitimate proposition.
Best of references will be furnished.
For prospectus and full particulars address
The Cooperative Investment and Exploration Company
311 Quincy Building - Denver, Colo.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men.

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

Japanese Have Taken Port Arthur--Combined Naval and Land Attack Made Early Saturday Morning

THROUGH THE BATTLE SMOKE

There are no developments in the naval campaign. A Times correspondent, who is with the Japanese fleet off Port Arthur, sends a wireless message that Admiral Togo maintains a close blockade. An interesting item, indicative of the adoption by Japan of everything scientific that will aid her arms, is the announcement that the navy is using an instrument invented by an Englishman that, when placed in the water, records the approach of ships at sea. Such an invention must be of immense value in the Port Arthur blockade. The explanation of the silence of the Vladivostok forts during the recent bombardment, as given by the Japanese Admiral, also shows that the Mikado's seamen are scientists as well as brave fighting men. The Japanese, knowing the method of mounting the guns in the forts, took up a position where they could train their guns on the forts while the Russian guns could not be brought to bear. That is as ingeniour in its way as any of the tricks played at Port Arthur. There is again speculation as to what has become of the Russian cruiser squadron. Vladivostok is silent and so are the Japanese, while press correspondents suggest that it is seeking a junction with the Port Arthur fleet, and it is probably trying to pass through the straits of Corea without betraying its presence. In any event it will have to fight its way into Port Arthur, and that will be no easy task.

A correspondent of The Times at Newchwang cables: "According to information received here, the reason the Vladivostok forts did not reply to the bombardment by the Japanese was because the batteries were not provided with guns. Since the bombardment parties have been working night and day to place guns in position. The bombardment destroyed the Linevitch battery. The Russian losses were slight because the batteries were deserted. The same conditions prevail at Vladivostok as at Port Arthur. The supply of provisions there is running short and the population is panic-stricken. The ice is considered the only real protection.

PRESENT WAR IS DISAPPOINTING

The Apparently Aimless Contest in the East

A GREAT LACK OF BRAINS

London Post Characterizes the Belligerent as without Intelligence

Special to The Times.

London, March 22—The Post says; Nearly everybody is wearying of this war and would like to have it called off. There is so little doing that it is an annoyance to have to keep track of it and to correct one day the erroneous impression received the day before. So far as non-combatants and spectators are concerned they are in favor of peace at any price.

If all the dispatches sent to this country by high-priced newspaper correspondents, who are naturally desirous of appearing to earn their salaries, be true, this war has been one of the fastest, bloodiest and most decisive conflicts of modern times. The Japanese navy by a few vigorous and well-directed blows not only annihilated the Russian navy but battered down the massive fortifications of Port Arthur and Dalny.

The operations of the Japanese army have been equally brilliant. One army corps landed at Possiet Bay, and cut off Vladivostock. Another landed at Chemulpo, marched 200 miles over ice-clad mountains to the Yalu, cleaned the Russians out of Corea and then marched westward to form a junction with a third column marching eastward from New Chwang. These armies are now so close to the railway that General Stessel is burning his stores and preparing to evacuate Port Arthur. Meanwhile the Czar has employed Kaiser William to sound the powers in regard to intervention.

The Russians, too, have performed marvellous exploits. Their land batteries at Port Arthur sank most of the Japanese fleet, and Makaroff soon afterward sallied forth from the harbor and finished it.

As for the Russian army, it has not only held its own against the Japanese, but it is being reinforced so rapidly that it will soon confront the Japanese with 300,000 and the Chinese with 200,000 men, and it will then overrun China, Corea and Japan and dictate a peace at Tokio.

Alas for people who anticipated the exquisite excitement of a bloody and disastrous war, all these reports were either unavoidable blunders or cunningly devised fictions, all these sunken fleets were phantom fleets and all these bloody and decisive engagements took place, if at all, in dreamland.

In England, where there is a passionate sympathy for Japan, as becomes allies, the extravagant admiration of Japanese military art which was manifested at the beginning of the war has now given place to a sort of amused pessimism. The military critics confess that what they at first regarded as profound and comprehensive strategy now appears to be nothing more than aimless tomfoolery. They are unable to discover any wise purpose or any purpose at all in the movements of the Japanese army, and just as little in the costly bombardment of land batteries by the Japanese navy.

So far as Russia is concerned it does not take a military expert to see that the campaign has been composed in equal parts of impotent threats and boasting, with a sloth and stolidity perfectly Chinese. There is not visible in the entire Russian programme a single gleam of intelligence or a single symptom of vigorous purpose. All is paralysis, hopelessness, and silly bragging.

To realize the want of enterprise and ability in this war one has only to contrast it with the Boer war, the China-Japan war, the Spanish war or the Chinese "boxer" rebellion. In each of these conflicts there was developed at once an objective point which was consistently and vigorously approached until it was reached by one side or the other. This Russia-Japan affair, on the other hand, seems to have no plan of campaign, but to be almost aimless.

GREAT BRITAIN AND THE FRENCH

Will Stand Side by Side in the Eastern Trouble

THE POLITICAL SITUATION

Some Tories Favor Immediate Election to Bring Victory to Chamberlain

Special to The Times.

London, March 22—Paris, they say, is delighted at the prospect of an Anglo-French agreement amicably settling international differences in Egypt, Newfoundland, Morocco, Siam, and West Africa. A well-informed Paris correspondent declares that it is already reflected in the balance sheets of leading establishments in the Rue de la Paix and the Grand Boulevards. The mass of the French people are none the less well content. It is an assurance for the future, and with the Frenchman the "esprit de prevoyance" is a leading characteristic. He has been seriously troubled by recent events on the Bourse. Now Now it is not likely there will be more panics. The various English football teams that visit Paris each Sunday receive an excellent welcome, which is not at all dependent upon the success of popular favorites. Thus when the Southampton club inflicted a crushing defeat upon a team of French professionals at the Parc Aux Princes, last week, the crowd was most impartial in its cheering. This Parisian exuberance is faithfully reflected in London. Indeed, the Frenchman stands at the present moment second only to the Jap in the appreciative attention given to him in the London streets.

The Kaiser is reported to be laughing at the resentment shown in the English House of Commons at the possibility of his prying into England's defences at Gibraltar during his visit to Spain, but nevertheless the resentment is some indication of the direction in which English feeling is running just now. The especial significance of the friendly Anglo-French compact now in making, is that Lord Lansdowne and M. Delcasse are following out leading public opinion in their respective countries. The feud of so many centuries would seem to be healing at last with untold possibilities to the world's peace.

NEGRO IS THE WORST CRIMINAL

Dr. Vance Says Black Men are Becoming Lawbreakers

New York, March 22—In a book just published, Rev. Joseph A. Vance, pastor of the Hyde Park Presbyterian church, asserts that the negro is the criminal element in our population, and that the black men are constantly growing worse and that more than seven-tenths of the negro law breakers are less than 30 years old. He asserts that the criminal is three times as bad in the northeast and one-half times as bad in the north west as he is in the south. As a solution of the race problem he advocates industrial education, moral and religious training.

Other subjects treated in his book "American Problems," are the labor situation and the liquor traffic. Dr Vance scores the employer upon several grounds and indicts union labor for strikes and violence. He suggests arbitration and profit-sharing as solutions of the labor disputes.

The minister declares that state ownership of breweries, distilleries and saloons would destroy the incentive for dealers to desire profits upon its sale. He asserts that the attractions of the saloon would then disappear and the use of liquor would be curtailed. He says this plan is practical because the liquor interests can be easily outvoted and would be if the opposition would decide upon a definite plan. He charges the prevalency of vice to the lack of civic conscience.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

TURBINES ON THE GREAT LAKES

Mr. C. A. Archibald Speaks of Coming Engine

IT WILL REIGN SUPREME

Canadian Steamship Companies Contracting for Propeller of the Future

Montreal, March 22—"I am of the opinion that in the course of a short space turbine engines will take the place of the present engines, especially on the inland lakes of Canada."

Mr. Charles A. Archibald, who is connected with the ship building interests of Newcastle-on-Tyne, was seen by a reporter in the Windsor on Saturday. Mr. Archibald is strongly of the opinion that the turbine is the engine of the future for the lake service. He spoke of the tests that had been made especially on the Clyde and the Tyne with the turbine, and the success that had attended the trials and expert tests.

Mr. Archibald said that there had been many enquiries among the ship building firms of Newcastle from Canada regarding the turbine engine, and there was a disposition shown to go deeply into the matter. The result of the tests on the Clyde and Tyne, and the English channel, had been so satisfactory that orders were coming in from Canada for boats to be equipped with turbine engines for use on the inland waters of the Dominion. Mr. Archibald was of the opinion that during the coming years the turbine would reign supreme on the Great Lakes.

AN OMINOUS INCIDENT

Students of South Carolina College Fly Colors of the South,

Clemson S.C., March 21— Almost a state of riot has prevailed here for the last two days owing to the action of the 500 students of Clemson college, a military school founded by Senator Tillman, in raising a huge confederate flag on the campus despite the protest of the commandant, who is a northern man.

Recently the commandant had erected on the campus a flagpole ninety-six feet high from which the flag of the United States was unfurled. The students took up a collection and had a confederate flag 14x21 feet made and Tuesday afternoon which the college band played Dixie and amid the cheers of 500 students the stars and stripes were hauled down and the stars and bars run up instead. The commandant ordered it taken down.

Immediately after release from quarters at the morning inspection, however, all the boys went to the flagpole and were raising the flag for the second time. The commandant came out of his office, caught hold of the rope and ordered it lowered. But in spite of his protestations, and his placing one boy under arrest, the flag was raised. The stars and bars floated until today, the students daring the commandant to lower the colors.

This afternoon the commandant assembled the students on the campus and said; "Boys, I don't blame you for honoring the flag your fathers and grandfathers fought for. Three cheers for the flag of the southern confederacy. But the south proved that there was only one flag in 1866. Boys, there's no use talking, we have the greatest flag on the face of the earth today. And now I want the band to play 'Dixie' while we lower the stars and bars and then to play the 'Star Spangled Banner' while we raise the stars and stripes."

STRIKE OUT UNION LABEL

Rochester, N.Y., March 21—The use of the union label has been discontinued by more than thirty of the large wholesale clothing manufacturing firms of this city. The manufacturers say that they are disgusted at the attitude of the unions and refuse to be dictated to any longer. They claim that their customers demand goods without the label on them.

Japs Cruisers and Destroyers are Keeping a Close Blockade.

RUSSIANS MORE ACTIVE

Threw Charge of Explosives on to a Japs Cruiser

London, March 22.—A number of rumors are printed in the newspapers this morning, but they must be taken with great reserve. The Daily Telegraph's Tokio correspondent cables a newspaper report of the Japanese occupation of Port Arthur, as the result of the combined sea and land attacks made on Saturday and Sunday. It is asserted that a division of Japanese landed on the Liao Tung peninsula Saturday and engaged the Russians near Port Arthur, while the fleet bombarded from Saturday evening until Sunday morning. The same correspondent reports a sharp encounter at Chyongsong, on the Yalu River, about 30 miles northeast of Wiju, in which the Russians lost 600 killed and wounded. The Daily Chronicle's Shanghai correspondent hears from New Chwang that the Japanese crossed Ta Tung Pass, 40 miles from Hai Cheng and that, a collision occurred with the Russians. Reports from Seoul and Tokio are to the effect that Marquis Ito has arranged to lend two million five hundred thousand dollars to Corea on easy terms. According to the Standard's Tien Tsin correspondent, China is appealing to the powers for an extension of a year in the period for the payment of the indemnity growing out of the Boxer trouble. The correspondent at Tien Tsin of the Daily Mail reports that Kataoka, a Japanese merchant, but Russian spy, has been assassinated by being buried alive, but that the Japanese authorities disavow any knowledge of the occurrence. The Morning Post's Hamburg correspondent says that Russia has purchased the Hamburg steamer steamer Hafis, which is now at Vladivostok for $200,000, and that the vessels name has been changed to Alexieteitracuna.

JAPAN WILL DEFEAT RUSSIA

So Said a Gentleman Recently Returned from the East

"I am firmly convinced that Japan will defeat Russia just as easily on the land as she has on the sea."

The above statement was made to The Times at the Snowdon House last night by a gentleman who has but recently returned from Yokohama, after travelling extensively through the far eastern countries, and who passed through Peterborough on his way home to New York. Continuing he said;—

"People may get the impression that I am allowing my enthusiasm to get the better of my judgment in stating that the Japs will be as easy winners on the land as they were on the sea but it is a fact. They did not go into this war on the spur of the moment, for every move that the squadrons and armies will make were planned out many months ago, and the chances of winning in the East were studied out years ago. When the first real land battle has been fought, the world will be as awe-stricken over the decisive manner in which the Japs handled the Russians on land as they were over the manner in which the Russian sea forces were annihilated.

"The victories which has Japan has gained on the sea were not due to luck, as some people seem to think, but rather to the superiority of the Jap as a seaman and fighter over the Russian in like circumstances. The Japs were rightfully named *the Yankees of the East*, for never were two nations as much alike in aggressiveness, skill, genius and constructive ability as the Americans and the Japanese. There is that same force behind the Jap under martial array, which made the American regular and volunteer, in the war with Spain, famous in every land where the game of war is known, and it is this same force that will make the Jap as much, if not more, famous in his fight to the death with the Russian bear.

"The impression seems to prevail that the great Siberian railroad will cut a great figure in aiding Russia to defeat Japan, and people seem to think that in that road the Russians have as good a thing as the Pennsylvania system in America. This is a wrong impression, for that rail road is in reality only a railroad in sections. Part of it is really up to date, but there are many sections of it, extending for miles and miles, that are practically worthless. Even should the road be in good condition the handicap at which the Russians started this war is too great to be overcome before the Japanese have gained a foothold which the bear will never succeed in displacing. According to all military strategy an army should not be over 300 miles from its base of supplies when there is but one line of railroad. The Russian army is now 6,000 miles from its base of supplies, St. Petersburg, and as Japan has control of the sea, all Russia's coal, soldiers and supplies, have to be moved into the country over the Siberian railroad.

"Japan, being in control of the sea, will have but little trouble in shipping all the soldiers and munitions of war into Corea and Manchuria that she needs, and is, in no fear of her being cut off from behind. The whole thing looks to me like a marked deck of cards, with Japan being wise to the marks."

S. O. E. MEMBERS AT LINDSAY

25th Anniversary of Westminster Lodge Celebrated

Last Tuesday evening there was a full attendance of members of Westminster Lodge, S.O.E., at their fine rooms over the Dominion Bank, to fittingly celebrate the 25th anniversary of the founding of Lindsay Lodge and to welcome about twenty Peterborough brethren headed by President Best, who were paying a fraternal visit.

The initiation of ten candidates was put through by the degree team in a manner that elicited the admiration of all. Upon the conclusion of the lodge business proper all adjourned to the Daly House, where Bro. W. Pym had prepared supper in his best style. About 50 brethren gathered around the festive board. When the cravings of the inner man were satisfied Bro. Warram, of Peterborough, was elected chairman by popular vote, after which the following toast list was honored;—

"Our King," was responded to by all singing the national anthem with right good will. Songs by Bro. F Frampton and Bro. Sharpe followed.

"Our Dominion" replied to by Bro. Hockin in an enthusiastic and patriotic address, and by Bro. Higgs, who contributed a song.

"Our Sister Societies brought Bro. J. Way, Lindsay, and Bro. Turner Peterborough, to their feet.

"Westminster Lodge" was replied to by Bro. Jas Boxall, who referred briefly to the progress made during the quarter century, and to the possibilities of the future. His address bristled with good points and witticisms, and was liberally applauded. A well rendered song by Bro. Thomas, of London Lodge, followed.

"Our Hosts," brought brief replies from the majority of the visiting brethren, and a rattling speech from Bro. Sheppard.

Chairman Warram added a few pleasant and appropriate words relative to the happy occasion that had brought about the gathering, and the excellent supper provided by Bro. Pym. The banquet was then brought to a close by singing "God Save the King" after which the brethren returned to the lodge rooms and enjoyed a game of carpet ball, Peterborough vs. Lindsay. Bro J. Rathwell, President of Westminster Lodge, acted as umpire, and reserved his decision.—Lindsay Post

ATHLETIC WORLD

BY OUR SPORTING EDITOR

HOCKEY.

Charlotte street Guild has accepted the challenge of the George street Guild, and will play as soon as they can obtain good ice.

SPRINTING.

A. J. Burns and Dave Belland will run a five-mile race on April 16th. the course will be 2 1-2 miles on the Lakefield road, and return.

FOOTBALL.

Bowmanville Football team will likely enter the Midland League this year. About 25 teams in all are expected to enter, and although several of the teams playing last year will be unable to enter, there is every prospect of next season's being a most successful one.

The following officers have been elected by the Bridgenorth Football team;

Hon President—Mr. W R. Kelly.
President—Mr. G. J. Jopling.
1st Vice-President—Mr. R. C Heard.
2nd Vice-President—Mr. J. A. Jobe.
Secretary—Mr. E. Brumwell.
Treasurer—Mr. J Jopling

The Club will enter the Midland Football League.

A meeting of the Quaker Football Club will be held in the Crown Hotel on Thursday night at 8 o'clock. All employees of the American Cereal Co. interested are requested to attend.

The Belleville Intelligencer says; "The idea of a lacrosse team for this summer is being quietly discussed in the city and it appears possible that we may have one. The formation of a Trent Valley League is being mooted, and that might not be a bad place for Belleville's team to locate. It's a pity that the young men of our city do not take more interest in Canada's national game. There is plenty of good material in town for a team of which we could be proud, if the boys would only stick together and practice—there's the difficulty. We had a good team last summer, and the boys got that tired feeling so bad that you couldn't get them off the shady side of the street, the result being that they went down before a Peterborough team, which had no license to beat them. This year things should be run differently. A hustling manager is needed. Who'll take a little trouble in the interest of sport and for the honor of the town?"

SUBMARINE SUNK

The Currie Liner Struck a Submerged Vessel

Portsmouth, March 19.—The British submarine boat No. A1 was run down and sunk off the Nab lightship yesterday by a Donald Currie Liner, and 11 persons were drowned, including Mansergh, the senior officer, engaged in submarine work. The liner passed on and reported that she had struck a torpedo.

At the time she was struck the vessel was off the lightship engaged in the manoeuvres, and was lying beneath the surface of the water seven fathoms deep, awaiting the approach of a battleship.

The boat was one of the newest of the fleet of submarine vessels, and was built from the latest models, but she had always been a bad diver

BAKERS WANT BREAD BY-LAW AMENDED

Opposition to the Isolation Hospital Registered with the Private Bills Com.--Transportation Commission Meets Here Thursday

The Town Council met in special session last night, when there were present Mayor G. M. Roger, and Aldermen W. J. Johnston, Edgcumbe, Morrison, E. F. Mason, Hicks, Scott, Frank Adams, Clinkscale, Batten and Best.

COMMUNICATIONS.

From the Salvation Army Band, asking a grant from the Council of one hundred dollars.—Received.

From E. Vinette, complaining that a number of pickets were broken off said complainant's fence by the snow plough on March 15th last, and asking that the damage be paid for.—Board of Works.

From the Best Stove Co., offering quotations for enamel street signs—Board of Works.

From T. E. Hunt and others owning property on Wescott street, complaining of the dangerous condition of the G.T.R. crossing, owing to the fact that there is no street lamp in near vicinity.—Received.

From Osias de Laplante, stating that unless the Council took some action before April 1st in giving redress to his client, Mr. P. McNamara, or damages caused him by the closing of Bethune street, between Perry and Lake streets, a writ would be issued in the affair.—Legal committee and Town Trust Commissioners.

From W. G. Morrow, secretary-treasurer of the Board of Education, enclosing the following letter from the chairman of the Board, containing information desired by the Council.

The Mayor and Council of the Town of Peterborough;

Gentlemen,—The Board of Education, in asking you to submit for the approval of the rate-payers a bylaw to provide funds for the erection of a Collegiate Institute building, deem it proper that you should be put in possession of information following;

1. Our first High School, or it was then called Grammar School, was opened in 1826. It was housed in a log structure erected on the present Central School grounds. This building became untenable in 1854, and for the next six years in an unused church. In 1860, and for several years thereafter, the High School occupied a portion of the present Central School building, then known as the Union School. As the population and attendance increased, more accomodation was needed, and for this, provision was made by enlarging one of the public School buildings and leasing it for High School purposes at an annual rental of $1100.00. Herein the Collegiate Institute classes are at present located, and so accustomed have we become to this arrangement that we are apt to overlook the important fact that for half a century at best, our High School has had no quarter of its own. This, of itself, would seem a sufficient reason for asking the rate-payers of our progressive town to supply such a long felt want as an up-to-date Collegiate Institute building.

2. The attendance at our Public Schools has also increased so that, in 1896, it was found necessary to rent the Menzie's property on George street, at an annual rental of $400.00 and taxes, amounting in all to about $550.00 per year. This building, though the best available, is not at all suited for school purposes. It has four class rooms, providing for about 160 pupils, though, according to the regulation requirements, the number should not exceed 125. Not only is the accomodation very limited, but the arrangement of walls, doors, windows, etc., is such that teaching is carried on under many inconveniences. The lease of this property will soon expire, and we are advised that no renewal thereof will be granted, even if desired by the Board. Two classes are compelled to occupy the basement. These rooms, owing to situation, ventilation and lighting, are fitted only for waiting-rooms, cloak-rooms, and play-rooms, and should not be utilized for class purposes. It will, therefore, be seen that the building now occupied by the Collegiate Institute is required for the immediate necessities of the Public School, and that were it now vacated, at least six rooms, almost the entire premises, would be at once utilized. It is, therefore, necessary to build at once either a Collegiate Institute or Public School building.

3. Furthermore, it is imperative that we secure additional accomodation if our schools are to be made more efficient and more popular, by giving special attention to the practical aspects of education, by providing for instruction in Domestic Science and Art and Manual Training—branches which are now successfully introduced in schools throughout the Province, in many places of less importance than Peterborough.

4. There are at present, for the Collegiate Institute, no play-ground separate from those of the Public Schools, and those used are quite inadequate for proper physical training and drill, and for the satisfactory conduct of games and schools sport. There is no suitable room or hall in which the pupils can be assembled for lectures or addresses. Such a room is urgently required.

5. For several years the High School Inspectors have regularly reported the building now used as very unsatisfactory for Collegiate Institute purposes. In 1902 the Inspector says; "In the matter of school accommodation, Peterborough is inferior to most of the other large centers in the Province, and it is much to be regretted that its Collegiate Institute is not now housed in a building with suitable surroundings, with so important a centre.

6. In the distribution of the High School grant the Department takes account of the character of the accommodations and equipment and it is, therefore, to the ratepayers' interest to have a building perfect in its appointments. The High School inspector's grading of our present accommodations has invariably been as follows;

I. being good, II. being fair, III. poor;

"Water-closets II., water supply II., school-grounds III., school-building III., class-rooms III., halls I., waiting-rooms III., cap-rooms I., desks II., black-boards I., lighting II., heating I., ventilation I.," and in the report for 1903, the Inspector states that he would be justified in lowering the grade of some of the above items.

7. Taking all into consideration, (a) the amount paid in rent and taxes for the Menzies property, (b) the increased High School grant, consequent upon the improved accomodation and equipment and for the Manual Training and Domestic Science classes, (c) the additional amount of fees paid by the increased number of pupils, which will be attracted by the greater efficiency of our Institute, (d) the improved value of property owing to greater educational advantages which the Town will have to offer, and (e) the low rate at which money can be borrowed, we are convinced that we are imposing no serious burden upon the tax-payer in asking for $50000.00 for the erection of a Collegiate Institute building which will be adequate for our educational requirements, and creditable to a town of such industrial and commercial importance.

8. In conclusion, the Board of Education believe that it is in the interests of education that this work should be done, and having given years of thought and consideration to the matter, are now prepared to take the responsibility of advising that a Collegiate Institute be erected at a cost not to exceed $50000.00.

Respectfully submitted on behalf of the Board of Education,

J. J. HARTLEY,
Chairman.

The communication was received.

From Mr. J H. Burnham, asking what action the Council intended to take regarding the petition of a number of property owners on Brock street.—Board of Works and Legal committee.

From W. G. Morrow, enclosing a copy of the report of the Committee of the Whole Board of Education, adopted at their last meeting, relating to the reduction of members.—Legislation committee.

ACCOUNTS.

A number of accounts were referred to the Finance committee.

WEIGHT OF BREAD.

Messrs. Bates, Lush, Williams and Stock were a deputation of bakers, seeking an amendment of the bread bylaw, granting them permission to make bread of less than four and two pounds weight, without ticketing it, so as to enable them to compete with Toronto bakers, who are shipping three and one and one-half pound loaves into the town. It appears that while our bakers can, under the bylaw, make three, and one and one-half pound loaves, they must put on each loaf a ticket containing its baker's name and its weight. Toronto bakers are not compelled to do this, and our bakers argue that they are thus placed at a disadvantage in competing with them.

Ald. Morrison remarked that the competition of city bakers was very small, and not worth consideration. Besides, the town bakers are on the same basis as those in Toronto, who have to pay freight on their bread.

Ald. Mason also thought it would cost more to make the smaller loaves and the public would have to pay the additional expense. Besides, on enquiry he had ascertained that the people dealing with him do not desire a three pound loaf instead of a four pound one.

Mr. Lush replied that his customers preferred the small loaf.

Ald. Edgecumbe said the people would rather buy a 12 cent loaf at the present time, as it comes cheaper than a three pound loaf at 10 cents; but I understand that should the bylaw not be amended to allow of a three pound loaf without ticketing, the price of bread will go up to 13 cents.

Mr. Lush—"If we make a three pound loaf the price of bread will only fluctuate one cent at one time, instead of two cents as heretofore."

Mr. Stock remarked that the bakers would make a three pound loaf whether or no, and it would be very inconsiderate of the Council to compel them to go to the expense of ticketing the bread. The people are now getting their bread too cheap; flour has risen 50 cents a hundred, and we are not charging a proportionate increase on bread. He believed the Ottawa bylaw calling for four and two pound loaves, and giving permission to make lighter loaves under the name of "fancy bread," without ticketing, would be a more satisfactory act for this town.

Mr. Bates said all the bakers in town are in favor of the change. He claimed that Toronto bread (3 and 1 1-2 lb. loaves) is being sold in town at 5 and 10 cents.

His Worship assured the deputation that the Legal committee will act on this matter without delay, in consideration of all concerned.

The matter relating to the Transportation Commission and Isolation Hospital has been unavoidably held over to tomorrow.

—Mr. T. Cavanagh, of Peterborough, was in town on Wednesday buying horses and picked up a few. —Cobourg Post.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, [illegible] Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

PETERBOROUGH, MARCH 22nd 1904

SCIENCE OR GUESSWORK

When experts disagree, who is to decide? Is there any proposition connected with medical bacteriology which is capable of absolute demonstration or is the whole thing a mere fad which will have its day like other fads and be relegated to the scientific ash heap?

People have been kept in a condition of mingled apprehension and amusement during the last few years by the warnings of the bacteriologists. "Don't eat this, it will surely kill you," shouts one. "Don't eat that; it is swarming with germs" vociferates another. "Sterilize everything you eat and drink," exclaims a third man of science. "Disinfect everything you wear or you will fall a prey to the prowling bacilli," is the warning of still another. If we had accepted the warnings of all the bacteriologists we should have starved to death, since every article of human food has been pronounced deadly by one or more of the learned gentlemen. We should not have been able to stir out of the house, since we have been warned that germs lie in wait in the streets, in public conveyances—everywhere.

One thing upon which the bacteriologists have been most emphatic is the peril of infection by inhaling the germs of tuberculosis. Upon this point the scientists have, for a wonder, agreed. With one voice they have proclaimed that consumption results from inhaling dried spores floating in the air. All their efforts for its prevention have been directed toward minimizing the possibility of infection by inhalation. Great and pleasing has been the harmony with respects to this subject. Unfortunately that harmony no longer exists.

For here comes a tremendously learned and distinguished bacteriologist, Professor Behring, of Berlin, who announces without qualification, as the result of his investigations, that nobody ever did nor ever will contract consumption through inhalation. Consumption of the lungs, he asserts, is caused by food containing tuberculosis bacilli. The lungs are attacked by the micro-organisms taken into the body by the alimentary canal. Tuberculosis bacilli do not enter the lungs in any other way whatever. On this thesis Professor Behring stakes his reputation as a bacteriologist and man of science.

Naturally—even inevitably—Professor Behring has drawn the fire of his scientific colleagues, who have opened fire upon him with all the heavy artillery of the laboratories. He is the target for those pleasant amenities which pass current among scientific gentlemen, particularly when the medical department of science is involved. He is no doubt astonished to learn from some of his former admirers that he is a mere mountebank whose opinions carry no weight. He will undoubtedly acquire still further information similar to that which is garnered by a man who is running for office. The professor is in for an unpleasant time of it.

Yet what if he is right? What assurance have we that the whole body of medical bacteriologists has not been wrong all the time with respect to consumption as it is admitted to have been in regard to malaria and yellow fever? If Professor Behring is right as to pulmonary tuberculosis does not it follow that the inhalation theory in general, involving diseases like pneumonia, diphtheria, and bronchitis, must be regarded as unsettled? Can we place any dependence upon any of the dicta laid down with such confidence by the gentlemen of the test tube and microscope during the last decade?

As was asked in the beginning,—Who is to decide when experts disagree? Is there an exact science of bacteriology or is the whole thing a series of more & less accurate guesses?

BONAPARTE'S OPINION OF RUSSIA

In spite of their early successes the Japanese may read and ponder with much profit the remarks of one Napoleon Bonaparte on the subject of making war upon Russia.

During the few years of captivity which preceded the death of the great Corsican at St. Helena he took frequent occasion in his conversation to discuss the most striking features of his career. Practically all that he had to say on these subjects has been preserved in various books written by those who were in his confidence at the time. In everything that he said relative to his Russian campaign he showed that he looked upon that enterprise as the principal mistake of his life and upon the Russians as a people whom even the greatest conquerors would better let alone. Thus—

It was making war upon Russia that ruined me.

Russia is the nation that is most likely to march to universal dominion.

I would not have declared war upon Russia but that I was persuaded she was about to declare war upon me.

In the end Russia will become mistress of the world.

But for my marriage with Marie Louise I would not have declared war upon Russia. (He expected assistance from Austria.)

I am reproached for not getting myself killed at Waterloo. I think I ought rather to have died in Russia.

Russia is in a favorable position to conquer the world.

Perhaps I did wrong to commence the Waterloo campaign. I did not think then that Russia would take a hand.

If I had had 200,000 more men in Russia, there would have been that many more lost.

After I had reached Moscow I should have died there.

These are the afterthoughts of a master of war who had conquered western Europe and whose downfall dated from his ill-starred campaign against the Russians.

The Japanese are not as yet attempting such an invasion as that undertaken by Bonaparte, but they are arrayed against the same stolid foe, the same innumerable hosts and the same enemy isolated in snow and ice during the greater part of the year.

So long as Japan confines its energies to the sea and to defensive operations on land it will not encounter the fury of the power which almost without pitched battle was able to destroy the grand army of France and to cause the throne of its military dictator to crumble. Its real perils will date from the moment that it begins offensive movements on land.

QUESTION IS SIGNIFICANT

Whether Consent to Canal Transfer is Question of Money

Paris, March 21—The case of the Republic of Colombia against the Panama Canal Company to prevent the transfer of the latter's concession to the United States was resumed Saturday before the first tribunal of the Seine. Much interest was manifested in the hearing and a number of Americans were present.

The former president of the tribunal, Maitre Du Buit, continued his argument in behalf of the company's right to sell its concession to the United States.

In closing M. Du Buit made the following significant query; "Why should we solicit your consent when your authority refused to exist? Let us speak frankly. It is a question of price, is it not? And it is best that we do not discuss that branch of the question."

M. Du Buit's statement that Colombia's consent to the transfer was "a question of price" was much commented upon.

BOYCOTT UNION GOODS

Des Moines, Iowa, March 21—The Iowa Retail Grocers' associations are in favor of boycotting union-made goods because of the decided stand labor organizations make in the legislative lobbies against the exemption bill introduced by the grocers for the purpose of protecting them from dead beats.

"I have little doubt," said Ira B. Thomas, secretary of the state association, "that at the next meeting of the Iowa Retail Grocers' Association resolutions will be introduced favoring retaliation by discriminating against union-made goods in buying. While I may question the advisability of this step, the sentiment is strong because of labor opposition to the grocers getting protection."

MACEDONIAN REFORMS

Important Declaration Issued to the Turks

Paris, March 21—The Vienna correspondent of the Petit Parisien says that Count Gulochowski, the Austrian minister of foreign affairs, has authorized the publication of the following declarations for forcing Turkey to effect reforms in Macedonia, which he made officially to the French, British and Italian ambassadors.

"The Russian and Austrian entente on the subject of Macedonia is firmer than ever. A perfect understanding exists on the subject of the modus vivendi in Macedonia and of Turkey's application of the reforms proposed by the two powers and accepted by the sultan.

"Russia and Austria are determined to use all influence and even to resort to extreme measures to obtain the fulfillments of the sultan's promises. They insist that full powers shall be accorded the heads of the international gendarmerie. The rumors that Austria is mobilizing troops are wholly unfounded."

Count Goluchowski added that he had hinted to certain powers that he would ask their aid with a view to joint action at Constantinople should the sultan remain obstinate.

This Weather Breeds Fever and Pneumonia

Thousands of Sick People are Seeking Admittance to Overcrowded Hospitals Take Warning and Keep Up Your Strength.

A tour of the hospitals in the large Canadian cities shows a surprising number suffering from different complaints brought on by the present unhealthy weather.

The winds are full of searching dampness and loaded with myriads of germs just waiting for a favorable opportunity to fly down your throat. If your vitality is low these germs are sure to break out in some malignant disease.

To avoid sickness you must keep up your strength. Increase your appetite. Get as much nourishment into the blood as possible. Store up a reserve of vigor.

How can it be done? Very easily with Ferrozone which revitalizes all the functions of the body, stimulates the formation of pure, rich blood, invigorates digestion and renews the endurance of the whole system.

You can ward of sickness and fight disease with Ferrozone because it is a food tonic that supplies building material for exhausted tissues. This assures firm, hard, flesh, strong sinew and muscle—in short Ferrozone builds up your system to such a vigorous healthy state that sickness is almost impossible.

If you feel the need of a bracing tonic, something that will awaken your dormant energies and send a stream of strong healthy blood dancing through your veins. Try Ferrozone and see how quickly you will improve and gain in weight, health and spirits.

Mrs. P. C. Spencer, of Beverly, P. O., writes; "About a year ago I was greatly run down. I suffered from severe headaches and felt so completely worn out and distressed that I thought I must have walking typhoid. My appetite was poor and my color was pallid, indicating that my blood was too thin. I found Ferrozone just what I needed. It increased my appetite and made me stronger. The feeling of languidness disappeared. After using Ferrozone a few weeks I felt like a new woman. It made me as strong and healthy. No medicine did me so much good as Ferrozone."

Far better to take Ferrozone than let your health run down. Get it to-day. Look out for substitutes and insist on having nothing but Ferrozone. Price 50c per box or six boxes for $2.50, at all druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

100,000 MEN IDLE

On Account of the New York Building Strike

New York, March 21—Twenty thousand bricklayers and laborers and about two thousand iron workers are on strike, and unless a settlement can be reached at a conference today the strike will probably spread until one hundred thousand men are involved.

The conference between the joint board or arbitration of the Union Builders' Association and the delegates of the Bricklayers' Union ended at an early hour Saturday without any agreement being reached. The employers, considering it improbable that any settlement will be arrived at at today's conference, are preparing for the strike which they think will follow.

Members of other unions, who will be out of work because they cannot proceed with building without the bricklayers, are said to be indignant that the bricklayers should tie up the whole building industry.

BURNED TO DEATH

Ridgetown Woman Meets with a Terrible Fate

St. Thomas, Ont. March 19—Mrs. Twigg, a widow, 65 years old, who occupied a small cottage at Ridgetown, near the station, was burned to death early Friday morning in a fire which destroyed her home. The fire was caused by a lamp upsetting, and the building was entirely enveloped in flames before the arrival of the fire company, who gained an entrance, and carried out the charred remains of the occupant. It is supposed that she must have been overcome with smoke and suffocated, as the body was lying on a lounge. The deceased leaves two daughters. An inquest will be held.

THROW OUT UNION LABEL

Rochester, N.Y., March 21—The use of the union label has been discontinued by more than thirty of the large wholesale clothing manufacturing firms of this city. The manufacturers say that they are disgusted at the attitude of the unions and refuse to be dictated to any longer. They claim that their customers demand goods without the label on them.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body, eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. R. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be usid for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

CHINA BUYING ARMS

DARK STATE OF AFFAIRS IN THE EAST

Large Order for Weapons Placed With Australian Firm

Washington, March 21—B. H. Warner, Jr., consul at Leipzig, Germany, writes to the state department that an Austrian company has just received an order for so large a number of small arms for the Chinese government that it will take the company several years to fill the order, even with additional forces of men to whom it has given employment.

This is only one of the many reports that have come to the state department within the past six month that both in Germany and Austria the armsmakers have been busy supplying the Chinese modern arms and ammunition.

Violates the Treaty of Pekin.

The fact has attracted attention here because it was provided in the treaty of Pekin which closed the "boxer" troubles that for a term of years the importation of arms into China should be stopped absolutely. The purpose was to reduce the capacity of the Chinese peasantry for mischief through lawless uprisings against foreigners, and as the danger is now believed to be no less than it was at the end of the "boxer" troubles the officials here view with regret this laxity in the enforcement of the treaty provision by the signatory powers.

Twenty-Five Million Reformers.

Chan Mun Shang, a prominent Chinese merchant of San Francisco, called on the president today. He is the head of the Chinese reform movement in this country. He says that 25,000,000 Chinamen are already enrolled in the movement and that the list is increasing rapidly.

Tokio, March 21—The war expense from the commencement of hostilities to the end of March are estimated at 156,000,000 yen ($78,000,000). Of the sum 108,000,000 yen is charged to the army and 48,000,000 yen to the navy. Only 50,000,000 yen has actually been disbursed, including the payment for the cruisers Nisshin and Kasuga, purchased abroad. The government plans to meet the expenditure to the end of March with 100,000,000 yen from exchequer bonds just sold, 25,000,000 yen from the special funds and 21,000,000 yen to be raised by a temporary loan.

The expenditure on account of the war from April next to December, inclusive, is estimated at 380,000,000 yen besides a special war reserve of 40,000,000 yen. The government plans to meet these expenditures by the issuance of 280,000,000 yen in exchequer bonds, 68,000,000 yen in war taxes, 7,000,000 yen balance on ordinary annual receipts and 25,000,000 yen from special fund.

JESSE ARRIES
Committed for Trial for Highway Robbery

St. Petersburg, March 19.—The Government's private information is not completely reassuring as regards China's sincerity in observing a neutral attitude. Secret advices indicate that at least a powerful party in the Chinese Government is abetting the Japanese. Although at first reluctant to credit these reports, the Russian authorities continue to receive evidence that Japanese contemplate landing on Chinese neutral territory, west of the Liao River, and 17,000 men are being held especially to await developments in that direction. Moreover, the Czar's naval experts who have been studying carefully the puzzle as to where Vice-Admiral Togo's fleet is coaling and provisioning, between its appearances off Port Arthur, who are becoming more and more convinced that it is using as a base some quiet spot on the Chinese coast. After each disappearance not a word is heard of the fleet's whereabouts until it reappears. A calculation of time and distances shows it is quite impossible for the fleet to steam to Nagasaki or Hiroshima, take on board coal and ammunition and come back.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $35 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,

JAPAN'S CONSUL TALKS OF CANADA

Is Moving from Montreal to Ottawa to Live

CLOSER TOUCH WITH PUBRIC

Anxious to Promote Good Feeling Between the Two Countries

Montreal, March 21—The Japanese Chief Consulate is to be moved from Montreal to Ottawa.

This has just been announced to Hon. T. G. Nosse, by a cable from the Japanese Government, and he will leave for Ottawa in a month's time. The order has come as a surprise to Mr. Nosse, who has been negotiating for the rent of a house, under the impression that he was to remain in Montreal. The official statement made at the Japanese Consulate here is that "The Japanese Government, recognizing increased importance of her political and commercial relations with Canada, and finding it more advantageous to keep closer relations with the Dominion Government has decided to move their representative to Ottawa, from Montreal, and a cablegram reached Hon. T. G. Nosse this morning giving him necessary instructions therein."

This step taken by the Japanese Government is apparently in response to the friendly attitude taken by the Canadian Government by sending their exhibits to the Osaka Exhibition, and the mission of the Minister of Agriculture, and lastly, the appointment of Mr. Alex Maclean as a permanent agent, to be stationed at Yokohama, Japan.

While regretting, Hon. T. G. Nosse says, to leave so many of his friends, made within the past two years of his stay in Montreal, he feels that there is a bright prospect before him of making a large number of friends among those who meet together in Ottawa, from all parts of the Dominion, especially the members of both the Senate and the House of Commons.

Hon. Mr. Nosse expressed to The Times his gratification, and that of the country he represents, in the interest taken by Canada in the present war. During the past few weeks, Mr. Nosse has received invitations to speak on the war, or failing that upon Japan as a country; from the Empire Club of Canada; the Canadian Club, of Toronto, and the Canadian Association of Insurance. Mr. Nosse felt that he was not in a position to speak frankly upon such a question, and has, therefore, declined the invitations.

Being asked if there was much excitement in Japan over the war with Russia, Mr. Nosse replied that he had that morning received a letter from Madame Nosse, written from Tokio, in which she stated her intention of returning to this country within a few weeks, saying that although the regular Japanese vessels on the Pacific have been withdrawn, to serve as transports, there are other boats being used for passenger boats. As far as excitement was concerned, she said, there was none. The streets are quiet, and not a soldier is to be seen. There are no flags and no excited crowds marching in procession through the streets. Except for the "extra" boys there is nothing to remind the public of Tokio that anything of unusual import is taking place.

"The 'extra boys' are very interesting," said Mr. Nosse. "Whenever there is any special occasion for it the papers issue small extras, just a little sheet containing the news. These newsboys wear red caps, and attract attention to their wares by ringing a sort of bell as they go through the streets, shouting the Japanese equivalent for 'extra.' Apparently the people of Japan do nto feel that there is any call at present for great confusion and excitement in connection with the war with Russia."

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly reccommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that is not permanently cure.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $79 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore..

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitble Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $3,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $0.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 200-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

CANADA WANTS WELSH TRADE

Good Opening for Our Products in Wales

HER TEEMING POPULATION

Large Emigration to Canada Promised—A Welsh Visitor Here

Montreal, March 21—"The development of trade between Canada and the Welsh ports is receiving the attention of the commercial bodies of Wales—particularly in South Wales, where the bulk of the population is to be found. There are so many things made or grown in Canada that we can use, and the trade that is now in its infancy can be extended greatly."

These were the words of Mr. Thos. H. Davies, of Cardiff, to a Times representative at his hotel today. Mr. Davies is on a tour through Canada, the reason of his trip being the glowing account given of the Dominion and her progress by the Cardiff representatives at the Congress of Chambers of Commerce of the Empire, held in this city last August. Mr. Davies desires to see for himself, and what he has already seen of Canada, causes him to admit that the report of the delegates was not overdrawn.

"South Wales, with her teeming population, is an excellent market for Canadian produce and goods," continued Mr. Davies. "When you come to consider that within a radius of 25 miles of Cardiff, the leading city of Wales—a port that ranks next to Liverpool and London in point of size and tonnage—there are considsiderably over a million mouths to be fed and bodies to be clothed, you will get some idea of the crowded condition of the country. Canadian produce finds a ready market; in fact, the only complaint is that we cannot get enough. Canadian apples and fruits find a market almost as soon as they are offered for sale, and the same remark applies to the other products that occasionally find a way to the Welsh markets. The population of South Wales is essentially a mining population; the coal valleys of the Rhonnda and other districts are studded with flourishing towns and communities, and as the miners make splendid wages, they spend their money freely. Cardiff is regarded as an excellent market for all classes of merchandise."

Mr. Davies then spoke of the movement towards Canada that has taken place, especially in the agricultural districts of Middle and North Wales. He did not think that the emigration that was now starting in would harm the country. "We are all British, you know," he added, "and the prosperity of Welshmen in Canada is just as good for the Empire as similar prosperity in Wales."

◆

ITALIAN SHOOTS FIREMAN

Murderer Gave Himself Up to Police—A Furious Mob

Port Arthur, March 19—An Italian named Donato is in jail here, on the charge of murdering J. Meechan, C.P.R. fireman, of Fort William. According to John Beyers, carpenter, who was employed in the shop, a number of young men went to Donato's fruit and confectionery store on Water street. They were intoxicated, acted disorderly and attempted to get at the money till. Mrs. Donato, who was in charge of the store at the time ordered the men out. They left, but two of them, Meechan, who was killed, and H. Laney, went back a few minutes later. They became noisy, and, it is said, used some filthy language to Mrs Donato, who screamed, and Donato, who was at the rear of the building, rushed in. He requested the men to get out, and told them that he would not have such language used in his house.

Struck the Italian.

Meechan then struck Donato in the face with his fist, and Laney ran over to assist his companion and kicked Donato a number of times in the stomach. The Italian was getting badly beaten, when three other Italians who were in the store, rushed to his assistance. They forced the men out of the store and braced themselves against the door. Meechan and Laney made desperate efforts to get in, breaking one of the windows. Donato then, acting under excitement, ran and got a revolver and fired, one shot going wild, and the second striking Meechan in the breast. It is supposed that Meechan had his arm up, endeavoring to protect himself, as the bullet went through the fleshy part of the forearm. After being shot, Meechan walked to Busquet's corner, about 50 yards distant, when he toppled over into a ditch and died in a few seconds.

Gave Himself Up.

Donato, when he perceived the enormity of the crime he had committed, ran up to the police station and met Chief of Police Nichols just as he was coming out of the station, and said, "I am the man you are after; I did the shooting'." He was taken into the station and he produced the revolver and handed it over to Nichols. It was a 32 calibre, and two shots had been fired from it. Laney, some time during the fracas, received a stab in the abdomen, inflicted, it is thought, by one of the Italians with a knife. He was taken to Dr. McCrady's office, where his wound was attended to. He is not injured seriously.

Mob Was Furious.

Shortly after the shooting, hundreds of infuriated people crowded around the store, and for some time it looked bad for the prisoner, and it was thought the mob would endeavor to raid the police station and lynch Donato. As soon as possible he was conveyed to jail. Meechan's body was taken to the morgue.

Refrigerator For Sale.

A refrigerator, in good order, for sale at a bargain. Just the thing for a private family.

SEEK TO KILL ALL BLACKS

GERMAN TROOPS WANT REVENGE FOR BUTCHERY OF WHITES

Soldiers Find Women Cut in Pieces and Nailed to Their Homes

Berlin, March 21—Letters from German Southwest Africa give details of the ghastly treatment of German settlers, 113 of whom were killed outright or tortured to death in the district of Okahandja alone, by the black Herreros tribesmen now in revolt. Women violated and dismembered and with pieces of their bodies nailed to the doors of houses, and boys mutilated and left to die slowly were frequent spectacles. The German expeditionary columns on coming in sight of a farmer's house would see the heads of its former occupants fastened to the roof.

These sights appear to have excited the rage of the soldiers. The letters express longings for revenge and a determination, one writer says, "to kill everything black."

That causes some papers to urge government to telegraph instructions to Colonel Leutwein, the governor of German Southwest Africa, that he order the soldiers to restrain themselves and conduct the war in a civilized manner. Colonel Leutwein himself comes in for criticism, as it is alleged that he left insufficient numbers of troops in the exposed districts and was misled by the temper of the natives, having frequently had at his own table chiefs who are now in rebellion and who are wearing decorations and swords of honor bestowed on them by the governor in behalf of the emperor.

The Tageblatt intimates that Colonel Leutwein will be recalled.

TWO TORY CANDIDATES

DR. VROOMAN MAY CONTEST VICTORIA WITH COL. HUGHES

Prominent Conservatives Sign Petition and Liberals are Said to be in the Game

Lindsay Watchman-Warder: During the past week there has been an interesting development in the political situation in this riding. For some time there have been rumors that the Liberals, despairing of getting a candidate to face Col. Hughes, would form an alliance with disgruntled Conservatives and support Dr. Vrooman as an independent Conservative. It looks now as though that is the strategy by which it is hoped to defeat the nominee of the Conservative convention.

At all events during the past few days a petition has been circulated in town asking Dr. Vrooman to run, and pledging him hearty support in case he does. The document is being used to find out the strength of the mutiny against the choice of the Conservative convention. Prominent on it are the names of Dougal Sinclair, J. D. Flavelle, James Boxall and J. H. Sootheran. An employe of Mr. Sinclair has been taking it around at night. Several names have been secured. It has apparently not yet been sent out into the country.

That the Conservatives who are behind this movement are in secret league with the Liberals is almost incredible, and yet that they are is made very certain by the fact that some of them have discussed the matter with the Liberal leaders and from the way in which they have at times expressed themselves. "I would rather see the Liberals win the riding that support Col. Hughes," was Mr. Boxall's remark, and he can be regarded as voicing the sentiments of those with him.

Here is further interesting evidence:—On Tuesday evening the editor of the Watchman-Warder sent the following telegram to Dr Vrooman at Ottawa;

> Prominent Liberal here positively declared you have promised to consider favorably running for the Commons in this riding, in case no Liberal is put into the field. Please say whether it is true, at my expense.

To that telegram Dr. Vrooman answered as follows;

> I can't be held responsible for what people may say.

HUBBARD DIED OF STARVATION

Party Could Not Find Sufficient Game for Food

STRENGTH PLAYED OUT

Companions Went and Secured Food but He Died Before Their Return

Quebec, March 21—A courier who left New River on the Labrador on the first of March, has reached the coast and brings a few details of the Hubbard expedition.

It appears that after making a cache of their whole stock of provisions on the North-West River the party pushed forward in the expectation that they would find sufficient game for subsistence. They, however, had very poor success, and a few days' experience showed the plan was altogether a mistake and they were compelled to retrace their steps, weakened and exhausted for want of food. When within a few hours' journey of their cache, Hubbard's strength failed him altogether, and his companions left him to try and procure food. They reached the depot and returned at once with provisions but though only gone a few hours, they were too late as they found their unfortunate companion had died in their absence. The survivors then made the best of their way to the settlements which they succeeded in reaching, as already reported, and they have since been taking the rest and treatment which they needed to recover from the exposure and frost bites from which they had suffered. It is understood that Mr. Wallace will bring the body of his unfortunate companion out to the coast, but it is a long and difficult journey, and it will be some time before he is likely to be heard from again.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever nonassessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a stock of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo, bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail. We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

HIGHCLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal

IT WILL STILL LIVE

BELIEF THAT THE BRITISH GOVERNMENT WILL STAND

The Colonies are an Immense Expense to Empire

London, March 19.—Mr. Bonar Law M.P., Under Secretary of the Board of Trade, addressing the Unionist Association of Glasgow, said he had heard ten times more in Glasgow than in London of the Government defeat. If there were any present who thought the Government nearly dead, he would not advise them to buy mourning yet, for he fully expected the Government to be alive this time next year.

Mr. John Redmond, M.P., addressing an Irish demonstration at Newcastle, said Irishmen only wanted to try the experiment of governing themselves. Despite what was said about the colonies, they were a great cost to the empire, and not to be weighed in the same balance against Ireland.

Mr. Asquith, addressing a Liberal meeting at Salisbury, declared the Chinese labor question in the Transvaal was an Imperial one, in which Canada, Australia, and New Zealand, because of the enormous sacrifices they had made, ought to have a voice. A proposal to send Chinese laborers to India would not be entertained for a moment.

Lord Cecil told a Weybridge meeting that he did not wish to see the Empire tied together. He suggested there could be no tie of Imperial interest, but a growing together.

PORTS ON THE PACIFIC.

Dr. T. Maguire. lecturing at the Royal United Service Institution on "The Pacific from a Strategic Point of View," said the importance of gaining a position on the Pacific had been recognised for many ages. The Americans were singularly unfortunate in the matter of harbors on the Pacific coast, while the whole of British Columbia was absolutely full of good harbors.

If there was a flaw in our strategic position it was that we had no harbor from Cape Horn to British Columbia. It was possible for Britain to land troops in China by the C.P.R. in half the time it could be done via Suez or the Cape. If British Columbia had been given to the United States we would have had no base whence to dominate the northern Pacific and no terminus for a railway to counteract the Siberian line. He spoke of the indifference of Japan to sea power until the bombardment of her ports in 1864.

He said that Seward's remark in 1863. "the Pacific Ocean, its coasts and islands, are destined to be the great theater in the world's affairs." and Napoleon's theory that the future would be with America and Asia, had been verified.

BOBS SPEAKS UP.

Lord Roberts spoke of the Siberian Railway, 6,000 miles long, in direct communication with St. Petersburg, and the Pacific. France, Germany, Britain and Australia were grouped in the same region. Australia one hundred years ago was almost a waste. Now it was the most flourishing continent in eastern waters. In British Columbia, Alaska and California, the same extraordinary development had been witnessed, showing the great importance of the Pacific coast, which was connected by nine railway lines from the Atlantic and a tenth was under consideration. Important as these railways are strategically, they will be surpassed by the Panama Canal.

The Morning Post, referring to the lecture, says if Canada, New Zealand and Australia cultivate naval power appreciating the importance of a concentration of force in one center of gravity, they will greatly prolong the vast possibilities of joint action by Britain and the United States. The Post agrees with Lord Roberts that the international center of gravity has shifted to the Pacific.

EASTER EGGS FOR TROOPS.

The wife of Grand Duke Constantine is preparing 17,000 Easter eggs in order to provide each soldier in the far east with a souvenir. Each egg will contain a portrait of the Emperor, a book, soap and towel, a tobacco pouch, note paper, etc., wrapped in a handkerchief, bearing pictures of Peter the Great's boat and of Russian naval victories. The eggs will be sent to the far east next week in order to arrive there in the season.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1500 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold,

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

A MARVELLOUS DISCOVERY THAT HAS DELIGHTED ALL CANADA BY ITS PROMPT CURES

The method that has proved successful through its enormous advantages of being pleasant and free from the danger of creating the drug habit employs dry air as the carrying agent.

By this method every part of the breathing apparatus is bathed by a medicated air. Germs which excite the trouble are immediately destroyed. Sore and tender spots are healed and the congested surfaces restored to normal condition.

This method of treatment is known as Catarrhozone, and has obtained a footing never attained by any other remedy for the many diseases affecting the respiratory tract.

Catarrhozone is fragrant, healing, balsamic, pleasant as the air of the pine woods and more active as a healing agent than anything hitherto discovered. It contains neither cocaine nor any of those irritating substances which really increase the congestion and add to the difficulty, instead of curing as Catarrhozone so quickly does.

MRS BINY BROWN, of Teneeape, N.B., had lung trouble and catarrh. She took cough mixtures but they made her sick. Then she used an atomizer, but after resorting without benefit to poultices and numerous other remedies, she tried Catarrhozone. "I used Catarrhozone Inhaler," she writes, "five minutes every hour, and soon recognized it was going to cure. I could feel the soothing medicated air spreading through the air passages of the throat, and it touched the sore spots in the lungs that other remedies failed to reach. Catarrhozone seemed to go just where it was needed most, and soon put a stop to my cough. It restored me to perfect health, and I am convinced that no cough, cold or catarrh can exist where Catarrhozone is used."

The complete Catarrhozone outfit contains a large bottle of inhalent, sufficient to keep recharging the inhaler for two months. It costs $1.00 and is guaranteed to cure; sample size 25c. Sold by all druggists or sent direct to your home by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

A New Industry

A new industry will shortly be established in Peterborough. Messrs. Wm. Taylor & Co. will next month commence the manufacture of cement building materials on the Hilliard farm, a portion of which they have bought.

An Acknowledgment

The Chief of the Fire Brigade begs to acknowledge with thanks the receipt of a cheque from the American Cereal Co., for $50, in recognition of the services of the Brigade in extinguishing the fire at their works on February 12th.

$50 Raised

The required $50.00 for the maintenance of the "Peterborough Cot," in St. Anthony's Hospital, Labrador, has been remitted for this year. A meeting will be held at 21 Scott street tomorrow afternoon at 3 o'clock, to discuss the proposed sending out of a bale in May next.

St. Paul's Ladie's Aid

The Ladies' Aid of St. Paul's church will hold a social this evening in the school room of the church, commencing at eight o'clock. An interesting program, consisting of musical and literary selections, is being provided. All the young people of the church are cordially invited to be in attendance.

Obituary

The death of Miss Jennie Laing, the little daughter of Mr. Eben Laing, of Norwood, occurred at Nicholls Hospital yesterday morning. Deceased was two years of age, and was brought to the city last week to undergo an operation. The remains were taken to Norwood for interment.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.

WM. PRINGLE,
Principal

A Meeting of St. Paul's Christian Endeavor

An interesting meeting of the Christain Endeavor of St. Paul's church was held last evening. Miss A. Williamson read a paper on the "Power of Little Things," and Mr. and Mrs. R. Mein sang a duet, "Scatter the Sunshine," which was well received.

Special Meeting

A special meeting of Court Peterborough, No. 29, C.O.F., was held last evening, when final arrangements were made to attend the funeral of the late Bro. Edward Brown today. Members of sister Courts are cordially invited to meet at the Foresters' Hall, Simcoe street, at 2 o'clock sharp. A. McCOLL, C.R

Eight New Books

The following new books have been added to the Public Library;—

In Search of a Siberian Klondike	Hulbert
Awakening of the East	Leroy Beaulieu
New Light on the Life of Jesus	Briggs
Imperialist	Duncan
Shipmates and Sunshine	Moore
The Yellow Van	Whiteing
Only One Woman	Fox
Denis Dent	Horning

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Local choirs are preparing special Easter music.

—There was no police court yesterday morning.

—The Never-Learn Club will meet tomorrow evening.

—Local contractors are preparing to begin spring operations.

—Farmers are complaining of the scarcity of help this spring.

—It is expected that the induction of and reception to Rev. Wm. Major, the new rector of All Saints', will take place on April 7th and 8th.

A special meeting of the Fire Brigade was held last night in the Fire Hall for the purpose of arranging for the entertainment to be held on Friday evening next.

—Major N. F. MacNachtan, 14th Midland Field Battery, of Cobourg, has compiled a Guide of Duties for the Canadian Field Artillery, which has been approved of by Lord Dundonald. It is a concise, comprehensive work, and will doubtless be of much help to this branch of the service.

—Lindsay is totally ignored in the Dominion Public Works estimates. Port Perry gets $2,200 for the dredging of the harbor, and Peterborough $6,000 for the deepening of the Otonabee river, but not one cent is voted for the improvement of the Scugog channel leading from the lower wharf, and our citizens will lower wharf, and our citizens will again have to endure a long and fatiguing walk when the water falls in midsummer and the Esturion is compelled to land about three-quarters of a mile from Kent st.—Lindsay Post.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Messrs. S. Laird and W. Cavanah spent Sunday in Toronto.

—Miss Ethel Thornton is visiting her sister, Mrs. E. W. Wood, Toronto.

—Mr. J. Fagan, of Peterborough was in town today.—Lindsay Post.

—Miss Dodds, of Beaufort, is visiting Mrs. G. W. Mulligan, for a few days.

—Mr. Captain Winslow passed away in Millbrook on Sunday, after some months' illness.

—Mrs. W. J. Thompson, of Peterborough, is the guest of her sister, Mrs. R. A. Gledhill, of 367 Huron street.—Toronto Star.

—Mr. John Lacheur, proprietor of the Queen's Hotel, Gooderham, visited Peterborough yesterday.

—Walter Eagleson, Esq., of Toronto, is spending a few days with his brother in town.

—Mr. Joseph Murphy, of Toronto, representing a plumbers' supply house of that city, is in town for a few days. He is the guest of his cousin, Mr. T. J. Begley.

—It is a pleasure to note that Mr. J. B. McWilliams has so far recovered from the effects of injuries sustained in a recent railway accident as to be able to be out again.

—Friends of Rev. O. C Elliott, formerly pastor in Park street church, but now of Belleville, were delighted to hear him in able sermons on Sunday.

DEATH OF MISS MARTHA REGAN

Passed Away at Nicholl's Hospital Saturday Evening—Operation Unsuccessful

Sad we are to have to chronicle the death of Miss Martha Regan, which occurred at Nicholls Hospital on Saturday evening. Deceased had been in poor health for some time and had been removed to the hospital to undergo an operation for appendicitis, but the latter proved unsuccessful. She was 31 years of age, and the daughter of Mrs. Emma Regan, 388 Murray street.

The funeral will take place from the family residence, tomorrow afternoon at 2 o'clock, to the Little Lake cemetery.

Obituary

Mr. O. W. Powell, father of Mr. Geo. Powell, of Peterborough, passed away at his former home in Cobourg last week. The Sentinel-Star says; "Thursday afternoon one of the oldest residents of Cobourg, Orin W. Powell, died at his residence, D'Arcy street. The deceased for years kept a meat market, even before the present market was built, he had a stall in the old wooden building that stood where Victoria Hall now stands. A few years ago he retired from business. Two years ago he and his wife celebrated their diamond wedding. He has been a consistent member of the Methodist church. Although of good old age, 84 years last Friday, he was able to be down town until a few weeks ago. He leaves a grown up family of five daughters and three sons, and his widow, who we regret to state, is also in failing health."

The funeral took place on Saturday afternoon, from the Methodist church to the Union cemetery.

TOOK HIS OWN LIFE.

AGED CITIZEN OF FIFTH WARD COMMITTS SUICIDE

Mr. Robert Davidson Passed Away Yesterday Morning at Age of Eighty-four—Despondent Over Wife's Death

On Monday morning Mr. Robert Davidson, of Brown street, Fifth Ward, committed suicide by taking paris green. Deceased had been in poor health for some time. He was born in County Down, Ireland, in 1819, and came to this country in 1845. He resided in Peterborough for a short time, and then went to the United States for a few years. On his return he again took up his abode here. He was married in 1852, and for a number of years farmed in Smith Township, retiring five years ago and taking up his residence in Ashburnham, where he has resided ever since. Deceased leaves two sons, John and Robert, of Smith and five daughters, Mrs. Hall, Mrs. Brackey and Miss Davidson, of this city, Mrs. Wm. Hall, of Fenelon Falls, and Mrs. Stormont, Ireland.

The funeral will take place tomorrow afternoon at 2.30 o'clock, from his late residence, Brown street, to the Little Lake cemetery.

ON A FLYING VISIT

Messrs. Herb. and Albert Dawson in Town Over Sunday

Mr. Herb Dawson, dry goods merchant of Port Arthur, Ont., accompanied by his brother, Mr. Albert Dawson, hardware merchant, of Fort William, Ont., arrived in town on Saturday morning, and spent Sunday with their parents, Mr. and Mrs Alexander Dawson, of the Fifth Ward.

Their many Peterborough friends will be pleased to know that the boys are doing well in their new homes. Mr. Ed. Dawson, who joined his brother, Herbert, a couple of months ago, is also doing well, and has invested in some real estate which bids fair to being a paying investment. The boys report business booming around Port Arthur and Fort William, and the prospects for a successful business year are most promising. The Messrs. Dawson were down on a buying trip to Montreal and visited Peterborough on their return to their western homes.

JIST SUM THINGS

BY SI JONES

The season's sport is now erbout ended I b'leeve, that is the hookie, curlin' and cetry, an' now the vickters kin onlie tawk of their vicktries. Of ther curlin line praps Billy Croft is the head of his class, but Mr. Will Snowden says the teatcher must hev favored him.. The long tawked of race between Harry le Brun and mi ole fren' George Graham hasn't kum off. Fact is it didn't mateerlise, so ter speke. Wun of 'em must hev dropped out but both swars it warn't he, so all i kin make of it is that they hed a mutule understandin' as twere. P'raps Mr Le's sugestshun of er swimmin' race'll be carried out, but accordin' te what I here miself, the onlie thing there practicin' fer is the sleepin' race. Onile Mr. Harry vows he'll not race if George snoars.

• • •

I was out ter the perlice coort Saterday mornin' ter see jessie air hisself, an' not withstandin' mi roomaticks, i enjoyed miself moren jess did. I've allers a hankerin fer soovenéers an' i wanted one of this grate lover of wimen—'—'s purses. So I drew out mi ole notbook an' begun ter sketch his phiz on the cover inside. Yer see I wunce thout i'd larn artin' an ever since ive did sum drawin'. I'de hearn how mi fren Meddervale hed hed an experence with the young 'Jessie. Least he'd been peppered by him afore he shook hands, so I was kareful. His pa was there an' tole him ter turn his head the other way, so I onlie got a rear view. He was young, yes, but he was ole enuff ter no better than steal a dollar an' i hope he gits a lesson larned for him, caus he won't larn wun hisself.

The Great World's Fair

Opens April 30th, and the cost will be Fifty Million Dollars. No young man or woman can afford to miss it. Will be worth a year's schooling. Round trip tickets from Peterborough to St. Louis will be on sale from April 25th at rate of $21.50, $28.70, $34.40, limited for 15 days, 30 days, and season respectively, and will permit of stop-over in Canada and at Detroit and Chicago.

Headquarters for St. Louis information will be the Grand Trunk City Office.

DEATHS

BROWN.—In Peterborough, on Sunday, March 20th, Edward Brown, in his 49th year.

The funeral will leave the family residence on Tuesday, March 22, at 2.30 o'clock, and proceed to St. John's church, thence to the Little Lake cemetery.

SETS NEW PACE

Holds Saloonkeeper Responsible for Patron's Death

Springfield, Ill, March 22—The Appellate Court, in a decision handed down yesterday holds that a saloonkeeper is liable for the death of a patron while under the influence of liquor sold by him. The case was that of Kate Algood, who was awarded $3,000 damages against William Botwinis, a saloon-keeper of this city, for the death of her husband, George Algood, who had been drinking in Botwinis' saloon, and who, while on his way home in an intoxicated condition, fell from his buggy and received injuries which resulted fatally.

Cooling Off.

The man who would sit on a cake of ice to cool off would be considered crazy. Yet it is a very common thing for a person heated by exercise to stand in a cool draught, just to cool off. This is the beginning of many a cough which ultimately involves the bronchial tract and the lungs.

For coughs in any stage there is no remedy so valuable as Dr. Pierce's Golden Medical Discovery. It cures deep-seated, obstinate coughs, bronchitis, bleeding of the lungs, and like conditions which if neglected or unskillfully treated terminate in consumption.

There is no alcohol in "Golden Medical Discovery," and it is entirely free from opium, cocaine and other narcotics.

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good."

"I took a severe cold which settled in the bronchial tubes," writes Rev. Frank Hay, of Nortonville, Jefferson Co., Kansas. "After trying medicines labeled 'Sure Cure,' almost without number, I was led to try Dr. Pierce's Golden Medical Discovery. I took two bottles and was cured, and have stayed cured.

"When I think of the great pain I had to endure, and the terrible cough I had, it seems almost a miracle that I was so soon relieved.

"That God may spare you many years and abundantly bless you is the prayer of your grateful friend."

Dr. Pierce's Common Sense Medical Adviser, containing 1008 pages, is sent *free* on receipt of stamps to pay customs and mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for it in cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

The Cooperative Investment and Exploration Company

311 Quincy Building - Denver, Colo.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

PLAN OF CAMPAIGN IS NOW DEMONSTRATED

The Forward Movement Will be in Full Swing in a Few Days

MIKADO'S ARMY IS ANXIOUS FOR THE FRAY

Interesting Outline of the Plan of Campaign--There Will Soon Be Fierce Fighting

Special to The Times.

London, March 23—Military experts in touch with Japanese authoritative circles predict that Japan's forward movement will be in full swing by the end of this month. They say that the main is now leaving the harbors at all the favorable landing points, and that the Mikado's army is eager to get to work. On the basis of a conversation with an adviser of the Tokio Government a correspondent ventures to build the following forecast of the Japanese operations.

In the first place, wherever possible, frontal attacks on intrenched positions will be avoided. If the Russians, contrary to the expectations of the Tokio authorities, determine stubbornly to contest the passage of the Yalu River the Japanese will not assail the Muscovite line there, but simply fortify and intrench their own position against an invasion of Corea. Should the Russians assemble at the Yalu in such numbers as to render the Japanese positions untenable the forces thus ousted will fall back on the line between Ping Yang and Wohson, where a desperate stand will be made.

PLANS ARE DEFENSIVE.

As a matter of fact, the Mikado's generals expect that the enemy will not only never reach Ping Yang in large numbers, but also that the Russians will never seriously undertake a campaign south of the Yalu. They declare that if the unexpected happens they will land their forces by sea in the rear of the Russians, by which means they hope to give the invaders all the entertainment they can possible desire. It can be seen from this outline that the plans of the islanders in Corea are primarily defensive. They will begin their offensive campaign elsewhere, possibly at New Chwang or a point further west on the Chinese side of the Liao River, or possibly on the coast of Corea Bay. It is not improbable that they begin operations from both of these points at once. It is quite likely that their force in the north-eastern corner of the theatre of war will devote itself to operations calculated to keep the Russians nervous about their line of communications.

If the Japanese attempt to invade Manchuria should prosper they expect the Russians on the Yalu to retreat and join General Kuropatkin's main army, in the region between Liao Yung and Mukden. In that event the Japanese intend to construct elaborate defences on the line between New Chwang and Wiju. they are thoroughly intrenched along this line they purpose to pursue the Russians northward, provided the numbers of the enemy are not too great.

WILL JUST SIT TIGHT.

If they are two great the Islanders will merely sit tight and permit their civil compatriots to build up a strong pro-Japanese civilization in the territory they have won. They hope in any case to be able to turn back the Muscovite forces. They think it highly probable that they can afford to push on to Harbin. The press informant said; "The Japanese do not need foreign strategists to tell them of the danger of going to Harbin. They realise the perils and difficulties of that adventure to the full. Nevertheless they do not regard the task as impossible. They see no reason why they should not be able to defend a line of communications five hundred miles long more easily than Russians can defend the railway that connects them with their base. It all depends on the number of men Kuropatkin is able to muster before the Mikado's army is ready to go north.

"Japanese sentiment demands a quick, radical solution of the question at issue. If that be beyond hope the nation must be content with what the army and navy can accomplish. The Czar's troops are arriving at Harbin and trickling southward. The balance of military power is hourly altering in favor of the Russians, but the Japanese are not yet anxious. Indeed they would be glad if a fair-sized Russian army were pushed down boldly to meet them on the great manoeuvring grounds of Southern Manchuria."

GRAPHIC DETAILS OF NAVAL BATTLE

The Torpedo Boat Fighting at Port Arthur

RUSSIANS VERY ACTIVE

Since Arrival of Admiral Makaroff—Terrible Scenes

Wei Hai Wei March 23— Admiral Togo has been comparatively passive since February 25, and Port Arthur has been given a respite, although the cruisers and destroyers are keeping a close blockade.

Since Admiral Makaroff's arrival at Port Arthur the defensive tactics of the Russians has become more active and their destroyers are more alert and enterprising. At 4 a.m., on the 10th inst., the first division of the Japanese destroyers' flotilla, under command of Captain Asia, while reconnoitring south-west of Liautieshan peninsula, attacked six Russian destroyers. A fierce engagement ensued, lasting fifty minutes. Early in the fight two Russian destroyers were very severely damaged. They drew off and made for Port Arthur. Others still fighting retreated until under the protection of the guns of the fort, and they also reached the harbor. The contest was so fierce at one time that the opposing vessels were within a few yards of each other. So close were two of them that the Russian blue jackets threw a charge of explosives on the bridge of the Japanese destroyer. Fortunately it did not detonate. The charge is kept as a memento. All the vessels engaged were more or less damaged. A Japanese destroyer received a shell in one of the stoke-holds, which burst a steam pipe, and scalded the stoker, and a petty officer to death. The Russian casualties are not known, but they must have been considerable. The Japanese losses were six killed and eight wounded. That the Russians were defeated in spite of superior numbers was due to the superior shooting of the Japanese combined with the fact that most of the Russian destroyers were armed with three pounders, while the Japanese were armed with six pounders. The three pounder, while perforating the hull, does less damage to the vessel and the crew than the six pounder.

JAPANESE GAVE CHASE.

Three hours later the third division of the Japanese destroyers, under Captain Tsuchiya, sighted two Russian destroyers fifteen miles south of Port Arthur. Immediately they gave chase, came up with them, and a fierce fight took place. The Russians fought with desperation, the Japanese with confidence born of past victories and superior numbers. The Russian commander was killed early in the fight. Lieut. Fant took command, only to fall, shot in both legs. The command then devolved on th sub-lieutenant, who was also killed after taking the wheel himself when the coxswain fell. This vessel was captured by the Japanese, the other escaped. One Japanese destroyer was hit at the waterline and two compartments flooded. As the quick-firing ammunition was wet the vessel was unable to participate further in the action. Her officers had a narrow escape. A lieutenant, sub-lieutenant and signalman were on the bridge when a shot from a twelve pounder struck her. One man was killed. The shell exploded, and the bridge was swept with splinters. The binnacle and engine room telegraphs were injured. The same vessel received a three pounder projectile through her hull, but no material damage was done. The davits were shot away and other marks of shot and splintered damage were seen on the funnels and deck fittings. Four days later, however, all damages had been repaired.

TERRIBLE SCENES.

On the Sazanami a man was killed while carrying an armful of ammunition. This vessel took the captured Russian in tow under a heavy fire from the shore batteries. The Russian had almost reached safety when the last officer was killed. The Japanese lieutenant who boarded her to make fast two ropes had never seen a more horrible sight. Thirty dead terribly mutilated by shell, were lying on the deck. As the Japanese approached two Russian blue jackets rushed from the conning tower and locked themselves in the cabin. Two stokers jumped overboard, and were picked up by the Japanese. These were the only survivors of a complement of fifty-five. After two hours' towing the Russian vessel sank, the men, who locked themselves in the cabin, going down with her. This fight lasted nearly an hour. Again the weakness of the Russian destroyer's armament proved fatal. The Japanese concentrated their fire first on the twelve pounder, the Russian's gun, and put it out of action early, leaving her only three three pounders against her own twelve pounders and six pounders. At times the combatants were within three hundred yard of each other. The Japanese had three killed and four wounded.

LONG RANGE BOMBARDMENT.

Again that day the Russians wer destined to suffer at the hands of th Japanese. About 9.30 a.m. the battle ships and the protected cruisers approached the Liauteishan Peninsula. The battleships took up their positions clear of the forts, and began a long range bombardment of Por Arthur, which continued nearly thre hours. They fired a hundred and fift 12-inch shells, and over one hundred and ten fell in the town. The amoun of damage is not known, but the effect of the great shells of 850 pounds weight must have been appalling. An outbreak of fire was seen, and an explosion heard which it is surmised occurred in the magazine of one of the forts. The attack was carried on in the usual thorough and scientific methods of the Japanese. It was undertaken at a range suited for the 12-inch guns and from a position unassailable by the Russians. While the battleships were firing the cruisers were in line with a tow at right angles to the line of fire. Admiral Makaroff probably will increase his strenuous efforts to get the fleet ready for sea again. It is reported he is making good progress, so unless Togo locks him up we may yet witness a fleet action at sea.

Portrait of the Emperor of Korea, Possession of Whose Kingdom is the Real Source of the Present Far Eastern Trouble

BOMBARDING OF PORT BY JAPENESE FLEET ON NIGHT OF MARCH 21-22

On the First Appearance of the Japs Torpedo Boats the Shore Batteries and Guard Ships kept up a Strenous Fire and Forced the Japs to Retreat

Special to The Times.

London, March 22.—A despatch to Reuter's Telegram Company from St. Petersburg says; Japanese torpedo boats appeared off Port Arthur at midnight of March 21 and 22, and the shore batteries and guard ships shelled them for 20 minutes. The Japanese retreated, but reappeared four hours later, when they met with the same reception. When they returned again at 6 a.m. the Japanese squadron of two divisions, composed of 4 and and 11 ships, and accompanied by 8 torpedo boats, appeared and the Russian squadron sailed out from the outer roadstead to meet them. No further details regarding the action are available. At 9 a.m. the Japanese battleships, having fired several shots at Liao Tishin and then, sheltered behind a promontory, commenced a bombardment of Port Arthur.

HAS ARBITRATION AGAIN FAILED?

Rumors Afloat re Russo-Canadian Sealing Negotiations

NEW TACTICS OF RUSSIA

Czar's Government Seeks to Reopen Settled Question

London, March 23—The Canadian Associated Press understands that there is a deadlock in the matter of the arbitration between Russia and Canada regarding compensation for sealers, and that it is unlikely that any decision will be reached.

REPORTS AT OTTAWA.

Ottawa, March 23 — Nothing is known here of the reported deadlock in the Russo-Canadian arbitration regarding the damage to which Behring Sea sealers, whose ships were seized many years ago, are entitled at the hands of the Russian Government, neither has any official intimation of a cessation of negotiations been received. The Canadian authorities now sitting in the matter in London have reported, however, that, notwithstanding that the fact of Russia's liability was settled years ago, and only the amount of damages remained to be assessed, the Russian agents have persisted in endeavoring to force a discussion upon points not contained in the protocols. They want to discuss the whole case of these fisheries, and want to ascertain how much Canada or Great Britain will accept as a solatium to relinquish all claims to fisheries in the Behring and adjacent seas.

As a prominent politician said;—"It looks as if the Russians had a private understanding with the United States and were playing their game." It is not considered impossible that this procedure by the Russian agents may tend to a cessation of negotiations.

POLES DENOUNCE RUSSIA

Bitter in Denunciation Started by Those in America

Chicago, March 23—Resolutions declaring the warmest admiration and sympathy for Japan in her fight with Russia have been adopted by the Polish organizations and the Polish press of the United States. Heroic and liberty loving, they style the people of the land of the chrysanthemum, whom they speak of as the sole representatives of civic and political freedom, as well as possessed of highly developed social and intellectual individuality, on the continent of Asia.

Over two millions strong, the Poles, as American citizens, who find the present conflict touching them nearly, in that three-fourths of the territory of Poland is at present under the rule of the Czar, deny rumors which they say are spread here and elsewhere by paid Russian agents, that they have any sympathy for either Russia or Germany.

CAN'T GET ENOUGH TO EAT

Tallest Man in the World Appeals to the Courts

Paris, March 23—The well known giant, Machnoff, at the present time the tallest man in the world, appealed to the courts to compel his manager, Sedelmeyer, to feed him sufficiently well to keep life in his body.

The manager admits that he agreed to provide proper rations for his star, but maintains that the grub furnished is amply sufficient. Here is his little list;-

Breakfast —Half a pound of Limburger cheese, pot of tea, half a pound of butter, and six or eight rolls.

Luncheon—Four or five plates of meat soup with noodles, three or four pounds of meat and a big dish of potatoes, thirty or forty, according to size.

Five o'clock tea—Three pounds of pumpernickel, a pot of coffee and a pound of bacon.

Dinner—Half a goose or three-quarters if the bird is below fifteen pounds in weight, and as much black bread as the giant wants.

Supper is "light"—Two pounds of American apples, stewed with a pound of sugar, twelve or fifteen boiled eggs, according to size, half a pound of butter, three loaves of white bread and a half or three-quarters of a pound of Limburger.

The giant finishes this ligh repast at 10.30 and at 11, he complains, "I sometimes wake hungry."

One of the judges suggested smilingly that the products of a Chicago slaughter house be turned over to the giant daily, together with the output of a Limburger cheese factory.

SAYS NAVY MAKES NATION

Italian Officer Says Britain is Right, Exampling Russia

Chicago, March 23 — Commander Lorenzo D'Adda of the royal Italian navy is at the Grand Pacific with his wife on his way to the far east under a year's leave of absence. He is the translator into Italian of Captain Mahan's celebrated book, "The Influence of Sea Power on History" He is a naval constructor and engineer by profession.

The commander said;—"Could you have a more forceful example of the determining influence of sea power than what is happening this moment in Asia! Japan, by virtue of her superiority at sea, has been able already to entrench herself in Corea, the subject of dispute, and to menace the Russians at will at any point she chooses on a line extending 600 miles from Port Arthur to Vladivostock.

"The strength of the most powerful continental army in Europe stops at the seacoast, but Great Britain, America and Japan, protected from invasion by salt water, are able to strike wherever they choose. Great armies make great powers in continental Europe, but great navies alon make world powers."

If you should take a Japanese, shave off his little moustache, let his hair grow and braid a false queue into it and then dress him in Chinese garments, how many Americans do you suppose could tell him from the original, simon pure John Chinaman?

More pertinent to the matter in hand, how many Russians do you suppose could find him out? The experiment has been made, not once or twice, but hundreds and thousands of

WEATHER NOTES

Fair and colder.

OUTLOOK BRIGHT IN OLD LAND

English Travellers Say; "Prosperous Times Ahead"

THE ELECTIONS LOOM UP

Bringing of New Blood Into Cabinet Considered an Excellent Move

Montreal, March 23—"I have been coming to Canada once a year for some time past, and I am particularly impressed on this trip with the air of prosperity and progress that appears to pervade the country. I think it must strike every visitor to the Dominion in the same way."

These were the words of Mr. A. G. S. Bompas, an English commercial man of London, to a reporter at the Windsor yesterday. Mr. Bompas reached Halifax some days ago on the SS. Parisian, and is going as far west as Winnipeg.

Speaking of conditions in the old land, Mr. Bompas said that in all lines of trade and commerce, business was picking up and there was a buoyant feeling. Political conditions were rather unsettled. A general election was looming up in the near future, and the appeal to the country could not be long delayed. The bringing in of new blood into the Cabinet had been a successful move in some ways, but the resignation of the strong man of English politics, Mr. Chamberlain, had put the Government to sore straits and a dissolution was inevitable. The Liberal party was still more or less divided under the leadership of Sir Henry Campbell-Bannerman, and was, therefore, incapable to a certain extent of taking over the reins of government.

Mr. Bompas inclined to the opinion that the next general election would give the Liberal party a majority, but the life of the Liberal administration would not be of any great length.

TRENT CANAL EXPENDITURE

The Appropriations That Have Been Made Since 1880

In answer to a question in the House of Commons on Monday, Mr. Lennox, of South Simcoe, was informed that the first appropriation for the Trent Valley Canal was made in 1879-80, work was actually commenced. The sums annually expended on the said canal are as follows;

1880	$ 561
1883	40,767
1884	120,393
1885	121,282
1886	75,108
1887	179,541
1888	114,879
1889	47,592
1890	58,644
1891	9,828
1892	4,467
1893	5,962
1894	2,412
1895	58,907
1896	392,976
1897	486,575
1898	351,273
1899	166,611
1900	334,583
1901	284,509
1902	449,075
903	523,950
	$3,825,837

The total estimated expenditure required to complete the work via Port Hope is $6,850,000, and via Trenton $6,000,000.

A CANADIAN LADY WRITES ABOUT THE PRESENT WAR

Was at Port Arthur When the Japanese Made the First Attack

Sherbrooke, March 22—Probably the first letter to arrive in this country from a resident of Port Arthur during the first days of the war was that received Thursday by Mr. W. C. Webster, of Coaticook, from his daughter, Mrs. Arthur T. Short. The writer, with her husband, went to Port Arthur some years ago.

Her letter is dated Shanghai, February 14, and is in part as follows;

"We arrived here on Saturday at 4 o'clock.

"A week ago Sunday the Japs sent transports to take away the Japanese residents, but we never believed trouble was so near, nor did the Russian officers. On Monday we knew that war was certain and spent the whole day packing our things. Luckily the ship could not go that night. At 11.30 p.m. we heard a lot of cannon firing, but supposed it to be the Russians trying their forts. We finished packing about 2 a.m. and got to bed.

"At ten a.m. Tuesday we all started for the ship (Fu Ping) where we met people, who told us the Japs had really been there the night before.

"It happened this way. The Russian fleet was lying just outside the harbor. Some war vessels came along from the direction of Dalny. They signalled the Russian fleet 'We are from Dalny.' this being done in Russian signals. Naturally the Russians thought they were some of their own ships and when they got near and inside the guard ship, they called out in perfect Russian, 'What is the news of war?' and joked a bit, then the nasty, sneaky little Japs sent the torpedoes going right and left, and then ran away. They badly disabled three of the Russian ships, the Pallada, Retvizan and Czarevitch. The Pallada can be mended, but the other two are too large for the docks. You see it was some time before the Russians began firing. There was not as many Russian officers in the forts as there ought to have been, and the navy officers were nearly all at Mrs. Stark's, at a party, so they had to hurry away rather unceremoniously and get to their ships, and then the Japanese ran away.

"We went to our ship which expected to sail every moment, but the Russians gave orders that the ship should not sail that morning.

About 11.30 the Japs came back and the fight began fast and furious, shells falling on all sides, so we decided the best place for us was our own house, as the steamer was crowded and if a shell struck her she would probably sink. We were perfectly calm and collected, but some of the women and children began to cry and got fearfully frightened.

"We got back all right from the ship, but soon a boy rushed in and told us the ship was about to go. We went back and waited all the afternoon. The firing stopped at 12 o'clock. This time the Russians being ready gave the Japs all they wanted. The ship was not allowed to go that night but the captain said to come back in the morning.

"Before returning to the house we took a look around the town. It was a most desolate looking place, hardly anyone stirring, all business places closed, the windows all smashed, cargoes scattered everywhere and smashed where a big shell had burst. In the Clarkson garden opposite the office was a big shell not yet burst.

"We went to the port and a torpedo boat came in with a lot of wounded sailors, a great number on stretchers, some in blankets, and others with their heads all done up. It was an awful sight and I shall not soon forget it.

"That night the street lights were turned off and the order was given for all lights to be turned as low as possible so as not to light the sky, or give a reflection. The next morning the weather was cold. We never had such a day.

"The following day Mr. Adams, a passenger, who was on his way to Manilla, rushed in and said the boat would leave at three o'clock sharp. We barely had time to catch the boat.

"We were just going out of the harbor when bang went three shots into the bow of our boat. The captain stopped immediately. Five Chinese passengers were badly wounded and the ship caught fire a little which was quickly put out.

"You see, the Wenchow, another English boat had tried to go out earlier, and had been stopped, the order being that if a ship goes out or comes in without first obtaining permission, the guard ship fires on her. Clarkson & Company are agents for these ships, and when the permit was given for the Fu Ping to go, Clarkson and Company should have informed the guard ship, which they neglected to do.

"The captain naturally got very angry, not knowing the reason, and started to abuse the Russians. We had to wait for a time till things were fixed up, but finally got away all right.

"We stopped at Wei Hai Wei. The ship was simply besieged with reporters, and the story of some of the passengers and the captain himself told would simply make your hair stand on end. I think each one tried to see who could tell the biggest yarn."

RUSSIANS PUZZLED

As to Where the Japanese Will Choose to Make Their First Extensive Land Operations

St. Petersburg, March 21—The following despatch from Mukden, March 20, was received today;

"Gen. Zilinski reports as follows;—

"'The troops are in good spirits and there is no sickness.

"'According to reports received from the frontier guards on the Eastern Chinese Railway, everything is in order there. At Udyini station Captain Ukasmoff, with 70 cavalrymen, has driven off a band of 100 chunchuses (Chinese bandits).

"The occupation of the Towns of Anju and Pingyang by the enemy's infantry and artillery is confirmed. An increased movement of the troops and transports on the road between Pingyang and Anju is noticeable.

"'Thirteen of the enemy's transports recently unloaded at Chinampo.

"'According to reports, there have been no preparations for landing on the coast of Caoljao or opposite Kinchow.

"'All reports appearing in foreign newspapers of the landing of Japanese troops at different points on the coast are inventions.'"

FIRING HEARD.

Yinkow, March 22— Firing was heard off the coast, apparently about six miles to the southward, this morning. There were fourteen shots between 7 and 7.30 The morning was hazy, and it was impossible to distinguish objects at sea. A ere two cruisers and five gunboats were two cruisers and give gunboats were off Kinchow yesterday.

THE VLADIVOSTOCK FLEET.

Cronstadt, March 22—The Vestnik, the leading service organ here, surmises that the Russian Vladivostock squadron has gone to attack Mororan —in Volcano Bay— and Otarunai —in Ishikari Bay—both on the Japanese Island of Yesso, where an excellent quality of coal is supplied to the Japanese warships.

RUSSIANS COMPLETELY PUZZLED

Paris, March 22—The Russian order stopping entry into Neuchwang without a permit is understood in official quarters here to be a military precaution, due to the uncertainty as to which of five places the Japanese will choose for their first extensive land operations. The five points are the Yalu River, Neuchwang, Port Arthur Vladivostock and Pigeon Bay. The Russians being unable to determine where Japan will make her main attack, are making preparations and taking precautions at all five points.

SOLICITOUS FOR COREANS

St. Petersburg, March 22 —The Foreign Office gives an absolute denial to the statement telegraphed from here that Corea is regarded as belligerent. Russia, as previously explained, holds all the acts of Corea since the declaration of her neutrality as being under Japanese duress, and unless the Corean Government formally notifies the powers that she has joined with Russia, and takes up arms, Russia will consider her neutral. But any Corean troops who actually impede Russian movements or join the enemy will be considered individual belligerents without reference to their nationality.

New York, March 23—The correspondent of the New York Tribune in London, says;—

"General Kuropatkin is not expected to reach Mukden till the end of the week. The military commanders in the field have received instructions to await an attack as reinforcements are constantly arriving by the Siberian Railway, and immense supplies of war material, especially artillery and remounts on a large scale are entering Manchuria daily. Notwithstanding fresh rumors of collision between the land forces, it is probable the Russian army will remain on the defensive till Kuropatkin assumes the entire responsibility of the military operations. Reports of the weather are less favorable."

MANUAL TRAINING COURSE

For Teachers—A New Line of Study for Teachers in Our Public Schools

A special course in Manual Training for teachers will open in the Macdonald Institute at Guelph immediately after the Easter vacation. The growing interest in this subject in our town and city schools has led to a demand for teachers, which cannot be supplied at present. The object of the above course is to give teachers a chance to prepare themselves for this newer line of work by taking a special training in practical wood work suitable for our High and Public Schools, along with lectures and reading in the theory and history of the subject. This special course will extend from April to the end of July and will be open to teachers holding at least Normal School certificates. A small fee will be required for materials, but tuition will be free. The standing thus given by the Macdonald Institute will be accepted by the Education Department as qualifying to teach this department in High and Public Schools Graduates of the present year of the Normal School or College, who have taken up Manual Training during their Normal course, will be eligible to enter at the Macdonald Institute upon completing their present courses in May.

After this year, the courses for teachers will extend from September until June and will include metal work with forge, lathe and bench, in addition to wood-work, card-board clay modelling, etc. This department will be in charge of Mr. John Evans, late Director of Manual Training under the County Councils of Leicestershire and Carnarvonshire, in England, and Wales. Mr. Evans has studied his work in England, Germany, Sweden and the United States, and is one of the leading authorities on this continent. He was selected by Professor Robertson for introducing the subject in the Macdonald Training Schools, and was transferred to Guelph on the completion of the Macdonald Institute.

Further information may be had by application to Dr. W. H. Muldrew Dean, Macdonald Institute, or to Mr. A. H. Leake, Inspector of Technical Education, 165 Delaware Avenue, Toronto.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 23 1904

EDITORIAL COMMENT

The most overworked of all platitudes is the one about accomplishing all reforms through the ballot. None of the self-constituted reformers seem to be aware that nearly all civic ills result from the misuse of the ballot, which is only potent for reform when cast by intelligent and honest men.

The Russo-Japanese conflict overshadows the little wars waged for the subjugation of alien races, but that the latter are still prosecuted relentlessly is shown by the action of the German Kaiser in sending reinforcement to southwest Africa, while Gen. Wood, of the United States army, has the honor to report that he has won another battle in the warfare continuously waged in the Philippines.

POLES DENOUNCE RUSSIA

Bitter in Denunciation Hurled by Those in America

Chicago, March 23—Resolutions declaring the warmest admiration and sympathy for Japan in her fight with Russia have been adopted by the Polish organizations and the Polish press of the United States. Heroic and liberty loving, they style the people of the land of the chrysanthemum, whom they speak of as the sole representatives of civic and political freedom, as well as possessed of highly developed social and intellectual individuality, on the continent of Asia.

Over two millions strong, the Poles, as American citizens, who find the present conflict touching them nearly, in that three-fourths of the territory of Poland is at present under the rule of the Czar, deny rumors which they say are spread here and elsewhere by paid Russian agents, that they have any sympathy for either Russia or Germany.

In language forcible and scathing, the resolutions denounce Russia as absolutely despotic, as enslaver and pillager of neighboring peoples, as brute, treacherous persecutor and insatiable gourmand, ever greedy to devour the weak by treachery and stealth.

Finland has been but another Poland in its unhappy experiences, they say.

NEW STREET LAMPS

AND REARRANGEMENT OF THE OTHERS ORDERED BY TOWN COUNCIL

A Committee Will Watch the Proceedings of Transportation Commission—Who is Opposing the Proposed Isolation Hospital? Exemption for the Y.W.C.A.

At the Council meeting held Monday night, Ald. Edgcumbe submitted the Fire, Water and Light Committee's report as follows;—

Gentlemen,—Your Fire, Water and Light Committee beg leave to report and recommend as follows—

1. That James English's resignation be accepted to take effect on 1st June next and that he be paid to that date and relieved from duty as soon after the 15th April next as he shall have handed over to his successor all material and apparatus now under his control in proper shape to the satisfaction of the Chairman of the Committee and the Chief of the Fire Brigade, and that Samuel Wainwright be appointed as his successor to give his whole time to the service of the town as may be required at a salary of $520.00 per annum, payable monthly, subject to such regulations and conditions as the Council may require, the engagement to take effect on 1st April next.

2. That the following street lamps be ordered to be placed in position by the Peterborough Light and Power Company;—Lake st., west side, at Robinson st; Douro st., north side, opposite Brown st; Stanley ave., at Stewart st; Concession st., west side, at Euclid ave; Concession st., west side, at Munro; Smith st., at east end of bridge; Water st., east side, at Antrim st; Stewart st., at Murray st; McDonnell st., at Rubidge st; McDonnell st., south side, at Downie st; London st., at Donegal st; Dublin st. at Rubidge st; Bonaccord st. at the G.T.R.; McDonnel st west of Park (top of hill); Aylmer st. at Manning ave; Homewood ave. at Babb's Lane; Park st. at end of Gilmour st; Charlotte st. west of Park; Charlotte st. at Reid st., 100 candle power; Bolivar st; Rubidge st. at Sherbrooke st., 1000 c.p.; Park st at Wolfe st; Albert st. at Alfred st; Parnell st; Wescott st. at the G.T.R; Wolfe st. at Bethune st; Sherbrooke st between Aylmer and George sts; Charlotte st. at Louis st; Hunter st. at Stewart st; Water st., north of bend; Wave st. half-way between Lock and Haggart; Elm st. west of Park; Stewart st., south end, (Baptist church, 1000 c.p.)

3. That the following changes be made in the positions of existing street lamps;—Lake st. at James st. move to west side of Lake st; corner Douro and Stewart sts., move to north side Douro st; corner Dublin and Aylmer move to south side of Dublin st; McDonnell st. at Bethune to be raised; McDonnell st. at Reid to be moved to south side or to G.T.R.; London st. at Reid to be moved to west side; Rubidge and Hunter moved south to next corner; Weller st., at Walton move to north side Weller; Reid st. at Brock, move north to centre of street; Reid st. at Simcoe, move to southwest corner; Park st. at Patterson, move west on Patterson; Benson st. at Manning, move south to high ground; Gilmour street near Babb's Lane, move west to high ground; Charlotte at Aylmer, move to G.T.R. crossing; Water st, at Auburn Dam, move south of bend; Brock st., at Bethune, to be raised; Water st., at Inverlea to be moved to northeast corner.

All of which is respectfully submitted.

The report was adopted as read.

MARKET HOURS.

Ald. Best believed that it would be in the interests of the public to do away with the restriction on dealers bargaining on the market before 11 o'clock. They go early in the morning, anyway, offer a price, and should the farmers or farmers' wives not get a better bargain from the public they fall back on the dealers after hours. He did not press a resolution in this direction, but as the market by-law apparently cannot be enforced, he thought the clause in question might as well be struck out.

TRANSPORTATION COM.

His Worship here drew attention to the fact that the Transportation Commission will meet here in the Council Chamber next Thursday at 1.30 p.m. and enquired if Council could suggest any action which would forward the Town's interests in the matter of transportation.

Ald. Morrison thought the Council would be warranted in taking any steps to furnish the commissioners with convincing data that grain could be shipped from Fort William to Montreal via the Trent Waterway much cheaper than by rail.

His Worship explained that the Commission will meet here at an earlier date than desired, still he thought the Council would be pleased with the amount of information on the lines suggested by Ald. Morrison which will be forthcoming through the efforts of the Board of Trade. The hope had been entertained that the Commissioners would not meet here till later on, say in May, which would have allowed of more time in which to collect the fullest possible data for their consideration, but as they were going through to the west, this meeting must either be held next Thursday, or postponed indefinitely.

Ald. Morrison, Best, Adams, and the Mayor were appointed a committee to watch the proceedings of the Transportation Commission, with power to take any action they may deem advisable in the Town's interests.

SPRING COMING.

Ald. Scott moved, seconded by Ald. Hatton, that the Board of Works be empowered to have the water carts painted and put in complete repair as soon as possible.—Carried

FOR THE Y.W.C.A

Ald. Edgcumbe here submitted a memorial to the Lieut.-Governor and the Ontario Legislature, petitioning that the proposed new building for the Y.W.C.A, with site, be exempted from taxation, as is the Y.M.C.A.

The Mayor and Clerk were authorized to sign and seal this petition.

ISOLATION HOSPITAL.

His Worship here pointed out that the Provincial Secretary had written him that as the clause in the Town's Bill asking legislation for power to erect an Isolation Hospital, without a vote of the people, had met with opposition, under such circumstances the Council will either have to strike out the clause, or be prepared to defend it before the Private Bills Committee.

In reply to Ald. Best His Worship said he had been given to understand that the opposition comes from St. Joseph's Hospital.

Ald. Adams understood the opposition originated with Rev. Father McColl, who apparently was not aware that the Town had been forced to provide an Isolation Hospital because of the refusal of the two hospitals to receive cases of contagious diseases. He thought if a committee were to wait upon the reverend gentleman and explain the situation all opposition would be withdrawn.

This matter was referred to the Legal Committee to deal with as they deem best.

The Council then adjourned at 11.30.

Important Time in Every Girl's Life

Is Between Fifteen and Eighteen Years of Age—How to Avoid the Dangers that Arise During this Period.

The mental activity of school life coupled with the terrible strain that must come during these years, taxes the vitality of even the strongest. A girl at this age often does not understand the physical change she is undergoing. She will in all probability be nervous and puzzled. She should have the benefit of good motherly advice and a long treatment of Ferrozone, which will supply new energy to bear her safely past the critical event. Ferrozone is the best remedy to take in early womanhood, because it contains so much nerve and blood nourishment. It corrects all derangements, cures bearing-down pains, nervousness, and prevents headaches. Ferrozone revitalizes young girls, gives them vim, bouyancy, strong nerves and healthy body. Every girl should use Ferrozone, and wise mothers will see that their daughters have the benefit of this health-giving tonic.

Mrs. W. E. Michel, of Richmond, writes;—"I can strongly recommend Ferrozone as a good tonic for young ladies. My daughter has been taking Ferrozone for the past six months and it has worked wonders for her. Before using Ferrozone she was anaemic and nervous and had no strength. But Ferrozone has built up her whole constitution and given her strength and vitality. Of all the tonics I ever used I don't think one of them compares with Ferrozone. It certainly brings health and strength to young girls more quickly."

There is no remedy half so effective as Ferrozone. A trial soon demonstrates its merit. Get Ferrozone from your druggist to-day and let it build you up. Beware of fraudulent substitutes and insist on having only Ferrozone. Price 50 cents a box, or six boxes for $2.50, by mail from the Ferrozone Company, Kingston, Ont.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $300,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. CLARKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

NEGRO IS THE WORST CRIMINAL

Dr. Vance Says Black Men are Becoming Lawbreakers

New York, March 22—In a book just published, Rev. Joseph A. Vance, pastor of the Hyde Park Presbyterian church, asserts that the negro is the criminal element in our population, and that the black men are constantly growing worse and that more than seven-tenths of the negro law breakers are less than 30 years old. He asserts that the criminal is three times as bad in the northeast and one-half times as bad in the north west as he is in the south. As a solution of the race problem he advocates industrial education, moral and religious training.

Other subjects treated in his book "American Problems," are the labor situation and the liquor traffic. Dr Vance scores the employer upon several grounds and indicts union labor for strikes and violence. He suggests arbitration and profit-sharing as solutions of the labor disputes.

The minister declares that state ownership of breweries, distilleries and saloons would destroy the incentive for dealers to desire profits upon its sale. He asserts that the attractions of the saloon would then disappear and the use of liquor would be curtailed. He says this plan is practical because the liquor interests can be easily outvoted and would be if the opposition would decide upon a definite plan. He charges the prevalency of vice to the lack of civic conscience.

SETS NEW PACE

Holds Saloonkeeper Responsible for Patron Death

Springfield, Ill. March 22—The Appellate Court, in a decision handed down yesterday holds that a saloonkeeper is liable for the death of a patron while under the influence of liquor sold by him. The case was that of Kate Algood, who was awarded $3,000 damages against William Botwinis, a saloon-keeper of this city, for the death of her husband, George Algood, who had been drinking in Botwinis' saloon, and who, while on his way home in an intoxicated condition, fell from his buggy and received injuries which resulted fatally.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $35 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

TURBINES ON THE GREAT LAKES

Mr. C. A. Archibald Speaks of Coming Engine

IT WILL REIGN SUPREME

Canadian Steamship Companies Contracting for Propeller of the Future

Montreal, March 22—"I am of the opinion that in the course of a short space turbine engines will take the place of the present engines, especially on the inland lakes of Canada.

Mr. Charles A. Archibald, who is connected with the ship building interests of Newcastle-on-Tyne, was seen by a reporter in the Windsor on Saturday. Mr. Archibald is strongly of the opinion that the turbine is the engine of the future for the lake service. He spoke of the tests that had been made especially on the Clyde and the Tyne with the turbine, and the success that had attended the trials and expert tests.

Mr. Archibald said that there had been many enquiries among the ship building firms of Newcastle from Canada regarding the turbine engine, and there was a disposition shown to go deeply into the matter. The result of the tests on the Clyde and Tyne, and the English channel, had been so satisfactory that orders were coming in from Canada for boats to be equipped with turbine engines for use on the inland waters of the Dominion. Mr. Archibald was of the opinion that during the coming years the turbine would reign supreme on the Great Lakes.

KNIFE ENDED SUFFERINGS

John Conners Relates Very Interesting Story

John Conners, a lumberman hailing from Hastings Co., who spent the past winter in a camp in Cavendish township, passed through town Saturday morning, having walked most of the way from Kinmount, owing to of the way from Kinmount, owing to the train blockade. He spent a week in that village awaiting to opening of the line, and finding that the gay life was making serious inroads on his winter's earnings he wisely made up his mind to head south and take the balance of his hard-earned cash to his family. In speaking of the deep snow, which made lumbering operations very difficult, Mr. Conners remarked incidentally that it had been a very hard season on the deer, the wolves having harassed them continually. Almost nightly the men in the shanty could hear them howling, and on two occasions they killed their quarry within half a mile of the camp, and men coming upon the fragments of the deer while on their way to work in the morning. On his way out from camp Mr. Connors donned snowshoes and struck a bee line course over the ten foot drifts in the direction of Kinmount. Passing through a little thicket he came on a poor deer that had been badly torn and mangled by its relentless enemies, and that so recently that the poor victim was still alive. Mr. Connors says he ended its sufferings by cutting its throat with his pocket knife.—Lindsay Post.

A LONG PULL

What a Kind Hearted Young Lady Found in Church

A kind-hearted young lady while attending divine service at St. John's church last Sunday received a severe shock. At the same time she was sitting behind a tall, well-dressed stranger, who had a piece of brown cotton hanging over his collar. Of course, there came to the young lady an irresistible inclination to pick off the unsightly thread. So when the congregation rose for the next hymn she carefully raised her hand and gave a little twitch, but the thread only lengthened.

Setting her teeth she pulled again, and about a foot more of the horrible thread appeared. This was getting embarrassing, but still determined, she gave another pull, and then discovered, to her dismay that she was unraveling the stranger's undershirt. Her discomfiture was evident when the gentleman turned with a kindly and inquiring look to see what was tickling his neck.

EXPECTS WAR WITH CHINA

St. Petersburg Paper Says Neutrality Will be Broken

St. Petersburg, March 22 — The Bourse Gazette says Japan's hope of aid from America is gone and she now looks only to China. With the latter's hatred of the west in view, she is trying her best to effect an alliance. The Gazette predicts that Chinese neutrality will soon be broken.

United States Ambassador McCormick has communicated to the Government the memorandum containing the assurance received by United States Minister Conger from the Chinese authorities at Pekin pledging the neutrality of China, while the neutral territory is respected by the belligerents. Satisfaction is expressed here at this new assurance of China's neutrality. The Russians deny that they have any intention of going west of the Liao region.

AN UNLIKELY RUMOR

Ottawa, March 22—It is rumored in the corridors that negotiations are under way for Premier G. W. Ross to enter the Dominion Cabinet after the session, in place of Sir Richard Cartwright.

It is pointed out that Sir Richard has so far given no indication of what seat he will contest at the next general election.

Refrigerator for Sale

A refrigerator, in good order, for sale at a bargain. Just the thing for a private family.

EVERYBODY READS THE TIMES

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $82.66 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. M. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air p into the 2?5-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $[illegible]00 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

PRESENT WAR IS DISAPPOINTING

The Apparently Aimless Contest in the East

A GREAT LACK OF BRAINS

London Post Characterizes the Belligerents as without Intelligence

Special to The Times.

London, March 22—The Post says: nearly everybody is wearying of the war and would like to have it called off. There is so little doing that it is an annoyance to have to keep track of it and to correct every day the erroneous impression received the day before. So far as non-combatants and spectators are concerned they are in favor of peace at any price.

If all the despatches sent to this country by high-priced newspaper correspondents, who are naturally desirous of appearing to earn their salaries, be true, this war has been one of the fastest, bloodiest and most decisive conflicts of modern times. The Japanese navy by a few vigorous and well-directed blows not only annihilated the Russian navy but battered down the massive fortifications of Port Arthur and Dalny.

The operations of the Japanese army have been equally brilliant. One army corps landed at Posset Bay, and cut off Vladivostock. Another landed at Chemulpo marched 200 miles over ice-clad mountains to the Yalu, cleared the Russians out of Corea and then marched westward to form a junction with a third column marching eastward from New Chwang. These armies are now so close to the railway that General Stoessel is burning his stores and preparing to evacuate Port Arthur. Meanwhile the Czar has employed Kaiser William to sound the powers in regard to intervention.

The Russians, too, have performed marvellous exploits. Their land batteries at Port Arthur sank most of the Japanese fleet, and Makaroff soon afterward sallied forth from the harbor and finished it.

As to the Russian army, it has not only held its own against the Japanese, but it is being reinforced so rapidly that it will soon confront the Japanese with 300,000 and the Chinese with 200,000 men, and it will then overrun China, Corea and Japan and dictate a peace at Tokio.

Alas for people who anticipated the exquisite excitement of a bloody and disastrous war, all these reports were either unavoidable blunders or cunningly devised fictions, all these sunken fleets were phantom fleets and all these bloody and decisive engagements took place, if at all, in dreamland.

In England, where there is a passionate sympathy for Japan as becomes allies, the extravagant admiration of Japanese military art which was manifested at the beginning of the war has now given place to a sort of amused pessimism. The military critics confess that what they at first regarded as profound and comprehensive strategy now appears to be nothing more than aimless tomfoolery. They are unable to discover any wise purpose or any purpose at all in the movements of the Japanese army, and just as little in the costly bombardment of land batteries by the Japanese navy.

So far as Russia is concerned it does not take a military expert to see that the campaign has been composed in equal parts of impotent threats and boasting, with a sloth and stolidity perfectly Chinese. There is not visible in the entire Russian programme a single gleam of intelligence or a single symptom of vigorous purpose. All is paralysis, hopelessness, and silly bragging.

To realize the want of enterprise and ability in this war one has only to contrast it with the Boer war the China-Japan war, the Spanish war or the Chinese "boxer" rebellion. In each of these conflicts there was developed at once an objective point which was consistently and vigorously approached until it was reached by one side or the other. This Russia-Japan affair, on the other hand, seems to have no plan of campaign but to be almost aimless.

GREAT BRITAIN AND THE FRENCH

Will Stand Side by Side in the Eastern Trouble

THE POLITICAL SITUATION

Some Tories Favor Immediate Election to Bring Victory to Chamberlain

Special to The Times.

London, March 22—Paris, they say, is delighted at the prospect of an Anglo-French agreement amicably settling international differences in Egypt, Newfoundland, Morocco, Siam, and West Africa. A well-informed Paris correspondent declares that it is already reflected in the balance sheets of leading establishments in the Rue de la Paix and the Grand Boulevards. The mass of the French people are none the less well content. It is an assurance for the future, and with the Frenchman the "esprit de prevoyance" is a leading characteristic. He has been seriously troubled by recent events on the Bourse. Now Now it is not likely there will be more panics. The various English football teams that visit Paris each Sunday receive an excellent welcome, which is not at all dependent upon the success of popular favorites. Thus when the Southampton club inflicted a crushing defeat upon a team of French professionals at the Parc Aux Princes last week, the crowd was most impartial in its cheering. This Parisian exuberance is faithfully reflected in London. Indeed, the Frenchman stands at the present moment second only to the Jap in the appreciative attention given to him in the London streets.

The Kaiser is reported to be laughing at the resentment shown in the English House of Commons at the possibility of his prying into England's defences at Gibraltar during his visit to Spain, but nevertheless the resentment is some indication of the direction in which English feeling is running just now. The especial significance of the friendly Anglo-French compact now in making is that Lord Lansdowne and M. Delcasse are following out leading public opinion in their respective countries. The foes of so many centuries would seem to be healing at last with untold possibilities to the world's peace.

AN OMINOUS INCIDENT

Students of South Carolina College Fly Colors of the South

Clemson, S.C., March 21.—Almost a state of riot has prevailed here for the last two days owing to the action of the 500 students of Clemson college, a military school founded by Senator Tillman in raising a huge confederate flag on the campus despite the protest of the commandant, who is a northern man.

Recently the commandant had erected on the campus a flagpole ninety-six feet high from which the flag of the United States was unfurled. The students took up a collection and had a confederate flag 11x21 feet made and Tuesday afternoon which the college band played Dixie and amid the cheers of 500 students the stars and stripes were hauled down and the stars and bars run up instead. The commandant ordered it taken down.

Immediately after release from quarters at the morning inspection, however, all the boys went to the flagpole and were raising the flag for the second time. The commandant came out of his office, caught hold of the rope and ordered it lowered. But in spite of his protestations, and his placing one boy under arrest, the flag was raised. The stars and bars floated until today, the students daring the commandant to lower the colors.

This afternoon the commandant assembled the students on the campus and said; "Boys, I don't blame you for honoring the flag your fathers and grandfathers fought for. Three cheers for the flag of the southern confederacy. But the south proved that there was only one flag in 1898. Boys there's no use talking, we have the greatest flag on the face of the earth today. And now I want the band to play 'Dixie' while we lower the stars and bars and then to play the 'Star Spangled Banner' while we raise the stars and stripes."

SUBMARINE SUNK

The Currie Liner Struck a Submerged Vessel

Portsmouth, March 19.—The British submarine boat No. A1 was run down and sunk off the Nab lightship yesterday by a Donald Currie liner, and 11 persons were drowned, including Mansergh, the senior officer, engaged in submarine work. The liner passed on and reported that she had struck a torpedo.

At the time she was struck the vessel was off the lightship engaged in the manoeuvres, and was lying beneath the surface of the water seven fathoms deep, awaiting the approach of a battleship.

The boat was one of the newest of the fleet of submarine vessels, and was built from the latest models, but she had always been a bad diver

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years: the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 6 boxes for $1.00.

Peter D. McFayden, Riverdale, P.E.I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that it w not permanently cure.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor."—London "Truth."

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:

I. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN	Secretary
ALEX J. CHAPTON,	Treasurer

Trustees

I. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

OFFICERS AND DIRECTORS

HON. W. A. SIMMONS, PRESIDENT, Formerly Collector of Customs, Port of Boston, Mass.	NEW YORK
A. EDWARD ROEBER, VICE PRESIDENT, With the John J. Mitchell Company.	NEW YORK
M. K. GOLD, SECRETARY AND TREASURER, Formerly with the Clark syndicate Companies.	NEW YORK
HOWARD E. MARSH, CONSULTING ENGINEER, Marsh Manufacturing Company.	NEW YORK
FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure the gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U.S.A.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires. Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 foot level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fue for many years.

Our Titles
